The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. SHOUSE. Mr. Speaker, I move to amend the title, line 2, by striking out the word "and" and inserting the word "of."

The question was taken, and the amendment was agreed to.

On motion of Mr. SHOUSE, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. SHOUSE. Mr. Speaker, I call up the bill S. 5221.

The SPEAKER. The Clerk will report the title.

The Clerk read as follows:

A bill (S. 5221) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

Mr. SHOUSE. Mr. Speaker, I ask unanimous consent that the first reading of the bill be dispensed with.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will read the bill for amendment.

The Clerk read as follows:

*Be it enacted, etc.*, That the Secretary of the Interior be, and he is hereby, authorized and directed to place on the pension roll, subject to the provisions and limitations of the pension laws—

The name of Cornelius A. Ahearne, late acting assistant surgeon, United States Army, and pay him a pension at the rate of $12 per month.

The name of Eliza J. Crittenden, widow of Charles Crittenden, late of Company I, Twenty-fifth Regiment Connecticut Volunteer Infantry, and pay her a pension at the rate of $20 per month in lieu of that she is now receiving.

The Clerk read the following committee amendment:

Page 1, strike out lines 6, 7, and 8.

Mr. SHOUSE. Mr. Speaker, we desire to withdraw the committee amendment, and ask that those lines be left in the bill.

The SPEAKER. The gentleman withdraws the committee amendment and asks that it be restored to the bill. Is there objection? [After a pause.] The Chair hears none.

Mr. SHOUSE. Mr. Speaker, the dollar sign is omitted in front of the figures "30," page 4, line 1, and I ask that that be corrected.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 7, strike out all of lines 3 to 6, inclusive.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 10, line 14, strike out the letter "C" and insert the letter "G."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 14, line 5, strike out the name "Adonirum" and insert "Adoniram."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 14, line 6, after the word "company," strike out the letter "A" and insert the letter "B."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Page 17, strike out all of lines 7 to 10, inclusive.

The question was taken, and the amendment was agreed to.

The Senate bill as amended was ordered to be read the third time, was read the third time, and passed.

On motion of Mr. SHOUSE, a motion to reconsider the vote by which the bill was passed was laid on the table.

## MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 5966. An act to amend an act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913.

The message also announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 562) entitled "An act to amend the act approved June 25, 1910, authorizing a Postal Savings System."

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bill:

H. R. 6099. An act to amend section 72 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911.

LEAVE OF ABSENCE.

By unanimous consent, Mr. AIKEN was granted leave of absence indefinitely on account of illness.

EXTENSION OF REMARKS.

Mr. HADLEY. Mr. Speaker, I request permission to extend my remarks in the RECORD on the question of woman suffrage by incorporating a short communication forwarded by a mass meeting of the citizens of the city of Bellingham, Wash.

The SPEAKER. The gentleman asks unanimous consent to extend his remarks in the RECORD on woman suffrage by incorporating a memorial from certain citizens of Bellingham, Wash. Is there objection?

Mr. GARRETT. Mr. Speaker, is the gentleman willing to let that go to the committee in the usual way or is there any special reason why it should be incorporated in the RECORD now?

Mr. HADLEY. Mr. Speaker, I realize that ordinarily a memorial would go through the basket, but the form of this petition as presented to me is such that I felt that I should present it on the floor, I will state to the gentleman.

Mr. GARRETT. If there is something special about it, that makes it necessary in the gentleman's opinion that it should go in——

Mr. HADLEY. This communication incorporates the request that I read it into the RECORD, and that request being made in that way I felt that I should present it in this manner.

The SPEAKER. Is there objection to the request? [After a pause.] The Chair hears none.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 20 minutes p. m.) the House adjourned to meet to-morrow, Saturday, May 13, 1916, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of White River at Batesville, Ark., with a view to determining what improvements, if any, are necessary in the interest of navigation to prevent the further caving of Ferrill Island, and the danger from such caving that might injure or impede navigation (H. Doc. No. 1109); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of South Milwaukee Harbor, Wis. (H. Doc. No. 1110); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

3. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on reexamination of Amite River and Bayou Manchac, La. (H. Doc. No. 1111); to the Committee on Rivers and Harbors and ordered to be printed.

4. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Anclote River, Fla., from the county bridge to the head of navigation (H. Doc. No. 1112); to the Committee on Rivers and Harbors and ordered to be printed.

5. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination and survey of Dorchester Bay and Neponset River, Mass., up to the Neponset highway bridge (H. Doc. No. 1113); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

6. A letter from the Rock Creek and Potomac Parkway Commission, transmitting report of Rock Creek and Potomac Parkway Commission, 1916 (H. Doc. No. 1114); to the Committee on Appropriations and ordered to be printed.

7. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of State, submitting an urgent estimate of deficiency in the appropriation for salaries, chargés d'affaires ad interim and vice consuls, for the fiscal year ending June 30, 1916 (H. Doc. No. 1115); to the Committee on Appropriations and ordered to be printed.

8. A letter from the Acting Secretary of the Treasury, transmitting a copy of a communication from the Secretary of War, submitting a supplemental estimate of appropriation required by the War Department for topographic maps, the same to be made immediately available and to remain available until expended (H. Doc. No. 1116); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. BURKE, from the Committee on the Merchant Marine and Fisheries, to which was referred the joint resolution (H. J. Res. 218) authorizing the acceptance of the gift of the Berkshire trout hatchery, Berkshire County, Mass., reported the same without amendment, accompanied by a report (No. 680), which said joint resolution and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (H. R. 13001) to provide additional assistants in the Bureau of Fisheries, Department of Commerce, for the purpose of aiding in the development of the shellfish industries, reported the same without amendment, accompanied by a report (No. 681), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. BURKE, from the Committee on the Merchant Marine and Fisheries, to which was referred the bill (S. 4760) to authorize the change of name of the steamer *Normania* to *William F. Stifel*, reported the same without amendment, accompanied by a report (No. 679), which said bill and report were referred to the Private Calendar.

Mr. MURRAY, from the Committee on Indian Affairs, to which was referred the bill (H. R. 12391) to reimburse Douglas H. Johnston, reported the same without amendment, accompanied by a report (No. 682), which said bill and report were referred to the Private Calendar.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 12472) authorizing the submission to the Court of Claims of the claims of sundry citizens of Idaho for damages sustained by reason of the overflow of their lands in connection with the construction of the reservoir to irrigate lands belonging to the Indians on the Fort Hall Reservation in Idaho, reported the same with amendment, accompanied by a report (No. 683), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. BURKE: A bill (H. R. 15617) to establish fish-hatching and fish-cultural stations in the States of Alabama, Louisiana, Florida, Georgia, South Carolina or North Carolina, Maryland or Virginia, Orégon or Washington, Texas, Oklahoma, Illinois, Washington, Arizona, New Mexico, Michigan, Idaho, Missouri, Pennsylvania, Delaware or New Jersey, and Minnesota; to the Committee on the Merchant Marine and Fisheries.

By Mr. CAREW: A bill (H. R. 15618) to amend section 4215 of the Revised Statutes of the United States, and for other purposes; to the Committee on the Merchant Marine and Fisheries.

By Mr. CARY: A bill (H. R. 15619) to set aside certain national homes for veterans of the Civil War and certain national homes for veterans of the War with Spain; to the Committee on Military Affairs.

By Mr. GOODWIN of Arkansas: A bill (H. R. 15620) to establish the National Chamber of Agriculture for the purpose of promoting the equitable distribution of farm products; to the Committee on Agriculture.

By Mr. HAYES: A bill (H. R. 15621) to provide for the purchasing of desert land by entrymen who can not make final proof; to the Committee on the Public Lands.

By Mr. SABATH: Joint resolution (H. J. Res. 223) for the relief of the victims of the *Eastland* disaster; to the Committee on Claims.

By Mr. DYER: Resolution (H. Res. 235) relating to treatment of Irish revolutionists by the British Government; to the Committee on Foreign Affairs.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 15622) granting an increase of pension to Nathan Smith; to the Committee on Invalid Pensions.

By Mr. BARKLEY: A bill (H. R. 15623) granting an increase of pension to Isaac Koon; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15624) granting an increase of pension to John Reid; to the Committee on Invalid Pensions.

By Mr. CANTRILL: A bill (H. R. 15625) granting an increase of pension to W. B. Newton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15626) granting an increase of pension to Jesse Lunsford; to the Committee on Invalid Pensions.

By Mr. CARAWAY: A bill (H. R. 15627) granting an increase of pension to George Binnix; to the Committee on Invalid Pensions.

By Mr. CONRY: A bill (H. R. 15628) granting a pension to Mary J. Burns; to the Committee on Pensions.

By Mr. COX: A bill (H. R. 15629) granting a pension to George Payton; to the Committee on Invalid Pensions.

By Mr. HAUGEN: A bill (H. R. 15630) granting a pension to Mary E. Cole; to the Committee on Invalid Pensions.

By Mr. HENSLEY: A bill (H. R. 15631) granting an increase of pension to Charles A. Herter; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15632) granting an increase of pension to Frederick Schwartz; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: A bill (H. R. 15633) granting a pension to Douglas D. Powell; to the Committee on Pensions.

By Mr. HOPWOOD: A bill (H. R. 15634) granting a pension to Elizabeth Beal, widow of Eli Beal; to the Committee on Pensions.

By Mr. LINTHICUM: A bill (H. R. 15635) for the relief of the Eastern Transportation Co., of Baltimore, Md.; to the Committee on Claims.

By Mr. OAKEY: A bill (H. R. 15636) granting an increase of pension to Mary Duffy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15637) granting an increase of pension to Marion G. Scott; to the Committee on Invalid Pensions.

By Mr. OLNEY: A bill (H. R. 15638) to remove the charge of desertion from the record of Sanford K. Knox; to the Committee on Military Affairs.

By Mr. POWERS: A bill (H. R. 15639) for the relief of Emily J. Mullins; to the Committee on Claims.

By Mr. PRICE: A bill (H. R. 15640) granting a pension to Julian Edmond; to the Committee on Pensions.

By Mr. NEELY: A bill (H. R. 15641) granting a pension to Joseph Miley; to the Committee on Invalid Pensions.

By Mr. RAYBURN: A bill (H. R. 15642) for the relief of the estate of Swinney A. Magnum; to the Committee on Claims.

By Mr. RUBEY: A bill (H. R. 15643) for the relief of J. C. Likes; to the Committee on Claims.

Also, a bill (H. R. 15644) for the relief of James S. Risher; to the Committee on Military Affairs.

By Mr. RUSSELL of Missouri: A bill (H. R. 15645) granting an increase of pension to William A. Swearingin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15646) granting a pension to David Harris; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15647) granting a pension to Reuben Barnard; to the Committee on Invalid Pensions.

By Mr. SHERWOOD: A bill (H. R. 15648) granting a pension to Henry O. Weckle; to the Committee on Pensions.

By Mr. SHOUSE: A bill (H. R. 15649) granting an increase of pension to Brother Buis; to the Committee on Pensions.

By Mr. STEDMAN: A bill (H. R. 15650) for the relief of Levi R. Whitted; to the Committee on Claims.

By Mr. VAN DYKE: A bill (H. R. 15651) granting an increase of pension to Mary L. King; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By the SPEAKER (by request): Memorial of the Wisconsin Conference of the Evangelical Association, relative to warning American citizens to keep off armed merchant vessels; to the Committee on Foreign Affairs.

Also (by request), memorial of mass meeting of Apollo, Pa., favoring the adoption of an amendment to the Constitution forbidding polygamy in the United States; to the Committee on the Judiciary.

Also (by request), petition of officers of the Porto Rico Regiment of Infantry in re Porto Rican bill; to the Committee on Insular Affairs.

By Mr. BOOHER: Petition of M. L. Duty and 25 other citizens of Halls, Mo., against the enforcement of the regulations concerning migratory birds; to the Committee on Agriculture.

Also, petition of C. W. Willetts and 23 other citizens of St. Joseph, against the Taylor system and asking for the passage of House bill 8665; to the Committee on Labor.

Also, petition of L. F. Gerding, O. H. Leake, and 35 other citizens of St. Joseph, Mo., against the passage of House bill 6468 and Senate bill 491; to the Committee on the Post Office and Post Roads.

By Mr. CAREW: Petition of Amateur Athletic Union of the United States in re national playground and stadium; to the Committee on Appropriations.

By Mr. CURRY: Petition of 25 citizens of Lodi, Cal., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. DALE of New York: Memorial of 300 citizens of Butte, Mont., favoring passage of suffrage amendment; to the Committee on the Judiciary.

Also, memorial of convention of milk producers and other dairy interests of the United States, relative to contagion among dairy herds; to the Committee on Agriculture.

By Mr. DAVIS of Texas: Memorial of thirty-first annual encampment of the Grand Army of the Republic, Department of Texas, indorsing Senate bill 1161; to the Committee on Invalid Pensions.

Also, memorials of sundry organizations of Texas, indorsing the Gillett bill; to the Committee on Alcoholic Liquor Traffic.

Also, petitions of sundry citizens and firms of Texas, opposing the passage of the Stevens bill; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Immanuel's Lutheran Church, in reference to our foreign relations and opposing war with Germany; to the Committee on Foreign Affairs.

By Mr. DILLON: Petition of citizens of South Dakota, against war with Germany; to the Committee on Foreign Affairs.

By Mr. DYER: Petition of the Engineers' Club of St. Louis, Mo., favoring Senate bill 4874, relative to engineering experiment stations; to the Committee on Agriculture.

Also, petition of W. G. Mueller Produce Co., of St. Louis, Mo., relative to House bills 14945 and 14976, as to measure for strawberries; to the Committee on Coinage, Weights, and Measures.

By Mr. ESCH: Memorial of Wisconsin Antituberculosis Association, against Senate joint resolution 120, relative to members of Public Health Service; to the Committee on Interstate and Foreign Commerce.

Also, petition of A. G. Leindorff and 14 others of Prairie du Sac, Wis., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petition of Lewis A. Young and 14 others of Prairie du Sac, Wis., against appropriations for sectarian schools; to the Committee on Indian Affairs.

By Mr. FLYNN: Memorial of convention of milk producers and other dairy interests of the United States, relative to contagious abortion among the dairy herds; to the Committee on Agriculture.

By Mr. FULLER: Petition of the Omar Machine Co., of Chicago, Ill., favoring 1-cent letter postage; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of Streator, Ill., against Taylor system in Government shops; to the Committee on Labor.

By Mr. GLYNN: Petition of Harry E. Vail and others, of Torrington, Conn., favoring House bill 8665, against Taylor system; to the Committee on Labor.

By Mr. HADLEY: Petition of sundry citizens of the State of Washington, opposing passage of House bill 652; to the Committee on the District of Columbia.

Also, petition of sundry citizens of the State of Washington, opposing House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

By Mr. HAYES: Petition of citizens of Soledad, Cal., favoring national prohibition; to the Committee on the Judiciary.

By Mr. HENSLEY: Petition of Charles R. Pratt, of Flat River, Mo., favoring exemption of telephone companies from operations and provisions of House bill 563; to the Committee on Interstate and Foreign Commerce.

By Mr. HOPWOOD: Petition of Christian Endeavor Society of Carmichaels Presbyterian Church, against intoxicating liquors in Porto Rico; to the Committee on Insular Affairs.

By Mr. KING: Petition of William J. Ruff and 200 other citizens of Quincy, Ill., protesting against further appropriation of public funds for the enforcement of the migratory-bird law; to the Committee on Agriculture.

Also, petition signed by M. O. King and divers citizens of Williamsfield, Ill., protesting against the passage of House bills 6468 and 491; to the Committee on the Post Office and Post Roads.

By Mr. KINKAID: Petition of merchants in the sixth congressional district of Nebraska, favoring taxing mail-order houses; to the Committee on Ways and Means.

By Mr. LOUD: Petition of Rev. A. D. Fample and Methodist Episcopal Church of Turner, Mich., favoring national prohibition; to the Committee on the Judiciary.

By Mr. McDERMOTT: Petition of Messrs. M. J. Doyle, L. O. Leonard, James Upton, Daniel Russell, and others, all of Chicago, Ill., favoring the passage of the Lobeck classification bill; to the Committee on Agriculture.

By Mr. McFADDEN: Memorial of Presbyterian Church and Sunday School, Woman's Christian Temperance Union, and Methodist Episcopal Church, all of Monroeton, Pa., and Presbyterian Church of Powell, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. NEELY: Papers to accompany House bill for the relief of Joseph Miley; to the Committee on Invalid Pensions.

By Mr. OAKEY (by request): Petition of citizens of Connecticut who are members of organized labor, in favor of House bill 8665, the Tavenner bill, to prohibit and prevent the introduction of the Taylor and other similar systems in Government workshops; to the Committee on Labor.

By Mr. PRICE: Petitions of sundry business men of Maryland, favoring tax on mail-order houses; to the Committee on Ways and Means.

By Mr. ROWLAND: Petition of citizens of Bradford, Pa., favoring national prohibition; to the Committee on the Judiciary.

By Mr. SLOAN: Petition of Nebraska Frauenbund, Lincoln, Nebr., favoring Emerson resolution, relative to shipments of milk; to the Committee on Foreign Affairs.

By Mr. SMITH of Michigan: Papers to accompany House bill 11525, for relief of George R. Rosenbrook; to the Committee on Invalid Pensions.

## SENATE.

### SATURDAY, *May 13, 1916.*

*(Legislative day of Tuesday, May 9, 1916.)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Gore | Lea, Tenn. | Smith, Ga. |
| Bankhead | Gronna | McLean | Smith, S. C. |
| Brady | Hardwick | Martine, N. J. | Smoot |
| Brandegee | Hitchcock | Myers | Stone |
| Catron | Hollis | Nelson | Sutherland |
| Chamberlain | Husting | Norris | Swanson |
| Chilton | James | Overman | Taggart |
| Clapp | Johnson, Me. | Page | Thompson |
| Clarke, Ark. | Johnson, S. Dak. | Phelan | Tillman |
| Colt | Jones | Ransdell | Townsend |
| Culberson | Kenyon | Shafroth | Vardaman |
| Curtis | Kern | Sheppard | Warren |
| Dillingham | La Follette | Sherman | Works |
| Gallinger | Lane | Simmons | |

Mr. CHILTON. I wish to announce the absence of my colleague [Mr. GOFF] on account of illness. I will let this announcement stand for the day.

Mr. MARTINE of New Jersey. I should like to state that the Senator from Mississippi [Mr. WILLIAMS] is unavoidably detained. He is paired with the Senator from Pennsylvania [Mr. PENROSE].

Mr. CURTIS. I desire to announce the absence of the Senator from Maine [Mr. BURLEIGH] because of the death of Mrs. Burleigh. I am confident that on the death of his wife the Senator from Maine has the sincere sympathy of all his associates here.

The VICE PRESIDENT. Fifty-five Senators have answered to their names. A quorum is present.

#### HEARINGS BEFORE THE COMMITTEE ON TERRITORIES.

Mr. KENYON. Mr. President——

Mr. PITTMAN. Mr. President, I should like to be permitted to submit and have passed a resolution authorizing the Committee on Territories to employ a stenographer to take down hearings before that committee. Will the Senator from Iowa yield to me for a moment?

Mr. KENYON. I yield for that purpose.

Mr. PITTMAN submitted the following resolution (S. Res. 192), which was read:

*Resolved*, That the Committee on Territories or any subcommittee thereof be, and hereby is, authorized during the Sixty-fourth Congress to send for persons, books, and papers, to administer oaths, and to employ a stenographer, at a cost not exceeding $1 per printed page, to report such hearings as have been had or may be had in connection with any subject which may be pending before said committee, the expenses thereof to be paid out of the contingent fund of the Senate, and that the committee or any subcommittee thereof may sit during the sessions or recess of the Senate.

The VICE PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. PITTMAN. I ask unanimous consent for the present consideration of the resolution.

The VICE PRESIDENT. The resolution goes to the Committee to Audit and Control the Contingent Expenses of the Senate under the statute. The statute so provides.

Mr. PITTMAN. Very well. I thank the Senator from Iowa.

#### RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

[Mr. KENYON resumed and concluded the speech begun by him on Tuesday. The entire speech is printed in the Senate proceedings of May 9, 1916.]

Mr. CURTIS. Mr. President, the other day, I understand, the Senator from Colorado [Mr. THOMAS] asked some question in reference to an amendment which was put in this bill upon my motion. It will be found on page 54, and is as follows:

State of Kansas, floods in: Investigate the flood periods of the waters of the State of Kansas by an examination of the territory and from data already gathered by governmental, State, and private efforts by the Board of Engineers of the War Department, and to devise some general plan which will best guard against the recurrence of such floods and diminish their damaging effects upon the lower valleys of the Kansas, Arkansas, Missouri, and the Mississippi Rivers.

That amendment, as I stated the other day, would have been offered to another measure if it had not been limited to the lower Mississippi and to certain parts of California by another legislative body.

This amendment is not in the interest of commerce in our State, and yet I judge from some of the remarks made by the Senator from Iowa [Mr. KENYON] that probably the Kansas River would be more entitled to an appropriation for navigation and for commerce than many of the rivers referred to by him and many of the projects that are covered by this bill.

I would prefer to have this amendment embodied in a broad and comprehensive measure drawn for the purpose of having the flood question studied in the different sections of the country, but I offered the amendment to the pending bill because I thought it was the best way to get it before Congress.

I wish just in a few minutes to point out some of the reasons for the amendment, or, rather, I want to call the attention of the Senate to what has been done by the State in securing data on the flood question.

As was said the other day in the debate upon this question, the senior Senator from Nevada [Mr. NEWLANDS] visited our State at the request of the governor and other citizens. There was a convention called in Topeka to discuss this question, and the Senator was invited to attend that convention and address the people who were interested. As a result of that meeting a committee was appointed to look into this subject. One of the leading engineers of the city of Topeka, who is employed by the State public-utilities commission, was put in charge, and it was thought advisable to consult an engineer from an adjoining State who had had large experience in matters of this kind.

I want now to read the letter of the engineer of the city of Topeka to Mr. Wanzer on this question, and then to read Mr. Wanzer's letter recommending this amendment:

MY DEAR MR. WANZER: In accordance with our conversation of even date, I am inclosing herewith a list of the gauging stations which have been maintained by the United States Geological Survey in the State

of Kansas during the years as shown. This list has been furnished to me by Prof. C. C. Williams, of the State university.

As I understand the situation to-day, no gauging stations are now being maintained by the United States Geological Survey in this State, while there are numerous stations maintained by this bureau in other States, where the problems involved are of much less relative importance than those at stake here in Kansas.

It seems to me that the best plan would be to make some arrangement with the Geological Survey for the establishment or resumption of a number of these stations, the location and operation of the stations to be made and carried on after a conference with the engineering committee of our Flood and Water Congress.

It is absolutely necessary that we have these stations established at the controlling points on our important streams, in order that we may have the necessary basic data to work from when we come to a full study of our flood-control problems; but it seems to me that these locations should only be made after a very complete study of our watersheds. * * *

Very truly, yours, T. J. STRICKLER, *Engineer.*

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER (Mr. HUSTING in the chair). Does the Senator from Kansas yield to the Senator from Colorado?

Mr. CURTIS. Certainly.

Mr. THOMAS. I merely wish to say to the Senator that the query which I propounded to the Senator from Louisiana [Mr. RANSDELL] regarding that amendment was prompted by his statement that every scheme or enterprise or proposition covered by the bill had been recommended and had estimates made concerning it from the Board of Engineers. I turned to that one because it was quite distinguished, having been printed in italics, with a view of ascertaining whether his observation appled to that as well as to other items. My own personal view is that the amendment is not germane to the river and harbor bill, but the merit of the amendment is much more apparent to me, at least, than a great many of the appropriations in the measure made for different places in the country.

Mr. CURTIS. I greatly appreciate the expression of the Senator from Colorado in regard to the merits of the item.

Mr. THOMAS. I did not intend so much to criticize the amendment itself as to ascertain whether it had been recommended and what was the reason for its appearance in this bill instead of in a flood-control measure.

Mr. CURTIS. For fear other Senators may desire information on this subject I will proceed, with the consent of the Senate, to publish the list that was furnished by Mr. Strickland to Mr. Wanzer without reading it.

The PRESIDING OFFICER. Without objection, the list will be printed.

The list referred to is as follows:

Arkansas River near Syracuse, 1902–1906.
Arkansas River near Dodge, 1902–1906.
Arkansas River near Coolidge, 1903.
Arkansas River near Hutchinson, 1895–1905.
Arkansas River near Arkansas City, 1902–1906.
Walnut River near Arkansas City, 1902–3.
Cimarron River near Arkalon, 1895–96, 1903–1905.
Medicine River near Kiowa, 1895–96.
Verdigris River near Independence, 1904.
Verdigris River near Liberty, 1895–1903.
Verdigris River near Fall River, 1904–5.
Neosho River near Neosho Rapids, 1904.
Neosho River near Iola, 1895–1903.
Neosho River near Humbolt, 1904.
Kansas River near St. George, 1904.
Kansas River near Topeka, 1904.
Kansas River near Lecompton, 1899–1906.
Kansas River near Lawrence, 1895–1899.
Smoky Hill River near Solomon, 1904.
Smoky Hill River near Ellsworth, 1895–1903.
Beaver Creek near Fort Scott, 1904–5.
Saline River near Beverly, 1895–1897.
Saline River near Salina, 1897–1903.
Solomon River near Beloit, 1895–1897.
Solomon River near Niles, 1897–1903.
Blue River near Manhattan, 1895–1905.
Osage River near Ottawa, 1902–1905.

Mr. CURTIS. I desire to read to the Senate the recommendation of Mr. Wanzer, and to place in the RECORD a little history of floods in the State of Kansas:

I recommend an amendment to the river and harbor bill about as follows—

The amendment is substantially as I offered it, except I add the Arkansas and other rivers.

I recommend an amendment to the river and harbor bill, about as follows:

"To appropriate the sum of $50,000 for the purpose of investigating the flood periods of the waters in the State of Kansas, and from examination of the territory, and from data already gathered, by governmental, State, and private efforts, devise some general plan which will best guard against the recurrence of such floods and diminish their damaging effect upon the lower valleys of the Missouri and Mississippi Rivers."

The later periods of flood damages in the State of Kansas of which data have been compiled occurred in the years 1903, 1908, and 1915.

The United States Weather Bureau gives the following estimate of flood losses during the years 1903 and 1908:

*Estimate of flood losses 1903 and 1908.*

| | Lives lost. | Property loss. | Crop loss. | Loss from erosion. | Loss from suspension of business. |
|---|---|---|---|---|---|
| 1903 | | | | | |
| Topeka and vicinity | 38 | $2,000,000 | [1] | [1] | [1] |
| Kansas City (Kansas and Missouri) | 19 | 15,000,000 | [1] | [1] | [1] |
| Total, 1903 | 57 | 17,000,000 | | | |
| Kaw Valley (1903) | | 22,000,000 | | | |
| 1908 | | | | | |
| Kansas River Valley | | 55,000 | $1,500,000 | [1] | $30,000 |

[1] No data. [2] Not including Topeka and Kansas City.

Total loss, both years, lives 57; property, crops, etc., $20,075,000.

The following extract from a paper written by Mr. H. B. Walker, of Kansas State Agricultural College, gives some physical facts concerning the floods of 1903, 1908, and 1915, especially as to the damage inflicted along the valleys in the State of Kansas, and where such immense losses are locally entailed it must follow that these same floods necessarily contribute materially to the greater damage incurred along the lower valleys of the Missouri and Mississippi Rivers—

That is what we contend in support of this amendment, that if the flood waters are controlled at the heads of these various streams it will lessen the damage on the Missouri and on the Mississippi and will necessarily save a great deal of money that is now expended in protecting the banks of those rivers.

SCOPE OF THE FLOOD PROBLEM.

Since 1903 that part of Kansas lying east of the ninety-eighth meridian has suffered a number of disastrous floods. Many of the small valleys have had an overflow practically every year, and three general flood periods have prevailed, the first and most destructive coming in 1903, the second and least destructive in 1908, and the third in 1915. For the purpose of discussion I have divided the State east of the ninety-eighth meridian into four groups, as follows: First, the Kaw River watershed; second, the Arkansas River watershed; third, the Neosho River watershed; fourth, other independent smaller watersheds.

The first mentioned is the largest, and therefore subject to the greatest destruction when inundated. The Arkansas River overflows infrequently, since its source is in a region of high altitude and scant rainfall. The other watersheds all lie wholly within the State and are subject to frequent and destructive overflows.

KAW RIVER VALLEY.

The total drainage area of the Kaw River is approximately 60,000 square miles, most of which is located within the State. Two principal tributary streams, however—the Republican and the Blue Rivers—have a considerable portion of their drainage areas in Colorado and Nebraska. The Smoky Hill, with its two tributaries—the Solomon and Saline Rivers—forms a large drainage basin almost entirely within the State. Streams of smaller drainage areas, but which contribute large quantities of flood waters to the main river, are the Vermillion, Delaware, and Wakarusa Rivers and Stranger, Soldier, and Mill Creeks. The importance of these smaller streams must not be underestimated. The maximum flood discharge for the Kaw River in 1903 was estimated to be between 250,000 and 300,000 cubic feet per second, while the Delaware River, with a drainage area in eastern Kansas covering 1,100 square miles, had a maximum flood discharge for the same flood of approximately 44,000 cubic feet per second, or a maximum flood flow approximately equal to one-seventh of the maximum flood discharge of the Kaw River. Of course it is evident that these smaller drainage areas can not in themselves cause serious flood conditions in the Kaw River Valley, but when added to the flood waters contributed by the Blue, Republican, and Smoky Hill Rivers great damage and destruction to property may result.

The Kaw River watershed has approximately 682,880 acres of land subject to overflow. Besides this, there are 81 cities and villages which are directly affected by floods. Two of these are cities of the first class, 13 of the second class, and 66 of the third class. The total population represented by these municipalities is 225,000.

Approximately 783 miles of main-line railroad are located in this flooded area.

Besides the numerous railroads which pass through the valley there are about 1,900 miles of public roads which are subject to inundation. This important drainage area of Kansas has experienced three general overflows since June of 1903. The losses during the 1903 flood were by far the greatest, but for the 13-year period the total loss to Kansas may be conservatively estimated at $40,000,000, distributed as follows:

| | |
|---|---|
| 1903 | $22,000,000 |
| 1908 | 3,000,000 |
| 1915 | 12,000,000 |
| Other miscellaneous floods | 3,000,000 |
| Total | 40,000,000 |

ARKANSAS RIVER VALLEY.

The drainage area of the Arkansas River above the point where it passes out of the State is approximately 35,000 square miles, about 75 per cent of which is outside of Kansas. Most of this drainage basin is situated in a semiarid country and the valley therefore does not often suffer from floods. East of the 98th meridian some losses have occurred. In 1904 the floods in the Arkansas River Valley from Wichita to Arkansas City were the highest ever recorded. Reports state that about three-tenths of the city of Wichita was covered with water and a property loss of $30,000 was reported. The losses, however, were greatest in the farming communities where the crops were entirely swept away. The Arkansas River Valley has an overflow area of approximately 73,600 acres. Nine cities and villages are also directly affected, two of these being cities of the first class, three of the second class, and four of the third class, and representing a total population of 93,000.

The railroads in the Arkansas River Valley are generally not much affected by flood conditions, there being only about 35 miles of railroad directly located in the flood plane of this stream. In this valley, however, there are practically 220 miles of public roads subject to overflow. The total property loss in this basin during the past 13 years has been approximately $1,500,000.

NEOSHO RIVER VALLEY.

The Neosho River is a true Kansas stream, since it has its headwaters entirely within the State. Floods in this district have been frequent and particularly destructive, especially to farm crops. The area drained is approximately 5,090 square miles, and the highest floods cover approximately 262,000 acres. Twenty-seven cities in this drainage basin are directly affected by floods. Seven of these are cities of the second class and 20 are cities of the third class, with a total population of 50,000. Approximately 269 miles of railroad are located within the flooded area, and 740 miles of public road are also subject to overflow. The most destructive flood in the Neosho Valley occurred in 1904. The property losses for this inundation alone were estimated at $1,200,000. The probable total loss by floods in the Neosho River Valley during the past 13 years is approximately $5,500,000.

OTHER INDEPENDENT SMALLER WATERSHEDS.

The remaining drainage areas in Kansas include the Verdigras, Marais de Cygnes, and the Marmaton Rivers. These streams are all especially subject to frequent periodic floods, resulting in heavy crop and property losses. The total flooded area in this group is approximately 137,000 acres. Twenty-six cities, including 2 of the first class, 10 of the second class, and 14 of the third class, and having a total population of 62,000, are directly affected by these floods. The total mileage of railroads subject to direct injury is 156 miles. Five hundred and forty miles of public roads are subject to inundation. The greatest property losses from floods occurred in 1904, 1909, and 1915. During the past 13 years the total flood losses have amounted to approximately $3,500,000.

*Summary of flood losses in Kansas for a 13-year period.*

| | |
|---|---|
| Kaw River Valley | $40,000,000 |
| Arkansas River Valley | 1,500,000 |
| Neosho River Valley | 5,500,000 |
| Other streams | 3,500,000 |
| Total property loss | 50,500,000 |

For the 13-year period this gives a loss of a little over $3,800,000 per annum. However, this is not a fair conclusion, since floods have been more frequent in recent years than formerly. The first Kansas flood on record occurred in 1844, and was the highest ever known. Other floods followed in 1877 and 1885. No other floods of a general nature occurred until 1903. It would seem, therefore, that the period above mentioned has been one of unusual conditions, and that it is not probable that we will soon have a repetition of such heavy losses.

Besides the property losses given above, there have been many indirect harmful results. Railway traffic has been greatly delayed and the entire public thereby inconvenienced, public roads and bridges have been damaged, and the seeds of noxious weeds have been widely disseminated. Moreover, these frequent and periodic floods have had a very discouraging effect upon the development of our very best agricultural land.

In addition to property losses, there have been a number of lives lost. The 1903 flood left a death list of 57. A number of lives were lost in the floods of the present year; just how many is not known, but the probable total number of lives lost during the 13-year period just mentioned due directly to floods is perhaps 75.

The total overflow area for the State is 1,205,520 acres. This represents the very best of Kansas soil. From an agricultural standpoint the protection of this area is of the greatest importance to the agricultural interests of the State. All of this splendid territory is contiguous to the best market centers the State affords, which insures rapid development, with consequent rapid advances in land values as soon as a reasonable protection system can be worked out.

Very truly, yours,

CHAS. WANZER.

As I stated, this amendment is offered to the pending bill. I believe it is a justifiable appropriation. If I did not believe so, I would not have offered it. I want to say, however, that the fact that I offered this amendment shall not in any way affect my vote upon other provisions of the bill. I believe we should honestly and fairly appropriate all the money that is needed to protect streams where appropriations are needed in the interest of commerce, and I shall do what I can to support and help pass such provisions; but where appropriations are not needed, it seems to me that we ought now to refuse to make them. Nor should we appropriate for rivers where there can be no benefit to commerce, navigation, or flood control.

Mr. President, just another word before I close. In the speeches made by the Senator from Iowa [Mr. KENYON] and the Senator from Illinois [Mr. SHERMAN] reference was made to the Fifty-first Congress, which was condemned as a billion-dollar Congress. That Congress, of which Mr. Reed, of Maine, was Speaker, appropriated in its two sessions for the two fiscal years of 1889 and 1890 the sum of $1,023,972,365. The Democratic Members of that Congress and the Democratic press of the country charged it with being a billion-dollar Congress. Mr. Reed answered that this was a billion-dollar country. If our friends on the other side of the Chamber then thought that Congress was extravagant with the people's money, what will they think of the present Democratic administration and Congress, with its majority in the House and in the Senate in the last Congress and in this session of this Congress?

I call your attention to the appropriations of the Sixty-third Congress and the estimates for the first session of the Sixty-fourth Congress. The Sixty-third Congress appropriated in its two sessions, for the two fiscal years 1915 and 1916, a total of $2,231,055,150, which was more than double the appropriations of the Fifty-first Congress; and this vast sum of over $2,000,000,000 does not cover all the money appropriated for the years 1915 and 1916, for it has taken four urgent deficiency bills so far this session, covering $25,731,229, to make up deficiencies for 1916.

More than that, the estimates submitted to this session of the present Congress for the next fiscal year amounted, for one year only, to $1,287,857,808. To that you must add the deficiency appropriations of this session, which will go into the report of the next Congress, which will make $1,311,588,000 appropriated by this session of this Congress for the fiscal year 1917, and that does not include appropriations for several measures which have passed this body and which will no doubt become laws before this session adjourns.

I think the time has come when we should call a halt upon the extravagance of this administration. It came into power under a promise of economy, but the records show that it has been the most extravagant in the history of the country, and the estimates for this year far exceed the estimates that have ever been sent to any Congress in the history of the country.

We, as representatives of the people, should stand for the reduction of taxation and for the strictest economy in the administration of the affairs of the Nation. We on the Republican side advocate this because it is right, and it is our duty in making appropriations to practice the strictest economy and only make such appropriations as are actually necessary and which will result in benefit to the people.

Mr. CLARKE of Arkansas. Mr. President, under the existing program there is no Senator ready to address the Senate further on the pending bill at this time. There has been expressed a general desire that the business of the day should be suspended at this point, so I ask unanimous consent that the further consideration of the pending bill may be postponed until the morning business is disposed of, or dispensed with on Tuesday morning next; and, if that request is granted, I shall then move that the Senate adjourn. I have made the request due to the fact that Monday will be devoted to business before the Senate in executive session.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Arkansas? The Chair hears none, and it is so ordered.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 5221) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, with amendments, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a concurrent resolution requesting the Speaker of the House of Representatives and the President of the Senate to cancel their respective signatures to the enrolled bill H. R. 759, entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof," etc., in which it requested the concurrence of the Senate.

The message further announced that the House had passed a bill (H. R. 15494) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war, in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. MYERS. I present a resolution unanimously passed by 300 citizens at the Auditorium, at Butte, Mont., in favor of a national constitutional amendment for woman suffrage, which I ask may be printed in the RECORD.

There being no objection the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Resolution unanimously passed by 300 citizens at the Auditorium, Butte, Mont., May 7, 1916.

Whereas we believe that greater than all laws is the right of the people to share in the making of those laws; and

Whereas the party in power has blocked the passage of the Federal suffrage amendment enfranchising women: Be it

*Resolved*, That we call upon the administration to put its strength behind this amendment and secure its immediate passage during this present session of Congress; be it further

*Resolved*, That copies of this resolution be sent the administration leaders, the chairman and members of the House Judiciary Committee and to the Montana congressional delegation, with the request that Senator MYERS and Congressman EVANS read it into the minutes of the CONGRESSIONAL RECORD.

HELEN FITZGERALD SANDERS, *Chairman*.

Mr. MYERS. I present resolutions unanimously passed by 100 women citizens of Butte, Mont., favoring a national constitutional amendment for woman suffrage, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Unanimously passed by 100 women citizens of Butte, Mont., at a luncheon given the envoys of the Congressional Union at the Hotel Butte, May 8, 1916.

Whereas the passage of the Susan B. Anthony Federal suffrage amendment is being unfairly blocked by the action of the Judiciary Committee of the House of Representatives: Be it

*Resolved*, That we demand of the committee an immediate favorable report on the amendment, that it may be voted upon in the House without delay; be it further

*Resolved*, That we hold the administration responsible for the passage of the amendment through this session of Congress; be it finally

*Resolved*, That copies of this resolution be sent the President of the United States, Majority Leaders KERN, of the Senate, and KITCHIN, of the House; Speaker CLARK, of the House; and the members of the Judiciary Committee, and to the Montana congressional delegation.

JOANNA S. GRIGG, *Chairman*.

Mr. ASHURST. I present resolutions adopted by the Central Labor Union of Oatman, Ariz., which I ask may be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the resolutions were referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

CENTRAL LABOR UNION,
*Oatman, Ariz., May 6, 1916.*

Hon. HENRY F. ASHURST,
*Senator from Arizona, Washington, D. C.*

DEAR SENATOR: By instructions from the above body, I am sending you the following resolutions:

"Whereas there exists an almost universal state of warfare between the nations of Europe; and

"Whereas there exists strained relations between the United States of America and the Republic of Mexico, chiefly due to the influence of large commercial interests; and

"Whereas there is serious danger of this country becoming involved in the European conflict; and

"Whereas the immediate burdens of warfare, as well as the ultimate results, weigh most heavily upon the shoulders of labor, the great producers of the world: Therefore be it

"*Resolved by the Central Labor Union of Oatman, Ariz.*, That our Senators and Representative in Congress be requested to use all means in their power to maintain strictest neutrality with European nations and to avert a conflict with Mexico."

Signed by committee on resolutions: S. W. Collins, Ora Page, and B. O. Lechens.

With kindest regards, I remain,

Yours, respectfully, B. O. LECHENS, *Secretary*.

Mr. CHAMBERLAIN presented petitions of sundry citizens of Oregon, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. PAGE presented a memorial of sundry citizens of Cavendish, Vt., remonstrating against any change being made in the parcels-post law, which was referred to the Committee on Post Offices and Post Roads.

Mr. McLEAN presented a petition of Local Union No. 210, United Brotherhood of Carpenters and Joiners of America, of Stamford, Conn., praying for the enactment of legislation to grant pensions to employees of the Postal Service, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of sundry citizens of West Hartford, Conn., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a petition of the Woman's Christian Temperance Union, of Torrington, Conn., praying for Federal censorship of motion pictures, which was referred to the Committee on Education and Labor.

He also presented memorials of Fyrtornet Lodge, International Order of Good Templars, of Stamford; of North Star Lodge, International Order of Good Templars, of Bridgeport; of Framat Lodge, International Order of Good Templars, of Ansonia; of Svea Lodge, International Order of Good Templars, of Branford; of Sveaborg Lodge, International Order of Good Templars, of New Haven; of Trochet Lodge, International Order of Good Templars, of Naugatuck; of Oscar II Lodge, International Order of Good Templars, of Waterbury; of Norden Lodge, International Order of Good Templars, of New Britain; of Freja Lodge, International Order of Good Templars, of Hartford; of Enighet Lodge, International Order of Good Templars, of South Manchester, and of Dristigheten Lodge, International Order of Good Templars, of Middletown, all in the State of Connecticut, remonstrating against an increase in armaments, which were ordered to lie on the table.

He also presented petitions of sundry citizens of Connecticut, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of Local Union No. 39, Cigar Makers' International Union, of New Haven; of Local Branch Sheet Metal Workers' Union, of New Haven; of Elm City Division, No. 317, Order of Railway Conductors, of New Haven; of Local Union No. 173, United Association of Plumbers and Steam Fitters, of Bridgeport; of Local Union No. 201, Brotherhood of Railroad Trainmen, of New Haven; of the Plumbers and Steam Fitters' Union of New Haven; and of Local Union No. 79, United Brotherhood of Carpenters and Joiners, of New Haven, all in the State of Connecticut, praying for the passage of the so-called Panama civilian compensation bill, which were referred to the Committee on Appropriations.

He also presented a petition of the National Association of Conservation Commissioners, praying for the enactment of legislation to establish game sanctuaries in national forests and also for the protection of migratory birds, which was referred to the Committee on Forest Reservations and the Protection of Game.

Mr. PHELAN presented a petition of sundry citizens of San Bernardino County, Cal., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a petition of the congregation of the First Presbyterian Church of Berkeley, Cal., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of General Jacob H. Smith Camp, No. 6, United Spanish War Veterans, of Fresno, Cal., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was ordered to lie on the table.

He also presented petitions of Local Union No. 256, Laundry Wagon Drivers' Union, of San Francisco, and of the Trades and Labor Council of Vallejo, in the State of California, praying for an investigation into the conditions surrounding the marketing of dairy products, which were referred to the Committee on Agriculture and Forestry.

Mr. JONES presented a memorial of sundry citizens of Colville, Wash., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

## REPORTS OF COMMITTEES.

Mr. SWANSON, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 5854) to provide for the erection, furnishing, and equipping of a building in the city of Washington, D. C., for the Department of Justice, reported it without amendment and submitted a report (No. 436) thereon.

Mr. ASHURST, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 1045) to provide for the erection of a public building at Prescott, in the State of Arizona, reported it without amendment and submitted a report (No. 434) thereon.

He also, from the same committee, to which was referred the bill (S. 1046) to provide for the purchase of a site for a public building in the city of Bisbee, Ariz., reported it with an amendment and submitted a report (No. 435) thereon.

Mr. NEWLANDS, from the Committee on Interstate Commerce, to which was referred the bill (H. R. 308) to amend the act to regulate commerce as amended, and for other purposes, reported it without amendment and submitted a report (No. 437) thereon.

## BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. OVERMAN:

A bill (S. 5982) to provide for the purchase of a site and the erection of a public building thereon at Marion, McDowell County, N. C. (with accompanying papers); to the Committee on Public Buildings and Grounds.

By Mr. PHELAN:

A bill (S. 5983) to acquire a site and for the erection and completion thereon of a public building in the city of San Mateo, Cal.; and

A bill (S. 5984) directing the Secretary of the Treasury to sell the present Federal building and site at San Jose, Cal., and to acquire a new site and to provide for the erection and completion thereon of a public building in the said city of San Jose, Cal.; to the Committee on Public Buildings and Grounds.

A bill (S. 5985) authorizing the Commissioner of Navigation to cause the steamship *Republic* to be enrolled and licensed as a vessel of the United States; to the Committee on Commerce.

By Mr. ASHURST:

A bill (S. 5986) making an appropriation for the construction of a bridge at Nogales, Ariz.; to the Committee on Finance.

By Mr. SIMMONS:

A bill (S. 5987) to amend subsection 11 of section 3244, Revised Statutes; to the Committee on Finance.

By Mr. SHIELDS:

A bill (S. 5988) granting a pension to Otto Greenlee; to the Committee on Pensions.

By Mr. JONES (by request):

A joint resolution (S. J. Res. 130) proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. OVERMAN submitted an amendment proposing to appropriate $2,880 for additional compensation to 16 privates, Capitol Police, at the rate of $180 per annum each for the fiscal year 1917, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. TOWNSEND submitted an amendment proposing to increase the appropriation for sugar-beet investigations from $41,495 to $51,495 and that not less than $10,000 of this appropriation shall be used for the development and improvement of American strains of sugar-beet seed, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. MARTINE of New Jersey submitted an amendment proposing to increase the number of messengers at $720 each, in the Division of Publications, Agricultural Department, from two to four, etc., intended to be proposed by him to the agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

Mr. BROUSSARD submitted an amendment proposing to amend the act of August 30, 1890, so as to authorize the Secretary of Agriculture to permit the admission of tick-infested cattle from Mexico, South and Central America, the islands of the Gulf of Mexico, and the Caribbean Sea into those parts of the United States below the southern quarantine line, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

THE NEW AQUEDUCT BRIDGE.

The PRESIDING OFFICER laid before the Senate the following concurrent resolution (No. 40) of the House of Representatives, which was read:

*Resolved by the House of Representatives (the Senate concurring)*, That the Speaker of the House of Representatives and the President of the Senate be, and they are hereby, requested to cancel their respective signatures to the enrolled bill H. R. 759, entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof;"

That upon the cancellation of said signatures the Clerk be directed to reenroll said bill with an amendment, as follows: On page 4, line 10, strike out the word "five" and insert in lieu thereof the word "four."

Mr. SWANSON. I move that the Senate concur in the resolution of the House.

The motion was agreed to.

PENSIONS AND INCREASE OF PENSIONS.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 5221) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, which were, on page 4, line 1, after "of," where it first occurs, to insert "$"; on page 7 to strike out lines 3 to 6, inclusive; on page 10, line 14, after "Company," to strike out "C" and insert "G"; on page 14, line 5, to strike out "Adonirum" and insert "Adoniram"; on page 14, line 6, to strike out "A" and insert "D"; and on page 17 to strike out lines 7 to 10, inclusive.

Mr. JOHNSON of Maine. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

HOUSE BILL REFERRED.

H. R. 15494. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war was read twice by its title and referred to the Committee on Pensions.

Mr. CLARKE of Arkansas. I move that the Senate adjourn.

The motion was agreed to; and (at 2 o'clock and 35 minutes p. m.) the Senate adjourned until Monday, May 15, 1916, at 12 o'clock m.

## HOUSE OF REPRESENTATIVES.

### SATURDAY, *May 13, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Lord, our God and our Father, let Thy blessing descend upon us in all its fullness to quicken our minds and bring our souls en rapport with Thee and Thy holy purposes, that we may think well and act well in all the relationships of life and merit the "Well done, good and faithful servant," after the manner of the Christ, the world's great Exemplar. Amen.

The Journal of the proceedings of yesterday was read and approved.

WITHDRAWAL OF PAPERS.

Mr. ASHBROOK, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, papers in the case of Gifford Ramey, Sixty-second Congress, no adverse report having been made thereon.

EXTENSION OF REMARKS.

Mr. McKINLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of rural credits.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD on the subject of rural credits. Is there objection?

There was no objection.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 5966. An act to amend an act entitled "An act to reduce tariff duties and to provide revenue for the Government, and for other purposes," approved October 3, 1913; to the Committee on Ways and Means.

SAMUEL SCHWARTZ.

Mr. BENNET. Mr. Speaker, I move to discharge the Committee on Foreign Affairs from the further consideration of the following resolution of inquiry.

Mr. GARNER. What is it?

The SPEAKER. The gentleman from New York moves——

Mr. GARNER. Mr. Speaker, I demand the regular order.

Mr. MANN. The rules provide——

The SPEAKER. This rule simply provides that the bill is to be in order. The Chair thinks this is a privileged resolution, and the Clerk will report it.

The Clerk read as follows:

House resolution 210.

*Resolved*, That the President of the United States be, and he is hereby, requested to furnish the House of Representatives with a statement of what he has done under the provisions of section 2001 of the Revised Statutes to secure the release of Samuel Schwartz, an American citizen unjustly deprived of his liberty by or under the authority of the Government of Great Britain.

Mr. BENNET. Mr. Speaker, I ask unanimous consent to proceed for three minutes.

The SPEAKER. The gentleman from New York asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. BENNET. Mr. Speaker, I have consulted with the chairman of the Committee on Foreign Affairs for several days past, and he told me yesterday that unless he got certain information from the State Department by to-day which would enable him to make the customary adverse report giving me the information I would be justified in moving to discharge the Committee on Foreign Affairs from the further consideration of this resolution.

Mr. FITZGERALD. I wish to suggest to the gentleman that this resolution contains the statement that the man is unjustly

deprived of his liberty by a foreign Government. It seems to me that that should be somewhat modified.

Mr. BENNET. I would say "alleged to be." I am perfectly willing to say that. In line 6, after the word "citizen," insert the words "alleged to be."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FITZGERALD. I would suggest to the gentleman also that he amend by inserting "if not incompatible with the public interest." It is a matter suggesting what has been done by some foreign Government, and it is the customary phrase in such resolutions.

Mr. MANN. When we address the President it is customary.

Mr. FITZGERALD. I suggest that the gentleman insert "if not incompatible with the public interest."

Mr. BENNET. Mr. Speaker, I ask unanimous consent to amend, after the word "requested," in line 2, by inserting "if not incompatible with the public interest."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

In line 2 insert, after the word "requested," "if not incompatible with the public interest."

Mr. DUPRÉ. Mr. Speaker, I ask for a reading of the amended resolution.

The SPEAKER. At the request of the gentleman from Louisiana, the Clerk will report the amended resolution.

The Clerk read as follows:

House resolution 210.

*Resolved*, That the President of the United States be, and he is hereby, requested, if not incompatible with the public interest, to furnish the House of Representatives with a statement of what he has done under the provisions of section 2001 of the Revised Statutes to secure the release of Samuel Schwartz, an American citizen alleged to be unjustly deprived of his liberty by or under the authority of the Government of Great Britain.

The SPEAKER. The question is on agreeing to the resolution.

The question was taken, and the resolution was agreed to.

Mr. BENNET. Mr. Speaker, that simply discharges the committee. Now I would like to have the resolution adopted.

The SPEAKER. It is all one motion.

RURAL CREDITS.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2986, with the gentleman from Texas [Mr. GARNER] in the chair.

The CHAIRMAN. The House is in the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2986, the title of which the Clerk will report.

The Clerk read as follows:

An act (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes.

APPRAISAL.

SEC. 10. That whenever an application for a mortgage loan is made to a national farm-loan association, it shall be first referred to the loan committee provided for in section 8 of this act. Said loan committee shall examine the land which is offered as security for the desired loan and shall make a detailed written report signed by all three members, giving the appraisal of said land as determined by them, and such other information as may be required by rules and regulations to be prescribed by the Federal farm-loan board. No loan shall be approved by the directors unless said loan committee agrees upon a favorable report.

The written report of said loan committee shall be submitted to the Federal land bank, and the directors of said land bank shall examine said written report when they pass upon the loan application which it accompanies, but they shall not be bound by said appraisal.

Before any mortgage loan is made by any Federal land bank, or joint-stock land bank, it shall refer the application and written report of the loan committee to one or more of the appraisers appointed under the authority of section 3 of this act, and such appraiser or appraisers shall investigate and make a written report upon the land offered as security for said loan. No such loan shall be made by said land bank unless said written report is favorable.

No borrower under this act shall be eligible as an appraiser under this section, but borrowers may act as members of a loan committee in any case where they are not personally interested in the loan under consideration. When any member of a loan committee or of a board of directors is interested, directly or indirectly, in a loan, a majority of the board of directors of any national farm-loan association shall appoint a substitute to act in his place in passing upon such loan.

Mr. HAWLEY. Mr. Chairman, I would like to ask the distinguished gentleman from Virginia [Mr. GLASS] if, in line 3, page 98, before the word "favorable," the word "unanimously" was not intended to be inserted? Then it would read:

No loan shall be approved by the directors unless said loan committee agrees upon a unanimously favorable report.

Mr. GLASS. No; that proposition was suggested, but the committee decided to use the term there employed, "favorable report."

Mr. HAWLEY. So that a vote of the two out of three appraisers would be sufficient to pass a loan?

Mr. GLASS. Yes. That was the idea.

Mr. MOORE of Pennsylvania. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Pennsylvania moves to strike out the last word.

Mr. MOORE of Pennsylvania. Mr. Chairman, the matter of appraisals is one of the keynotes to this proposition. If a man wants to borrow $100, having qualified by making himself a stockholder, at an expense of $5, he then must proceed to obtain an appraisal of the property upon which he desires to obtain his loan. In order to do that he must obtain the assistance of pretty much the entire system provided for in this act. If the piece of ground upon which he desires to borrow the money is remote, the expenses of the appraisers and others interested will, of course, be a matter to be considered; the compensation of those who are engaged in passing upon such an important matter as the loan of $100 on a piece of ground will also have to be considered.

This paragraph illustrates more than anything else, perhaps, the amount of detail that the average poor farmer must go through in order to obtain any satisfaction or relief under this bill. The loan committee of the national association, formed by 10 borrowers, must examine the land; then their report must be presented and passed upon, all the way up practically to the Federal land bank. For a loan of $100 it would seem as if the Government of the United States and the land associations would be required to spend in salaries for attorneys, for inspectors, for agents, for expenses in connection with the papers to be drawn, for the affidavits to be filed, for the traveling expenses, for the clerk hire, for the overhead charges, about as much as the loan is worth.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. I do.

Mr. FESS. Line 17 and part of line 18 seem to exempt a borrower from acting as a member of this appraising committee, but lines 18 and 19 let him in. Borrowers can act as members if they are not personally interested. What would determine whether they were personally interested or not?

Mr. MOORE of Pennsylvania. I suppose that would be determined very largely by the opinion of those who were about to make the loan.

Mr. FESS. The fellow who wants the money can appraise it?

Mr. MOORE of Pennsylvania. Yes; very much as men in a legislative body, who are supposed not to vote upon anything in which they are interested, frequently have a great deal more to do with it than those who are not interested.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. MOSS of Indiana. The gentleman realizes the fact that the man shall make an application for the loan. The appraisal by the land bank is the official appraisal.

Mr. MOORE of Pennsylvania. That is true; but is it not true also that before a poor farmer can get $100 on a piece of land which he offers as security under this bill he will have to pay his proportion of the expense all the way back to the maintenance of the three $10,000 men who are to be at the headquarters here in Washington—experts, lawyers, and all?

Mr. MOSS of Indiana. He may or he may not.

Mr. MOORE of Pennsylvania. I ask if his application will not have to be passed on first by the land-bank association, with its paid secretary-treasurer?

Mr. MOSS of Indiana. That is true.

Mr. MOORE of Pennsylvania. I ask if he will not have to pay his proportion of the expense of the committee that is appointed to appraise his property?

Mr. MOSS of Indiana. If the gentleman had read the bill he would have found out that the expense may be borne by the individual borrower or by the system as a whole.

Mr. MOORE of Pennsylvania. It is extended along the line of the various officers, and there are plenty of them.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. GLASS. Mr. Chairman, I understand that this is only a pro forma amendment. What is the discussion about?

The CHAIRMAN. To strike out the last word.

Mr. GLASS. I ask unanimous consent that all debate on this section and amendments thereto close in five minutes.

Mr. MORGAN of Oklahoma. I have an amendment, Mr. Chairman.

Mr. BENNET. I object, Mr. Chairman.

The CHAIRMAN. The gentleman from New York [Mr. BENNET] objects.

Mr. GLASS. I move, Mr. Chairman, that all debate on this section and amendments thereto close in five minutes, unless somebody has a definite amendment to offer.

Mr. MANN. I would not do that if I were the gentleman.

Mr. MORGAN of Oklahoma. I have a definite amendment to offer.

Mr. GLASS. I have no disposition in the world to be unreasonable, but I object to wasting time on pro forma amendments to strike out the last word and the last two words.

Mr. MANN. I wanted to strike out the last word myself, in order to get some information.

Mr. GLASS. We are glad to give anybody any information when we can. How much time is wanted now?

Mr. MORGAN of Oklahoma. I shall want about five minutes.

Mr. MANN. I suggest 15 minutes on the section.

Mr. GLASS. Very well.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that debate on the section and amendments thereto close in 15 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MORGAN] offers an amendment, which the Clerk will report.

Mr. MORGAN of Oklahoma. I move to strike out lines 2 and 3, on page 98.

The Clerk read as follows:

Amend, page 98, by striking out lines 2 and 3.

Mr. MORGAN of Oklahoma. Mr. Chairman, section 10 refers to the appraisal; and the question propounded by the gentleman from Oregon [Mr. HAWLEY], it seems to me, is important.

Now, if the committee will notice, beginning on line 20 on page 97 it says:

Said loan committee shall examine the land which is offered as security for the desired loan and shall make a detailed written report, signed by all three members, giving the appraisal of said land as determined by them and such other information as may be required by rules and regulations to be prescribed by the Federal farm-loan board.

Now, the part which I wish to strike out is what follows in the next two lines:

No loan shall be approved by the directors unless said loan committee agrees upon a favorable report.

Now, in the first place, that language is somewhat indefinite. It is uncertain. I would like to know what that means. If some of the committee will indicate, I will pause for an answer. I do not know just what that means—a favorable report.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield to me?

Mr. MORGAN of Oklahoma. Yes; I will be glad to yield.

Mr. HAWLEY. I think it clearly means that unless these three men find the land worthy of making a loan upon, and the title clear and in fee simple in the owner or purported owner of the land, no loan shall be recommended to the Federal land bank for this applicant.

Mr. MORGAN of Oklahoma. Does the gentleman think that the loan committee or this appraisal committee is to pass on the title?

Mr. HAWLEY. The loan committee ought not to recommend a loan to a man who has not a fee-simple title in the land, if they know it.

Mr. MORGAN of Oklahoma. I think that is true. Now, Mr. Chairman——

Mr. HOWARD. Will the gentleman from Oklahoma, right in that connection, let me propound a question to the gentleman from Oregon [Mr. HAWLEY]?

Mr. MORGAN of Oklahoma. I am glad to yield to the gentleman.

Mr. HOWARD. Does the gentleman from Oregon interpret these lines, that the gentleman from Oklahoma [Mr. MORGAN] seeks to strike out, to mean that all three of the appraisers shall agree upon the valuation, or that a majority of them shall agree?

Mr. HAWLEY. I asked that question when the section was first read. I thought from the preceding language that it was intended that no loan should be recommended unless all three appraisers had agreed upon a favorable report.

Mr. CULLOP. Under the language of this provision——

Mr. MORGAN of Oklahoma. Mr. Chairman, I do not wish to lose all my time by yielding to too many gentlemen.

Mr. HOWARD. Like the gentleman from Oklahoma [Mr. MORGAN], I am trying to get some information about this. I would like to have somebody tell us what it does mean. Does it mean that a majority shall agree on the appraisement, or does it mean that they must be unanimous in their appraisement or that the farmer's loan will be rejected?

Mr. MORGAN of Oklahoma. I concede that the expression is indefinite and uncertain, but I think the entire language ought to go out. The appraisal committee, as properly understood, should have nothing to do except to appraise the value of the land.

The members of this committee will not be lawyers; they are not to pass on the title to the land. Their business is to make an estimate on the value of the land, furnish information as to its character, and such other information as will be required of them. When this is done their work is completed. They have done all that the members of any appraisal committee should be required or should be allowed to do. Under the provisions of this bill, as I have heretofore pointed out, a man can not become a member of the national farm-loan association except upon a two-thirds vote of the five directors thereof. They can not secure a loan unless the loan is recommended favorably by the appraisal committee. Then, after that, his loan can not be accepted by the Federal land bank until after one of its appraisers has visited the land and made an appraisement thereof. Under such provisions it is my fear that many worthy farmers will not be able to secure loans through the Federal land banks and the farm-loan associations. My idea is that all of these restrictions should be stricken out. There is only one question that should be determined, and that is, What is the land worth? If, after final appraisement, a man's farm is determined to be worth so much, he is entitled to a loan of 60 per cent of that value. One farmer is as good as another. The only thing that the Government or the bank or the association has a right to ask is that whoever secures a loan shall furnish proper security, and when a farmer has done this he is entitled to a loan. A business conducted on any other line will necessarily lead to great dissatisfaction.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN of Oklahoma. I ask unanimous consent for one minute more. My time has been taken up.

The CHAIRMAN. The gentleman asks unanimous consent for one minute. Is there objection?

Mr. SHOUSE. I object.

Mr. MANN. This does not extend the time. It comes out of the 15 minutes.

Mr. MORGAN of Oklahoma. Did the gentleman object?

The CHAIRMAN. The gentleman from Kansas [Mr. SHOUSE] objected.

Mr. MORGAN of Oklahoma. I make the point of order that there is no quorum present.

Mr. MANN. I hope the gentleman will not object to the extension for one minute. It will come out of the 15 minutes.

Mr. HOWARD. I will give the gentleman the time.

Mr. MOORE of Pennsylvania. I make the point of no quorum.

The CHAIRMAN. The gentleman from Pennsylvania makes the point of no quorum. The Chair will count.

Mr. MOORE of Pennsylvania. If gentlemen do not want discussion of this bill, if they want to rush it through, let them do it. It takes $9,000,000, and if nobody is to say anything except those in favor of the bill——

The CHAIRMAN. Eighty-two members present, not a quorum, and the Clerk will call the roll.

Mr. MANN. Mr. Chairman——

The Clerk called the name of Mr. ABERCROMBIE.

Mr. MANN. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Illinois moves that the committee do now rise.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. MANN. I ask for a division.

The committee divided; and there were—ayes 27, noes 40.

Mr. MANN and Mr. GLASS demanded tellers.

Tellers were ordered; and the Chairman appointed Mr. MANN and Mr. GLASS.

The committee against divided; and the tellers reported—ayes 2, noes 101.

The CHAIRMAN. On this vote the ayes are 2 and the noes are 101. A quorum is present.

Mr. MOORE of Pennsylvania. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. MOORE of Pennsylvania. Mr. Chairman, I make the point of order that under the rule, the Chair having announced that no quorum was present and having directed the Clerk to call the roll, which the Clerk began to do, the roll call must pro-

ceed. I quote for the information of the Chair section 2 of Rule XXIII:

Whenever a Committee of the Whole House or of the Whole House on the state of the Union finds itself without a quorum, which shall consist of 100 Members the Chairman shall cause the roll to be called, and thereupon the committee shall rise, and the Chairman shall report the names of the absentees to the House—

Which has not been done—

which shall be entered on the Journal; but if on such call a quorum shall appear the committee shall thereupon resume its sitting without further order of the House.

My point is that under the rule, the Chair having declared that no quorum was present, and having directed the Clerk to call the roll, the roll call must proceed.

Mr. MANN. Mr. Chairman, all rules are construed at different times, and precedents become a part of the rules. When the Chair declared that there was no quorum present I immediately rose to make the motion that the committee do now rise.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. MANN. Yes.

Mr. MOORE of Pennsylvania. Is it not a fact that before the gentleman made that motion the Chair stated that there were 82 Members present—not a quorum, and that the Clerk would call the roll, and that the Clerk began to call the roll, and called the name of Mr. ABERCROMBIE?

Mr. MANN. The Clerk called the name of Mr. ABERCROMBIE while I was making that motion, and on my feet for that purpose, and the Chair could not cut me out from making that motion by the activity of the Clerk. You can not cut out the right of a Member because the Clerk is unduly—I will not say unduly, but properly—active. [Laughter.] This rule has been frequently construed in the same way, and the Chair has always held heretofore that when on a motion to rise the presence of a quorum was developed, there was no roll call required because there was a quorum present.

The CHAIRMAN. The point of order is overruled. The Clerk will read.

Mr. BENNET. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for 10 minutes. Is there objection?

Mr. GLASS. Reserving the right to object, how much more time is there under the unanimous-consent agreement?

The CHAIRMAN. Ten minutes. Is there objection?

There was no objection.

Mr. BENNET. Mr. Chairman, the gentleman from Oklahoma [Mr. MURRAY] and the gentleman from Georgia [Mr. TRIBBLE] and other gentlemen who have taken the position that this bill confers no substantial benefit on the people who ought to be benefited are, it seems to me, quite correct. I come from a city district, and therefore come under the inhibition of the gentleman from Alabama [Mr. HEFLIN] and others, but it does seem to me that when we are attempting to pass a bill to benefit the people we ought to benefit somebody. The gentleman from Oklahoma [Mr. MURRAY] said yesterday that a man who had $200 ought to have the right to enter into the occupancy of a $2,000 property. That may seem fantastic to some people, but it ought not to seem fantastic to any resident of the State of New York.

In village after village and city after city in the State of New York a man that has saved up $200 can buy a lot and go to his local building and loan association, take his plans, take his proposed contract with the material man, and that building and loan association will build a house for him.

All over the State of New York, and I do not doubt it is so in the States of Illinois and Indiana, probably in the States of Vermont and New Hampshire, a man that has had the thrift to save $300 can go to a loan and building association and it will build him a little home. In the city or village where I was born I can show you block after block of little homes built by men whose initial saving was not over $200 or $300. How do they do it? By marshaling the assets of the community for the benefit of the members of the community.

Mr. McFADDEN. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. McFADDEN. Have those loan and building associations ever asked for Government aid?

Mr. BENNET. I was coming to that. None of these associations have ever asked for Federal or State aid. The Federal aid in this bill is a delusion and a sham. It is not helping out anybody except a few farmers, if it helps them. It does help the farmer who has acquired a large amount of land and who wants to borrow what would be called a savings-bank mortgage up in my country. This bill does not put one single landless man on a farm. If we are to pass a bill for the benefit of the people, we ought to exercise more care.

The gentleman from South Carolina [Mr. LEVER] and the gentleman from Alabama [Mr. HEFLIN] alluded to the bill for the Philippines. I was here when the bill passed and voted for it. The gentleman from Illinois [Mr. MANN] voted against it. Time has vindicated him. It has not vindicated me. The gentleman from North Carolina [Mr. SMALL] and the gentleman from Kentucky [Mr. SHERLEY] voted for it; they spoke for it all in the very best intention, because they wanted to benefit the Filipinos. We passed it by a vote of 188 to 69. Why did not the gentlemen talk about what we did for the Filipinos under the agricultural banking bill and tell what happened. It was passed in 1907, nine years ago, and there has not been an agricultural bank established under it in the Philippines yet. You can not legislate economic conditions simply by statute.

Mr. GARRETT. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. GARRETT. There has never been any legislation here where the Government undertook to do anything about Filipino banks.

Mr. BENNET. It was passed here nine years ago under suspension of the rules.

Mr. GARRETT. It was passed through the House but no such bill ever became a law. The Philippine Commission subsequently passed an act.

Mr. BENNET. I have just come from the library, and the bill that passed the House was a Senate bill. It was passed under a suspension of the rules on motion made by the gentleman from Indiana, Mr. Crumpacker, and the motion was carried by a vote of 188 to 69. If the gentleman will look at page 4538 of the RECORD of the Fifty-ninth Congress, he will see that that is a fact and that the law was approved by the President.

Mr. GARRETT. I am familiar with it; but there never was a bank authorized under it.

Mr. BENNET. Well, I would like to make that part of the speech myself. [Laughter.] The law was passed, and there never has been a bank organized under it.

I was a Member of Congress when the House, by unanimous consent, voted, in the interest of the farmer—and we all believed it was in the interest of the farmer—for a bill of the gentleman from North Dakota, Mr. Marshall, in relation to denatured alcohol; recommended not only by him but by everybody. What has become of that? In the limbo of forgotten things. This bill is as absolutely useless for the ordinary farmer as those two bills turned out to be.

Mr. GLASS. Will the gentleman permit an interruption?

Mr. BENNET. I will.

Mr. GLASS. I believe the gentleman has admitted that time has not vindicated his judgment in those two matters. Is it not barely possible that time will not vindicate his judgment in this matter? [Laughter.]

Mr. BENNET. I have been more generous; I have admitted that time has not vindicated the judgment of the House because the House passed the bill by a vote of 188 to 69. Better men than I voted for the bill. There was the gentleman from Missouri, Mr. De Armond, and others—good men all of us. [Laughter.]

Mr. GLASS. The gentleman is a good man, but good men make mistakes.

Mr. BENNET. I am calling the attention of the gentleman that he is making a mistake now.

Mr. GLASS. I think the gentleman from New York is making a woeful mistake.

Mr. BENNET. No; because the gentleman from Virginia can not point out to me, and neither can the gentleman from Oklahoma point out to me, where there is a provision in this bill that will put a landless man on the land.

Mr. GORDON. Will the gentleman yield?

Mr. BENNET. Yes.

Mr. GORDON. Does the gentleman think that this House ought to pass a law to put every man on a farm? [Laughter.]

Mr. BENNET. No; not if it included the gentleman from Ohio. [Laughter.]

Mr. Speaker, the real life, the real people, and the real happenings of the homes of New York City are rarely heard of outside our city limits. On Monday, May 15, a man whose very name is unfamiliar went to his grave. His coffin was of plain pine boards, unadorned. Yet 120,000 people followed the hearse through the city streets. There were only a mere handful of police, but no disorder, for those who thronged the streets mourned. It was the greatest spontaneous gathering of the people in the history of our city. Factories and workshops found it difficult to proceed, and toilers, men and women alike, who could ill afford the loss, sacrificed the

day's wage to join in the tribute. And the dead man was neither rich nor powerful. Sholem Ben Menachem Rabinowitz was just a writer. "Sholem Aleichem" (Peace to you) his Hebrew readers called him. But so truly did he write the gay and the grave, the tender, the true, and the delightful that he gripped the hearts of his people.

Stories, humorous stories with a kindly cast, were what he was principally known for, but my colleague, Mr. SIEGEL, tells me that on the editorial pages of the Yiddish and Hebrew papers of our city he wielded a trenchant pen, and that in behalf of those in public life whom he cared for, in which category I was glad to be found, he wrote strong, persuasive words. Of the home, of husbands, of wives, and of little children he wrote, and the Jewish people, a home and family loving people, thronged our streets to honor his memory.

He rose superior to misfortune. A large fortune was lost in Russia, but no tinge of bitterness crept into his writings. His oldest son died, but the shining radiance of his affection turned his falling tears into a rainbow of promise. Through it he looked forward with hope, and under its arch his message to his people lost none of its tender sympathy. All his life he was the sincere friend of his people. When he died they passed by the tens of thousands beside his dead body in his humble home in The Bronx, and followed by scores of thousands his plain coffin to its last resting place. "Call no man happy until he is dead," said the cynic of old; but Sholem, the son of Rabinowitz, of the tribe of Manasseh, just a singer of songs as was David, King of Israel, from out the grave tells us that a lover of his kind who lives to make them happy may in his lifetime gain much joy and, dying, be mourned as the rich and the powerful rarely are. Throned in loving memories of real friends his kingdom is secure.

I append his unique and entirely characteristic will:

WILL OF SHOLEM ALEICHEM.

I ask that it be opened and published on the day of my death.

To-day, the day after Yom Kippur, a new year has just begun, and a great misfortune has befallen my family. My oldest son, Misha (Michael) Rabinowitz, has died, and with him part of my life has gone down into the grave. It remains for me now to redraw my will, which I had written in Nerve, Italy, when sick there in 1908.

Being in good health and of sound mind, I write my will, which consists of 10 parts:

I. Wherever I die I want to be placed not among aristocrats, or among the powerful, but among plain Jewish laborers, among the people itself, so that the gravestone that is to be placed upon my grave should illumine the simple graves about me, and these simple graves should adorn my gravestone, even as the plain, good people during my lifetime illumined their Folkschrieber.

II. No titles of any kind, with praises, with rabbinical honors, should be placed upon my gravestone, with the exception of the name Sholem Aleichem on the one side and the Jewish inscription, herewith inclosed, on the other side.

III. There should be no kind of debate or discussion among my colleagues as to making my name eternal, as to a monument to be erected in New York, etc. I shall not be able to rest quietly in my grave if my colleagues make themselves foolish. The best monument for me will be if my works are read and if there be found among the better-to-do classes of our people Maecenasas who will publish and distribute my works in Yiddish or in other languages, and thus give the people the possibility of reading and my family an honorable existence. If I have not been worthy or have not earned Maecenasas during my lifetime, perhaps I shall be worthy of them after my death. I go away from the world in the full belief that the people will not forsake my orphans.

IV. At my grave and throughout a whole year, and then every year on the Jahrzeit, my remaining son, and my sons-in-law if they are so minded, should say Kaddish after me. And if they do not wish to do this, or if they have no time for it, or if it be against their religious convictions, they can be absolved from this duty only if they all come, together with my daughters and my grandchildren and with good friends, and read this my will, and also select one of my stories, one of the really joyous ones, and read it aloud in whatever language they understand best, and let my name be mentioned by them with laughter rather than not be mentioned at all.

V. My children and children's children can have whatever religious convictions they will. But I beg of them to guard their Jewish descent. Those of my children who want to cut themselves off from their race and want to join another faith have by that very desire already cut themselves off from their race and their family, and have thus erased themselves from my will, "and they shall have no portion and inheritance among their brethren."

VI. Everything that I have, be it money—if any such thing be in my possession—be it books, printed or in manuscript, in Yiddish or in other languages (except those translated into Hebrew) belongs to my wife Hodel, the daughter of Elimelech (Olga Rabinowitz), and after her death it belongs to my children—in equal parts to my daughter, Chaye Esther Berkowitz; to my daughter, Sarah Kaufman; to my daughter, Naomi Rabinowitz; to my daughter, Miriam Rabinowitz; and to my son, Hanum Rabinowitz. And as to my works in Hebrew, they belong to that master translator, my son-in-law, J. D. Berkowitz, and to his daughter, my grandchild, Tamar Berkowitz—that should be her marriage dowry. The royalties which result from my plays in Russia or in America should go half to my heirs and half should be set aside in the name of my grandchild Bella, the daughter of Michael and Sarah Kaufman—that should be her marriage dowry.

VII. Out of all of the income mentioned in the foregoing paragraph there should be taken for the fund for Jewish writers (in Yiddish and in Hebrew) 5 per cent, up to 5,000 rubles, and if the income be more than 5,000 rubles a year, 10 per cent (e. g., from 6,000 rubles 600, from 7,000 rubles 700, from 8,000 rubles 800, etc.). If at that time there be such a fund here in America or there in Europe, the percentage shall be paid into the fund yearly, and the fund will act according to its statutes. If, however, at that time there be no official fund, or if there be a fund that does not correspond with my will as mentioned at the beginning of this paragraph, the percentages shall be distributed among the most needy authors by my heirs direct after agreement among themselves.

VIII. If I am not able during my lifetime to place a stone over the grave of my recently deceased son, Michael (Misha) Rabinowitz, in Copenhagen, my heirs should do this with a generous hand, and on his Jahrzeit every year Kaddish should be said, and there should be given to the poor 18 crowns charity.

IX. My wish is that my heirs should so arrange that my works and my plays be not sold in perpetuity either here in America or in Europe. They should try to live from the permanent income due them according to law. Should there, however, come a time, or should there be found such a fool who will pay for the privilege a sum that will suffice for the support of a family, then all the heirs shall consult with one another, and if the majority agree, the money should be divided, share and share alike, in accordance with Paragraph VII. But first of all the 10 per cent shall be deduced for the Jewish literary fund, in accordance with Paragraph VII.

X. My last wish to my successors and my prayer to my children:

To protect mamma, to beautify her old age, to make her bitter life sweet, to heal her broken heart; not to weep after me, on the contrary, to think of me with joy; and the main thing—to live together in peace, to bear no hatred one for another, to help one another in bad times, to remember one another upon occasion in the family, to have pity on a poor man, and when circumstances permit, to pay my debts, should I have any. Children! Carry with honor my hard-earned Jewish name, and may God in heaven come to your help. Amen!

SHOLEM BEN MENACHEM RABINOWITZ (SHOLEM ALEICHEM).

I also append an appreciative editorial from this morning's New York Times:

A TOUCHING APPEAL TO CHILDREN.

In the whole great domain of testamentary literature it would be hard to find a will better deserving to be viewed as a "human document" in the full sense of that term than is that of the man whose least apposite title was "the Jewish Mark Twain." It merits recognition as such because with remarkable clearness it reveals an equally remarkable personality, and so well explains why he preferred and successfully chose to be known among his own people by a name—"Sholem Aleichem"—the exact Hebrew equivalent of the Latin "pax vobiscum" and the English "peace be with you," than by one that referred to his extraordinary abilities as a humorist. Those abilities he had, but he had much more, else would he not have won, as the enormous popular demonstration at his funeral showed, the respect and affection which an amuser who is nothing else can never earn.

The distinctive quality of the man is perhaps best illustarted by the last clauses of his testament, called by him "my wish to my successors and my prayer to my children." They read:

"To protect mamma, to beautify her old age, to make her bitter life sweet, to heal her broken heart; not to weep after me, on the contrary, to think of me with joy; and the main thing—to live together in peace, to bear no hatred one for another, to help one another in bad times, to remember one another upon occasion in the family, to have pity on a poor man, and, when circumstances permit, to pay my debts, should I have any. Children, carry with honor my hard-earned Jewish name, and may God in heaven come to your help. Amen."

This paragraph, of course, should be read in connection with the rest of the will, as it reveals only one side of a many-sided, and yet harmonious and consistent, nature—one that could be proud of achievement and yet modest in appreciation of its kind and extent. And one of the very best features of the document, perhaps, is that in it there is nothing of an attempt firmly to fix a "dead hand" on the minds of those to whom it is addressed or to control from beyond the grave their actions in matters on which they should be left free to exercise their own judgment. Of that too common form of weakness and egotism "Sholem Aleichem" seems to have been without a trace. He advised and appealed, but he did not command or bind.

The CHAIRMAN. All time has expired, and the question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

POWERS OF NATIONAL FARM-LOAN ASSOCIATIONS.

SEC. 11. That every national farm-loan association shall have power:

First. To indorse, and thereby become liable for the payment of, mortgages taken from its shareholders by the Federal land bank of its district.

Second. To receive from the Federal land bank of its district funds advanced by said land bank, and to deliver said funds to its shareholders on receipt of first mortgages qualified under section 12 of this act.

Third. To acquire and dispose of such property, real or personal, as may be necessary or convenient for the transaction of its business.

Fourth. Against deposits of current funds, to issue certificates for $20 and $50, or any multiple of either, convertible into Federal farm-loan bonds; such deposits to be forthwith transmitted to the Federal land bank of the district. The land bank shall, as soon as practicable after the receipt of any money so deposited with any national farm-loan association, forward to such association Federal farm-loan bonds of a par value equal to the amount received from such association. Such association shall hold such bonds in trust, to redeem its outstanding convertible certificates, and shall not deliver them except in exchange and upon presentation for redemption and cancellation of an equal amount of such convertible certificates. When such certificates are redeemed by the association issuing them they shall be canceled. Such association may charge the holder of such certificates the actual expense incurred in forwarding the bonds from the land bank to the association, together with accrued interest. Such accrued interest, if collected, to be forwarded to the Federal land bank.

Mr. POWERS. Mr. Chairman, I move to strike out the last word. While this measure does not by any means put the Government back of the farmers' credit to the same extent——

Mr. GLASS. Mr. Chairman, I ask unanimous consent that debate on this section and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this section and amendments thereto close in five minutes. Is there objection?

Mr. McLAUGHLIN. Mr. Chairman, reserving the right to object——

Mr. McFADDEN. Mr. Chairman, I desire to make a statement in regard to the third clause of the section.

Mr. GLASS. Then I make it 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 10 minutes. Is there objection?

Mr. YOUNG of North Dakota. Mr. Chairman, reserving the right to object, I would like to have five minutes.

Mr. POWERS. Mr. Chairman, I make the point of order that the gentleman from Virginia can not break in on my remarks without first asking permission. I was recognized.

Mr. MANN. Is the request to close the debate on the amendment or on the section?

Mr. GLASS. I inquired if anyone wanted to offer an amendment, and nobody indicated they did.

Mr. MANN. Several gentlemen indicated to me that they did.

The CHAIRMAN. The Chair will state to the gentleman from Kentucky [Mr. POWERS] that the gentleman from Virginia [Mr. GLASS] was on his feet asking for recognition at the time the Chair recognized the gentleman from Kentucky, but the gentleman from Kentucky having been on his feet prior to the closing of debate on the last amendment, the Chair thought he would recognize him, though he also had the right to recognize the gentleman from Virginia, in charge of the bill, to submit a request for unanimous consent.

Mr. FESS. Mr. Chairman, a parliamentary inquiry. May I ask whether, when the gentleman from Kentucky is speaking, anyone can interrupt him without his permission, even to make a request for unanimous consent?

The CHAIRMAN. He can not; but the Chair made that statement to indicate that it was his duty, probably, to recognize the gentleman from Virginia, in charge of the bill.

Mr. GLASS. I do not want to cut anybody off who desires to offer a specific amendment to any section of the bill, but I do not want to lose time on these pro forma amendments. I ask unanimous consent that debate on this section and amendments thereto close in 10 minutes.

Mr. MANN. Make it 15.

Mr. GLASS. Very well; I will make it 15.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 15 minutes. Is there objection? [After a pause.] The Chair hears none, and the Chair recognizes the gentleman from Kentucky [Mr. POWERS].

Mr. POWERS. Mr. Chairman, while this measure does not by any means put the Government back of the farmers' credit to the same extent that another measure passed by Congress puts the Government back of the bankers' and business men's credit, still I expect to give this bill my support, although I am afraid it will not do the farmers much good. It is not what they are entitled to. This bill will not help the poor man who owns no farm.

I am in favor of the proper sort of rural-credits legislation. I have been advocating it for years and I had hoped that the system, when once set up, would at least be free from the evils of the spoils system. The country would be inclined to overlook any ordinary errors of judgment that might be made in an honest endeavor to work out and set up a system of rural credits for the benefit of the agricultural interests of our Nation; but it will not overlook the deliberate injection of the admittedly injurious effects that will result from the placing of it under the spoils régime. The country had a right to expect better at the hands of the Democratic Party—that is, it did at one time. And while it is my purpose a little later on to offer some observations upon the merits of the bill before us, it is not out of place at this time to call attention to one more of the long list of oft-repeated broken promises of the Democratic platform upon which the Wilson administration was elected.

One plank of the Democratic platform adopted at Baltimore, July 2, 1912, reads, in part, as follows:

> The law pertaining to the civil service should be honestly and rightly enforced, to the end that merit and ability shall be the standard of appointment and promotion rather than service rendered to a political party.

And yet in the face of that sacred pledge to the people of this great country, we find deliberately and advisedly placed in the bill before us a provision that all the "attorneys, experts, assistants, clerks, laborers, and other employees, and all registrars, examiners, and appraisers" to be appointed by the Federal loan board shall not, before appointment, be required to pass a civil-service examination, but may be selected, and doubtless will be selected, from that long list of "deserving Democrats" whose chief qualifications are that they have rendered, and are still willing to render, valuable party service.

Mr. Chairman, the purpose of the amendment I propose is to force all these employees to pass, before appointment, a civil-service examination.

But few of the farmers of our country have ever sought political preferment. The business of their lives is far removed from that ever-continuing struggle for place and power. They have never stood at the public trough, nor waited before the pie counter. "The loaves and fishes" of Government have gone to other hands. All they wish or have ever asked for is good government—efficient government. They are entitled to this. They are entitled to have, free from every vestige of the spoils system, the rural-credits legislation, alleged to be intended for their benefit.

Merit alone should be the standard of appointment of all the employees whose services are required to put into effective operation and keep in effective operation the system of rural credit we are about to set up. Time forbids me at this time to discuss the merits of this measure.

The amendment I have proposed, putting these employees in the classified service, ought to be adopted, but well do I know that it awaits undoubted defeat. The purpose of the Democratic Party is to fill all these places with "deserving Democrats," and after it has done that it then proposes to have President Wilson, by Executive order, place them in the classified service for life. The bill now under consideration makes provisions for that. It says "that nothing herein shall prevent the President from placing said employees in the classified service."

Woodrow Wilson will be President until next March the 4th. After that it will be back to Princeton with the President. In the meantime and before he goes out of office and after these places are all filled with deserving Democrats he will issue an Executive order putting them into the classified service, and thereby the spoils system will be fastened on the farmers of this generation for the rest of their natural lives. It will be fastened on them by President Wilson. It will be fastened on them by the once vice president of the National Civil Service Reform League. As I said, it will be fastened on them by President Wilson, who was vice president of this league up to the time of his election, and who when a candidate for President wrote to it as follows:

> I am a hearty believer in the principles of civil-service reform and shall take pleasure at all times in doing what I can to promote those principles in practice.

And the President who wrote these lines has done more to debauch civil service and its principles than any other President that has ever occupied the White House. From March 4, 1913, to May 13, 1916, he has admitted to the service by Executive orders 253 persons, waiving the civil-service rules in so doing.

As soon as he was inducted into office, if not before that date, he surrendered body and soul to the hungry horde of Democratic office seekers who raised the Jacksonian cry "To the victor belongs the spoils."

A good deal of the extravagance and most of the inefficiency of the Wilson administration is due to its flagrant disregard of both the spirit and the letter of the civil-service laws.

When the candidates of the Democratic Party and President Wilson come before the electorate of this country in the approaching November election, seeking an indorsement of what they have done, the voters will remember that the Democratic Party in the Baltimore platform, upon which its candidates were then elected, pledged itself to the maintenance of the merit system in Government service. They will not forget that President Wilson, the professed friend of the principles of civil service, and pledged to their practice, has issued more Executive orders relieving job-seeking Democrats from the operation of the civil-service law than any other President this country has ever had.

He has been utterly oblivious to the demoralizing effect his course has had upon the public service in his mad efforts to provide places for faithful party workers.

The Democratic Congress, with the hearty cooperation and approval of the President, has let no opportunity pass to set aside the provisions of the classified-service law so as to make way for the onward march of "deserving Democrats" and ardent champions of the spoils system—champions of it when it is to their political advantage so to do.

The very first law—the Underwood Tariff Act—that was passed after the Wilson administration came into power, exempted from the civil-service regulations more than 600 agents, deputy collectors, inspectors, and other income-tax employees to be employed in the collection of the new internal-revenue taxes.

In the very first general deficiency bill put upon the statute books by the Wilson administration there was a provision authorizing appointments and removals, without reference to the civil-service act, of 1,145 deputy collectors of internal revenue and 176 deputy United States marshals.

When the Federal reserve banking law was enacted the Democrats, over the earnest protest of the Republican Members of Congress, inserted a provision in it exempting from the classified competitive test all appointees of the board.

By an act of December 17, 1914 (38 Stat., 789), over the protest of Republican Members of Congress, there were exempted from competitive test 200 employees in the Internal-Revenue Service to enforce the provisions of the act regulating the distribution and sale of narcotics.

By the act of December 26, 1914, the Democrats again ignored their platform pledge and exempted from the civil-service laws the secretaries, clerks, attorneys, special experts, and examiners in the Federal Trade Commission.

By an act of July 16, 1914, the Democrats again forgot all about their sacred promises to the American people to uphold the civil-service laws, when they exempted from competitive test the commercial attachés in the Department of Commerce.

The Democratic Party by the act of January 28, 1915, again reminded the American people that it had no regard for its platform pledges when it included in the Coast Guard, and relieved them from the civil-service laws, the members of the Life-Saving Service.

By the acts of March 4, 1913, August 1, 1915, and other acts, the Democrats have shown their utter disregard for civil-service laws and their platform pledges to uphold them.

Following the unhappy advent of the Wilson administration, with bugle blasts it manifested its purpose to put the 45,000 fourth-class post offices in this country into the classified service, or rather the people to fill them.

Where the salary of the office per annum ranged between $180 and $500, a competitive examination was required for appointment. The three making the highest average on the examination were eligible to appointment. Since the Democratic pie distributors had the right to recommend any Democrat in the list of eligibles, and since he was sure to be appointed, and since this by experience became to be an accepted fact among Republicans, naturally they did not trouble themselves to take the examinations, knowing that it would profit them nothing. In this way and by this clever ruse the Democratic politicians found a way to put deserving Democrats into most of the post offices of this whole country where the salary ranged from $180 to $500 annually. They did it, too, under the guise of extending the civil service. The postmasters in all the fourth-class post offices in the whole country, where the salary of the office is less than $180 annually, are now appointed upon the recommendation of post-office inspectors sent to the locality for that purpose. It is a well thought out scheme. It works like a charm.

Post-office inspectors under a Democratic administration naturally recommend, when they can, Democrats to hold the offices. No doubt they have been taught to believe that it stands them in hand to do this, since every post-office inspector appointed by this administration has been a Democrat. Not a single Republican have they appointed. By these methods substantially the whole post-office force of the country is now Democratic. I know that that is true in the district I have the honor to represent. Other Members of Congress say it is true as to their districts, although scattered here and there over the country are Republicans still holding on.

This complete overthrow of the merit system, the turning out of office trained and experienced Republicans, and putting in their places untrained and inexperienced Democrats, has given us the poorest mail service within the recollection of this generation.

Business men have bitterly complained at the confusion and delay in the transmission and delivery of the mails, but the rural districts have suffered most in the shortening and abolishing of rural routes for the sake of economy in the Post Office Department. And while it would appear that the Democratic politicians ought to be satisfied with the number of Republican postmasters they have turned out of office and the number of Democrats they have put in, still their thirst seems insatiable. Only last year they tried to put all the assistant postmasters of the country, in the larger sized offices, under the spoils system, but failed. Now they are trying a new method—now they are resorting to a most revolutionary and far-reaching plan to make a political machine out of the entire post-office force and system.

There passed the United States Senate on March 15, 1916, a bill styled a "postal-savings" bill containing this provision:

SEC. 18. That hereafter the Postmaster General may establish, under such rules and regulations as he may prescribe, one or more branch offices, nonaccounting offices, or stations of any post office for the transaction of such postal business as may be required for the convenience of the public.

It looks innocent. It appears harmless. Its purpose seems to be studiously concealed in the language used. Let me reveal its meaning through the gentleman from Wisconsin [Mr. STEENERSON], the ranking Republican member on the Post Office and Post Roads Committee. He said concerning it:

It amounts to this, that the Postmaster General can abolish some fifty-odd thousand post offices and annex them as substations to the principal offices that he may select. It is proposed by some to make the county a postal division under this bill, and the First Assistant Postmaster General stated in the hearings that he would have authority under the law to establish one post office in each county of the United States and have all the other offices as substations.

Now, there are 533 first-class offices, 2,139 second-class offices, 6,248 third-class offices, and 56,380 fourth-class offices in the United States. If that plan as proposed should go through, it would be possible, and it is evidently the intention of the department, to make one post office in each county. There are 3,000 counties in the United States. You would therefore abolish something like 55,000 or 56,000 post offices and make them substations. It would create that many vacancies to be filled, whether they appointed the old postmasters as superintendents of substations or selected new men. * * * If you pass this law you could make vacancies for 56,000 men, to be filled in this case by worthy Democrats, and then put them into the civil service forever. As to the efficiency, who can tell?

I do not believe this postal bill will become a law at this session of Congress. There are men in this House, Democrats though they are, who will not stand for this legislation.

In my judgment, the Democratic majority in this House is too small to pass this bill at this time, but with a larger Democratic majority, in all probability, it would go through. But that majority will not be larger for years to come. The people will have their say about that in November. When they have spoken again there will be returned to this House an old-time Republican majority.

The Democratic Party has been weighed in the balance and found wanting. It has failed to keep the faith.

The Democratic leaders have broken their Baltimore platform pledges on the immigration question and the labor question. They reversed themselves completely on the Panama Canal tolls plank. Their broken pledges of economy is known of all men and denied by nobody. The high cost of living has soared still higher since their advent into power, although they pledged themselves to reduce it at once. The only reason they can give for it is that it has gone higher because it has not come lower. They promised they would put a tariff law on the statute books of our country that would not injure legitimate industry. And yet but for the European war, the darkest and grimmest panic this country has ever seen would now be upon us. They said that the laboring classes, along with the great masses of our citizenship, were staggering under the weight and burden of robber protective tariff laws. They promised relief in free trade. They promised the laboring man cheap sugar for his breakfast coffee. They put it on the free list. The price went higher, and this country lost annually in revenues over $50,000. They promised cheap shoes for the poor man. They put hides on the free list, and the price of shoes are higher than ever before. They promised jobs for the laboring men. They fulfilled their promise by turning 5,000,000 of them out of employment. They promised a general reduction in the price of the necessaries of life. The average increase in price since the Democrats came in is about 17 per cent.

They pledged themselves to a single presidental term. They have broken that pledge in so far as in their power lies. It is the one pledge they are most anxious to break; but the American people will see to it that that pledge is not broken.

In the face of this amazing record, what faith can the American people place in the future promises of the leaders of the Democratic Party? Their appalling number of betrayed trusts considered, can they hope for a return to power by again making a lot of other promises, which in their turn could be and would be broken just as easily?

Mr. McFADDEN. Mr. Chairman, I desire to call the attention of the committee to the first paragraph of section 11, on page 99. In my judgment, it confers power on this board to acquire real estate, upon which it might erect buildings for the purpose of conducting the business of these 12 banks. It seems to me that provision is a pretty generous authority to be given under this section and might lead to the erection of additional Government owned and controlled buildings,

and thus tie up in permanent investment the working capital which is advanced by the United States.

Mr. YOUNG of North Dakota. Mr. Chairman, I would like to ask the gentleman from Virginia a question, if he will be kind enough to give me his attention. Is there anything in this bill which permits general deposits in banks?

Mr. PHELAN. Mr. Chairman, with the permission of the gentleman from Virginia, I will say that there is no provision which permits general deposits, if by general deposits the gentleman means deposits from anyone.

Mr. YOUNG of North Dakota. I would like to ask the gentleman why he calls these banks at all? Are they not just simply Government loan agencies?

Mr. PHELAN. These banks receive deposits and they do make loans, and those are the functions of a bank. Banks, to be sure, in many cases have a third function of issuing notes; but an institution may be called a bank if it makes loans and receives deposits, and they do receive deposits.

Mr. YOUNG of North Dakota. As I understand it, no deposits are provided for excepting those contained in section 11, which are not deposits in the ordinary acceptation of that word. This section simply provides for payments to the banks for bonds. The banks are simply to take in the money and forward it for bonds. They are not general deposits nor time deposits. Webster defines a bank in this way:

> An establishment for the deposit, custody, and issue of money, and also for making loans and discounts and facilitating the transmission of remittances from one place to another.

It would seem to me that the agencies created by this bill might be more appropriately and sincerely called Government loan agencies. There is nothing in the bill if it should be operated for a hundred years, so far as I can see, that will ever take the farmer out of the position of having to go to somebody else to get his money. There is nothing here that will help the farmer to establish a real bank through which money will be slowly collected and conserved even if it should take a quarter of a century, so that they would some time come to the point where others would not fix the rate for them. At this time the price is fixed by some one else on everything that the farmer buys and everything that he sells. On everything that he borrows at this time the terms are fixed by some one else. I am absolutely unable to find anything in the bill whereby if these banks be operated for a hundred years or two hundred years the farmer will ever be taken out of that position. It seems to me that what is of very much greater importance than Government aid is to make these institutions real banks, make them banks of deposit so that the farmers can some time in future history get to the point where they will have some independence, and have something to say at least in fixing the conditions of their own credit and in financing their own business.

Now, as to the item of cooperation. I am also unable to find any cooperation in this bill. The only principle upon which they are to share anything is to share the liabilities, and there certainly are going to be some. The Federal reserve act has failed to meet the expectation even of its friends. The complaints most frequently heard against it are along the line that there is too much machinery connected with it. There are some good features to the Federal reserve act; but all the good features that are provided for in that act might very well be taken care of in a bureau of the United States Treasury. So, also, all the good features of this bill could be taken care of with very much less expense and red tape, and I think that a serious mistake is being made in this bill to load it up with a lot of machinery, expensive machinery, which is entirely unnecessary.

When the Federal reserve bill was before Congress every official, almost, from the President of the United States down promised the farmers a real, genuine rural-credit bank of their own that would some day make them independent. What are they being given? Something not worthy of being called a bank. The most important function of a bank is lacking—deposits. The bill, in fact, provides only for loan agencies. It is conceivable that some good may be done by such agencies in some localities, but it is monstrous to think or say that the farmers are to have what they were promised—a real bank.

Mr. Chairman, there was a time when the committee had in the bill a provision permitting general deposits of money to be made, and they expected to report out the bill to the House in that form. Why was the change made? At whose request, and upon what theory? These are questions which should and must be answered sooner or later. So far as the provisions of this bill are concerned, those who control the present sources of money and credit will remain in control for all time.

The CHAIRMAN. The time of the gentleman has expired.

Mr. McLAUGHLIN. Mr. Chairman, I desire to offer an amendment, and I offer that amendment to be added to line 6, page 99.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

> Add, at the end of line 6, page 99, the following: "That no mortgagor shall in any manner or to any extent be held liable beyond or in excess of the amount of principal and interest unpaid on his own mortgage."

Mr. McLAUGHLIN. Mr. Chairman, the first power of the loan association to be organized under this section of the bill is to indorse and thereby become liable for the payment of mortgages taken from its shareholders. These associations, as I understand, are to be made up of borrowers, farmers who have mortgaged their farms to obtain money in some way or another from the funds available for the purpose.

Other features of the bill provide that the borrower shall become liable, in excess of the amount of his own loan, for 5 per cent of his loan originally and for 5 per cent more under certain circumstances; but the provisions of this section to which I offer an amendment, it seems to me, would make these associations, made up of individual borrowers, liable for the entire sum of all mortgages, and, of course, each member of the association would be liable to the extent of his ability to respond, certainly to the extent of the amount for which he has mortgaged his property or to the value of his property placed under mortgage.

Mr. PHELAN. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. PHELAN. I will state positively that that is not so, and that there is no construction of the bill under which it can be so interpreted.

Mr. McLAUGHLIN. Mr. Chairman, the fact is that after a careful reading of these provisions, and of this one in particular, by myself and other Members, we are led to the conclusion that the interpretation I have given is proper evidence at least of the difficulty of construing it and, further, that it ought to be amended so that there will be no misunderstanding, and so that the responsibility of the individuals composing the associations may be made clear.

Now, it seems to me that under this bill as it stands, if a lot of farmers, all of them borrowers, form an association, that association will be required to indorse and become liable for the payment of the mortgages of all of the members.

Mr. SWITZER. Will the gentleman yield?

Mr. McLAUGHLIN. In a moment—makes it clear each and every individual borrower must become liable to the extent of his property, certainly to the extent of the loan that he has made from this association.

Mr. SWITZER. Will the gentleman permit a question?

Mr. McLAUGHLIN. Yes.

Mr. SWITZER. The other parts of the act fix the liability not to exceed 10 per cent of the amount he borrows. Now, I am in sympathy with the gentleman——

Mr. McLAUGHLIN. Other parts of the act relating to farm-loan associations alone?

Mr. SWITZER. He is responsible, of course, for the 5 per cent of the stock he has already paid in and also 5 per cent additional liability——

Mr. McLAUGHLIN. That is true as to the——

The CHAIRMAN. The time of the gentleman has expired.

Mr. SWITZER. Mr. Chairman, I will ask that the gentleman have two minutes.

The CHAIRMAN. There are two minutes remaining. Is there objection to the gentleman from Michigan consuming those two minutes? [After a pause.] The Chair hears none.

Mr. McLAUGHLIN. Now, I will say that is true, as I understand, as to some other features of the bill, some other kind of organization effected under this bill; but here is a clear provision, it seems to me, that the stockholders, already members of the association, shall be liable for the full amount of all the mortgages.

Mr. SWITZER. Here is my question: Does not the amendment of the gentleman make each individual borrower liable to the full extent of his mortgage and increase the liability?

Mr. McLAUGHLIN. I believe not.

Mr. SWITZER. It seems to me like it does.

Mr. McLAUGHLIN. I think it does not in any manner.

Mr. SUMNERS. Will the gentleman yield?

Mr. McLAUGHLIN. I will.

Mr. SUMNERS. Are not these institutions incorporated under laws, holding a charter?

Mr. McLAUGHLIN. Oh, no; except that this law be presumed——

Mr. SUMNERS. But they have to get a charter, and if they do get their charter, under the charter the liability of the stockholder is limited to the amount of stock he subscribes.

Mr. McLAUGHLIN. I think the only safe way is to express it in words limiting that liability. I think one of the very

objectionable if not the fatal feature of this bill is that the borrower is made liable to some extent beyond the amount of his own borrowing, and we will find in the practical operation of this law that the farmer borrowers will refuse altogether to borrow money if their liability is to extend beyond the amount they themselves borrow.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Michigan.

The question was taken, and the amendment was rejected.

Mr. YOUNG of North Dakota. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. YOUNG of North Dakota: Page 100, line 7, after the word "bank," insert "Fifth. Receive general deposits of money."

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

RESTRICTIONS ON LOANS BASED ON FIRST MORTGAGES.

SEC. 12. That no Federal land bank organized under this act shall make loans except upon the following terms and conditions:

First. Said loans shall be secured by duly recorded first mortgages on farm land within the land-bank district in which the bank is situated.

Second. Every such mortgage shall contain an agreement providing for the repayment of the loan on an amortization plan by means of a given number of annual or semiannual installments sufficient in amount to cover, first, interest on the loan at a rate which shall be the same as that of the last series of farm-loan bonds issued by the bank making the loan; second, a charge for administration and profits at a rate which shall not exceed 1 per cent per annum of the outstanding loan; and, third, such amounts to be applied on the principal as will extinguish the debt within an agreed period, not less than 5 years nor more than 36 years: *Provided*, That after 5 years from the date upon which a loan was made additional payments in sums of $25, or any multiple thereof, for the reduction of the principal may be made on any regular installment date under the rules and regulations of the Federal farm-loan board.

Third The rate of interest charged for such loans shall not exceed 6 per cent per annum.

Fourth. Such loans may be made for the following purposes and for no other:

(a) To provide for the purchase of land for agricultural uses.

(b) To provide for the purchase of equipment and live stock necessary for the proper and reasonable operation of the farm; the term "equipment" to be defined by the Federal farm-loan board.

(c) To provide buildings and for the improvement of farm lands; the term "improvement" to be defined by the Federal farm-loan board.

(d) To liquidate indebtedness of the owner of the land mortgaged, existing at the time of the organization of the first national farm-loan association established in or for the county in which the land mortgaged is situated, or indebtedness subsequently incurred for one of the purposes above mentioned.

Fifth. No such loan shall exceed 60 per cent of the value of the land mortgaged and 20 per cent of the value of the permanent, insured improvements thereon, said value to be ascertained by appraisal, as provided in section 10 of this act. In making said appraisal the value of the land for agricultural purposes shall be the basis of appraisal and the earning power of said land shall be a factor. A reappraisal may be permitted at any time in the discretion of the Federal land bank, and such additional loan may be granted as such reappraisal will warrant under the provisions of this paragraph. Whenever the amount of the loan applied for exceeds the amount that may be loaned under the appraisal as herein limited, such loan may be granted to the amount permitted under the terms of this paragraph without requiring a new application or appraisal.

Sixth. No such loan shall be made to any person who is not at the time, or shortly to become, engaged in the cultivation of the farm mortgaged. In case of the sale of the mortgaged land, the purchaser shall have the option within 60 days to assume the mortgage and stock obligations of the mortgagor on the mortgaged farm. In case of the death of the mortgagor, his heir or heirs, or his legal representative or representatives, shall have the option, within 60 days of such death, to assume the mortgage and stock obligations of the deceased on the mortgaged farm.

Seventh. The amount of of loans to any one borrower shall in no case exceed a maximum of $10,000.

Eighth. Every applicant for a loan under the terms of this act shall make application on a form to be prescribed for that purpose by the Federal farm-loan board, and such applicant shall state the objects to which the proceeds of said loan are to be applied, and shall afford such other information as may be required.

Ninth. Every borrower shall undertake to pay when due all premiums on insurance and also all taxes and local assessments which may be lawfully assessed against the land mortgaged.

Tenth. Every borrower who shall be granted a loan under the provisions of this act shall enter into an agreement, in form and under conditions to be prescribed by the Federal farm-loan board, that if the whole or any portion of his loan shall be expended for purposes other than those specified in his original application, or if the borrower shall be in default in respect to any condition of the mortgage, the whole of said loan shall, at the option of the bank holding same, become due and payable: *Provided*, That the borrower may use part of said loan to repay any sum borrowed to pay for his stock in the national farm-loan association, and the land bank holding such mortgage may permit said loan to be used for some other purpose specified in this section.

Mr. PHELAN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr PHELAN: Page 101, line 3, after the word "principal," insert the words "or the payment of the entire principal due."

Mr. PHELAN. Mr. Chairman, the purpose of that may be briefly stated. As the section reads it permits the application upon the principal of $25 or any multiple thereof. It may call for a reduction of something other than a multiple of $25. It may be $27 or $23, and this amendment would take care of that.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Massachusetts.

The question was taken, and the amendment was agreed to.

Mr. MOSS of Indiana. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

Mr. MOSS of Indiana. It is a committee amendment.

The Clerk read as follows:

Page 100, strike out lines 15 to 25, inclusive, and on page 101, strike out lines 1 to 5, inclusive, and insert in lieu thereof the following:

"Second. Every such mortgage shall contain an agreement providing for the repayment of the loan on an amortization plan by means of a fixed number of annual or semiannual installments sufficient to cover, first, a charge on the loan which shall be at the same rate as the interest rate in the last series of farm-loan bonds issued by the land bank making the loan; second, a charge for administration and profits which shall not exceed 1 per cent per annum on the outstanding loan, which two charges combined shall constitute the interest rate on the mortgage; and, third, such amounts to be applied on the principal as will extinguish the debt within an agreed period, not less than 5 years nor more than 36 years: *Provided*, That after five years from the date upon which a loan was made additional payments in sums of $25, or any multiple thereof, for the reduction of the principal may be made on any regular installment date under the rules and regulations of the Federal farm-loan board: *And provided further*, That before any farm-loan bonds shall have been issued by any land bank the interest rate may be determined in the discretion of said land bank subject to the provisions and limitations of this act."

Mr. MOSS of Indiana. Mr. Chairman, the gentleman from Illinois very pertinently called the attention of the committee to the fact that perhaps the interest rate, as contemplated in this bill, was not accurately defined in this section. It was the intention of the committee in framing this language to make the interest rate include an amount equal to the interest on the bonds for which the mortgage would stand as security, plus whatever charge the bank might make for administration. And in order to make it perfectly plain we divided the installment into three primary elements. Now, all that this amendment does is, it states that the first element, namely, an amount equal to the amount which would be paid on interest on a bond that had been issued to secure money to make the loan, and the amount which the bank would charge for administration, not exceeding 1 per cent on the unpaid principal loaned, when combined, should constitute the interest rate.

Mr. HAWLEY. When the gentleman has concluded his statement I would like to ask him a question.

Mr. MOSS of Indiana. I yield for that purpose.

Mr. HAWLEY. In the amendment offered by the gentleman from Indiana he provides that the interest on the mortgages taken succeeding any bond issue should be taken "at the same rate as" the bond issue. This condition might arise: The market might have absorbed that bond issue at a premium, so that the next bond issue can be made for a somewhat materially lower rate of interest. I would like to ask the gentleman if it would not be advisable that a mortgage taken after the bond issue shall "not exceed" the rate of interest at which the bonds were floated. That would give the farmer the advantage of the declining interest rate.

Mr. MOSS of Indiana. I will say to the gentleman from Oregon that that condition has been considered by the committee, but we believe that the wording can be worked out in conference better than on the floor of the House.

Mr. HAWLEY. I would suggest to strike out the words "shall be the same as" and say "shall not exceed that."

Mr. MOSS of Indiana. There may arise a condition where the bank would not be able to loan at the same rate of the last bond issue. It might require the rate to be raised or to be lowered, and there might be a reciprocal arrangement brought about. The committee desires to pass that question over to the conferees and let them work it out.

Mr. HAWLEY. With the provision that they allow discretion to the farm-land bank issuing the bond that, as the condition of the market justifies it, the farmer shall be given the advantage of the declining rate.

Mr. MOSS of Indiana. It has that power now.

Mr. HAWLEY. It limits it to that rate.

Mr. MOSS of Indiana. I will say that I know the gentleman has given very careful attention to that matter. It is one upon which his judgment and mine may differ, as to the powers conferred on the farm-loan board.

Mr. HOWARD. Will the gentleman yield?

Mr. HAWLEY. Will the gentleman yield further?

Mr. MOSS of Indiana. I will yield to the gentleman from Oregon.

Mr. HAWLEY. Since you have submitted this amendment to paragraph 2, would it not be in the interest of simplicity and clearness for the paragraph marked 3 to be eliminated altogether? I do not see any use of it.

Mr. MOSS of Indiana. Personally I have no objection to the elimination. I do not know how the other gentlemen of the committee would view it.

Mr. HOWARD. I would like to ask the gentleman this question: His amendment does not in any way limit the provision in the bill that the maximum rate of interest on bonds shall not be in excess of 6 per cent?

Mr. MOSS of Indiana. Five per cent. That is in another section of the bill. This section does not change the meaning of that at all, except that it does definitely and clearly define the term "interest rate" as the committee used it in framing this bill.

Mr. HOWARD. If the gentleman will please refer to page 101, line 6, it is there stated, in the third section, that—

The rate of interest charged for such loans shall not exceed 6 per cent per annum.

Does that mean 5 per cent plus 1 per cent for expenses or 6 per cent plus 1 per cent?

Mr. MOSS of Indiana. It means 5 per cent plus 1 per cent, and it is made perfectly plain in this amendment which we have submitted.

Mr. HOWARD. That is what I wanted to know.

Mr. MORGAN of Oklahoma. I notice, in lines 22 and 23 of page 100, it is provided that the charge for administration and profits shall not exceed 1 per cent per annum of the outstanding loan.

Now, the gentleman intends by that language to mean 1 per cent—and it is included in his amendment in the same language—

One per cent per annum of the amount due on the outstanding loan.

Mr. MOSS of Indiana. That is precisely what the language means. You do not have anything outstanding except that part which is unpaid.

Mr. MORGAN of Oklahoma. It seems to me that that might be capable of misconstruction or misunderstanding.

Mr. MOSS of Indiana. I will say to the gentleman from Oklahoma that such result hardly seems possible. No man has a loan outstanding after he has paid it off.

Mr. MORGAN of Oklahoma. I will ask the gentleman if he does not think it would make it clearer and more definite if he would insert, after the word "of," in line 22, the words "the amount due on the outstanding loans"? That would make it absolutely definite and certain.

Mr. MOSS of Indiana. This language has been worked over repeatedly by the committee. I will say to the House that we found this to be the most difficult section in the bill to express. The members of the committee have worked on it at different times, I may say for at least a month, and I will guarantee that this language has been rewritten by the different members of the committee at least a hundred times. Every member of the committee worked on the language over and over again, and we believe it now expresses exactly what the committee intended and will mean what every Member on the floor wishes it to mean.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I would like to get a little information if I can. As I understand, while the interest on the bonds shall not exceed 5 per cent, it is not necessary that it should be uniform throughout the United States. Is that correct?

Mr. MOSS of Indiana. That is true.

Mr. MANN. It may be different in different districts?

Mr. MOSS of Indiana. Yes.

Mr. MANN. Provided it does not exceed 5 per cent?

Mr. MOSS of Indiana. Yes. It may not exceed 5 per cent in any district.

Mr. MANN. Now, you provide here, first, interest on the loan; that is 5 per cent. Then you originally provided for 1 per cent administration charges on the outstanding loans. Do you endeavor to make a distinction between interest on the loan at 5 per cent and interest on the outstanding loan? In other words, is the 5 per cent to be charged on the full amount of the loan until it is all paid in, or is it to be charged only on the outstanding principal?

Mr. MOSS of Indiana. I will say to the gentleman that that matter is settled by the tables of amortization.

Mr. MANN. Oh, that matter is settled by the language of the law.

Mr. MOSS of Indiana. A man pays 5 per cent only on the amount of the loan remaining unpaid?

Mr. MANN. Then the language ought to be changed, so as not to say in one place "interest on the loan" and in another place "1 per cent on the outstanding loan," because there you make a distinction between the full amount of the loan, the face value, and the outstanding loan.

Mr. MOSS of Indiana. If that be true, to make it clear——

Mr. MANN. That is the reason I asked the question.

Mr. MOSS of Indiana. It certainly is not the intention of the bill to charge any man interest except upon the part of his loan which remains unpaid.

Mr. MANN. Then I should say "the outstanding loan" in the first case, as well as in the last case, because where you use two different expressions——

Mr. MOSS of Indiana. What suggestion does the gentleman make?

Mr. MANN. Just insert the word "outstanding," so as to make it read "the outstanding loan," in the first place.

Mr. MOSS of Indiana. On what page and line?

Mr. MANN. Page 100, line 19, in the bill as printed.

Mr. MOSS of Indiana. I will say to the gentleman that, as I am not a lawyer myself, I would much prefer that he permit that suggestion to go into the RECORD——

Mr. MANN. I am quite willing to do that. I am not offering any amendment. I am only calling attention to it. It is not wise ever, when you mean the same thing, to use two different expressions in two different places, because it is the duty of the court to see if you mean a different thing when you use different words.

Mr. PHELAN. I do not want to take the gentleman's time, but I want to say one word. The reason that was put in was this——

Mr. MANN. I am not complaining of why it was put in.

Mr. PHELAN. Under many systems they charge one-half of 1 per cent, or whatever the amount is, on the original loan.

Mr. MANN. I am calling attention to the fact that the language here is that the interest is on the loan——

Mr. PHELAN. I think it is better to make it clear, as the gentleman suggests.

Mr. MANN. You make a differentiation, and I did not think you intended to charge the interest on the full loan until the end.

Another thing I would like to call attention to, for the benefit of the committee, is this: This section provides that no Federal land bank organized under this act shall make loans "except upon the following terms and conditions." One of those terms and conditions is:

Fourth. Such loans may be made for the following purposes, and for no other.

Now, what happens if they loan a man money for some other purpose? Is this directory merely; or does it invalidate the loan? It seems to me that under the language of the bill it invalidates the loan; that the association has gone beyond the power conferred upon it, and if it lets a man have money for some other purpose or he uses it for some other purpose than that prescribed in the bill and you endeavor to foreclose, he can set up his answer that the loan is invalid.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Illinois yield to the gentleman from Arkansas?

Mr. MANN. Yes.

Mr. WINGO. Mr. Chairman, the gentleman certainly would not present that as a legal proposition.

Mr. MANN. I certainly do.

Mr. WINGO. Let me ask the gentleman this question: This foreclosure would come in the gentleman's State and in mine in a court of equity?

Mr. MANN. Yes.

Mr. WINGO. Would he in a suit in equity be permitted to set up that defense?

Mr. MANN. Certainly. He could not come into court for relief without clean hands, but he can set up any defense he pleases if he is brought into court. He is not asking for action by the court. He is denying the action of the court.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. MANN. Mr. Chairman, I would like to have five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MANN. If you say that the bank can not loan money except upon certain conditions, it has not the power to loan it otherwise. I would not say that the bank could not possibly sue him for the money advanced, but they could not foreclose

on his mortgage; and if the land had passed into the hands of a purchaser, you would have no lien on the land.

Mr. WINGO. The purchaser would take notice of the incumbrance upon it.

Mr. MANN. If the incumbrance is invalid, it would not make any difference whether there was notice or not.

Mr. WINGO. If there was notice, it would not be more invalid to the purchaser than to the borrower.

Mr. MANN. Well, that is neither here nor there. What I want to have is a clear understanding here. If it is the intention of the committee that a loan made to a farmer not for this purpose is valid, and that these directions are merely directions, let us make that clear, that the person who violates the law or the officers who loan the money will know it. But if it is the intention of the committee or the House in passing the legislation that the mortgage shall be invalid, let us make that clear.

Mr. BENNET. Mr. Chairman, will the gentleman yield?

Mr. MANN. Not for the present. I want to speak for a minute. Now, one of the main purposes of this bill is, and must be, to obtain for the farmers the benefit of good credit. That is the primary object of the bill. In many parts of the country where farmers now pay higher rates of interest than that provided in the bill the purpose of this bill is to enable people in other parts of the country, who have money that they want to invest, to invest it, so that the farmers may get the benefit of it at the rate of 5 per cent, and you can not do that unless your securities are beyond question. [Applause.]

If the farmer borrows money under the terms of this bill, and borrows it for some other purpose not authorized by the law, and obtains the money and a bond is issued against it, then the farmer can say, "True, I have borrowed this money, but it was a violation of the law. They had no right to loan it to me. My mortgage is not valid." If you can escape the validity of the loan in that way, you can never obtain credit in that way.

Mr. CULLOP. Mr. Chairman, will the gentleman yield there?

Mr. MANN. Not for a moment. I have an idea here that I want to express. You have got to make it clear, if you want to make it so that you can obtain money by investors. You have got to make it clear that nothing can defeat the foreclosure of these mortgages in the end. There is no other way to obtain the money. You can not obtain money at 5 per cent from people in New York to be invested in Arizona unless the people in New York who advance the money know that there is nothing in the way of a technicality which can defeat the enforcement of the payment by the borrower.

Now, I say that under the terms of this bill as now drawn, in my judgment, any loaning of money by these associations, if it was borrowed for some other purpose than that named here, would be ultra vires, in so far as this association is concerned, and that that defense could be set up in a suit to enforce the payment of it.

I yield now to the gentleman from Indiana.

Mr. CULLOP. Would not the mortgagor in the case the gentleman has put by his own action be estopped from making that defense, and nobody could make it but an innocent purchaser in good faith without notice?

Mr. MANN. Oh, all over the United States, a few years ago, municipalities were borrowing money on bonds, and then during a series of years of hard times they did not pay the bonds or the interest. Suits were begun all over this country against municipalities to enforce the payment of those bonds, and in every case the courts held that technical compliance with the law was necessary, and that the municipalities had the right to set up as a defense that the technicalities had not been complied with; and thousands and millions of dollars of bonds were defeated on that ground.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. CULLOP. Mr. Chairman, I do not agree with the gentleman from Illinois [Mr. MANN] on the legal proposition he has laid down in reference to the defense of a party who has executed a mortgage and secured a loan under this law. The mortgagor would be estopped under the law from setting up and maintaining in any court a defense of that kind. In other words, the law would not permit him knowingly to commit a fraud, be a party to it, and then take advantage of it to relieve himself from responsibility under the contract which was entered into by him.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. CULLOP. Certainly.

Mr. MANN. Whatever may be the facts about that, here is an argument—and the gentleman is a better lawyer than I am: Would it not be better to make it clear in this bill what we intend by it? If any such defense can be set up, let us say so, so that a man who wants to loan money on the bonds will know it, without having to argue it out in court some time hence.

Mr. CULLOP. There might be a difference of opinion in construing the measure. In my judgment, it is written in the bill. The bill itself as written carries in it the well-settled principles of law applicable to it, and therefore a party can not come into a court of justice under its provisions and take advantage of his own fraud or his own wrong and be relieved from his responsibility.

Mr. DILLON. Will the gentleman yield?

Mr. CULLOP. Yes.

Mr. DILLON. Is not the gentleman mistaken on this theory, that the party would have the right to defend, because, if unauthorized and without authority, the right of the Government would be for money had and received independent of the contract?

Mr. CULLOP. The right of action could be asserted under both theories and the pleader could set up both causes of action in a foreclosure suit where there was a default in the terms of the mortgage for the collection of a debt, and he would have the advantage of both of them on a suit to recover.

Mr. DILLON. His right of defense would be absolute, except that it was unauthorized and without authority. He could defend on that ground, but he could not defend on the ground that it was for money had and received.

Mr. CULLOP. The court would so hold, no doubt, and there is where the gentleman from Illinois would be correct, that an innocent purchaser in good faith could come into court and successfully defend on that ground. But one of the original parties to the transaction would not be able to take advantage of it and relieve himself of the liability and the law. Hence the measure should be made certain in this respect so as to obviate that danger.

Mr. HOWARD. Will the gentleman yield?

Mr. CULLOP. Yes.

Mr. HOWARD. Is it not a fact that the books are full in every State in the Union where a municipality has bonded itself for a specific purpose, to wit, to build a schoolhouse, and diverted that fund and used it for some purpose other than what the bonds were issued for, and the municipality came in and defended against the suit on the bonds and successfully defended it?

Mr. CULLOP. The gentleman is invoking a different principle of law which has no application here; it is not an analogous proposition in any respect whatever. It involves a different principle of law, where a municipality can defeat the issuance of bonds, to the principle involved in this proposition. The parties seeking relief in the question presented by the gentleman from Georgia are not parties to the contract, have not executed the contract, but it has been executed under some law by public officials for the benefit of the public in the discharge of a public duty, and the parties made responsible have not and could not in the nature of things participate in the execution of such obligations. Hence there is no analogy existing in the two propositions. I anticipate no dangers arising in this matter in the practical working out of this system under this provision.

Mr. RODENBERG. Mr. Chairman, I move to strike out the last word. I want to ask a question of some gentleman from Texas who is familiar with land titles in that State. I have received a letter from a former constituent of mine now living in Texas, asking for information which I can not supply. The letter is dated Fort Worth, Tex., May 2, and is as follows:

FORT WORTH, TEX., *May 2, 1916.*

Hon. W. A. RODENBERG,
*Washington, D. C.*

DEAR MR. RODENBERG: I formerly resided in Washington County, Ill., and was a constituent of yours for several years. For the past few years I have been engaged in farming near Fort Worth. I write you to ascertain whether the rural-credits bill will apply to Texas. I have read a good deal about the bill, and think it a good one, and I hope it will go through. I have been told that possibly it would not affect Texas because the lands here have never been surveyed and patented by the United States, and no one can tell what lands belong to Texas and what belong to persons claiming under grants made by Spain and Mexico before Texas came in as a State. Ever since I came here from Illinois I have heard that before you could get a fee-simple title to lands the Government would have to make a survey separating the vacant and unappropriated from the appropriated and separate the valid from the invalid land grants, and this can only be done by Congress. Until this is done all that we can hold in Texas is what we call a State possessory right. If this is the situation, would the Government approve a first mortgage on land here, so that we could take advantage of the rural-credits bill?

I may be mistaken about this matter, and I hope you will look into it and give me your opinion.

Very truly, yours, GEORGE E. WATTRUS.

Now, I would appreciate it if some gentleman from Texas could explain this.

Mr. HARDY. Mr. Chairman, I am glad to inform the gentleman from Illinois that his friend and former constituent has got a whole mare's nest of absolute absurdities. There is scarcely an acre of ground in my county to which the title is at all in question. Lands there—a great many of them—were not surveyed originally by the square system—miles, rods, acres, and so forth—but they were surveyed under grants, some of them from the old Mexican authorities, in leagues, labors, and square varas. In my county there is a survey of 11 leagues called the B. J. Chambers survey. A league is 2⅓ miles square, a labor is 177⅓ acres, and 5,645 varas make 1 acre—a vara being 33⅓ inches. There have in the past been some conflicts between these old surveys, but 95 per cent of all those conflicts have been settled, and loan companies have invested their money in loans upon the lands of Texas all over the State. There may be here and there a question in regard to title growing out of some defect in the chain of title, but there is absolutely nothing in the many fears and suggestions in the letter which has been read by the gentleman. The truth is, that until about 30 years ago there were a great many defective titles to lands in Texas, and a great deal of litigation between conflicting claims to land, but that has practically ended. Our people used to be careless about their deeds and title papers. They failed to record them and lost them or they would pay off their vendor's lien notes and fail to secure releases. When we began to deal with land-mortgage companies these companies insisted on clearing up the titles. These companies have been loaning money in Texas for over 30 years and to-day there is no question of the titles to 95 per cent of the lands of Texas. Our homestead laws are sometimes said to stand in the way of the operation of this law. That is true, where a man owns a home fully paid for, because our law prevents any incumbrance on the homestead except for purchase money—but this law can be used by persons in buying land for homes or in taking up and extending what they owe for purchase money, or any part of such purchase money provided only that the mortgage given to the land bank shall be the first lien on the property.

Mr. CARAWAY. Mr. Chairman, I wish to offer an amendment to the amendment of the gentleman from Indiana.

The Clerk read as follows:

Amend, on page 100, after the word "loan," in line 23, by inserting the following: "And which shall include the expenses incident to securing the loan by the borrower under provisions in this bill except the cost of procuring an abstract and subscription to stock."

Mr. GLASS. Mr. Chairman, I would like to find out how many amendments are likely to be offered to this section.

Mr. SUMNERS. I have one.

Mr. MORGAN of Oklahoma. I have five.

Mr. CARAWAY. Mr. Chairman, I want this amendment adopted to cure this defect. Under the provisions of the bill as now written, a man who seeks to become a borrower is subject to many expenses. Among these are the appraisement and examination of the title. If we could adopt this amendment and make this 1 per cent that is charged for administration expenses cover these expenses incident to procuring the loan, the original borrowers at least will come into the system under more equitable conditions than under the bill as now written. Under the present bill when a borrower shall go into the system he applies for a loan, we will say, for 36 years; the expenses incident to securing the loan which he must pay is a part of the salary of the secretary-treasurer, the appraisement, examination of title, and in addition pay this 1 per cent that is charged for administration. On maturity of his loan he is required to cancel out his stock at par. What is the injustice of this? The bill provides that he shall receive what dividends that stock may earn, but he does not get it for this reason: Twenty-five per cent of all the net earnings must be passed to a reserve until that reserve equals 20 per cent of the capital stock of the Federal land banks. For instance, if he goes into the system at the beginning and stays in for 36 years and pays in 1 per cent of the amount of his loan all those 36 years, 25 per cent of the net earnings of that stock for 36 years is passed to the reserve, unless the accumulation of 20 per cent has been made in less time than that. When he goes out all that reserve is left to the system; he pays it but does not participate in its benefits.

Under that system I think if a million farmers go into the system at the beginning and stay in for these 36 years, when they go out they will leave to the system anywhere from twenty to thirty millions of dollars. They accumulated it but can not enjoy its benefits. If this amendment is adopted and the expenses incident to procuring the loan are paid out of this 1 per cent, they are permitted to share to that extent in the earnings of their stock. There is one other reason: Even if he saves nothing by this amendment, and he would, he does not have to pay until he has received some benefits. The bill now provides that when a man procures a loan he has his land appraised. It is a little hazy as to whether that appraisement by the local committee is to cost him anything, but in one place it says that the expense of appraisement shall be paid by the borrower. After this local committee shall have made its report, the Federal land bank shall have an appraiser also make a report, the expense of which the borrower must pay. It provides in another section that the cost of determining the title shall be paid by the borrower. It may happen that a man will be compelled to pay out a considerable sum before he perfects his loan.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. CARAWAY. Yes.

Mr. FESS. According to that this section 3 fixing the maximum rate at 6 per cent does not mean what it says.

Mr. CARAWAY. I do not mean to say that it could raise the rate of interest above that, but it may mean that a man will have to pay——

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. CARAWAY. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CARAWAY. The rate of interest can not exceed 6 per cent, but it may cost the borrower considerably more than that, because, if he is compelled to be at the expense of a hundred dollars, say, to procure his loan, he pays 6 per cent, not on $900 but 6 per cent on $1,000, the face of his loan.

Mr. QUIN. How does the gentleman's amendment correct that?

Mr. CARAWAY. The amendment undertakes to say that this 1 per cent shall cover all of this expense of procuring the loan other than the cost of procuring an abstract and the subscription to the stock.

Mr. BARKLEY. Would the amendment also cover the expense of drawing the mortgage, the notary's fees, the jurats, and all those things?

Mr. CARAWAY. Everything except the expense of procuring the abstract and the payment of his initial stock investment. That is what I intend to do.

Mr. BARKLEY. Then under this amendment the 1 per cent would also cover the appraisal ordered by the Federal land bank after this committee has gone over it?

Mr. CARAWAY. Yes; and it should, because the original borrower does not get any dividend on his stock. He must give up 25 per cent of its net earnings to accumulating a 20 per cent reserve in which he never can share and be at other expense which wipes out all dividends. This places the initial borrower at a disadvantage, because this 25 per cent of the net earnings on his stock is contributed by him to build up a reserve for others to profit from. Therefore he should be relieved of all expense not strictly individual.

Mr. PHELAN. Mr. Chairman, I just want to say that if that amendment were adopted and did what the gentleman thinks it will do, the system would never get started. These banks can not pay for the looking up of titles and all of these other expenses.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arkansas to the amendment of the gentleman from Indiana.

Mr. HOWARD. Mr. Chairman, I want to ask the gentleman from Massachusetts a question. As I understand the gentleman's amendment, he exempted from this 1 per cent the expense of the title.

Mr. PHELAN. He thinks he does, but he does not.

Mr. CARAWAY. Oh, I know what I do.

Mr. PHELAN. He says "an abstract of title." In my State and in a dozen other States an abstract of title is not worth the paper it is written on. A man has to look up the title afterwards. We have had the same experience before. Members will take some local application and attempt to write it into the law and have it apply to the whole country. An abstract of title furnished to me in my State does not mean anything at all. After I get the abstract I have to have the title looked up and paid for.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this amendment be now closed.

Mr. CARAWAY. Mr. Chairman, I ask unanimous consent for one minute to answer the gentleman from Massachusetts.

The CHAIRMAN. There is one request for unanimous consent already pending.

Mr. GLASS. I have no objection to the gentleman having one minute.

The CHAIRMAN. Is there objection to the gentleman from Arkansas proceeding for one minute?

There was no objection.

Mr. CARAWAY. Mr. Chairman, the amendment introduced by myself, which the gentleman from Massachusetts assures the House would make it impossible for the banks to go into business if it should prevail, does not undertake to impair the capital stock of the bank at all, because it exempts the 5 per cent he must subscribe to the capital stock and the expense of procuring the title. It simply means to say that that expense in the examination of the title, appraisement, secretary hire, and recording title shall be paid by this 1 per cent collected for administrative and other expenses. That is all. The gentleman, as usual, did not know what he was talking about.

Mr. GLASS. Mr. Chairman, I renew my request.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this amendment be now closed. Is there objection?

Mr. MAPES. Mr. Chairman, is that to the substitute or to the amendment offered by the gentleman from Indiana?

The CHAIRMAN. On this amendment and——

Mr. GLASS. On this amendment and the substitute.

The CHAIRMAN. If the Chair understands, the gentleman from Virginia asks unanimous consent that all debate on the Moss amendment——

Mr. GLASS. On the pending amendment.

The CHAIRMAN. On the pending amendment shall now close. Is there objection?

Mr. HAWLEY. Mr. Chairman, reserving the right to object, I have an amendment I want to offer and discuss for two or three minutes. The amendment I desire to offer is an amendment to the amendment offered by the gentleman from Indiana, and I should like to discuss my proposed amendment two or three minutes.

Mr. GLASS. I have no objection to that; I am asking to close debate on the pending amendment.

Mr. HOWARD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. HOWARD. Does that prevent the introduction of other amendments to the section?

The CHAIRMAN. Certainly not.

Mr. BARKLEY. The gentleman's request was to the Caraway amendment.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate be closed on the Caraway amendment. Is there objection? [After a pause.] The Chair hears none. The question is on the amendment offered by the gentleman from Arkansas to the amendment offered by the gentleman from Indiana.

The question was taken, and the Chair announced that the "noes" seemed to have it.

On a division (demanded by Mr. CARAWAY) there were—ayes 21, noes 42.

So the amendment was rejected.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman permit me to make a request—to ask unanimous consent to offer a modification of my amendment?

The CHAIRMAN. The gentleman from Indiana asks unanimous consent to modify his amendment. Is there objection? [After a pause.] The Chair hears none.

Mr. MOSS of Indiana. Mr. Chairman, I ask to modify my amendment so as to include the amendment of my colleague [Mr. PHELAN] offered on behalf of the committee, and which was adopted previously.

The CHAIRMAN. Is there objection to the amendment being modified as indicated by the gentleman from Indiana? [After a pause.] The Chair hears none. The gentleman from Oregon offers an amendment, which the Clerk will report.

Mr. PHELAN. After the words "reduction of the principal" insert "or the payment of the entire principal due."

The CHAIRMAN. That amendment has been agreed to and by unanimous consent is incorporated in the amendment of the gentleman from Indiana.

Mr. WINGO. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. WINGO. As I understand the object of the gentleman from Indiana it was to meet this situation, and I want to see that it has been met by the action of the committee. The gentleman from Massachusetts offered an amendment, which was accepted, to the original text as appears in the printed bill, and the gentleman from Indiana then offered an amendment which is a substitute for the entire text. Now, his request was that the amendment be modified to the extent of the amendment which had already been adopted to the original text.

The CHAIRMAN. The Chair put that unanimous-consent request and all this is superfluous.

Mr. WINGO. The Chair is certain that has been done, then?

The CHAIRMAN. The gentleman from Oregon offers an amendment which the Clerk will report.

Mr. HAWLEY. In that part of the amendment of the gentleman from Indiana where it says, "First, interest on the loan at a rate which shall be the same as that of the last series of farm-loan bonds," and so forth, strike out the words "be at the same as" and insert the words "not exceeding," so that it will read:

First, interest on the loan at a rate which shall not exceed that of the last series of farm-loan bonds, etc.

Mr. SHOUSE. Will the gentleman yield? The gentleman from Indiana has substituted an entire section for that. The gentleman must amend his amendment.

Mr. HAWLEY. I am asking to do that.

Mr. SHOUSE. The gentleman did not read the text right. I suggest the gentleman get his text and amend that.

Mr. HAWLEY. My amendment proposes that the phraseology in the amendment where it says the loan to the farmer shall be at a rate of the last bond issue be changed so that it shall be at a rate not to exceed that of the last bond issue.

The CHAIRMAN. The gentleman from Oregon offers an amendment which the Clerk will report.

The Clerk read as follows:

In the fourth line of the Moss amendment strike out the words "be at the same rate as" and insert "shall not exceed."

Mr. MOSS of Indiana. Will the gentleman permit a question?

Mr. HAWLEY. If the gentleman will proceed, I have only five minutes. I will be glad to yield to the gentleman.

Mr. MOSS of Indiana. I desire to ask if the gentleman had taken into consideration the fact that the farm-loan board under this is given the power to fix the rate of interest on the bonds, and that each new issue of bonds must have a decision from the farm-loan board, therefore it is incredible that the conditions which the gentleman seeks to cure can arise.

Mr. HAWLEY. If the gentleman is right, the language of the amendment is not correct. This is the purpose here. The land bank sells an issue of 5 per cent bonds running for five years, and the condition of the market is such that they have been taken by investors on a 4¾ interest basis, which would be at a price of 101.10, or 1.10 premium.

That is, the bonds sold better than was anticipated when they offered them. Now, they propose to loan money to the farmers out of the proceeds of these bond sales and other money in their banks. Now, under the provision in the bill they must charge the farmer 5 per cent.

Mr. MOSS of Indiana. Now, if the gentleman will yield, that objection is corrected in the form in which the amendment is offered, namely, that the banks must loan under the regulations and limitations of the bill. The farm-loan board is given specific authority in section 4 to review and alter the rates made to borrowers.

Mr. HAWLEY. What does it mean here by saying that the interest on the loan at a rate which "shall be the same as" that of the last series of farm-loan bonds?

Mr. MOSS of Indiana. I will say to the gentleman that this amendment seeks to make a new definition of the rate of interest. The rate of interest as fixed in the new amendment may be 1 per cent higher than that on the bond; but whether it shall be 1 per cent higher or one-tenth of 1 per cent higher is left in the amendment to the discretion of the farm-loan board.

Mr. HAWLEY. This is the situation I am trying to cure, and I doubt if the gentleman has cured it in his amendment. As I said a moment ago, a land bank sells an issue of 5 per cent bonds in a favorable market on a 4¾ interest basis. These sold at 101.10 premium. Therefore there is a market for those bonds at 4¾ per cent interest when offered and sold at par. The bank ought not to charge the farmers a rate of interest greater than the rate they can sell their bonds at par for.

Mr. WINGO. Will the gentleman yield right there?

Mr. HAWLEY. And if the bonds sold above par, they are taking from the farmer an amount of money that ought not to be taken from him.

Mr. WINGO. I think I am in accord with the gentleman's view on that point. Your amendment, instead of making the language mandatory as to what the rate of interest shall be, says it "shall not exceed"?

Mr. HAWLEY. Yes.

Mr. WINGO. That makes it possible to make the rate of interest upon the loans that were made subsequent to a 5 per cent issue 4¾ per cent?

Mr. HAWLEY. Yes. Instead of requiring the bank to be bound by an iron-clad phraseology, it says "not exceed." It

gives them all the power they have now and gives them power to reduce the rate.

Mr. WINGO. I agree with the gentleman.

Mr. SHOUSE. Has the gentleman taken this into account. A situation might arise where they would be able to put out a bond issue at 3 per cent under the most favorable conditions. Then conditions six months later might not be so favorable. Now, if the amendment of the gentleman were adopted, would it be possible to put out a 3½ per cent bond issue three months later?

Mr. HAWLEY. It would not affect that at all for this purpose. The proposal here relates to the interest rate in the mortgages following the bond issue.

Mr. SHOUSE. The gentleman realizes that the bonds are based on mortgages previously taken and not on mortgages subsequently taken?

Mr. HAWLEY. I understand. The condition of the market and the mortgages subsequently taken are the basis for subsequent issues. They have sold an issue of 5 per cent bonds on a 4½ basis. My amendment would allow them to loan money on that basis. And then there occurs an unfavorable turn in the market—a fluctuation such as is bound to occur from time to time—and they find that they must fix a 5 per cent basis again in the sale of the bonds. This amendment of mine does not affect that situation at all. It only allows the bank to lower the rate of interest to the farmer below the last bond rate of interest. They may fix any rate they find necessary up to the 5 per cent rate in the subsequent sales of bonds.

Mr. GLASS. Mr. Chairman, I think the committee will accept the amendment of the gentleman from Oregon.

The CHAIRMAN. Without objection, the amendment of the gentleman from Oregon to the amendment of the gentleman from Indiana is adopted.

Mr. MORGAN of Oklahoma. A parliamentary inquiry.

The CHAIRMAN. The Chair is undertaking to put a unanimous-consent request. Without objection, the Clerk will again report the amendment to the amendment.

Mr. BARKLEY. Mr. Chairman, reserving the right to object, I would like to amend that request by having the Moss amendment reported as it would appear if this amendment is accepted. There have been so many amendments to it that we have been lost in the woods.

The CHAIRMAN. Without objection, the Moss amendment will be reported as it would read if the Hawley amendment were agreed to.

The Clerk read as follows:

Strike out lines 15 to 25, inclusive, on page 100, and on page 101 strike out lines 1 to 5, inclusive, and insert:

Second. Every such mortgage shall contain an agreement providing for the repayment of the loan on an amortization plan by means of a fixed number of annual or semiannual installments sufficient to cover, first, a charge on the loan which shall not exceed the interest rate in the last series of farm-loan bonds issued by the land bank making the loan; second, a charge for administration and profits which shall not exceed 1 per cent per annum on the outstanding loan, which two charges combined shall constitute the interest rate on the mortgage; and, third, such amounts to be applied on the principal as will extinguish the debt within an agreed period, not less than 5 years nor more than 36 years: *Provided*, That after 5 years from the date upon which a loan was made additional payments in sums of $25, or any multiple thereof, for the reduction of the principal may be made on any regular installment date under the rules and regulations of the Federal farm-loan board: *And provided further*, That before any farm-loan bonds shall have been issued by any land bank the interest rate may be determined, in the discretion of said land bank, subject to the provisions and limitations of this act.

Mr. MANN. Now, I would like to know what the Hawley amendment is—the language of it.

The CHAIRMAN. Without objection, the Clerk will report the language of the Hawley amendment.

The Clerk read as follows:

After the word "shall," in line 4 of the Moss amendment, strike out the words "be at the same rate as" and insert the words "not exceed."

The CHAIRMAN. Is there objection to accepting the amendment to the amendment?

There was no objection.

Mr. MORGAN of Oklahoma. Mr. Chairman, I have an amendment that I wish to offer to subdivision second on page 100. Will it be necessary for me to offer this to the Moss amendment in order to get it in?

The CHAIRMAN. The gentleman can offer it as an amendment to the Moss amendment or as a substitute. The gentleman from Virginia [Mr. GLASS] will be recognized. The gentleman from Oklahoma [Mr. MORGAN] simply rose to a parliamentary inquiry, and was not recognized for the purpose of offering an amendment.

Mr. GLASS. I ask unanimous consent, Mr. Chairman, that we may vote on the Moss amendment as amended.

Mr. HAUGEN. Mr. Chairman, will the gentleman yield for a question?

Mr. GLASS. Yes.

Mr. HAUGEN. If I understand the bill correctly, each borrower who becomes a stockholder shares equally in the profits?

Mr. GLASS. Yes.

Mr. HAUGEN. If that is so, the rate of interest should be uniform. It is not fair to give the borrower paying 4 per cent an equal share in the profits with one paying 5 per cent. If they are to share equally, the rate of interest should be uniform.

Mr. MOSS of Indiana. I will say to the gentleman from Iowa that the profit is the excess that the bank gets from its mortgages over what it pays on its loans. That is the purpose of this—to fix it, regardless of the sale of the bonds, so that the profits of the bank will always be the same on the same volume of business.

Mr. HAUGEN. Certainly. The excess on 4½ per cent is one-fourth of 1 per cent, but the excess on a 4 per cent loan is nothing.

Mr. MOSS of Indiana. The bill does not propose anything of the kind. It proposes to do it under the rules and regulations to be prescribed by the Federal farm-loan board.

Mr. HAUGEN. I think under the Hawley amendment you have given him an advantage.

Mr. BENNET. Mr. Chairman, I move to strike out the last word, for the purpose of asking a question, or I will reserve the right to object. I want to ask a question.

The CHAIRMAN. Does the gentleman from Virginia [Mr. GLASS] yield?

Mr. GLASS. Yes.

Mr. BENNET. As I read the bill, the authorized capital of the bank is $9,000,000. They can also issue bonds twenty times that, which would make a total altogether of $189,000,000.

Mr. GLASS. That is simply the Government subscription to the capital. You understand that the capital stock of the bank is constantly increasing from the funds of the borrowers. It carries with it a corresponding increase in the amount of the bonds to be issued.

Mr. BENNET. I could not find that in express language, and I wanted to ask the gentleman, in connection with that, this question——

Mr. GLASS. And it is provided that when these subscriptions to the individual farm associations shall aggregate the full Government subscription, thereafter a certain percentage shall be set aside to pay the Government the initial subscription.

Mr. BENNET. Yes; but that does not increase the amount of the fund that can be loaned.

Mr. GLASS. That percentage does. Section 6 of the bill will explain the whole inquiry.

Mr. BENNET. I have read section 6, "That every Federal land bank shall have, before beginning business, a subscribed capital of not less than $750,000," and so forth.

Mr. PHELAN. What is the trouble? What do you want to know about?

Mr. BENNET. I am trying to state what I would like to know about. Starting with that $189,000,000, and putting it aside for a moment, then you provide for the joint-stock bank, which does not have the restrictions around it that the land bank has, and there is apparently no limit to the amount of these joint-stock banks. What I wanted to ask was whether, under the bill as framed, there would not be a possibility that there would be a great deal more money available to the joint-stock banks than there would be through the land banks?

The CHAIRMAN. The time of the gentleman has expired. All time has expired on this amendment.

Mr. SHOUSE. Mr. Chairman, I ask for an extension of one minute in order to answer the question of the gentleman from New York.

The CHAIRMAN. The gentleman from Kansas asks unanimous consent that the gentleman's time be extended one minute. Is there objection?

There was no objection.

Mr. SHOUSE. At the top of page 81, if the gentleman will read the third provision there as to Federal land banks, he will see they are given an opportunity to increase their capital by subscriptions that will come to them. That is indefinite and automatic.

Mr. BENNET. Is it the statement that the gentleman makes that the Federal land banks can increase the capital indefinitely as applications for loans come in?

Mr. SHOUSE. Absolutely. It is automatic.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MORGAN] offers an amendment to the amendment, which the Clerk will report.

Mr. MORGAN of Oklahoma. I move to strike out and insert after the words "shall not exceed" the words "one-half of," so as to make it read, "charge for administration and operation at a rate which shall not exceed one-half of 1 per cent per annum."

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on the Moss amendment and all amendments thereto be closed in five minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on the Moss amendment and all amendments thereto close in five minutes. Is there objection?

Mr. MORGAN of Oklahoma. Mr. Chairman, reserving the right to object, I have three amendments that I want to offer.

Mr. GLASS. To the section?

Mr. MORGAN of Oklahoma. To the Moss amendment.

Mr. CULLOP. I have an amendment to the section.

Mr. GLASS. I ask that the gentleman from Oklahoma put in all three of his amendments and let us see what they are.

Mr. MORGAN of Oklahoma. I do not think the chairman of the committee ought to insist on that, or ask me to do that.

Mr. GLASS. The gentleman from Oklahoma has consumed more of the time of this committee than any other 10 men here. It is unreasonable to ask us to stay here all the day. One would suppose we were considering the Morgan bill rather than the bill reported by this committee.

Mr. MORGAN of Oklahoma. I am willing, Mr. Chairman, to be lectured by the chairman of the Committee on Banking and Currency, but what he says will not deter me from performing my duty.

Mr. GLASS. I am simply standing by my rights.

Mr. MORGAN of Oklahoma. The gentleman may be standing by his rights, but he can not push me from my rights.

Mr. GLASS. I am compelled to do this.

Mr. MORGAN of Oklahoma. I object, Mr. Chairman.

Mr. GLASS. Then I move, Mr. Chairman, that all debate on the Moss amendment and all amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Virginia moves that all debate on the Moss amendment and all amendments thereto close in five minutes.

Mr. GLASS. Now, the gentleman from Oklahoma can make the point of no quorum, if he wants to.

Mr. MANN. I move to amend by making it 15 minutes. Let us get along peaceably if we can.

The CHAIRMAN. The gentleman from Illinois moves to amend the motion of the gentleman from Virginia. He moves that all debate on the Moss amendment close in 15 minutes.

Mr. GLASS. I would like to develop whether there are any further amendments to be proposed to this section.

Mr. McFADDEN. I have one.

Mr. MORGAN of Oklahoma. I have two.

Mr. MANN. Quite a number of gentlemen rose to offer amendments when the section was read.

Mr. GLASS. If the gentleman will make it 10 minutes——

Mr. MORGAN of Oklahoma. Make it 15.

Mr. MANN. I ask unanimous consent that all debate on the Moss amendment and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that all debate on the Moss amendment and amendments thereto close in 10 minutes. Is there objection?

Mr. MORGAN of Oklahoma. Reserving the right to object, this has been up a long time. Gentlemen have had their say. I have three amendments which I want to offer.

Mr. MANN. Why does not the gentleman offer his three amendments and take 10 minutes on the three together?

Mr. MORGAN of Oklahoma. I will consent to that.

Mr. MANN. I ask unanimous consent that the gentleman from Oklahoma may offer three amendments and have them pending, and have 10 minutes, and that at the end of that time all debate on the Moss amendment and amendments thereto be closed.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] modifies his request and asks unanimous consent that the gentleman from Oklahoma [Mr. MORGAN] may have the privilege of offering three amendments to the Moss amendment, and may have 10 minutes to discuss them. Is there objection?

Mr. MANN. And that at the end of that time all debate on the Moss amendment and amendments thereto be closed.

The CHAIRMAN. And that at the end of that time all debate on the Moss amendment and amendments thereto be closed. Is there objection?

There was no objection.

The CHAIRMAN. The gentleman from Oklahoma will offer his amendments.

Mr. MORGAN of Oklahoma. I have already offered the first one. Now I will offer the second and third ones. I move to strike out——

Mr. NORTON. Mr. Chairman, may we have those amendments reported by the Clerk?

The CHAIRMAN. The Chair will have them reported when the gentleman from Oklahoma submits them.

Mr. MORGAN of Oklahoma. I move as my second amendment to strike out the word "thirty-six" and insert the word "sixty."

The CHAIRMAN. The gentleman will kindly state his third amendment.

Mr. MORGAN of Oklahoma. The third amendment is in line 1, on page 101, to strike out the word "five" and insert the word "two."

The CHAIRMAN. The Clerk will report the three amendments offered by the gentleman from Oklahoma to the Moss amendment.

The Clerk read as follows:

Amend the Moss amendment by inserting, after the word "exceed," in line 7 of the amendment, the words "one-half of."

In line 11 of the Moss amendment, strike out the word "thirty-six" and insert the word "sixty."

After the word "after," in the same line, strike out the word "five" and insert the word "two."

The CHAIRMAN. Under the unanimous-consent order just made, the gentleman from Oklahoma [Mr. MORGAN] has 10 minutes.

Mr. MORGAN of Oklahoma. Mr. Chairman, the amendments which I have offered apply to section 12 of the committee bill, as found on page 100 of the bill. I regard this as one of the most important sections of the bill. The section in part is as follows:

SEC. 12. That no Federal land bank organized under this act shall make loans except upon the following terms and conditions:

* * * * * * *

Second. Every such mortgage shall contain an agreement providing for the repayment of the loan on an amortization plan by means of a given number of annual or semiannual installments sufficient in amount to cover, first, interest on the loan at a rate which shall be the same as that of the last series of farm-loan bonds issued by the bank making the loan; second, a charge for administration and profits at a rate which shall not exceed 1 per cent per annum of the outstanding loan; and, third, such amounts to be applied on the principal as will extinguish the debt within an agreed period, not less than 5 years nor more than 36 years: *Provided*, That after five years from the date upon which a loan was made additional payments in sums of $25, or any multiple thereof, for the reduction of the principal may be made on any regular installment date under the rules and regulations of the Federal farm-loan board.

Third. The rate of interest charged for such loans shall not exceed 6 per cent per annum.

Fourth. Such loans may be made for the following purposes, and for no other:

(a) To provide for the purchase of land for agricultural uses.

(b) To provide for the purchase of equipment and live stock necessary for the proper and reasonable operation of the farm; the term "equipment" to be defined by the Federal farm-loan board.

(c) To provide buildings and for the improvement of farm lands; the term "improvement" to be defined by the Federal farm-loan board.

(d) To liquidate indebtedness of the owner of the land mortgaged existing at the time of the organization of the first national farm-loan association established in or for the county in which the land mortgaged is situated, or indebtedness subsequently incurred for one of the purposes above mentioned.

* * * * * * *

Sixth. No such loan shall be made to any person who is not at the time, or shortly to become, engaged in the cultivation of the farm mortgaged.

I have offered three amendments to this section, and I wish to support the amendment which proposes to limit the rate of interest charge by these Federal land banks to 5 per cent per annum instead of 6 per cent per annum, as appears in the original section of the committee bill.

The first amendment which I propose limits the charge which the Federal land banks may make for "administration and profits" to one-half of 1 per cent per annum on the amount due on any mortgage, instead of allowing a charge for administration and profits of 1 per cent per annum on the amount due on any loan as provided in the committee bill.

The second amendment which I propose is that the maximum period at which loans should be made should be increased from 36 to 60 years.

The third amendment which I propose is to permit the borrowers to pay off the principal or any part thereof at any time after two years of the date of the mortgage. The committee bill does not permit any payment other than the various amortization payments to be made on any mortgage until five years after date of the mortgage.

The fourth amendment which I should like to see made to this section is this: I would like to see the maximum interest charge limited to 5 per cent per annum instead of 6 per cent per annum,

as is provided in the bill, and this to include charges for administration.

My first proposition is this: That one-half of 1 per cent per annum on the amount due on a loan is sufficient to provide administration expenses and reasonable profits. I am therefore opposed to authorizing a charge of 1 per cent per annum for such purposes. It is well to bear in mind that this bill creates two kinds of land banks, namely, the 12 Federal land banks and any number of joint-stock land banks which may be organized under the provisions of the bill. The 12 Federal land banks are nonprofit-sharing institutions. That is to say, all net profits will ultimately be returned in dividends to the borrowers, all of whom, through the farm-loan associations, will be shareholders in the Federal land banks. This will not be true, however, of the joint-stock land banks which will be purely private profit-sharing, dividend-paying, and surplus-creating land banks with no object in view except to make money. But I believe that the Federal land banks can be operated on a charge of one-half of 1 per cent per annum and that there will be sufficient left to provide for proper dividends on the stock held by the borrowers. These 12 Federal land banks will employ many persons. They will spend money in many ways. They must either own or rent buildings in which to do business. Much depends upon how all of this is to be done. If through the provisions in the law a large amount of money is set aside for expenses, the natural effect of this will be to encourage the directors and managers of the banks to be extravagant in expenditures for administration purposes. On the other hand, if the amount set aside to be used for expenses is somewhat limited and restricted the managers of the banks will be compelled to operate upon a scale that will bring the expenses within the amount provided by law. These land banks may be regarded as public institutions. We all know how easy it is to have extravagance in the management of public affairs. We know how cities, counties, and States from year to year increase their expenditures and thus add to the taxes upon the people. We all know that as a rule local, State, and national governments are not conducted as economically as private business concerns are conducted. The danger is that the great Federal land banks we are creating will not be operated economically. Indeed, this is one of the criticisms which I have frequently made upon the bill proposed by the committee. In my judgment its machinery is too cumbersome, complex, and extensive to be operated economically. In the preparation of the bill which I introduced I took great care to present administrative machinery that could be economically operated. I am profoundly impressed in my belief that one important way to insure economical administration is to limit the amount that may be used for this purpose. I therefore believe that it is very unwise to set aside 1 per cent per annum to be used for administration and profits even by the 12 Federal land banks which are nonprofit-sharing institutions.

But a different proposition is presented when this section is applied to the joint-stock banks. Section 16 of this bill creates the joint-stock land banks. The section creating the joint-stock banks does not limit their profits but does prohibit them from making loans at a rate of interest which exceeds the interest on their bonds by more than 1 per cent per annum. I am opposed in the first place to creating the joint-stock land banks, but if they should be created I am especially opposed to permitting them to make a charge of 1 per cent per annum upon all loans to provide for expenses and profits. If the joint-stock land banks shall sell the bonds bearing 4 per cent interest under this provision of the law they would charge the farmers 5 per cent interest. The banks would thus receive one-fifth, or 20 per cent, of the entire interest paid by the borrowers every year. So that 20 per cent of the interest charge under this law will be consumed in providing the middlemen with salaries, expenses, and profits. Now, I think this is altogether too much.

The position which I take is fully supported by the amount consumed for administration and profits by the land-credit institutions of Europe.

The administrative charges made by the 16 state or provincial mortgage credit banks of Germany range from one-fourth to one-half of 1 per cent per annum. The rate of interest charged by the Credit Foncier of France must not exceed more than six-tenths of 1 per cent of the rate of interest on the bonds, from the sale of which the funds were raised. The Prussian Central Land Credit Co. of Germany charges borrowers for cost of business as a commission on the face of the loan from 1 to 1¼ per cent, with an additional one-half of 1 per cent as a profit to the bank. This charge is introductory, and is made but once. Mr. Cahill, in his report, as shown by Senate Document No. 17, pages 44 and 45, Sixty-third Congress, gives a summary of the costs of the administration charges of the Landschaften of Germany. This report shows that these institutions never charge to exceed one-fourth of 1 per cent per annum for expenses. Some of them indeed make no charges to borrowers for expenses. Funds for this purpose are secured otherwise. The expenses of the Hungarian Land Credit Institutions are run on less than one-half of 1 per cent per annum upon the loan. The Bavarian Agricultural Bank charges only one-fourth of 1 per cent on the amount due on the loan for expenses. The Nassau Mortgage & Savings Bank of Germany charges but one-fourth of 1 per cent for running expenses. The Landschaft of Saxony charges only one-fourth of 1 per cent for general expenditures. These are sufficient to show that the land-credit institutions of Europe meet their expenditures by charges of less than one-fourth of 1 per cent per annum on the amount due on the loan. The Prussian Central Land Credit Co., one of the largest land-credit institutions of the world, conducts its business upon an administrative charge of only thirteen-one-hundredths of 1 per cent per annum upon its total loans.

If European land-credit institutions can be operated on an expense of one-fourth of 1 per cent per annum of the amount due on loans, I see no reason why our land-credit institutions could not be operated on the same amount, but I would be willing in the law to give them a maximum of one-half of 1 per cent, because I believe that conditions are such in the United States that our land-credit institutions can not be operated at so small an expenditure as European institutions. But I believe that 1 per cent per annum is extravagant and unnecessary and will tend to encourage the managers of such institutions to be reckless in their expenditures. The farmers must, of course, pay the entire cost. I believe in aiding them in every way possible. I am opposed to placing in the statute a provision which, in my judgment, will cost the farmers in the future years many and many millions of dollars.

Mr. FESS. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Just for a question.

Mr. FESS. Has the gentleman estimated what the interest would amount to after all expenses are paid, how much above 6 per cent, or would it be below 6 per cent? I mean all expenses, not alone the rate of interest but the cost to the borrower under the bill?

Mr. MORGAN of Oklahoma. It makes 6 per cent under this section. Besides he will have to pay an amortization fee of over 1 per cent, which will make 7 per cent.

My second proposition is that Federal land banks should be allowed to make loans run for 60 years. Under the provisions of the committee bill the loans made by Federal land banks as well as joint-stock land banks are limited to a period of 36 years. To my mind, there are many reasons why this should be amended. I do not know what object the members of the committee had in limiting the length of loans to 36 years?

Mr. SHOUSE. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. SHOUSE. Is it not the rule to charge a half per cent on the total loan and not on the outstanding amount?

Mr. MORGAN of Oklahoma. No; I think not.

Mr. SHOUSE. I think the gentleman will find that to be the case.

Mr. MORGAN of Oklahoma. I say a loan payable in 12 years is not as secure as one payable in 36 years, and a loan payable in 25 years is not as secure as one payable in 36 years.

Mr. SHERLEY. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. SHERLEY. Why?

Mr. MORGAN of Oklahoma. Because when you limit the term of years that the man must pay the loan in, say you limit it to 12 years, then he must pay one-twelfth of the principal every year, and you place on him a burden that perhaps he can not meet, and if he can not and he defaults, the whole institution is injured thereby. On the other hand, if he pays one-half of 1 per cent—if he is allowed 60 years to pay the principal—the annual contribution is much smaller and is not so burdensome on the borrower.

Mr. SUMNERS. But if you increase the length of time and decrease the amount of the annual payments, do you not lessen the relative value of the security?

Mr. MORGAN of Oklahoma. Certainly not, because the land is growing in value every year.

Mr. BARKLEY. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. BARKLEY. Would it not be harder to sell bonds that run for 60 years than it would be to sell those that run for 30 years?

Mr. MORGAN of Oklahoma. That is not true. In the landschaft of Germany the bonds have no date of payment. In many other institutions in Germany the bond is absolutely without date of payment, as gentlemen know who have studied the question thoroughly.

Mr. SHERLEY. Did the gentleman ever take into consideration the difference between Germany and France and America; that there they are tied to the soil, whereas here they are not?

Mr. MORGAN of Oklahoma. Yes.

Mr. SHERLEY. That is worth considerable on this point.

Mr. MORGAN of Oklahoma. There has been a good deal said about the fact that this bill would not reach the man who needed it. There is a basis for this charge. You take a man with a limited amount of means who wishes to secure a farm loan, and if you do not give him 60 years in which to pay it you prevent him from getting the benefits of this act. Borrowers who are better able to pay and who do not need assistance will have the advantage. There is only one way that you can reach the poor man, and that is what this legislation is intended to do, to give him a loan for 60 years so that he can pay the principal off at a half of 1 per cent per annum. So I assert that in limiting loans to 36 years you are discriminating against the farmers of limited means.

Mr. JOHNSON of Washington. The Senate bill carries a 60-year term, does it not?

Mr. MORGAN of Oklahoma. I can not say.

Mr. JOHNSON of Washington. I think it does.

Mr. MORGAN of Oklahoma. That I am right in this matter is shown by the length of loans made by European land-credit institutions. In France the land-credit institutions make loans for a period of 75 years, in Ireland loans may be made for a period of 68½ years, in Switzerland loans may be made for 57 years, in Germany for 56½ years, in Sweden for 56½ years, in Russia for 55½ years, in Australia for 54½ years, in Japan for 50 years, in Italy for 50 years, and in Austria for 42 years. The loans made by the banks we are creating must be paid by annual installments. The object of making the loan for a long period of years is to make the various payments as small as possible. It will require 56 years to pay a loan by paying one-half of 1 per cent annually on the principal. To pay a loan in 36 years will require something over 1 per cent annually to be paid upon the principal. The difficulty in this is that borrowers are required to pay 1 per cent annually on the principal. This payment, together with the interest rate, will in many cases make the annual payment too large for the borrowers to meet. This is why European land-credit institutions generally require only one-half of 1 per cent annually to be paid on the principal. My conception has been that under our new system of land credits the average farmer throughout the United States should be able to pay both the principal and interest on his loan at a rate that would be somewhat less than what he is now paying as interest. If the institutions which we are creating will not enable our farmers to do this, we have fallen far short of what we should have accomplished. As I have studied the bill which the committee has presented I have been impressed with the fear that the farmers will be disappointed in the benefits which they shall receive from these institutions. We must bear in mind that one-third of the farmers of the United States are tenant farmers. We had in 1910, 2,354,576 tenant farmers. One great object of this legislation is to enable tenant farmers to purchase farms of their own. To require these tenant farmers, who are ambitious to acquire farm loans, to pay 1 per cent or more annually upon the principal of the loans is an unnecessary burden placed upon them. My amendment is supported by the example of European land-credit institutions. It will in no way weaken the strength of the system of land-credit institutions we are creating. The 60-year loan would be more satisfactory to the borrowers, because, of course, they are given the privilege to pay off the entire loan at any time they may choose or to make any payment thereon that they may desire. One of the chief advantages of long-time loans is that the borrowers may have practically unlimited time in which to pay the principal, but yet he may have the advantage of paying all or any amount thereof at any time. By limiting the loan to 36 years you are thereby in a measure destroying one of the chief benefits supposed to be derived from what is known as long-time loans. Besides, I regard it as a discrimination against the farmer of small means in favor of the farmer of large means. I am opposed to any discrimination at all in favor of anyone, but I am in favor of a system that will meet equally the needs of the well-to-do farmer as well as the needs of his less fortunate brother.

My third proposition is that I propose to permit borrowers to pay off the principal or any part thereof at any time in two years after the date of the mortgage. Under the provision in the committee bill the borrower is not permitted to pay any part of the principal for five years, except the annual amortization payment. I believe that we should permit any part of the principal to be paid at any time after one year of the date of the mortgage. Gentlemen, we should bear in mind that in the United States it is seldom that a farm loan is made for more than a period of five years. Most of the existing farm-loan companies making five-year loans, give the borrower the privilege of paying off the principal at any interest payment. It is strange to me that we should propose to create a land-credit system and yet not give the borrower privileges equal to those given by existing private loan companies. My view is that we should give the borrower every encouragement to pay his loan at the earliest date possible. So far as I can see, the land bank could suffer no loss by permitting the borrower to pay all or any part of his loan at any time after two years from the date of the mortgage. This privilege would not in any way endanger the safety of the land-credit banks. It would not entail upon them any material losses. On the other hand, it would be more satisfactory to borrowers and in many cases would be a great advantage to them.

My fourth proposition is this: Section 12 of the bill limits the interest charged to 6 per cent per annum. My proposition is to limit the interest charged to 5 per cent per annum, and that to include administration charges. I believe that a farm-mortgage bond, except from national, State, and local taxation, bearing 4 per cent interest, will sell at par. If the bonds issued by these banks, free from taxation and bearing 4 per cent interest, will not sell at par, then there will be something wrong with our land-credit institutions. Bonds of the United States Government bearing 3 per cent interest in recent years sold at a premium. In European countries farm-mortgage bonds sell on a par with the bonds of the National Government. If the bonds of the United States bearing 3 per cent interest sell at a premium, I see no reason why farm-mortgage bonds, wholly exempt from taxation, could not be sold at par at 3 per cent interest. I think, therefore, we are perfectly safe in assuming that if Government bonds bearing 3 per cent interest are sold at a premium, farm-mortgage bonds bearing 4 per cent interest can be sold at par. Allowing 1 per cent additional for expenses and profits, the total interest charged ought not to exceed 5 per cent. To this must be added the annual payment on the principal, which would require under this bill 1 per cent per annum more. This would make 6 per cent per annum as the total payment the borrowers would make. If, however, the interest charged is 6 per cent and 1 per cent be added as payment on the principal, the borrower would be required to pay 7 per cent per annum. This would be unsatisfactory to many borrowers. In the bill which I have prepared and which I have presented as a substitute for the committee bill I have planned that the total annual charge to the farmer shall be but 5 per cent per annum.

The CHAIRMAN. Under the order of the committee all time has expired, and the Clerk will read the first amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Line 7, of the Moss amendment, after the word "exceed," insert the words "one-half of."

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read the second amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

In line 11 strike out the words "thirty-six" and insert the word "sixty."

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read the third amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

In line 11 strike out the word "five" and insert the word "two."

The question was taken, and the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment to the section.

The CHAIRMAN. That is not in order, and the question is on the Moss amendment as amended by the Hawley amendment.

The question was taken, and the amendment as amended was agreed to.

Mr. McFADDEN. Mr. Chairman, I offer the following amendment. I move to strike out, on page 101, lines 6 and 7.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 101, strike out lines 6 and 7, which read as follows: "Such accrued interest, if collected, to be forwarded to the Federal land bank."

Mr. McFADDEN. Mr. Chairman, I want to call attention to the fact that this clause of the bill attempts to fix by legislation

the rate of interest in the United States, and its very purpose, if accomplished, in my judgment, will work to the defeat of the successful operation of this measure.

In the first place, suppose the bonds are selling at 4 per cent in the open market. You permit an extra charge of 1 per cent, which would make 5 per cent the rate of interest which could be charged to the farmer. If the bonds were selling at 5 per cent in the open market, you charge the farmer 6 per cent. If, on the other hand, as does sometimes occur in this country, the demand for money increases, as we have had evidence of in the last few years, when leading railroad, industrial, and other high-grade securities were sold as high as 8 per cent in the open market, the farmer under this provision who, if he desired to obtain money under similar conditions, could not obtain it under this system, because it limits the rate of interest to 6 per cent which could be charged him.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. For a question.

Mr. MOSS of Indiana. If the provision now in the bill remains, and which we will reach in a subsequent section, that no bonds may be sold at a rate of interest higher than 5 per cent, then does the gentleman from Pennsylvania believe that the conditions he has just outlined can possibly obtain?

Mr. McFADDEN. Mr. Chairman, I think that clause ought to be left open, so that the matter of supply and demand could fix the question of the rate.

Mr. MOSS of Indiana. Is it the intention of the gentleman from Pennsylvania, if this amendment be adopted, to later on offer an amendment striking out the 5 per cent?

Mr. McFADDEN. I think I would; yes.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. McFADDEN. Yes.

Mr. FESS. The object in the sale of bonds would be to get as high an interest as possible on the bonds. The purpose of the issuance of bonds is not only security, but interest.

Mr. McFADDEN. Yes.

Mr. FESS. The object in the issuance of bonds is to make them sufficiently secure and of a sufficiently high rate of interest to make them marketable. Those two elements necessarily must obtain in a good bond; otherwise we would not be able to make a sale of them. It is this fear that caused you to ask the Government to secure the interest upon them. That is one side of the question; on the other side you are limiting the interest that is to be paid by the borrower. The two things seem to be in conflict. In one case you are trying to get as high a rate as possible and in the other case as low a rate as possible. In the interest of the former case we have arranged that the Government shall pay the interest upon the bond, and in the second place we provide that the interest paid by the borrower shall be fixed at a definite rate. The two things seem to me to be somewhat contradictory, and the amendment to strike out should be agreed to.

Mr. GLASS. Mr. Chairman, will the gentleman point to the provisions of the bill which provide that the Government shall pay the interest upon the bonds?

Mr. FESS. We adopted such an amendment the other day.

Mr. GLASS. Oh, I do not think that amendment is properly presented by that description.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. HOWARD. Mr. Chairman, I offer an amendment to the amendment of the gentleman from Pennsylvania.

The Clerk read as follows:

Page 101, line 7, strike out the word "six" and insert the word "five."

The CHAIRMAN. The Chair understands that the gentleman offers this as an amendment to the amendment of the gentleman from Pennsylvania?

Mr. HOWARD. Yes; not to strike out the whole section.

Mr. CULLOP. Mr. Chairman, I desire to offer an amendment to the amendment to perfect the text of what the gentleman from Pennsylvania offers to strike out.

The CHAIRMAN. The Chair will state that that is what the gentleman from Georgia also offers—an amendment to the amendment of the gentleman from Pennsylvania, and the gentleman from Georgia is entitled to recognition. The Chair will endeavor to recognize every gentleman in due course.

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, I want to say this impressively if I can. I have been watching the reading of this bill and the comments upon it, and I want to say this: If I have any judgment about anything, I do not believe that when this bill is finished, from the standpoint of an investor, there is going to be a security issued in the United States that will be any better than the securities issued under the provisions of this bill. They will be better than any municipal bond on the face of the earth.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Not right now. I want to make myself plain on what I have in mind and I will try to yield to the gentleman later. What do you do? In the first place you take the basis of all security on earth—land—and you take 60 per cent of its value. Then when the loan is granted to the farmer you require him under the provisions of the bill to increase that security by expending every dollar of the money that he borrows upon the enhancement of the original land upon which he borrowed the money. The gentleman from Pennsylvania [Mr. McFADDEN], who has just taken his seat, who knows something about finances, talks about railroad bonds and other bonds, but when this bond is issued, if it does not sell readily in the open market at from 4 to 4½ and 5 per cent, this system is not going to be what we think it will be and hope for. You can talk about your Government aid all you want. I have not paid one particle of attention to the amount of Government aid carried in this bill. This $750,000 subscribed here by the Government for each bank does not amount to a bagatelle.

The only reason for the appropriation of this money is the fact that it starts these banks in operation. If that capital is not absorbed under the provisions of this bill, if the Government is not repaid, and repaid quickly, under the provisions of this bill, your system will not be working like it should, and that is all there is to it.

Mr. McFADDEN. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. McFADDEN. Does the gentleman contend that the Government will receive back this $750,000 which it subscribes?

Mr. HOWARD. I say this, that under the provisions of this bill, as I understand it, when the capital is subscribed by the borrower, when a certain point is reached, to wit, 25 per cent, I believe, of the original capital——

Mr. MADDEN. No. When all of the capital is paid in, 25 per cent will be taken out and paid back.

Mr. HOWARD. Then, 75 per cent of all of the capital. I have forgotten the provision exactly, but I know that that provision is here for the retirement of this capital. That is what is contemplated by the bill. The point I am driving at is this, that if, instead of calling these banks Federal land banks, you would call them Federal brokerage associations you would hit the nail on the head. They are not banks at all; they are nothing in the world but clearing houses to bring the collective credit of the farmers of this country together under practical, strict, governmental supervision, in order that they may put bonds on the open market and sell them for what money is bringing for first-class long-term bonds. Now, then——

Mr. QUIN. Then that feature is good?

Mr. HOWARD. Of course it is good. Now, as a matter of fact, this Government-aid proposition that is here is all buncombe. That is all there is about it, and it does not amount to a row of pins except to start out the system, and I am not going to stand up here and try to make my farmer constituents believe that a little $9,000,000 contribution to these banks by the Government of the United States is material aid, except for the purpose of blowing breath in these land banks.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOWARD. I would ask that I may have three minutes more.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that he may proceed for three minutes.

Mr. HAUGEN. Make it five minutes.

The CHAIRMAN. The gentleman from Iowa modifies it by asking that the gentleman have five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HOWARD. I simply desire the time to finish what I started out to say.

Mr. HAUGEN and Mr. SMITH of Michigan rose.

The CHAIRMAN. To whom does the gentleman yield?

Mr. HOWARD. I yield to my friend who got me the two additional minutes, the gentleman from Iowa.

Mr. HAUGEN. I would like to ask the gentleman if he seriously believes that there will be any demand for bonds guaranteed by a mortgage in amount equal to 60 per cent of the land value and 20 per cent of the permanent improvements, which will average 70 per cent of the land values—if the gentleman knows of anybody with money to loan who will loan any such amount?

Mr. HOWARD. Mr. Chairman, here is what I honestly believe, and I introduced a bill here once that I did not draw by myself, just like all the balance of these bills, not drawn by

any particular person, but they have been collaborated with, and everybody has his idea in here. My idea was 50 per cent ought to have been the basis of the real property, the improvements not to be taken into consideration at all. But the committee disagreed, but they thought that last year, and they have increased it to 60 per cent on the real property and 20 per cent on the improvements. Now, here is what I am talking about: All the limitations, the restrictions, and everything that is thrown around this bill, all of them that I have seen, every single, solitary, blessed one is in the interest of the investor, and no advantage can be taken of him. You take a farmer who loses his stock or a farmer who has had bad luck, sickness in his family or anything else, and he has to meet these interest and amortization payments. Your local association, gentlemen, has got to supply this money. The local association has got to see that this money is expended by the farmer for the purposes for which it was loaned. The local association, so far as supervisory powers under this bill go, is weak, and I hope it can be strengthened.

Mr. PHELAN. Will the gentleman yield?

Mr. HOWARD. I will.

Mr. PHELAN. I will point out that the gentleman's amendment does not do anything of the kind. The gentleman's amendment says the loan shall not be made at a rate greater than 5 per cent.

Mr. HOWARD. That is what I said.

Mr. PHELAN. The gentleman just stated the bonds should not be issued at a greater rate than 5 per cent.

Mr. HOWARD. If I understand this section, I meant that this section reads "the rate of interest for such loans shall not exceed 6 per cent," and I say 5 per cent. I desire to say this, that I have never seen a law on the statute books in a State in the Union where a rate was fixed by law—for instance, 8 per cent as a legal rate of interest—where every bank, every blooming money-lending concern in the country, did not charge the limit always. You never catch them charging anything below the limit. Why? Because the man who has the money can fix the rate, and if you put it at 6 per cent every farmer in this country who uses this system will pay 6 per cent; and if these bonds do not sell on the open market readily at 5 per cent and the investing public is not clamoring for these bonds, then your system is not working. That is true.

Mr. GLASS. I would like to ask the gentleman if the earnings of the system are not returned to the farmer?

Mr. HOWARD. Yes—well, after it gets started.

Mr. GLASS. Suppose the bank would make a difference between the rate charged and the rate proposed by the gentleman; does it not go right back to the borrower?

Mr. HOWARD. I will answer my friend by saying this: You tell your initial borrower he has to subscribe to 5 per cent of the stock. You tell him he will get back certain dividends; but that if the dividends do not pay for the stock, if they do not pay the expenses, you will assess them against him.

The CHAIRMAN. The time of the gentleman has again expired.

Mr. GLASS. Mr. Chairman, I want to develop how many more amendments are to be offered to this section. Here we have been two hours, lacking five minutes, on the section.

Mr. MANN. Oh, we have not been two hours on this section.

Mr. GLASS. Very nearly that. I would like to develop how many more amendments are to be offered to this section. I judge there will be eight more amendments to this section.

Mr. MANN. The gentleman counted eight on that side.

Mr. GLASS. I did not. I counted four on this side. I am going to ask unanimous consent to close debate——

Mr. NORTON. May I have the attention of the gentleman from Virginia?

Mr. GLASS. Let me prefer my unanimous-consent request, please. I am going to ask unanimous consent to close debate on this section and all amendments thereto at 3 o'clock.

Mr. HAUGEN. Mr. Chairman, may I have five minutes?

Mr. GLASS. That will make an hour and ten minutes.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this section and all amendments thereto close at 3 o'clock. Is there objection?

Mr. MANN. Reserving the right to object, I want to expedite the bill as rapidly as possible. A number of gentlemen want to offer amendments. I wanted myself to have a little time on this section.

Mr. GLASS. I would cheerfully like to see the gentleman from Illinois get any time he needs, because he always talks to the merits of the bill.

Mr. MANN. That would only allow six amendments to be discussed on both sides.

Mr. GLASS. Make it a quarter past 3 o'clock, then.

Mr. MANN. Make your request then for an hour and 25 minutes, so that the time in reading amendments will not be taken out.

Mr. HAUGEN. Then I suggest that the time be divided between the two sides.

Mr. GLASS. Then I will say 1 hour and 25 minutes.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on the section and all amendments thereto close in 1 hour and 25 minutes. Is there objection?

Mr. MORGAN of Oklahoma. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MORGAN of Oklahoma. Does that mean the vote will have to be taken in 1 hour and 25 minutes?

Mr. MANN. That means 1 hour and 25 minutes.

The CHAIRMAN. As the Chair understands the request, all gentlemen who have amendments may now offer them.

Mr. MANN. Oh, let them offer them as they want to and have 1 hour and 25 minutes of debate. There might be time taken in voting, and that ought not to be taken out of the time for debate because the Chair can not figure it out.

Mr. GLASS. Then I move that all debate close in 1 hour and 25 minutes.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on the present section and amendments thereto close in 1 hour and 25 minutes.

Mr. DILLON. Reserving the right to object, who will control the time?

The CHAIRMAN. The Chair will control it.

Mr. DILLON. I want five minutes.

Mr. CULLOP. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. CULLOP. I would like to inquire of the Chair whether the amendment of the gentleman from Georgia is an amendment to the text of the bill.

The CHAIRMAN. The Chair understands it to be the text.

Mr. CULLOP. I desire to offer an amendment to his amendment by striking out the word "five" and inserting the word "four," so that it will read "four per cent." In order to perfect the text I understood an amendment was in order before an amendment to strike out the text.

Mr. MANN. That has nothing to do with this now.

The CHAIRMAN. The Chair will state the proposition. The gentleman from Pennsylvania [Mr. MCFADDEN] moves to strike out two or three lines of the bill. The gentleman from Georgia [Mr. HOWARD] offers an amendment to perfect the text of the lines sought to be stricken out, striking out the proposition of 6 per cent. The gentleman from Indiana [Mr. CULLOP] desires to offer an amendment to the amendment of the gentleman from Georgia, which was an amendment to the text.

Mr. MANN. Was the request of the gentleman from Virginia [Mr. GLASS] agreed to?

The CHAIRMAN. The question is on the request of the gentleman from Virginia [Mr. GLASS].

The motion was agreed to.

The CHAIRMAN. The Chair will recognize the gentleman from Indiana [Mr. CULLOP] to perfect the text. The gentleman offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend the amendment by striking out the word "five" and inserting in lieu thereof the word "four."

Mr. SMITH of Michigan. Let us have the amendment read, so that we can tell to what it applies.

The CHAIRMAN. Without objection, the Clerk will read the lines sought to be stricken out, and then read the amendment of the gentleman from Georgia and the amendment of the gentleman from Indiana.

The Clerk read as follows:

Amendment offered by the gentleman from Pennsylvania [Mr. MCFADDEN]: Page 101, strike out lines 6 and 7, which reads as follows: "Third. The rate of interest charged for such loan shall not exceed 6 per cent per annum."

Amendment offered by Mr. HOWARD: Page 101, in line 7, strike out the word "six" and insert the word "five," so that the line will read "not exceed five per cent per annum."

Amendment offered by Mr. CULLOP: Amend the amendment by striking out the word "five" and inserting in lieu thereof the word "four," so that the line will read "not exceed four per cent per annum."

Mr. CULLOP. Mr. Chairman, the question of what the interest shall be upon these loans is one of the most important questions to settle in the consideration of this bill. If the rate of interest is not to exceed 6 per cent, this measure is not going to be patronized as much as if the maximum limit was fixed

at 4 per cent. Already loans are being made all over the country by private concerns at 4½ and 5 per cent, so that if the rate of interest is left at 6 per cent you are going to do the farmer an injury instead of a benefit by the adoption of this measure [applause], for the reason that with the private concern now loaning money at 4½ and 5 per cent, the rate being established by law at a higher per cent than now offered them, and hence they will patronize private concerns. By leaving the maximum at 6 per cent, it will enable and encourage private concerns to raise their rates on farm loans, and will for this reason prove injurious instead of beneficial.

I for one am solicitous about the success of this plan. I believe it a workable one, and have confidence in its future. I therefore desire a rate should be fixed in the law which will cause it to be a competitor with private concerns and be the cause of them reducing the rate now charged.

Mr. FESS. Would the gentleman yield?

Mr. CULLOP. Certainly.

Mr. FESS. I want to confirm what the gentleman says about low interest rates in certain sections—4 and 5 per cent.

Mr. CULLOP. I want the gentleman to hurry, because I have only five minutes.

Mr. FESS. What is the use of this bill if that be the case?

Mr. CULLOP. The use of this bill is very plain. It will bring the rates of interest down on farm lands in sections of the country where they can not obtain low rates at present.

Mr. GLASS. Mr. Chairman, will the gentleman yield?

Mr. CULLOP. In one moment. In the case of money stringencies and in a time of scarcity in money circles it will prevent money lenders from increasing the rate and punishing the farmer. That will be the result of it, and because of this fact it will serve a most useful purpose.

Mr. GLASS. I will state to the gentleman from Indiana that the rate of interest is not the only thing in this bill by any means. The bill provides an amortization plan for payments which no banking system of this country has ever provided.

Mr. CULLOP. I thank the gentleman from Virginia for his suggestion. This feature will prove of great aid to the farmer, and will enable him to liquidate his mortgage indebtedness when otherwise he would be unable to do so. This feature of the law will prove of great assistance to farmers. This plan in building and loan associations has been successful, and has enabled many a person to become a home builder in this country who otherwise would have remained a tenant under the domination of an exacting landlord.

Mr. BARKLEY. Mr. Chairman, will the gentleman yield?

Mr. CULLOP. In a moment. This system is not being instituted as a money-making concern, but as a concern for the relief of the greatest industry of the country and the men engaged in it. It ought not to be constructed on a profit-making basis or as a money-making concern. That is not the intention of it. [Applause.]

Now, then, the security offered for these loans is the very best security that can be afforded for a loan. It is both adequate and safe. The farms of this country constitute a safe security, and if the system is honestly and properly handled it will prove a great boon to many people in this country who desire to avail themselves of its provisions.

Mr. SWITZER and Mr. PHELAN rose.

The CHAIRMAN. Does the gentleman yield, and to whom?

Mr. CULLOP. I will yield to the gentleman from Massachusetts.

Mr. PHELAN. If we can fix in this bill the rate at which investors are willing to lend the money to the farmer, why put it at 4 per cent? Why not put it at 3 per cent or 2 per cent and give the farmer the benefit?

Mr. CULLOP. This is not to exceed 4 per cent, and it may be less than that. I believe the maximum should not exceed 4 per cent, and then if the business warrants the rate can be lowered by those interested with the administration of the law.

Mr. PHELAN. That is what we say about 6, and you say 4.

Mr. CULLOP. Yes. The bill as written fixes the maximum limit at 6, and by this amendment I propose to have it fixed at 4 per cent. That is the difference between us. I believe the committee have fixed the rate higher than it should be in order to secure the desired results by the enactment of the measure. If its adoption will secure a reduction of interest charges on farm lands by private concerns, then it has accomplished its purpose and brought about the relief desired. If private concerns can loan money on farm lands at 5 per cent, then under this system it can be loaned for a lower rate of interest, because these loans are exempted from taxation and those of private concerns are not, and this feature alone will make a great difference, one that should receive due consideration in the enactment of this measure. Do not hold out to the farmer a promise not to be redeemed.

Again, the overhead charges, as some gentlemen have pleased to call them, the expense for securing the loan, are not different from those in obtaining loans from private concerns, except in perhaps one particular, and that one particular is in some instances the borrower has to pay a commission. This plan will relieve the borrower from that expense. But the difference in interest charges more than overcomes that expense, if the present rates are continued.

Now, it is evident that if private concerns can loan, as they are now and have been doing, at 4½ and 5 per cent and pay taxes on the loans, under this system it can be loaned at a lower rate, when such loans are exempted from taxation. Now, for this reason I feel the maximum rate should be fixed at 4 per cent; and if fixed at that percent, the administrators of the law will be able to loan at a still lower rate. Exemption from taxation means much in this law and should receive the consideration it deserves. I would remind those in charge of this measure that if the volume of property for taxation be reduced, necessarily the rate of taxation must be increased, and that increase will fall heavily on the visible property. The property of the farmer is visible as a rule, and hence the burden of the increase will fall upon him. He can not escape it.

Now, if improvement bonds, such as highway improvement bonds, drainage bonds, school bonds, and other improvement bonds, exempted from taxation, drawing 4 per cent and 4½ per cent, will sell on the open market above par, why will not these farm-mortgage bonds, drawing a similar rate of interest, be just as desirable an investment and sell just as readily? They will do so, and there will be a demand for them by investors, just as there is now for the bonds I have above named. Then fix this maximum rate at 4 per cent, and by so doing competition has been established between this system and the private concerns loaning on farm property, which will lower instead of raise the interest charges. By so doing, the farmer will be helped and his business benefited. Leave it as now fixed in the measure and an inducement has been furnished to increase rates over what they are now in many localities. Again the banks of this country pay 3 per cent on time deposits. These loans are subject to taxation. Now, if loans of this character can be made at 3 per cent, surely those who make them would not hesitate to take a farm loan at 4 per cent exempt from taxation.

The security is just as good, the investment is just as safe, if not safer, and the evidence of indebtedness as marketable. It is asserted that in some localities money commands a higher rate than even 6 per cent, and hence it would deprive farmers, for this reason, of the benefits of this measure. In other words, because of this fact farmers could not avail themselves of the measure because capital would not invest at such places in these securities. In this view they are greatly mistaken. It would be true if local capital were to be invested, but it is not the purpose to have solely local capital invested. Under this system the organization would get its loans together, issue the bonds, and sell them elsewhere and obtain distant capital and bring it into such localities, and thereby it would reduce the rates of interest on local capital desired for other enterprises. The rate would therefore be uniform for farm loans, and it would reduce interest charges on capital for other local purposes. This would be the effect, the opposite one from that which some here have contended. I do not see how any other effect than the one I have presented could result. If this be true, then the effect would be most wholesome, because it would stimulate other lines of industry along with farming, and the result would redound to the benefit of all except the money changers in such localities. I most earnestly hope the amendment which I have offered will be adopted, as it will, I am confident, add to the success of the measure, popularize it, and prove of great benefit to those for whom this legislation is being enacted. If we are to help the farmer by this measure—and that is its purpose, which is most laudable—then let us do so substantially and increase his opportunities for building up the country and adding to the wealth of the Nation. [Applause.]

The CHAIRMAN. The time of the gentleman from Indiana has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent for five minutes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. MANN. Mr. Chairman, I had intended to ask for longer time, but the time has been fixed, and I will not.

Mr. Chairman, gentlemen here seem to fondly hope and believe we will fix the rate of interest at which investors will

invest their money. We may fix the rate of interest at which we will permit somebody to loan money, but we can not fix the rate of interest at which the borrower will get the money.

I hold in my hand a copy of a daily newspaper giving the New York bond transactions on Wednesday of this week. Several million dollars' worth of bonds every day are sold and bought over there. Here is a long column of different kinds of bonds sold and bought in quantities, listed all the way from $1,000 to over a half million dollars, of different kinds of bonds.

Now, some of these gentlemen may be able to tell why New York City 4½ per cent bonds due in November, 1957, sold at 106½ and bonds due in 1964 sold at 102½, or why 4½ per cent New York City bonds sold at 102½ and 4 per cent bonds sold at 100, almost the same, or why Chicago, Burlington & Quincy general fours sold for 92½ and Chicago, Burlington & Quincy (Illinois division) fours sold for 95⅛, and why Nebraska fours sold for 99½.

Everybody knows that the men who invest their money know that there is a little difference in the security. Bonds that you and I think are perfectly good—4 per cent bonds, some of them—sell for as high as 100, and what apparently are equally well secured, to a greenhorn—6 per cent bonds—will sell at 100.

We can not say what the bonds will sell for. In my judgment it is a mistake to put into this bill any provision limiting the rate of interest. This bill can be made to reduce the rate of interest paid by the farmer, at least in the Northwest, the Southwest, and the South, but I doubt very much whether it will make any difference in my State. Perhaps it will. But the only way you can reduce the interest paid by the farmers under this bill is to get people to buy the bonds. You can not force anybody to buy the bonds. They will buy the bonds in competition with other bonds. There are plenty of railroad bonds. Armour & Co. 4½ per cent bonds sell for 93 and 94; Sulzberger 6 per cent bonds sell for 99—only a little more. There is quite a difference in the interest rate. Somebody believes there is a little difference in the security.

Mr. CULLOP. Mr. Chairman, will the gentleman yield?

Mr. MANN. No; I have not the time. I would yield if I had the time.

We make a mistake when we think that we can fix the rate of interest at which the investors will invest their money. They will invest it if they think these bonds are good and of equal security on about the same terms and at the same rate that they will invest in other bonds that they think are equally good, depending somewhat on how they are advertised and handled. If we fix no rate of interest, but endeavor to let some brokerage house for a commission make people understand that the bonds are good, you can sell the bonds at a lower rate of interest than otherwise, and you can loan the money to farmers at the rate of interest that the bonds bear.

It is sometimes cheaper to pay a firm for underwriting expenses than to attempt to sell the bonds directly over the counter. Millions of dollars will be invested every day in the country in bonds of some kind. People do not have to buy bonds. People do buy bonds—railroad bonds and other kinds—on the market. These bonds can be put on the market in the New York Stock Exchange, and you can convince people that the security is good, as it will be if the provisions of this law are carefully executed. You can borrow money at 4½ and 5 per cent. Some of the districts may be able to borrow money at less, but you can not borrow cheaply by fixing the rate in this bill low.

The CHAIRMAN. The Chair will ask the indulgence of the committee to make the statement that under the rules all time on the present amendment is exhausted, and that the time is limited as to all amendments pertaining to this section. The Chair thinks it is better to submit the pending amendment.

Mr. SMALL. Mr. Chairman——

Mr. DILLON. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DILLON. There has been no direct opposition to the original motion made by the gentleman from Pennsylvania.

The CHAIRMAN. The Chair will answer that by saying that under the rules there is supposed to be one speech for and one against, or 10 minutes on an amendment.

Mr. PHELAN. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. PHELAN. We have not had any speech against the amendment for which the gentleman from Illinois obtained time by unanimous consent.

Mr. MANN. That is all you are entitled to, and I think that is enough.

Mr. PHELAN. If it is, I am perfectly satisfied.

Mr. DILLON. I ask unanimous consent that I may have five minutes.

The CHAIRMAN. The gentleman from South Dakota [Mr. DILLON] asks unanimous consent to proceed for five minutes.

Mr. SMALL. Mr. Chairman, I thought I addressed the Chair before the gentleman from South Dakota did.

Mr. CLARK of Missouri. Mr. Chairman, some time shortly in the general mêlée I would like to get 10 minutes on the bill itself.

The CHAIRMAN. After the time which has been limited on this section?

Mr. CLARK of Missouri. Yes. I am in no hurry.

Mr. GLASS. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The question is on the amendment of the gentleman from Indiana [Mr. CULLOP] to the amendment of the gentleman from Georgia [Mr. HOWARD] to strike out 5 per cent and substitute 4 per cent.

Mr. DILLON. I ask that my request for unanimous consent may be put to the committee.

The CHAIRMAN. The Chair put it and the gentleman from Virginia [Mr. GLASS] demanded the regular order.

Mr. DILLON. I did not hear him.

The CHAIRMAN. The Chair will submit the request again. The gentleman from South Dakota [Mr. DILLON] asks unanimous consent that he be allowed to speak on this amendment for five minutes. Is there objection?

There was no objection.

Mr. DILLON. Mr. Chairman, I want to speak in reference to the question of limiting the interest rate, and to call the attention of the committee to a few facts contained in the report of the Comptroller of the Currency, in reference to usurious charges made by national banks. I call attention to a statement on page 29 of the annual report of the Comptroller of the Currency to the first session of the Sixty-fourth Congress, December 6, 1915, as follows:

The records also show that as of September 2, 1915, 1,022 national banks in 25 States were, by their sworn reports, charging an average of not less than 10 per cent, and in some cases 18 per cent, on all their loans. The sworn statements of the banks in one particular State include a list of 131 banks whose maximum rates of interest ranged from 15 to 24 per cent; 67 banks whose maximum rate was between 25 and 60 per cent; 22 banks which charged between 60 and 100 per cent; and 26 banks whose maximum rates were 100 per cent or more.

I call attention to another statement of the comptroller, on page 194 of the same report, in which he gives a list of 29 loans made to a widow.

SPECIMEN LIST OF USURIOUS LOANS MADE TO A WOMAN BY A NATIONAL BANK.

A certain national bank, in response to request from this office, sent in a list of loans made by it since the preceding call, upon which it had charged interest at the rate of 12 per cent or more.

From this list of borrowers one name was selected at random, to whom several loans had been made during the preceding 60 days at usurious rates, and the bank was requested to send a list of all loans which had been made to this borrower during the preceding 12 months.

In reply to that request the bank submitted, under oath, a list of 29 loans which had been made to this borrower who, upon investigation, was found to be a woman who owned a farm about 6 or 7 miles from the town in which the national bank was located. The bank when asked for what purposes the money was borrowed professed ignorance, but stated that it thought that one loan of $110 for 30 days, upon which interest at the rate of 120 per cent was charged, was for the purchase of a horse. The bank furthermore stated that all of the loans to this borrower had been paid in full.

The following is a copy of the affidavit made by the bank as to the loans and the rates of interest charged. In five cases the interest appears to have been incorrectly calculated by the bank, and the figures placed in parentheses are those inserted by this office as being apparently the figures intended.

[Copy of affidavit of bank.]

THE NATIONAL BANK OF ———,
*October 12, 1915.*

Hon. COMPTROLLER OF CURRENCY,
*Washington, D. C.*

DEAR SIR: We acknowledge receipt of your telegram of the 11th instant. * * *

The following is a list of the notes made to this bank for the past 12 months as requested:

| Date. | Time. | Amount. | Maker (name of borrower not printed). | Interest discount, or commission collected or charged. | Rate per annum. |
|---|---|---|---|---|---|
| 1914. | *Days.* | | | | *Per cent.* |
| Oct. 12 | 30 | $11.00 | | $1.00 | 120 |
| 26 | 30 | 21.50 | | 1.50 | 90 |
| Nov. 5 | 25 | 33.00 | | 2.00 | 93 |
| 16 | 15 | 27.00 | | 2.00 | 195 |
| Dec. 1 | 30 | 162.50 | | 5.00 | 36 |
| 12 | 19 | 27.00 | | 2.00 | 151 |
| 17 | 14 | 55.00 | | 5.00 | 259 |
| 18 | 60 | 97.50 | | 7.50 | 50 |
| 28 | 34 | 377.00 | | 15.00 | 44 |

| Date. | Time. | Amount. | Maker (name of borrower not printed). | Interest discount, or commission collected or charged. | Rate per annum. |
|---|---|---|---|---|---|
| 1915. | *Days.* | | | | *Per cent.* |
| Jan. 30 | 60 | $433.00 | | $24.50 | 36 |
| Feb. 5 | 26 | 35.25 | | 7.25 (363 %) | 112 |
| 12 | (1) | 120.00 | | 5.00 | 75 |
| Mar. 3 | 23 | 620.25 | | 30.00 | 77 |
| 13 | 17 | 22.00 | | 2.00 | 210 |
| 16 | 14 | 7.00 | | 1.00 | 426 |
| 20 | 10 | 6.00 | | 1.00 | 720 |
| 25 | 5 | 6.00 | | 1.00 | 1,450 |
| Apr. 10 | 20 | 28.00 | | 3.00 (219 %) | 1,080 |
| 17 | 13 | 12.00 | | 2.00 (561 %) | 183 |
| 19 | 11 | 5.00 | | 1.00 (830 %) | 682 |
| 23 | 7 | 29.50 | | 2.00 | 383 |
| 26 | 4 | 11.00 | | 1.00 | 900 |
| 27 | 3 | 7.00 | | 1.00 | 2,000 |
| May 1 | 30 | 110.00 | | 10.00 | 120 |
| 3 | 27 | 6.00 | | 1.00 | 267 |
| 10 | 20 | 23.50 | | 3.50 | 315 |
| 25 | 5 | 3.50 | | .50 | 1,200 |
| July 10 | 30 | 58.50 | | 5.00 | 113 |
| Sept. 13 | 48 | 20.00 | | 5.00 (253 %) | 187 |

[1] Demand.

Mr. McKENZIE. Will the gentleman yield for a question.

Mr. DILLON. I have not time to yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. DILLON. I call attention to page 217 of the same report in which the comptroller says:

Another one of these banks, with capital, surplus, and undivided profits of about $35,000, declared that the highest rate which it had charged between September 2, 1915, and November 10, 1915, was 147 per cent, the lowest rate 10 per cent, and the average rate on all loans made during that period 36 per cent. Population of the town about 700.

The third of these three banks had a capital, surplus, and undivided profits of about $30,000, and reported its average rate on all loans made between September 2, 1915, and November 10, 1915, to be 40 per cent. The highest rate charged during that period was declared to be 300 per cent, and the minimum rate 8 per cent. This bank was located in a town with a population of about 1,400.

I call the attention of the committee to the further fact that under the laws of practically every State in the Union usurious interest is prohibited and interest rates are fixed. This report shows that the Comptroller of the Currency knows these facts. I want to know why he does not enforce the provisions of law against these national banks all over this country that are exacting usurious interest from borrowers. [Applause.] There is no question in reference to the authority of the National Government in that regard. The Comptroller of the Currency is permitted by a direct statute to bring a suit for the cancellation of the charters of these banks for violation of law. The report of the comptroller shows that he had in his possession affidavits in which it was admitted that many of the national banks were violators of section 5198, United States Revised Statutes. Why does this department allow these agencies to constantly violate the law?

This bill is cumbersome, and the machinery provided is extremely complicated. It provides for an army of useless officials, agents, and servants. It is loaded down with extravagant salaries.

It occurs to me that there is no necessity for having 12 Federal land banks. Each of these banks must have 9 directors, making a total of 108, when 7 directors ought to be able to handle the business from one bank with proper assistants. They are each authorized to employ attorneys, experts, assistants, clerks, laborers, and other employees.

Again, the Federal farm-loan board consists of three members, who are allowed large salaries and traveling expenses, and have power to appoint attorneys, experts, assistants, clerks, and laborers. Many of these expenses could be reduced by providing for a commissioner, with a provision for assistants and necessary help to carry on the work.

I am also impressed that we could adopt the county and State unit and use the machinery already established, and thus be able to reduce extravagant operating expenses. For instance, the board of county commissioners or State officers could be utilized, and thus form a part of the working machinery. Or, again, the postmasters, United States marshals and deputies, United States internal-revenue collectors and deputies could be used, and by the use of existing machinery expenses could be materially reduced.

It appears to me that under the terms of the bill the banking industry will operate and control the entire machinery. If this system could be divorced from commercial banking and operated without extravagant administrative features and money furnished by the Government on the same terms as now furnished to banking houses, loans could be obtained at a much less rate of interest.

In the State of South Dakota we have about $5,000,000 in loans belonging to the school fund, loaned on farm mortgages at 5 per cent interest. We have about $6,000,000 running on deferred payments at 6 per cent. When paid in it is loaned out at 5 per cent. It is estimated that we have about $27,000,000 of insurance funds loaned at about 5½ per cent.

The most serious criticism of this bill is its extravagant operating features. For instance, New Zealand issues bonds at 3 per cent to 3½ per cent and loans to the farmers. The Government expense of handling these loans is fifteen one-hundredths of 1 per cent, and these mortgages run 36½ years.

This bill has many good features, but it ought to be simplified and operating expenses reduced. Otherwise the farmers are not going to get loans at a greatly reduced rate of interest.

Mr. SMALL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SMALL. If I could get recognition now, would it be in order to offer another amendment to this section, other than this one?

The CHAIRMAN. The Chair does not think so. The Chair thinks under the rules of the House all amendments that are in order are now pending, unless it be a substitute. The question is on the amendment of the gentleman from Indiana [Mr. CULLOP] to strike out 5 per cent and insert 4 per cent.

The question was taken; and on a division (demanded by Mr. CULLOP) there were—ayes 12, noes 47.

Accordingly the amendment was rejected.

The CHAIRMAN. The question is on the amendment of the gentleman from Georgia (Mr. HOWARD).

Mr. FINLEY. I would like five minutes on that.

The CHAIRMAN. All debate on the present amendment is exhausted. When these amendments are disposed of there will be opportunity for other amendments and other debate.

Mr. FINLEY. I ask unanimous consent that I may have five minutes.

The CHAIRMAN. The gentleman from South Carolina asks unanimous consent that he may be permitted to address the committee for five minutes. Is there objection?

Mr. GLASS. I ask for the regular order.

The CHAIRMAN. The gentleman from Virginia objects, and the question is on the amendment offered by the gentleman from Georgia [Mr. HOWARD] to the text of the bill to strike out 6 per cent and insert 5.

The question was taken; and on a division (demanded by Mr. GLASS) there were—ayes 25, noes 49.

Accordingly the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania, which the Clerk will report.

The Clerk read as follows:

Page 101, strike out lines 6 and 7.

The question was taken, and the amendment was rejected.

Mr. WOOD of Indiana. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 102, line 17, after the word "become" insert the words "personally or through his agent."

Mr. WOOD of Indiana. Mr. Chairman, if this clause is not amended and it is strictly construed it would be absolutely impossible for anyone to obtain a loan unless he individually intends to do the farming. If the man is the owner of the farm and is farming it by his tenant, under this clause he could not obtain this loan. The purpose of the amendment is that a person may obtain the loan if he, or through his agent, is doing the farming.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. WOOD of Indiana. Yes.

Mr. MOSS of Indiana. I would like to ask the gentleman how the land can be farmed except by a man or through his agent.

Mr. WOOD of Indiana. That is not the provision of the bill. It says:

No such loan shall be made to any person who is not at the time or shortly to become engaged in the cultivation of the farm mortgaged.

The amendment is for the purpose of making it absolutely clear, and it will save a lot of trouble and annoyance on that proposition. It would make the clause clear, so that a person can obtain a loan if he is going to do the farming through his agent. It strikes me that it will strengthen the bill rather than weaken it.

Mr. CLARK of Missouri. Mr. Chairman, I ask unanimous consent to proceed for 10 minutes.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the time heretofore fixed by the committee may be increased 10 minutes and that that time be allowed to the gentleman from Missouri.

The CHAIRMAN. The gentleman from Illinois asks that the time heretofore fixed be increased by 10 minutes and that time be allowed to the gentleman from Missouri. Is there objection?

There was no objection.

Mr. CLARK of Missouri. Mr. Chairman, I am very much in favor of passing this bill. [Applause.] I think we are all under obligations to pass it—not this particular bill, perhaps, but some general bill on this subject; and as this is the only bill in sight I am heartily for it.

I believe that men in this life should keep their promises in politics, in religion, in business, and everything else. [Applause.] In my judgment that is the only rule of conduct to live by or die by.

Here is what the Democrats said in their latest platform:

Of equal importance with the question of currency reform is the question of rural-credit or agricultural finance. Therefore we recommend that an investigation of agricultral credit societies in foreign countries be made, so that it may be ascertained whether a system of rural credits may be devised suitable to conditions in the United States; and we also favor legislation permitting national banks to loan a reasonable proportion of their funds on real estate security.

The Republicans raised us at our own game, to use the phraseology of a game I have heard much about but do not understand [laughter], and here is what the last Republican platform said. In one paragraph it says:

We need better currency facilities for the movement of crops in the West and South.

In another paragraph it says:

It is of great importance to the social and economic welfare of this country that the farmers have facilities for borrowing easily and cheaply the money they need to increase the productivity of their lands. It is as important that financial machinery be provided to supply the demand of farmers for credit as it is that the banking and currency system be reformed in the interest of general business. Therefore we recommend and urge an authoritative investigation of agricultural credit societies and corporations in other countries and the passage of State and Federal laws for the establishment and capable supervision of organization having for another purpose the loaning of funds to farmers.

The progressive platform says this:

Country life.—The development and prosperity of country life are as important to the people who live in the cities as they are to the farmers. The increase of prosperity on the farm will favorably affect the cost of living and promote the interest of all who dwell in the country and all who depend upon the products for clothing, shelter, and food We pledge our party to foster the development of agricultural credit and cooperation, the teaching of agriculture in schools, agricultural college extension, the use of mechanical power on the farms, and to reestablish the Country Life Commission, thus directly promoting the welfare of the farmers and bringing the benefits of better farming, better business, and better living within their reach.

So we all promised to do this thing. I do not mean that we promised to pass this particular bill, but to pass some legislation on this subject. In the situation in which we find ourselves it is for this session this bill or nothing.

There has been much investigation on this subject. We sent a commission to Europe to examine into this subject. They made a very strong, luminous, and exhaustive report. In addition to that, we had a joint congressional committee here in our own country to investigate it. They have made their report, and it is clear and comprehensive. The people of the United States want some legislation on this subject, and they demand it now.

I will tell you one of the strangest things that I ever witnessed in this House, and I have witnessed a great many. When we sent the Agricultural bill over to the Senate last year there were only seven Senators in the Chamber. They hitched on the McCumber rural-credits bill to the Agricultural bill, which not a single man in this House probably had ever read. It came back to us when time was the essence of things in the closing days of the Sixty-third Congress. I have seen a dozen men on the floor simultaneously trying to get recognition from the Chair on several occasions, but on that day it seemed to me that the majority of all the Members of the House rose up, demanding recognition.

It was like Roderick Dhu's men jumping up out of the heather all of a sudden, and if the parliamentary situation had been that a Member could move to concur in the McCumber bill amendment that day under the rules of the House, it would have been adopted so quickly that it would have made our heads swim. I am glad it was not so adopted, because that is not the proper way to legislate.

Mr. GLASS. Is not that a commentary upon the American Congress?

Mr. CLARK of Missouri. Of course it is, and the gentleman from Virginia [Mr. GLASS] and myself also could make several interesting commentaries. That was an amazing performance, but it demonstrated beyond even the shadow of doubt that the majority of the national legislators were overwhelmingly in favor of some legislation upon this important subject. I can not investigate all of these bills for myself—none of us can—but I have faith in these men who are on these great committees, and while probably this bill may have been improved by amendment, and frequently that is the case, yet these gentlemen on the committee, Mr. Chairman GLASS and the rest of them, have investigated the subject, and when I have not investigated the matter for myself particularly I follow the committee. [Applause.] That is the only way to get legislation through.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. CLARK of Missouri. Yes; with pleasure.

Mr. MANN. Did not the distinguished Speaker vote for the Lever amendment the other day?

Mr. CLARK of Missouri. I think so; but I did not say that I would not vote to amend the bill.

Mr. MANN. That was against the committee.

Mr. CLARK of Missouri. That may be true, but in the main I follow the committee. Of course, I reserve the right to vote for an amendment to the bill if I desire to, where I think it may be improved.

This is not an experiment, Mr. Chairman. It is not even new in this country. Two or three States have tried it heretofore but they did not make a success of it. The principle underlying this bill is very old. In First Kings, fourth chapter, twenty-fifth verse, it is related that in the spacious days of King Solomon, "Judah and Israel dwelt safely, every man under his vine and under his fig tree, from Dan even to Beersheba, all the days of Solomon."

And in the fourth chapter and fourth verse of the Prophet Micah it is written: "But they shall sit every man under his vine and under his fig tree; and none shall make them afraid."

This bill is intended to aid people to sit under their own vines and fig trees—in other words, to increase the number of home owners—a great desideratum.

I will tell you where this plan in concrete form was started and who made it practicable. There was a man in Germany named Büring, an obscure merchant, who went around like one crying in the wilderness for years to get what they called the landschaft system put in operation over there. He could not make it go; he was poor, did not have influence enough; he was sneered at as a "mere theorist," but one of the greatest men of modern times breathed into the nostrils of this system the breath of life, Frederick the Great, of Prussia, and it is a remarkable tale. He not only was one of the foremost soldiers of all time, but he was also a wise statesman. What is more, he was a very successful business administrator. So this man Büring induced Frederick the Great to take it up. Of course the king was absolute and could do as he pleased. It was just at the close of the Seven Years' War, and the story of that war is one of the most remarkable tales ever told in the history of wars.

With 5,500,000 people when he started, Frederick the Great fought France, Russia, Austria, Sweden, and Saxony, one of the largest of the German States, all at one time, and soundly thrashed the whole aggregation, although they had a population of 105,000,000 people. His kingdom was not half as large then as the Kingdom of Prussia is now, and consisted of three separate, disconnected pieces. Although he was the victor in that war, he had lost one-ninth of his entire population, and there never has been a country in the history of modern times that was so thoroughly devastated as was the Kingdom of Prussia. There was not a square mile which had not been laid waste with fire and sword. Frederick started in to rehabilitate his country. The people did not have seed enough to plant a crop. He mortgaged the crown jewels and tore the silver bullion out of his palaces—for in those days they fixed up fine houses with a great deal of bullion. He melted it down and sold it and invested the proceeds of the bullion and the crown jewels in field seed for the farmers and gave it to them. They did not have horses enough to put the crop in, and he loaned them 60,000 cavalry and artillery horses to do their plowing. Then he undertook, furthermore, to reestablish their homes, and he constructed over 30,000 houses. Taken all in all, he is one of the greatest men that ever lived. This man Büring, the obscure merchant, went

to Frederick the Great and pumped into his head this scheme of landschaft, farm loans or rural credits. Frederick changed it somewhat, but accepted the principle. He reached out and took the nobility of Silesia by the nape of the neck and dragged them into the landschaft. They did not have any choice about it; he made them go in; and in order to help it along he contributed $632,000 out of the royal revenues—a large contribution in those days.

The landschaft that he started in 1769 is running successfully yet, and it has been adopted in every country of Germany—the 26 States—except one, and has been adopted in France, where it has been reduced to almost an exact science.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman may have 10 minutes more, not to be taken out of the time already fixed for debate.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CLARK of Missouri. I thank the gentleman from Illinois [Mr. MANN] and the committee. I made the preface to my remarks longer than I intended. Our people went over to Europe and studied the system there. I understand perfectly well that with such a large country as we have, with our everlasting incorrigibility about moving from pillar to post—nearly every man who has lived west of the Missouri has lived in three different States—on account of the size of the country and of our migratory habits, it is going to be harder to make this thing work in the United States than it was in Germany.

My friend from Philadelphia [Mr. MOORE], of whom I think a great deal and who is a very bright man, was objecting to this bill because it did not do the cities any good.

I want to suggest to him that we have been legislating ever since I have been here and ever since the Government has existed for some one else beside the farmer. [Applause.] We have legislated for the bankers, for the manufacturers, for wage earners, for nearly everyone else, and now it is our time. I desire to make another suggestion to him. As the farmers of this country prosper so do the cities prosper. [Applause.] If the farmers did not prosper, the grass would grow in Broad Street and Chestnut Street in Philadelphia and in the streets of all the great cities; but in ordinary fairness it ought to be stated that if it were not for the vast population of the great cities—laborers, merchants, lawyers, doctors, and men and women in other walks of life and the great army of children, all consumers of agricultural products—the farmers would be in a bad way. Truth to tell, we are all interdependent on each other, and all of us should encourage every legitimate and useful industry in the land.

The learned gentleman from Ohio [Mr. FESS] asked the gentleman from Indiana [Mr. MOSS] a very pertinent question, and that was, If farmers could borrow money at 4½ or 5 per cent now or at 6 per cent, what is the sense in passing this bill? In the first place, they can not borrow money at 4½ per cent, and, in the second place, theoretically they can borrow it sometimes at 5 per cent, although things, including rates of interest, have gone up somewhat lately. You can only borrow under present practice for five years at a clip. In addition to that, by the time you pay the bonuses and other charges you have run up to 6 or 7 per cent. That is not the principal thing. Even if this bill fixed the per cent at exactly what the farmer could borrow for now I would still be in favor of this bill, and I will tell you why. The most valuable feature of this bill is the long-term loan [applause] and the amortization feature. I will give you a concrete example. You borrow money for five years from one of the land agencies or one of the insurance companies. You want to plant an orchard. There are some species of apple trees which come into bearing in seven or eight years to some extent, but you can not count reasonably on a full apple crop from a new set of trees in less than 10 years. The same thing is true of pecan orchards and some others.

Another thing about it: The man who borrows on one of these long-term loans, certainly if he complies with the terms of it, can keep that money, paying the interest and part of the principal each year, practically a lifetime. Some of these concerns in Europe have a 100-year period; some of them, I think two or three, have more; many 75, 50, 25. The man gets that money. He gets it at a low rate on easy terms of payment; the loan runs a long time; he can lay his plans reaching far into the future; he starts in to make that farm a home for himself and his children forever.

Mr. EAGLE. Will the gentleman from Missouri permit?

Mr. CLARK of Missouri. I will.

Mr. EAGLE. May I call the attention of the gentleman from Missouri in this connection to this fact, that even if the current present average rate of interest that the farm mortgages of America bear be as small as 6 per cent, which I doubt, notwithstanding that he takes care only of the current interest rate, whereas under the system we are here setting up that same amount paid every year will not only take care of the system and the current interest rate but amortize and in a period of 30 years pay off the principal. [Applause.]

Mr. CLARK of Missouri. I thank the gentleman for his suggestion. He is entirely correct. Now, the fact that he secures a long-time loan, the fact that he has easy payments, induces a man to go in and do the most important thing on a farm, and that is improve the quality of the soil and put better improvements on the farm. Five or six or seven years ago, when James J. Hill, the great empire builder, made a speech at an agricultural fair, in which he said that unless we learned how to make an acre of land produce more than it was doing now, in less than 20 years we would be habitually importing foodstuffs, it sounded like a firebell at midnight, and scared the wits out of half of us.

Now, this bill that Mr. Chairman GLASS has reported here has a tendency to make conditions under which farmers will make an acre produce more than it has produced heretofore. [Applause.] Suppose it is defective, and I would not be at all surprised if it is in some regards, but it is laying a foundation on which we can build hereafter, and if it is not right improve it by amendment. Now, gentlemen, that is about all I have to say or desire to say. I want to see this bill pass because we all promised it, every one of us. And I will tell you another thing about it. There is not a man representing an agricultural district in this House on either side of this aisle who can vote against this bill and go home to his people without being put on explanation. [Applause.]

Mr. HENRY. Mr. Chairman, will the gentleman yield?

Mr. CLARK of Missouri. If I have time. How much time have I remaining, Mr. Chairman?

The CHAIRMAN. The gentleman has two minutes remaining.

Mr. HENRY. The gentleman from New York [Mr. BENNET] said that there is not anything in this bill that will benefit the landless man. I want to suggest the landless man can avail himself of the benefits of this bill, because he can borrow 60 per cent from the Government and can turn over that money to the man who has land for sale, say, 200 acres at a value of $10,000, and then the owner of the land can take a second lien for the other 40 per cent, and every year the second lien becomes more valuable because the principal and interest are being paid off.

Mr. CLARK of Missouri. Of course it does. I believe as firmly as I am standing here that the passage of this bill will increase the number of landowners—home owners—in the United States—a consummation devoutly to be wished. [Loud applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana.

Mr. SUMNERS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. SUMNERS. I desire to oppose the amendment, and I ask unanimous consent that that amendment be again reported.

The amendment was again reported.

Mr. SUMNERS. Mr. Chairman, I want to speak in opposition to the amendment offered by the gentleman from Indiana [Mr. WOOD]. He is apprehensive that the benefits of this bill do not extend to the man who does not live on the land upon which the loan is sought and does not intend to, while I am apprehensive—in fact, I am certain—that it does extend the benefits to such a man. The gentleman from Indiana now offers an amendment which, if adopted, would remove his apprehension, and I shall offer just the contrary amendment.

Mr. Chairman, this is a most vital question with which we are dealing now, one which calls for a disregard of personal interest and political considerations. Whether this legislation is to be a blessing or an injury to this country will depend upon whether in its operation it facilitates home getting by the homeless or facilitates the extension of landed holdings by the nonoccupiers of the land. In the competition for the land between the man who wants it to establish his home upon and the man who wants it to rent, there is no uncertainty as to which one's winning would accord best with sound public policy. We can not close our eyes to the fact that there are three more or less distinct classes—the home builder, the landlord as such, and the speculator—who are competing with each other for the ownership of the lands of this country.

I am not criticizing either class. I have no prejudice in the matter. Most of what I have is invested in a farm. But I know as a matter of broad national policy we have reached a condition in which attention must be given to absentee landlordism. We must extend the hand of encouragement, the hand

of help, if you please, to the man who is willing and able with that help to build a home for himself and live in that home.

This is no small matter of passing importance we are dealing with. It reaches to the very foundation of governments. There is strength in that nation where the people who own the lands live on them. I do not want to help the man get lands who is going to live in town and rent them, as does the gentleman from Indiana. Not because I have aught against him, but it is not good for the Nation. I want to help the man who is going to live on the land. I want to help the man to get a home who has no home. Not because I think he is any better than the other man, but because it is good for the Nation that this homeless man get a home and occupy it. We are here to legislate for the good of the Nation. If this bill gives a much cheaper rate of interest, as it is hoped it will, and that cheap money is available to the speculator it will be more difficult for the poor man to get a home then than now, because the price of land is largely controlled by the rate of interest where it is located. Reduce the rate of interest on money available for land purchase and the price of land is increased. The higher the value per acre the greater, of course, will be the sum necessary to make the initial investment. Forty per cent of the price is the initial investment contemplated under this bill. The first 40 per cent is the hardest part for a poor man to get. We do not want to increase that difficulty. We will increase that difficulty unless the benefits of this bill are limited to the home builder. I hope the gentleman's amendment will be defeated.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana [Mr. WOOD].

The question was taken and the amendment was rejected.

Mr. CARAWAY. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Arkansas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, at the bottom of page 101, at the end of line 23, by striking out the word "above" and add to line 24 the words "in this section."

Mr. CARAWAY. That is an amendment that the committee, I believe, agrees to accept.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 101, at the end of line 23, strike out the word "above" and after the word "mentioned," in line 24, insert the words "in this section."

Mr. MOSS of Indiana. I will be glad to say to the gentleman from Arkansas, in behalf of the committee, that I am quite willing to accept that amendment.

The CHAIRMAN. Without objection, the amendment will be agreed to.

Mr. MANN. Reserving the right to object, I would like to have the amendment again reported.

The amendment was again reported.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

Mr. NORTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from North Dakota offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. NORTON: Page 102, line 16, after the word "sixth," strike out all of line 16 and all of lines 17, 18, 19, and 20 and all of line 21 to the word "In," and substitute in lieu thereof the following:

"No loan shall be made to any person who is not at the time or who does not in his application state his intention to become within six months engaged in the cultivation of the farm mortgaged. In case of the sale of the mortgaged land the Federal land bank may, in its discretion, declare the mortgages thereon due and payable, or permit the mortgage to be assumed by the purchaser."

Mr. NORTON. Mr. Chairman, some who have made a study of this subject believe that these loans should be made to anyone who owns farm property. I believe the loan should be extended only to those who own farm property and who cultivate that property. I believe one of the important purposes of this legislation is, and should be, to encourage the ownership and cultivation of farm property, to encourage the living upon farms by more people in this country.

The provision as it stands in the bill would permit one who owns farm property to make a loan and then to sell the property, and have that loan assumed by the buyer, who might not be a farmer at all, but who might be purely a speculator in farm lands. In my own State we have a system whereby we loan on farm property funds belonging to the schools of the State. These mortgage loans are made at the rate of 5 per cent for a period of 12 years. A few years ago, on making an examination of these loans, I found that most of the loans at that very favorable rate of 5 per cent had been made to land speculators, to merchants, and bankers, and not to actual farmers. In many cases land speculators, merchants, and bankers who had received from our board of university and school lands the privilege of these State loans at 5 per cent were making farm loans to actual farmers at rates of 10 and 12 per cent.

I firmly believe if there are any benefits connected with this system they should go to the man who is actually operating the mortgaged farm, either by his servants or directly by himself. That is the purpose of the amendment that I have offered. It is provided by my amendment that when the land mortgaged is sold the farm-land board may, in its discretion, declare the mortgage due and payable.

Mr. FESS. Will the gentleman yield there?

Mr. NORTON. Certainly.

Mr. FESS. Is it possible for you to make a law so as to prevent a man from acting by proxy? May not one own farm land and have certain servants work it?

Mr. NORTON. Of course, that can not be done, as the gentleman well knows. My amendment does not propose to do anything of that kind.

Mr. FESS. You do not prevent a man living in the town from owning a farm and letting somebody else do the farming?

Mr. NORTON. I would not propose or favor any legislation that would discourage a landowner from personally operating or supervising the operation of his farm, but I do desire the benefits of this legislation to accrue to actual farmers who occupy their farms rather than to soap-box or swivel-chair farmers.

Mr. FINLEY. Mr. Chairman——

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

Mr. MOORE of Pennsylvania. Mr. Chairman——

The CHAIRMAN. Does the gentleman from South Carolina [Mr. FINLEY] desire to be recognized in opposition to the amendment?

Mr. FINLEY. I do. Mr. Chairman, I think the provision in the bill is very well worked out, and I am of the opinion that if the amendment of the gentleman from North Dakota was incorporated in the bill it would bring about more or less confusion and interfere with the administration of the bill as contemplated in its general outlines.

Mr. NORTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from North Dakota?

Mr. FINLEY. Certainly.

Mr. NORTON. The gentleman argues that my amendment will bring about confusion. Now, that is not so. I want to say——

Mr. FINLEY. Well, Mr. Chairman, I do not yield to the gentleman for a speech.

The CHAIRMAN. The gentleman declines to yield.

Mr. FINLEY. There is no doubt about it, Mr. Chairman, that a proper rural-credit law should be for the benefit of the farmer. But you must have some system, some theory upon which to operate. And not only that, Mr. Chairman, but here we wish to encourage a large class of people who are not landowners to become landowners. A great many of those people are in the country. We wish to reduce that class to a minimum as far as possible under the operations of this bill. Besides that, there is a large percentage of the city population of this country who are without homes. They can do better in the country than they can do or than they are doing in the town or in the city, and they should go, and should be encouraged to go, to the country and become landowners. [Applause.]

Mr. Chairman, I think the plan as worked out here, and of which the gentleman from North Dakota has complained, should remain in the bill.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman from South Carolina yield to the gentleman from Wisconsin?

Mr. FINLEY. Yes.

Mr. COOPER of Wisconsin. What does the gentleman from South Carolina think of that part of the amendment offered by the gentleman from North Dakota, which proposes to change this language of the bill—"No such loans shall be made to any person who is not at the time, or shortly to become, engaged in the cultivation of the farm mortgaged"—by making it require, in substance, that in the application for the loan the applicant shall declare that he is, within six months of the date of the application, to become engaged in farming?

Mr. FINLEY. The gentleman asks what my view is of striking that out?

Mr. COOPER of Wisconsin. No; the language of the bill is "shortly to become," which in itself is very indefinite, and the amendment of the gentleman from North Dakota proposes to change this to an absolute definite requirement that in the application for the loan the borrower shall declare that within six months' time he will be a farmer.

Mr. FINLEY. I stated that in my opinion the language employed by the gentleman from North Dakota in his amendment would bring about an indefinite or unsatisfactory state of affairs.

Mr. COOPER of Wisconsin. Could it be more indefinite than to say "shortly to become"? The amendment simply proposes that the borrower be required in writing to declare that within six months of the date of the application for the loan he is to become a farmer, and so forth. What does "shortly" mean?

Mr. FINLEY. Well, the gentleman is able, and I will leave that question for him to answer himself. I think some discretion should be lodged in the board. It may be that sometimes six months would not be the proper time. So, Mr. Chairman, I think the amendment should be voted down. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from North Dakota [Mr. NORTON].

The question was taken, and the amendment was rejected.

Mr. SMALL rose.

The CHAIRMAN. Has the gentleman from North Carolina an amendment to offer?

Mr. SMALL. I have.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SMALL: Page 103, after line 26, insert a new section, No. 11, as follows——

Mr. MANN. Mr. Chairman, that is not in order yet.

The CHAIRMAN. Not at this time. That would not be in keeping with the spirit of the agreement. This is an entirely new section, as the Chair understands.

Mr. SMALL. It is an amendment to the section.

Mr. MANN. No; a new section is not an amendment of the present section.

The CHAIRMAN. The Chair will state that he was not in the chair at the time the agreement was entered into. The Chair understands that there was an agreement of 1 hour and 20 minutes on this section and all amendments thereto, and in keeping with that agreement the Chair believes that a new section ought not to be debated within that time.

Mr. SMALL. This is not a new section.

The CHAIRMAN. The amendment says "a new section."

Mr. SMALL. I mean it is a subsection.

The CHAIRMAN. Very well. The Clerk will report the amendment.

The Clerk read as follows:

That no loan or the mortgage securing the same shall be impaired or invalidated by reason of the exercise of any power by any Federal land bank or national farm-loan association in excess of the powers herein granted or any limitations thereon.

Mr. SMALL. Mr. Chairman, the beginning of this section under consideration contains this language: "That no Federal land bank organized under this act shall make loans except upon the following terms and conditions." The gentleman from Illinois [Mr. MANN], during the early stage of the consideration of this section, submitted a query as to whether a loan made by the Federal land bank beyond the powers or contrary to the limitations contained in the several provisions of the subsections of this section would impair the obligation or relieve the mortgagor from his liability.

I respectfully submit that substantially the interpretation made by the gentleman from Illinois [Mr. MANN] is correct. It may well be that a mortgagor could not himself make the defense that it was ultra vires. It may well be that if a suit were brought in equity to foreclose the mortgage he could not plead that his mortgage was void. But it is, I think, quite true as a matter of law that if any loan were made contrary to the exceptions or inhibitions contained in this law it could be taken advantage of by a third party, so that if the mortgagor had given a second mortgage, or if he had conveyed the land, the second mortgagee or the grantee could take advantage of it, and as a defense could set up the action of the Federal land bank in exceeding its powers or the limitations imposed upon it. This Federal land bank is a creation of law. It has no powers except those which are granted to it. Such powers as are granted are to be rigidly construed, and if they exceed those powers or violate any limitations imposed upon them, I think a proper interpretation would be that a loan made in excess of those powers would not be binding upon any third party as grantee or mortgagee of the same land. I think it may well be true that the borrower would be personally liable for the amount. He would not be permitted to set up this violation of law by the Federal farm-loan board, to relieve himself of his liability, because he had had value received and he would therefore be personally liable. And, as I said, in any suit in equity to foreclose the mortgage I think he might not be able to set it up. But it is extremely probable that a third party could set up this defense.

Now, the gentleman from South Carolina [Mr. LEVER] and others upon this floor during this debate have constantly and repeatedly made the statement that the vital feature of this act was the bond, and that we must keep the security of that bond intact, that we must make it attractive as an investment, and that if we do not do so, then the workability of this law will be seriously impaired.

[Mr. WINGO addressed the committee. See Appendix.]

Mr. MANN. Mr. Chairman, before I came to Congress I was a real estate lawyer. I had handled more than a thousand foreclosure suits. I think I was fairly well acquainted with the law when I came here. There is no reason on earth why you should leave a question of this sort in doubt. I say that in my opinion the chances are that the court under this would hold that, while a man could be sued for money had, he could not have his mortgage foreclosed; that it is essential to have it clear one way or the other if you want this a success.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

Mr. LEVER. Mr. Chairman, I desire one minute. I hope this amendment will be adopted. If there is to be any doubt of the right of the parties involved in this matter, it is going to affect very much the salability of these bonds, and we can not afford to take any chances on that. I trust that this amendment will go into the bill and that we will depend on the conferees to work it out carefully, so that there will be no doubt on the subject.

Mr. NORTON. Mr. Chairman, can we have the amendment again reported?

The CHAIRMAN. Without objection, the Clerk will again read the amendment.

The amendment was again reported.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina [Mr. SMALL].

The question was taken, and the amendment was agreed to.

[Mr. CANNON addressed the committee. See Appendix.]

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 101, lines 11, 12, and 13, after the word "equipment," strike out the words—

Mr. CULLOP. Mr. Chairman, I make a point of order against the amendment. This is a land bill, and the amendment relates to live stock.

The CHAIRMAN. The Clerk will finish reporting the amendment.

The Clerk read as follows:

Page 101, after the word "equipment," lines 12 and 13, strike out the words "and live stock."

Mr. MOORE of Pennsylvania. I am glad the gentleman from Indiana agrees with me that we ought not to lend Government money to farmers for the purchase of live stock.

Mr. CULLOP. Not in this bill; it does not belong here.

Mr. MOORE of Pennsylvania. I appreciate the gentleman's support; the gentleman does not believe we ought to take money out of the Treasury to lend to men for the purchase of live stock.

Mr. CULLOP. The gentleman is misquoting me; I am not taking that position.

Mr. MOORE of Pennsylvania. If the gentleman thinks we ought to lend money on live stock, he can take that angle of it. While the bill does not lend Government money directly on live stock, it authorizes the land board to lend the money to farmers to buy live stock. So that if he buys live stock with it and an epidemic of foot-and-mouth disease sets in and the loser sees fit to take himself to other parts, the Government gets the farm. It is a splendid opportunity for the Government to get into the farming business; it may pick up lots of poor farms in this way.

I have offered this amendment because I do not think the farmer, the real farmer of the country, apart from the land shark, the speculator, or the agitator, wants to have the Federal Treasury used in this manner. That is not a fair deal to other people who have to buy their own stock.

Mr. Chairman, the Speaker of the House of Representatives, in his splendid historical review of foreign land-loan organizations a few moments ago, took occasion to refer to the fact that some of us did not agree with him upon this proposition. He did me an unintentional injustice when he said that I objected to this bill because it would do the cities no good. I have never taken any such position. Since I have been in this House I have stood up for the farmer of the country along with the city man. My position on this bill, as a man representing a city constituency which buys everything it eats from the farmer, is this: This bill specializes in the interest of the farmer. It takes $9,000,000 out of the Treasury which belongs to the men in the cities as well as to the men in the country, and it applies that money to the purposes of the farmer alone. The pretense is that it is going to give the farmer who never could earn a farm for himself an opportunity to own a farm. It does not give the city worker any such advantage.

I have contended in the spirit of fairness, in that spirit which I think animated the framers of the Constitution in regard to the uniformity of laws, that what is fair in the matter of governmental control and supervision for the farmer is fair for the man in the city. There ought to be no special advantage of one over the other. The distinguished gentleman from Missouri [Mr. CLARK] says that we have been voting everything to the man in the city and to the manufacturer in particular. I have been in this House now for five terms, and I have not heard one kind word from that side about the manufacturer. He has more often been the subject of unjust denunciation. I have heard very few words about the industrialist who constitutes the major portion of the population of the country. He is overlooked in this special legislation. I have observed that the people in my city who have to buy their own homes, who get no governmental support in that regard, who have to bear the burden of taxes for all the people of the country, are depended upon to buy everything the farmer has to sell. I observe that the burden borne by the man in the city receives scant sympathy in the laws we pass here and that he gets no such favoritism as is here intended to be conferred upon the farmer at his expense.

Mr. BLACK. Mr. Chairman, I wish now to discuss briefly the rural credits bill which we have under consideration. I do not think the House would be interested in a history of rural credit legislation in European nations, such as Germany and France have, because most of the membership of this House are more or less familiar with that. There has been a great deal said in our farm papers and magazines during the last few years with reference to these European systems and, in fact, it was the admirable results of rural credits over there which first attracted the attention of this country and caused Congress to send a commission to Europe to make a study of its different systems. This commission on its return made a very full report of its investigation which was printed and made available for study and reference by those who were interested in this important subject. At the closing session of the Sixty-third Congress, a commission was appointed, composed of Members from the Senate and House of Representatives to make further investigation of the subject and report back a bill for the consideration of the present session of Congress.

The committee performed its labor, and the bill which we now have under consideration follows, in the main, the recommendations which they made. The legislation does not follow the precise lines of any of the European systems for the very simple reason that conditions there are in many respects entirely different from those which prevail here. For instance, the German Empire, with an area of 208,780 square miles, supports a population of nearly 70,000,000 of people; while our own State of Texas has an area of 265,896 square miles—nearly a third larger than the whole German Empire—and has a population of only 4,000,000 people, or about 6 per cent as large as the population of Germany. Therefore it necessarily follows that the same identical system of rural credits which prevails in countries where farming is done on the intensive plan and the population is more stationary in their abodes can not be entirely applicable where the lands are not so well improved and the population is more migratory. Now, to illustrate the point I am trying to make: The landschaft system, which is largely used in Germany, is often referred to here in this country. It is purely a cooperative system, and a member who desires a loan on his land does not get the money from his association, but gets a landschaft bond, which he himself sells on the open market and gets his money in that way. It works admirably in that highly developed Empire, but perhaps would not prove to be a great success in this country.

So the task of Congress was to study these different foreign systems, and, using them as a basis, work out an independent plan suitable to conditions in the United States. This they have done; and while no one would expect a great constructive measure of this kind to be perfect in all of its details, the country is to be congratulated on the measure which the committee has given us, and there is every reason to believe that it will take its place alongside of the Federal reserve act as one of the greatest pieces of constructive legislation ever enacted in the history of the American Congress.

Now, it would be useless for me to take up any of your time in a discussion of the needs of rural-credits legislation. It is generally recognized throughout the country that our Nation has reached that point in its economic development where an independent system of agricultural finance is absolutely necessary. Perhaps no people preach more fervently than we the value of home-owning citizenship. The idea has perhaps been nowhere expressed with more happy and varied eloquence. It has been coined into ten thousand epigrams, all of them resplendent and inspiring. But what have we done? That is the question. The awakening to our responsibility is the occasion for the passing of this bill. So, instead of addressing myself to the needs of rural credits, I will confine my remarks to a brief analysis of the provisions of the bill which we have devised to meet our responsibilities. In the first place, this bill provides for two means of effecting the end sought, namely, the Federal land banks, which are based in part on the cooperative idea of the European nations, but in a modified form, and the joint-stock land banks, which are more individual in their conception and where each borrower stands on his own footing.

A study of rural credits in foreign countries has shown these two systems working satisfactorily, side by side, and it was thought by those who had made a close study of conditions in this country that it was a matter of supreme importance to give our borrowers the benefit of both systems. The reason for this will become more apparent as we familiarize ourselves with the details of the Federal land banks and the joint-stock land banks provided for in this bill.

FEDERAL LAND BANKS.

This bill provides for 12 Federal land banks, to be located in different sections of the United States, such locations to be determined by the Federal land-loan board, and no two of which shall be in the same State. The capital stock of each of these Federal land banks shall be not less than $750,000 each, and the stock subscriptions shall first be open to the public, and if within 90 days after the opening of such stock subscription books all or any part of the stock remains unsubscribed, then the Secretary of the Treasury is authorized to subscribe for said stock for and in behalf of the United States. This insures that these Federal land banks will be actually established and that if the investing public does not care to take hold at the start, then the system will not fail because of that fact, but will go right on and will be provided with its initial capital by the United States Government.

Now, there has been a good deal of criticism directed at this Government-aid feature, but when it is studied and analyzed it seems to me that there can be no valid objection to it. This contribution is in the nature of an advance, which is to be subsequently restored to the Treasury of the United States as fast as the stock is subscribed by the farm-loan associations. In other words, this Government stock is to be retired by the successful workings of the cooperative plan provided for in the bill. While it is true that this generous subscription of $9,000,000 on the part of the United States Government is perhaps larger than any initial subscription ever made by any Government to any similar rural-credit system, the purpose of it is laudable in the extreme, the benefits to be expected are manifold, and there is no reason to believe there will be any ultimate loss to the Government. Of course it is well understood by the framers of this bill that this initial amount of $9,000,000 would only, when considered by itself, be a small beginning to take care of the demand for farm lands in the United States, and the natural inquiry is, How will additional capital be procured? Well, gentlemen, that is the vital feature of this bill.

The means which it provides to accomplish this end are substantially as follows: After these Federal land banks are organized with their initial capital stock of not less than $750,000 each, the next step is for prospective borrowers to organize themselves into farm-loan associations. Ten or more persons desiring loans on farm land may join together to form these associations. After a prospective borrower becomes a member, he then makes his application to the association for a loan. His application is then passed upon by the officers of the local association; the land is appraised, and if it is approved the

application is passed on to the Federal land bank, and if it is there approved the loan is made—conditioned, of course, upon proper execution and delivery of the mortgage papers. After the Federal land bank has made loans to the extent of as much as $50,000 through these various farm-loan associations on first mortgages it may take these mortgages and file them with the Federal loan board and get the approval of the board for a bond issue of an amount equal to the face value of the mortgages which have been filed; these bonds to be issued in denominations of $20, $50, $100, $500, and $1,000, and not to draw more than 5 per cent interest per annum. The bonds can then be sold on the open market, and the money thus obtained from their sale will furnish additional capital for the banks to make other loans; and thus this process may continue on and on until the bank shall have sold bonds equal in amount to twenty times its capital stock, when it would have to stop under the limitations of the law. So it will readily be seen that the success of the system depends upon the simple question of whether or not the public will buy the bonds. And when their ample—and I might say "gilt edge"—security is considered, there ought to be little doubt but that the investing public will not only be willing to buy them but will be anxious to have the opportunity to do so.

Let us see how well these bonds are to be secured under the law: (1) By the capital, reserve, and earnings of the land bank which issues it; (2) by the capital, reserve, and earnings of the 11 other Federal land banks in the United States, because the law provides that each Federal land bank guarantees the payment of every bond and coupon issued by every other Federal land bank; (3) by the collective security of all the mortgages pledged and segregated in the custody of the farm-loan registrar, a Government official, which must at least equal in amount the outstanding bonds unless replaced by United States bonds or cash.

Every mortgage mentioned in paragraph 3 above is secured as follows: (1) By the personal undertaking of the borrower; (2) by the security of the mortgaged land; (3) by the capital, reserves, and earnings of the local association indorsing the loan; (4) by the individual liability of the members of the indorsing association.

In addition to the advantages of the iron-clad security above mentioned, these bonds are exempt from Federal, State, and municipal taxation, and during consideration of the bill an amendment was adopted authorizing the Secretary of the Treasury of the United States, in times of financial stress, to deposit with these Federal land banks as much as $500,000 each in any one year for the purpose of meeting any default in the principal or interest of the bonds.

Thus it will be seen that every possible safeguard has been thrown around them. In fact, some have complained that the framers of the bill have been really too cautious in safeguarding the security of these bonds, but this criticism loses much of its weight when it is remembered that the absolute success of this whole rural-credit system rests upon the ready salability of the bonds at advantageous prices. This bill takes into consideration this fundamental fact and, in my opinion, is both sound and practical in its provisions.

JOINT-STOCK LAND BANKS.

Now, there will perhaps be a great many borrowers who desire a loan on land who will not desire to go into the cooperative farm loan associations, but will prefer to act in their own individual capacity. The bill takes into consideration that fact and has provided for that class of borrowers by authorizing the organization of joint-stock land banks. These banks must have a minimum capital stock of $250,000, which capital must be subscribed wholly by private individuals. They are limited in their loans to the territory of the single State where they are organized and can not issue bonds beyond an aggregate amount of fifteen times their capital and surplus, and are confined in their operations to farm-loan business. In other words, they have no authority to do a general banking business. In countries where rural credits have been studied, it has been found that these banks are a very useful part of agricultural finance and have worked successfully, side by side, with the cooperative system.

In procuring a loan from these joint-stock land banks, the borrower does not have to join any association, but simply makes his application in the ordinary way that is now pursued in private loan transactions. The bonds issued by these joint-stock land banks will be distinctive in their character so as not to be confused with the bonds of the Federal land banks, and will be secured as follows:

(1) By the capital, reserves, and earnings of the land bank which issues them; (2) by the double liability of stockholders (similar to the liability of a stockholder in a national bank); (3) by the collective security of all the mortgages pledged and segregated in the custody of the farm-loan registrar—a Government official—which must at least equal in amount the outstanding bonds, unless replaced by United States bonds or cash. Thus it will be seen that these bonds are also well and amply safeguarded and should find a ready market with the investing public.

INTEREST RATES ON FARM LOANS.

I have now briefly reviewed some of the essential features of the machinery, so to speak, of this bill as it relates to the two separate plans, namely, the Federal land banks and the joint-stock land banks. Of course, I have not discussed all the details of administration, because that would be a tiresome rehearsal of particulars which would not be interesting and would be an undue trespass upon your time.

I now wish to address myself to the real meat of the subject, and that is as to the result which the bill is designed to accomplish. In the first place, the supreme object of the bill is to bring the idle capital of the country to the disposal of the man who either desires to buy a home and improve it or to improve and equip the one which he already has; and with the further object that he shall be able to borrow this money on long time and at a reasonable rate of interest.

If the bill accomplishes this end, then it will be, without a doubt, one of the most useful pieces of legislation ever enacted by the American Congress. This bill provides that the interest rate charged on the loans, either by the Federal land banks or the joint-stock banks, shall not exceed 6 per cent per annum. It was sought by some Members of Congress, by amendment, to lower this maximum rate of interest to 4 per cent per annum, but the majority of the membership of Congress did not deem it wise to do so. Of course, Congress is desirous of seeing these farm loans bear the lowest possible rate of interest, but we further realize that capital can not be conscripted and forced to invest in these bonds; and if the interest is made too low, so that the public will not buy the bonds, then the whole system would fall down and prove a dismal failure.

Congress can not, with a mere stroke of the pen, ordain that the public shall buy these bonds, and the man who argues so is either "beside himself" or is an enemy of the bill. It must be understood that the limitation of 6 per cent is a maximum amount, and whenever the farm-loan board finds that the bonds can be sold at a lower rate of interest than 5 per cent it is their duty to reduce the rate of interest on these bonds and thereby reduce the rate on farm loans. It is the confident expectation of all who have studied this question that farm-loan bonds drawing only 4 per cent can be easily marketed, and this would bring the rate of interest down to 5 per cent on farm loans. This is a very reasonable prospect, and there is but little doubt that it will be accomplished. Any man who has made any study of these matters knows that interest rates fluctuate in the financial centers in accordance with the law of supply and demand, and I can conceive of no greater folly than for Congress to "hamstring" this system by providing a rate of interest which the investing public would not take. The maximum rate of 6 per cent takes into consideration these fundamental facts and insures the safe working of the system.

Therefore I affirm that this bill meets the interest situation with the very best of wisdom and good judgment.

AMORTIZATION FEATURE.

Now, as to the long-term feature: The bill provides that loans shall be made for periods of not less than 5 years and not more than 36 years, depending on the wishes of the borrower, and that the payments shall be made on the amortization plan, which is to say that a definite installment is paid regularly by the borrower semiannually or annually, as the case may be; and in which installment is included the interest charge, the expense charge, and a payment on the principal. As the principal is reduced by the application of the amortizement to the reduction of principal, the interest is therefore reduced from time to time, and a constantly greater portion of the installment is applied to the extinguishment of principal. This long-term amortization feature is, of course, the real heart of the bill. The great need of the man of small means to-day is to have some source from which he can borrow money on long time at a reasonable rate of interest and pay it back in small annual installments. He is not able to do that now in most of the States, and under the present system must procure his loan at a high rate of interest and for a comparatively short time and run the risk of getting it extended at maturity.

Extensions are sometimes very difficult to procure and foreclosure is not infrequently the result. I know that in the State which I have the honor to represent in part, that for a time after the outbreak of the European war it was almost impossible to procure farm loans, and the result was that a great

deal of farm paper which matured during that time was very difficult to extend; and, unhappily in some cases, it could not be done at all and foreclosure was the result. I am, therefore, enthusiastic about the long-term amortization feature of this rural-credits bill. The gentleman from Massachusetts [Mr. PHELAN] who wrote the report recommending the passage of this bill, has given an excellent illustration of the admirable results which may be expected from the feature I have just been discussing. In this report, he said:

The general average farm mortgage interest rate has been conservatively estimated at 7½ per cent. It has furthermore been estimated that the total farm mortgage indebtedness of the Nation approximates $4,000,000,000. Accepting these estimates the annual interest charge will equal $300,000,000 with no reduction of principal. If this indebtedness could be refunded under the provision of this bill at a rate of 5 per cent per annum, the same sum as is now being paid for interest alone, the entire debt, principal and interest, would be paid in 22 years and 6 months. This would mean a net saving of more than $175,000,000 per annum. It would mean the extinguishment of the entire existing farm-mortgage debt by the operation of the system provided for in the bill in 22 years and 6 months, without increasing the annual payments over that now made to meet interest charges alone.

Now, what about that, critics? Is not that a result worthy to engage the attention of every man interested in the progress and welfare of agriculture in these United States? All honor to the gentlemen who have worked long and faithfully in framing this bill, and my hope is that even their most sanguine expectations will be surpassed by the actual results obtained.

HOME BUILDERS.

The home builder is the Nation builder, and upon his shoulders must depend the ultimate destiny of this Republic.

A prince can make a belted knight,
A marquis, duke, and a' that;
But an honest man's aboon his might,
Guid faith, he maunna fa' that.

Edmund Burke, in his great speech on the excise bill, said:

The poorest man may in his cottage bid defiance to all the force of the Crown. It may be frail; its roof may shake; the wind may blow through it; the storms may enter; the rains may enter, but the King of England can not enter; all his forces dare not cross the threshold of the ruined tenement.

The home—the poet has sung of it in his sweetest song; the artist has painted it with his loveliest colors, and the musician has dedicated to its sacred precincts, his most charming strains.

God grant that its domestic purity may continue to be preserved, and its fireside still remain the altar of American liberty.

Mr. CARAWAY. Mr. Chairman, I offer the following amendment——

The CHAIRMAN. If the committee will indulge the Chair for one statement, he will state that there are only 20 minutes left. The Chair would like to recognize all gentlemen having bona fide amendments to offer to the bill. During those 20 minutes if he recognizes gentlemen to offer amendments and then some one in opposition to them, naturally but two amendments can be offered; but if the committee will grant unanimous consent that these amendments offered may be considered as pending and be voted on at the conclusion of the debate, the Chair thinks it would facilitate matters. Is there objection to that procedure?

Mr. RAGSDALE. Mr. Chairman, I object.

The CHAIRMAN. The gentleman from Arkansas [Mr. CARAWAY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. CARAWAY: Amend, on page 102, in line 19, after the word "land," strike out the remainder of the sentence and insert: "If the purchaser is not eligible to borrow under the provisions of this act, the entire amount of such loan, at the option of the Federal land bank, shall become due and payable, or, if the purchaser is eligible to borrow, all excess of the loans above $10,000 shall be due and payable."

The CHAIRMAN. The Chair will state to the gentleman from Arkansas that there is an amendment now pending offered by the gentleman from Pennsylvania, and the question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment was rejected.

Mr. CARAWAY. Mr. Chairman, I should like to have the attention of the committee, if I may.

Mr. QUIN. What page and line?

Mr. CARAWAY. I am seeking to amend subdivision 6.

Mr. SHOUSE. The committee is going to accept the gentleman's amendment.

Mr. CARAWAY. Then I do not care to argue it.

Mr. SHOUSE. Mr. Chairman, on behalf of the committee, I am authorized to accept the amendment.

The CHAIRMAN. Without objection, the amendment offered by the gentleman from Arkansas will be agreed to.

Mr. SMITH of Michigan. Let us have it again reported.

The amendment was again reported.

The CHAIRMAN. Without objection, the amendment——

Mr. HAWLEY. Mr. Chairman, reserving the right to object, I would like to ask the committee if, in accepting this amendment, they mean to eliminate the rights of the heirs or successors in interest of the deceased borrower?

Mr. SHOUSE. No; that follows.

The question was taken, and the amendment was agreed to.

Mr. MORGAN of Oklahoma. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 101, lines 8 to 24, section 12, strike out all of lines 8 to 24, inclusive.

Mr. MORGAN of Oklahoma. The members of the committee will note that I have stricken out the lines which contain the four restrictions for which loans may be made. A few days ago, in making some remarks here, I opposed these restrictions placed upon the loan. If I remember correctly, the gentleman from Virginia, the chairman of the committee, questioned the statement that I made to the effect that as a rule the European land-credit institutions did not restrict the purposes for which loans are made. Now, to show I am correct about that——

Mr. GLASS. If the gentleman will permit an interruption?

Mr. MORGAN of Oklahoma. I will be glad to do so.

Mr. GLASS. All I meant to imply was that there was no banking system in this country or in any European country or any other country of which I had any knowledge that did not take the precaution to restrict its loans.

Mr. MORGAN of Oklahoma. Now, of course, that somewhat modifies the gentleman, as I understood what he said, but I insist that these limitations were not placed upon loans in European land-credit institutions, and my statement was called in question. Now, I want to read what Mr. Herrick says in a pamphlet which he has issued, page 25, where he says, referring to the landschaft:

No other maximum is set for the amount, nor is the mortgagor required to be the resident cultivator or to use the proceeds for any specified and sworn-to purposes. A landschaft is concerned only with the adequacy of the security, and this is determined through appraisers and officers, who see that the occupant is a good farmer and that the farm is productive and capable of yielding an annual income equal to the dues which the borrower obligates himself to pay. To go further than that, and require the loan to be used for some particular purpose, would necessitate an attention to details that the landschaft could not give without complicating its operations and increasing the cost of business.

Now I want to read from Mr. Cahill's report, with which I am sure Members are familiar, and whom they recognize as probably the best authority on this question. On page 11—and this is published as Senate Document 17, Sixty-third Congress:

The various agencies may be divided into three main classes, according to the purposes for which their loans are granted. In the first class there are four groups of institutions, namely, the land mortgage credit associations (landschaften) in the State, provincial and district mortgage credit banks, the joint-stock mortgage banks, and the savings banks, all of which grant mortgage credit without requiring, in ordinary circumstances, any declaration as to the purpose of the loan.

So there can be no question that in the committee bill you have put restrictions and limitations for which you can give no authority in existing land-credit institutions.

Now, what benefit can that be——

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

Mr. RAGSDALE. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. RAGSDALE. The gentleman from Mississippi [Mr. QUIN] before the motion was put, demanded recognition of the Chair.

The CHAIRMAN. If the gentleman from Mississippi demands recognition he can have it for the purpose of opposing this amendment. Does the gentleman desire to oppose the amendment?

Mr. QUIN. I desire to offer one.

The CHAIRMAN. The Chair is going to recognize the gentleman from Kentucky [Mr. BARKLEY] to offer an amendment as he agreed to do, and he will then recognize the gentleman from Mississippi if he gets a chance.

Mr. BARKLEY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 103, line 21, after the word "payable" insert:

"*Provided*, That the whole of said loan shall not become due and payable on account of any default in the payment of any installment of interest or principal except upon the existence of at least two of such defaults, unless such default by the borrower shall have been for the purpose of defrauding the holder of such mortgage."

Mr. BARKLEY. Mr. Chairman, under the bill as it is drawn it is provided that if the borrower shall be in default in reference to any condition of the mortgage the whole of such loan shall at the option of the bank holding the same become due and payable.

Mr. RAGSDALE. Mr. Chairman, I make the point of order that there is no quorum present.

The CHAIRMAN. The Chair will count. [After counting.] Eighty-four Members are present, not a quorum. The Clerk will call the roll.

Mr. BARKLEY. A point of order, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. BARKLEY. Has a gentleman a right when another gentleman has been recognized and been speaking, to take the floor away from him?

The CHAIRMAN. The point comes too late now. The point of no quorum has been ascertained.

Mr. GLASS. Mr. Chairman, I move that the committee do now rise. I hope the motion will be voted down.

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. GLASS. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 14, noes 66.

Mr. MOSS of Indiana. Mr. Chairman, I demand tellers.

Tellers were ordered, and Mr. Moss of Indiana and Mr. GLASS took their places as tellers.

The committee again divided; and the tellers reported—ayes 1, noes 107.

So the motion to rise was rejected.

The CHAIRMAN. A quorum is present. The gentleman from Kentucky [Mr. BARKLEY] has the floor.

Mr. BARKLEY. Mr. Chairman, under the provisions of this bill on page 103 it is provided if there shall be any default by the borrower in any of the conditions of the mortgage the whole debt shall then become due at the option of the bank holding the mortgage. Now, we can all very readily understand that there may be such a thing as the failure of a crop, or a man may have misfortune; he may have sickness in any given year, and by reason of these misfortunes he may be unable to meet the installments, either of interest or principal, for that one year, and yet under the terms of the bill automatically, if the bank holding the mortgage desires, the whole mortgage may become due and payable, and it may enforce collection.

Now, under my amendment I provide that two defaults in payment of interest and principal must occur before the bank has the right automatically to enforce the collection of the entire debt unless the default is brought about by the mortgagor to defraud the holder of the mortgage. It seems to me, instead of giving the option to the bank holding the mortgage to bring about the collection of the entire loan on the default of any condition of the mortgage, the farmer, who for any reason can not pay the installment in any year should have another year in which to make payment before the debt becomes entirely due at the option of the bank. And I trust that the conditions of this amendment are so reasonable that they will appeal not only to the House but to the committee which has produced this bill, so that they will recommend it and accept it for passage in the House.

Mr. RUSSELL of Missouri. How do you propose to be able to establish whether his intent was a fraudulent intent or not?

Mr. BARKLEY. They can bring a suit to enforce collection, and prove whether there was an intent to defraud, and if they can not show it is due to fraud the borrower will have two years in which to make the payment.

Mr. RUSSELL of Missouri. I think oftentimes there are circumstances over which the debtor would have no control whatever that make it very unreasonable for them to act simply because of the first default.

[Mr. WINGO addressed the committee. See Appendix.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kentucky [Mr. BARKLEY].

The question was taken, and the amendment was rejected.

Mr. QUIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Mississippi [Mr. QUIN].

The Clerk read as follows:

On page 102, in line 2, strike out the words "20 per cent of" and add, in line 3, the word "combined," after the word "thereon."

Mr. QUIN. Mr. Chairman, this amendment I offer provides that a farmer can get 60 per cent of the combined value of his land, of his residence, his barn, or his gin. The bill as it reads provides that he can get only 20 per cent of the value of his insurable improvements, his residence, his barn, or his gin. I ask by this amendment that 60 per cent of the value of his improvements may be borrowed.

I consider this one of the most important parts of this bill, because when a land-bank association proposes to loan they are going to be hampered in getting the proper valuation, and it will be difficult for the farmer to realize the proper loan on his property. His insurable improvements may constitute two-thirds the value, and under the language of the bill he can borrow only 20 per cent on such improvements. It strikes me it could not hurt the bill and would be a benefit to the bill itself and to the bond itself, as well as an advantage to the farmer, the borrower.

Mr. GLASS. The gentleman is proposing to reduce the amount the borrower can get by his amendment. It does not say "60 per cent of the value of the land mortgage or 20 per cent of the value of the improvements," but it says "and."

Mr. QUIN. Yes; but it says "and" 20 per cent of the insurable improvements.

I want it to say "60 per cent of the improvements" instead of 20 per cent; 60 per cent of the combined value of the land and the house and the barn and his gin, and so on. Surely the farmer should not be barred from that.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. QUIN. Yes.

Mr. WINGO. Why should not the farmer be permitted to borrow 100 per cent?

Mr. QUIN. I do not believe anybody ought to be loaned over 60 per cent of the value of the property when it comes to a loan. You talk foolishness when you think any business man will buy a bond on the full face value of property. Sixty per cent is about right. That is my idea about it. I think they are entitled to 60 per cent of the value of all their property—the land, the residence, the barn, and so on. For that reason, Mr. Chairman, I ask that the amendment I have offered be adopted.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SMITH of Michigan. Mr. Chairman, I ask unanimous consent that the time of the gentleman be extended for one minute.

The CHAIRMAN. The gentleman has the privilege of offering an amendment after the time has expired. The question is on agreeing to the amendment offered by the gentleman from Mississippi.

The question was taken, and the amendment was rejected.

Mr. RAGSDALE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from South Carolina [Mr. RAGSDALE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. RAGSDALE: Page 101, line 20, strike out all after the word "mortgage."

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from South Carolina may proceed for five minutes.

Mr. GLASS. I was going to make the same request, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from South Carolina [Mr. RAGSDALE] may proceed for five minutes. Is there objection?

There was no objection.

[Mr. RAGSDALE addressed the committee. See Appendix.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. RAGSDALE].

The question being taken, on a division (demanded by Mr. RAGSDALE) there were—ayes 21, noes 51.

Accordingly the amendment was rejected.

Mr. SMITH of Michigan. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Michigan: Page 102, line 5, after the word "the," insert the word "market."

Mr. SMITH of Michigan. Mr. Chairman, I ask unanimous consent to address the committee for five minutes.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to address the committee for five minutes on his amendment. Is there objection?

There was no objection.

Mr. SMITH of Michigan. Mr. Chairman and gentlemen of the committee, the appraising of the land that is to be mortgaged is a very important factor in the loaning of money. A good deal has been said here about the benefits of this law. I think the law is a little intricate. When a man wishes to borrow money

upon his land, he has first to sign an application. Then he must subscribe for certain stock in the land bank:

Any person desiring to borrow on farm-land mortgage through a national farm-loan association shall subscribe for shares of stock in such farm-loan association to an amount equal to 5 per cent of the face of the desired loan, said subscription to be paid in cash upon the granting of the loan.

Then there is a committee of three that is sent by the land-bank association for the appraisal of his land, and under the law as it now reads the land is to be appraised according to its value for agricultural purposes. It occurs to me that the market value of the land should be the basis, and not what the land is worth simply for agricultural purposes. The act provides that there may be three appraisals of the land:

APPRAISAL.

That whenever an application for a mortgage loan is made to a national farm-loan association, it shall be first referred to the loan committee provided for in section 8 of this act. Said loan committee shall examine the land which is offered as security for the desired loan and shall make a detailed written report signed by all three members, giving the appraisal of said land as determined by them. (Sec. 10.)

Before any mortgage loan is made by any Federal land bank, or joint-stock land bank, it shall refer the application and written report of the loan committee to one or more of the appraisers appointed under the authority of section 3 of this act, and such appraiser or appraisers shall investigate and make a written report upon the land offered as security for said loan. (Sec. 9.)

The Federal farm-loan board shall from time to time require examinations and reports of condition of all land banks established under the provisions of this act, and shall publish consolidated statements of the results thereof. It shall cause to be made appraisals of farm lands as provided by this act, and shall prepare and publish amortization tables which shall be used by national farm-loan associations and land banks organized under this act. (Sec. 3.)

We have heard a good deal about land being the very best security that can be offered to the investor.

Mr. COX. Will the gentleman from Michigan yield for a question?

Mr. SMITH of Michigan. I yield to the gentleman from Indiana.

Mr. COX. Does not the gentleman think there will be a good deal of trouble in determining the value of the land?

Mr. SMITH of Michigan. My amendment does not say just the value of the land. It says the market value of the land and the earning power, both.

Mr. COX. I can readily see that the market value of an acre of land might be $200 or $500, while for agricultural purposes it would not be worth that at all.

Mr. SMITH of Michigan. It depends on whether or not you put the land into strawberries or some very productive crop. If you put it into strawberries, it is worth under this bill $400 an acre for agricultural purposes, and you use $400 an acre as the mortgage basis.

Mr. COX. Take the case of a piece of land situated close to a town, the market value will not be the agricultural value at all, because the market value may be $500 an acre.

Mr. SMITH of Michigan. The law as provided in this bill does not say anything about the location of the land. The amendment says the market value for agricultural purposes. It is not for speculative purposes, but for agricultural purposes. I want to read from the Weekly News Letter issued by the Department of Agriculture on April 26, 1916, as to the value of land and how it would affect a mortgage loan:

Recently 64 groups of farms in 19 States were studied in order to ascertain what the farmer obtained for his year's work after deducting the interest at 5 per cent on the value of his farm and other capital; in other words, to find out his labor income or wages. In each of these groups, which included altogether 4,400 farms, the conditions were reasonably similar. In each group the farmers were divided into five numerically equal classes, according to their labor incomes.

THE SUCCESSFUL FIFTH.

It was found that although the average labor income for all the groups was only $387, the average for the farmers in the first class—that fifth of the farmers who did best—was $1,421. In the second class it was $642. The last class—the fifth of the farmers who were least successful—got nothing for wages and lost, on the average, $517. That is to say, the interest on the amount of money represented by their farm, stock, and equipment would have been $517 more than the farm returned them. It should be borne in mind in this connection that the labor income is merely the farmer's wages, and that the family has, in addition, besides interest on investment, the use of the farmhouse and such fuel and food as the farm supplies free of money cost.

As to the average income of the third and fourth classes, I present a letter received only a few days ago, also from the Department of Agriculture:

UNITED STATES DEPARTMENT OF AGRICULTURE,
STATES RELATIONS SERVICE,
*Washington, D. C., May 10, 1916.*

Hon. J. M. C. SMITH,
*House of Representatives.*

DEAR SIR: Replying to your letter of the 1st, addressed to the Weekly News Letter, we would beg to advise that the average labor income of the third and fourth classes of farmers was $331 and $49, respectively. Of these 64 groups, 6 were in the State of Michigan.

We have made no effort to determine the average size of these farms. They are located in all sections of the country, as stated in the article mentioned by you, and the average farm income of these sections is several times as great as in others. You will find this same matter more thoroughly presented in the recent hearings before the Agricultural Committee of the House, pages 1157 to 1173.

Trusting this gives you the information desired,

Very truly, yours,

C. B. SMITH, *Chief.*

The CHAIRMAN. The time of the gentleman has expired.

Mr. SMITH of Michigan. I ask for two minutes more, in order to complete this statement.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for two minutes. Is there objection?

There was no objection.

Mr. SMITH of Michigan. This article states that the last class, the fifth of the farmers who were least successful, got nothing for wages and lost on the average $517. That means that the farmers in that class would each have made $517 more if they had had the value of their farms and investments on a 5 per cent loan. That is to say, the interest on the amount of money represented by their farms, stock, and equipments would have been $517 more than the farm returns.

Now, there are three appraisers to go and appraise a man's farm. They set a certain day to go and appraise it. On that day one of the appraisers finds that his own farm is under water, and he can not go. The second man is busy killing boll weevils, and he can not go. The third man is dipping his cattle to get rid of the cattle ticks, and so on. [Laughter.] You have provided a system of appraisal that is complicated and expensive. And think of the fees of the lawyers who will examine the titles. Section 5 provides for a set of lawyers in the land bank, and the Federal land board, by section 3, is provided with a set of lawyers. It requires good lawyers who are competent to examine land titles. It is the most intricate work there is. It requires care and skill. It requires experience. The lawyer must report on the title. If the title is not good, the mortgage will not be good, nor the bond it secures. I want to consider this from the standpoint of the borrower of the money. He does not want to pay large or small fees to appraisers, attorneys, experts, assistant clerks, laborers, and other employers such as are provided for in this bill. What he wants is to get his money readily and at a low rate of interest, devoid of publicity and red tape. The money lender deals directly with the farmer. Why can not we enact a law whereby the farmer can get his money with the same ease and with as little expense as he can at a State, savings, or national bank at the present time. The farmer has good security, and wants a correspondingly low rate of interest. We all agree to that.

Mr. SWITZER. Will the gentleman yield?

Mr. SMITH of Michigan. Yes, for a question.

Mr. SWITZER. Will there be just one appraiser selected by this land bank, or will they have a number?

Mr. SMITH of Michigan. The land board has appraisers.

Mr. SWITZER. I mean this land bank.

Mr. SMITH of Michigan. And the land bank has appraisers and the land association has got appraisers. They have all got them everywhere.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment of the gentleman from Michigan [Mr. SMITH].

The amendment was rejected.

Mr. SUMNERS. Mr. Chairman, I offer the following amendment.

Mr. WINGO. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. WINGO. Was not all debate closed on this section and amendments thereto?

The CHAIRMAN. All debate on this section and amendments thereto were closed and have been closed for some time, and we are proceeding by unanimous consent. The Clerk will report the amendment of the gentleman from Texas.

The Clerk read as follows:

Page 103, line 12, after the word "mortgage," strike out the period and insert "and that he and his assignees will continue to occupy and cultivate said land, provided the farm-loan board may waive the undertaking as to occupancy where the owner thereof or the members of his family are personally engaged in the cultivation of said land."

Mr. SUMNERS. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to proceed for three minutes. Is there objection?

Mr. WINGO. Mr. Chairman, I shall not object to this, but I shall be compelled to object to any further requests on this section.

Mr. MANN. I would like to get three minutes myself to call attention to one matter.

Mr. WINGO. Then, Mr. Chairman, I ask unanimous consent that all debate close on this section in six minutes, the gentleman from Illinois to have three minutes and the gentleman from Texas three minutes.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent that all debate close on this section and amendments thereto in six minutes, three minutes to be occupied by the gentleman from Texas and three minutes by the gentleman from Illinois. Is there objection?

There was no objection.

Mr. SUMNERS. Mr. Chairman, I say candidly to the committee that I do not expect that this amendment will be adopted now. But I want to call to the serious attention of this committee the fact that this bill provides that these loans shall be limited to those who occupy, or are about to occupy, the land; but there is not a line in the bill to prevent a man from abandoning the property on which a loan is gotten the day after he gets the loan.

Another thing, you make the maximum loan $10,000, but there is not a thing in the bill to prevent a man who already owns $100,000 worth of land taking advantage of the provisions of the bill. My amendment would limit the benefits of the bill to the home builders and prevent the speculator from using it to the detriment of the home builders.

I say to you, gentlemen, that no man ought to get one dollar of this money except the home builder. If you give cheaper money and make it available for general use you make it more difficult for the poor man to get his home than now, for the reason that you will increase the price of land. It would be harder for him to get the first 40 per cent, that part which this bill does not help with regard to, than now. Instead of doing the poor man a service you will do the speculator a service and the poor man an injury.

I know what I am talking about. Take Texas, with 52 per cent of its farms occupied by tenants. We need more home owners and fewer landlords there. The home, the owned home, is the foundation upon which the Nation rests. Facilitate their increase and strengthen the foundation of the Government. That is our duty now. I hope the committee in charge of this bill will seriously consider this matter. I appeal to you, gentlemen, because I know that I am right, and I ask you to see if you can not consent to so amend the bill that it will take the privileges of the measure away from the speculator and give it to the man who is trying to build a home for his family and is not ashamed to live in the country after he has gotten it. [Applause.]

Mr. MANN. Mr. Chairman, I wish to call attention to something that I think may be worthy of attention. Page 102, paragraph 6, says:

Sixth. No such loan shall be made to any person who is not at the time, or shortly to become, engaged in the cultivation of the farm mortgaged. In case of the sale of the mortgaged land, the purchaser shall have the option within 60 days to assume the mortgage and stock obligations of the mortgagor on the mortgaged farm. In case of the death of the mortgagor, his heir or heirs, or his legal representative or representatives, shall have the option, within 60 days of such death, to assume the mortgage and stock obligations of the deceased on the mortgaged farm.

I do not know just what is meant by this, but it is quite evident that if it amounts to anything 60 days is too short a time to require the heirs or the legal representatives of a deceased farmer to determine what they are going to do. I can not see that it amounts to very much unless giving an option means that they have the option to do or not to do. Of course there is a mortgage on the land; it is a lien on the land.

Mr. WINGO. I think there is something in the gentleman's suggestion, and what time would the gentleman indicate?

Mr. MANN. I do not know. I do not undertake to say, but I think it ought to be a longer time than 60 days.

Mr. WINGO. I think the committee agrees with the gentleman, and we have thought of it before.

Mr. MANN. This bill is going to the conferees, and I make the suggestion with the view of having it corrected deliberately. If the option means that the purchaser may refuse, that is one thing, but I do not know just what it would mean. The purchaser takes the farm subject to the mortgage anyhow; he does not need to assume it. Somebody has to pay it, but if it means anything at all it ought not to be such a short time in the case of the estate of a deceased farmer.

Mr. SHERLEY. What does it mean?

Mr. MANN. I do not know.

Mr. CULLOP. Does not the gentleman think that one year would be a reasonable time?

Mr. MANN. I do not know.

Mr. CULLOP. I would like to call the gentleman's attention to another thing. Does not the gentleman from Illinois think that the State courts should have jurisdiction in foreclosure proceedings on the mortgages?

Mr. MANN. I think they do.

Mr. CULLOP. There is nothing to indicate it in the bill, and I think State courts ought to have jurisdiction.

Mr. MANN. I will say to the gentleman that one distinguished Member of the House—and a very able Member of the House, too—came to me awhile ago and insisted that the Federal courts ought to have exclusive jurisdiction over the foreclosure of mortgages under the bill.

The CHAIRMAN. All time has expired, and the question is on the amendment offered by the gentleman from Texas [Mr. SUMNERS].

The question was taken, and the amendment was rejected.

The Clerk, proceeding with the reading of the bill, read as follows:

POWERS OF FEDERAL LAND BANKS.

SEC. 13. That every Federal land bank shall have power, subject to the limitations and requirements of this act—

First. To issue, subject to the approval of the Federal farm-loan board, and to sell, farm-loan bonds of the kinds authorized in this act, to buy the same for its own account, and to retire the same at or before maturity.

Second. To invest such funds as may be in its possession in the purchase of qualified first mortgages on farm lands situated within the Federal land-bank district within which it is organized.

Third. To receive and to deposit in trust with the farm-loan registrar for the district, to be by him held as collateral security for farm-loan bonds, first mortgages upon farm land qualified under section 12 of this act, and to empower national farm-loan associations, or duly authorized agents, to collect and immediately pay over to said land bank the dues, interest, amortization installments, and other sums payable under the terms, conditions, and covenants of the mortgages and of the bonds secured thereby.

Fourth. To acquire and dispose of—

(a) Such property, real or personal, as may be necessary or convenient for the transaction of its business, which, however, may be in part leased to others for revenue purposes.

(b) Parcels of land mortgaged to it as security.

(c) Parcels of land acquired in satisfaction of debts or purchased at sales under judgments, decrees, or mortgages held by it. But no such bank shall hold title and possession of any real estate purchased or acquired to secure any debt due to it, for a longer period than five years, except with the special approval of the Federal farm-loan board in writing.

Fifth. To deposit its securities, and its current funds subject to check, with any member bank of the Federal Reserve System, and to receive interest on the same as may be agreed.

Sixth. To accept deposits of securities or of current funds from national farm-loan associations holding its shares, but to pay no interest on such deposits.

Seventh. To buy and sell United States bonds.

Eighth. To charge borrowers, under rules and regulations promulgated by the Federal farm-loan board, reasonable fees not exceeding the actual cost of appraisal and determination of title. Legal fees and recording charges imposed by law in the State where the land to be mortgaged is located may also be included in the preliminary costs of negotiating mortgage loans. The borrower may, at his option, pay such fees or he may require them to be advanced by the Federal land bank making the loan, in which case said expenses shall be made a part of the face of the loan and paid off in amortization payments. Such addition to the loan shall not be permitted to increase said loan above the limitations provided in section 12.

Mr. SHOUSE. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Page 105, line 8, after the word "years" strike out the balance of line 8 and line 9.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kansas.

Mr. HUMPHREY of Washington. Mr. Chairman, I desire recognition. I have been listening to this debate for several days. Like the distinguished Speaker, I want to vote for the bill, but if I do I am going to be compelled to forget a good deal that I have heard in this debate.

The more I know about this bill the less enthusiastic I am about supporting it. I doubt whether it will help that class that most needs help—the farmer that is struggling with poverty and debt. I doubt if it will help any man to secure a home for himself and family. Yet, as it is the only legislation of this character that the Democratic Party will permit Congress to consider, poor as it is, failing as it does to meet the promises made to the country by the majority and solely because we can not get something better, I shall support it, hoping it may be of at least some benefit to the farmer and trusting that it will do him no harm.

The sudden anxiety of the Democratic Party to pass this legislation and, as they claim, to redeem their platform promise after forgetting this promise for more than three years, is at least sufficiently surprising to attract attention. Why this sudden desire on the part of the Democratic Party to keep a platform promise? Have they shown any desire to keep any other platform promise? Will some good Democrat point out any promise that they made in their platform at Baltimore that has been redeemed? If he can it certainly will be interesting information to the American people. Have the Democrats redeemed their

promise to reduce the high cost of living? Have they redeemed the pledge that they made that their candidate would seek but one term for President? Is there a Democrat in this House that dares even assert that he is in favor of keeping this pledge? Does any Democrat feel proud of the way his party kept its promise in regard to free tolls for American ships using the Panama Canal? How can you explain the Democratic failure to keep any other promise in that platform and their great anxiety now to keep the one about rural credits. Is it possible that the Democratic Party desires to be in a position at the coming St. Louis convention so that they can point with pride to the fact that of all the promises made in the last Democratic platform, they have attempted to keep at least one? Why have they waited so long to redeem this pledge? Why their feverish haste now? Can it be that the Democratic Party is more anxious to pass this law in time to boast of it at the coming convention than they are to get it on the statute books in order that it might be given a fair trial before election? Do the Democrats think that they are deceiving the American farmer by such performances?

Much has been said during this long consideration of this bill about the farmer and farming.

I labor under no delusions in regard to the glories and the beauties of farm life. I know what farm life is; I have lived it. I know what it means to rise early and work late. When I was a boy on the farm we worked 10 hours before noon and 9 hours after noon. We slept only when we could not see to work. Much of the poetry and romance of farming is written by those who have plowed the fields only in a swivel chair in some comfortable city office. It is true that the interurban railroad, the telephone, the automobile, the rural route, the modern machine have removed much of the isolation and inconvenience and hardship of the farmer to-day as compared with the farmer of 25 years ago. But the life of the farmer is still one of hard work and self-denial, of saving and frugality. It is a life of good living and independence but not of luxury, ease, and extravagance.

Our farmers to-day, we are told, are prosperous. We rejoice that this is true. But the farmer that grows independent does not do it by speculation or by the accidental stroke of good fortune. He does it by industry, by economy, and by the exercise of sound judgment. There are no eight-hour days for the successful farmer. His days of watchfulness, anxiety, and care contain 24 hours.

The farmer is the most independent man in all the world. He has the most initiative. His success depends, perhaps, more largely on his individual effort than that of any other class. He is the strongest character of our race, always has been and probably always will be. The farmer of all classes is the most opposed to paternalism. Of all classes he most despises the fallacy that you can make prosperity by law. He of all classes demands no special favors. He wants only an equal chance. The farmer of this country demands only a fair deal.

In war and in peace the security of the Nation has largely rested with those who came from the farm. In time of peace the farmer keeps us from starvation. In time of war he is the backbone of the Nation's defense. It was the farmer's boy that helped more than any other class to establish our national independence and to preserve the Union. If the shock of war comes again, it will be the boy from the farm upon whom the Nation will chiefly rely for its protection.

To say that the farmer feeds the world is a trite saying. But he does far more than this. His sons and daughters keep the race from death.

In Grecian mythology we are told that one of the greatest feats of the mighty Hercules was the killing of Antæus. Antæus was a giant wrestler, and every time his antagonist threw him to earth he rose with his strength renewed, and Hercules could only slay him by holding him high in the air and strangling him to death. There is truth as well as poetry and imagination in that story. Great men keep close to the soil. The Nation that does not renew its strength by coming in contact with Mother Earth must die. If it were not for the new and clean blood that comes from the farms of this Nation, our country would perish in 50 years, the victim of its own degeneracy.

THE FARMER'S BOY.

The farm furnishes us not only with the foundation of national prosperity and the chief sources of our wealth, is not only the great power upon which the Nation leans in time of peace and in time of war, but the farm also furnishes the men that fill the leading places in all the world of success. In art and literature and profession and business and politics the boy from the farm stands first. The figures upon this subject are instructive and astonishing. Not one in every hundred of the men to-day in all the various walks of life who are leaders were born and raised in cities. The great judges, inventors, and scientists, lawyers and physicians, politicians and statesmen, have nearly all come from the country. The boy reared in the city rarely has the opportunity to fully develop either mind or body. He does not have to work, and, above all, he does not know the value of money measured in human toil. He fails to comprehend the primal lesson of every real success—that it can only be achieved by hard work.

I like to recall the story that was told to me by a former member of McKinley's Cabinet. He said that one time President McKinley and his Cabinet were riding upon a train through the State of Iowa. Early in the morning, looking out on the frost-covered fields, President McKinley said, "Gentlemen, do you know what that sight recalls to my memory? It makes me think of the days when I was a barefooted farmer's boy and when I used to drive up the cows in the early morning when the frost was still heavy on the grass and when I would stop to warm my feet in the places where the cows had lain." Each member of the Cabinet replied that he had gone through that same experience, except one, and he had been born and raised upon a farm, but it was in the South, where they had no frost.

It is the barefooted country boy that drives up the cows on the frosty morning and stops to warm his feet where they had lain that will make the man that will win and hold the highest prizes that success can give.

The boy that has never lived in the country, gone barefooted and bareheaded, who has never driven home the cows nor ridden the horses from the plow to the barn, who has never worked in the harvest field, who never cared for the horses and cattle, who never toiled in the garden, who never fished in the little stream, who never wandered in the shady woods, who never saw the minnow in the quiet pool nor the squirrel in the autumn trees, who never hunted the fields and hills and forests when white with the winter snow, who never has been taught to work, who has never learned the value of a dollar measured in human labor—that boy has missed the best and most valuable training that this world can give.

When I see the boy in the city, with his starched collar, his polished shoes, his well-fitting clothes, his artificial manners of a man, his pale, untanned face, my heart and sympathy go out to that boy. He does not have a fair chance in life.

The country boy, barefooted and ragged, hatless and sunburned, familiar with the fields and woods, who comes face to face with nature, who learns by actual experience, who earns what he spends, who works with his hands, who has his duties and responsibilities, the farmer's boy who goes after the cows in the early morning frost—that boy is gaining strength and character that will make him a leader among men.

GIRL, WIFE, AND MOTHER.

The farmer's girl is the sweetest blossom that sheds its perfume in this world of sunshine and shadow.

The one person in this world that works harder, bears heavier burdens, and has greater responsibilities than the farmer and to whom the world owes a greater debt than it does to the farmer is the farmer's wife. In a little country graveyard is the last resting place of her who gave me birth—a country girl, a farmer's wife, the mother of a farmer's family. The mothers of most of the men who have served in Congress were born and lived and toiled and raised their families and died in the country.

The mother of the farmer's boy has done more to direct and mold the destiny of the race than any other human being that ever blessed this world of ours. Hers is the most successful, the grandest, noblest life that God in his infinite wisdom has ever yet created beneath the stars. In the kingdom of the brain, in the empire of the heart, her sons and daughters rule the earth.

To-day, in the little home upon the farm, in the modest cottage, in the country village, in the humble home everywhere throughout this land, the tired and patient mother, with loving hand, is rocking the future great of the world. That mother, on the quiet summer's evening, in singing a lullaby to him, who, in the future years, will dictate the policy of the Nation and direct the destiny of mankind.

To that mother, the ideal American woman, the woman who with her own hand rocks the cradle of her child, I pay my tribute. She is our country's security, humanity's hope, the salvation of the race.

All great mothers do not have great sons, but all great sons do have great mothers. This is the law eternal of our race, fixed by the Infinite Wisdom.

[Mr. SISSON addressed the committee. See Appendix.]

Mr. MANN. Mr. Chairman, if I understand the amendment pending, it is to strike out, page 145, lines 8 and 9, the words "except with the special approval of the Federal farm-loan board in writing." I think this is the fact. Most of the States, many of them, have provided that the corporation acquiring title to real estate shall not hold the real estate beyond a certain number of years—in other words, must dispose of it—and if the corporation does not dispose of the real estate the only person who can raise the question is the State.

A few years ago in our State we passed a law providing that no one could acquire real estate in Illinois except a citizen of the United States. It was not on the statute books very long. There is no title to-day examined in the State of Illinois and elsewhere where they are very careful about titles in our State; they do not have to prove citizenship of everybody who owned property during that time. It was not a question under the law. The law was positive. It was not a question that could only be raised by the State. The abstract and the title people said that it was a question of holding the title. Now, this provision in the bill is:

But no such bank shall hold title and possession of any real estate purchased or acquired to secure any debt due to it for a longer period than five years.

It might easily happen the title would be in dispute for longer than five years. Litigation is prolonged, especially chancery real-estate litigation. This bank might acquire title to a piece of property by foreclosure, somebody else intervene, file a suit, set aside the proceedings, and it might not be determined within the five years.

Mr. SISSON. Will the gentleman permit an interruption? If the gentleman will look at line 6 in the bill——

Mr. MANN. I have read it.

Mr. SISSON. It would indicate clearly that the bank should hold both title and possession of real estate, and to hold title would be at the outset——

Mr. MANN. Not at all; you would determine at the end of a lawsuit that you have just acquired title. You do not determine whether you had title in commencing. You hold title. It may not be an undisputed title. That would not amount to anything at all. That would not amount to a row of pins. There ought to be some method by which under proper circumstances title should be legally retained. I think there could be an ouster here, but it would cloud the title when they went to sell to a purchaser. There might be a panic at the end of the five years; there might be a contract to sell the property, and that might be in litigation.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. MANN. I think it would be wise to leave in the provision that the Federal farm-loan board's consent in writing might remain, and in a particular case hold the title for a sufficient time.

Mr. SHALLENBERGER. The gentleman has practically made the point I intended to raise, that it might occur that they would be compelled to sell under circumstances and at certain times, and that quite a loss might occur, and it would be very necessary, in order to preserve the institution, that this authority should be held by the governing board.

Mr. MANN. After the Chicago fire, when real-estate mortgages were foreclosed there by insurance companies on properties that had become absolutely valueless, or practically so, those companies held the property longer than was allowed by law, until in the course of time and the development of the city property which no one would have bought from them more than paid them back their investment.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. PHELAN. Mr. Chairman, I ask unanimous consent that the gentleman from Illinois may have two minutes more. I would like to ask him a question.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. PHELAN. I do not object to the amendment, but I did not like the wording as it was. I wanted it in another wording in the committee room. If it had said for a further period of five years, I would have no objection. As it read, if the board once gave its approval for five years it might run on indefinitely. That was the objection I had to the particular provision as it stood in the bill. If it had said for a further period of five years, I would not object. I think that can be fixed.

Mr. SISSON. I would like to suggest that in the contingency such as the gentleman from Illinois states would exist in reference to real estate this amendment might be adopted and might be settled in conference.

Mr. MANN. It is easier to be settled in conference by leaving something in than it is by leaving something out.

Mr. SISSON. Let the committee amendment be adopted, and if they desire to do so——

Mr. MANN. The committee amendment is to strike something out, so that they will have nothing before them in conference.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas [Mr. SHOUSE].

The question was taken, and the amendment was rejected.

Mr. DAVIS of Texas. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

At the end of section 13 add:

"And whenever any Federal land bank shall deposit with the Federal reserve board farm-loan bonds of any amount the Federal Reserve Board shall cause to be issued and advanced thereon Federal reserve notes upon the same terms as Federal reserve notes are now issued to member banks under the provision of the Federal reserve act: *Provided*, That the amount so advanced shall never exceed the sum of $200,000,000, and the reserve board shall have power to control the amount of these reserve notes outstanding by sale of said bonds and retirement of said reserve notes at its discretion."

Mr. WINGO. Mr. Chairman, could we reach an agreement as to time on this particular amendment? How much time does the gentleman want?

Mr. DAVIS of Texas. I have about a three hours' speech wound up in this, but I can get through in five minutes.

Mr. WINGO. Mr. Chairman, I will withdraw the request and let the debate proceed.

The CHAIRMAN. The gentleman from Texas [Mr. DAVIS] is recognized.

Mr. DAVIS of Texas. Now, Mr. Chairman and gentlemen of the committee, I have tried to be during this whole discussion very demure and decorous, and yet this is the most important question that has been before this House, so far as I am individually concerned. It involves, in a measure, a life's work for myself and a lot of men who have gone to the great beyond with whom I worked. And I am not going to play politics. I want to suggest to our friends from the Republican side of the House who have been making fun of this rural-credits measure and wanted to romp on Woodrow Wilson and the Secretary of the Treasury, that if you want to play politics with me on this or any other question the Democrats have passed thus far you meet me in the next campaign, have your best silk-hatted and kid-gloved men, and tease me in joint debate in the general campaign, and I will play politics with you to your heart's content.

I am not going to discuss the political phase of this question. I want to treat it in its economic sense. The question was raised by the Republican side of the House, wanting to know why we did not just start the grinding machine and grind out a lot of money for the farmer, because the farmers have never expected that. That was a peculiar operation of the Government given by the Republicans to the Aldrich gang. They had millions and hundreds of millions ground out and handed to them under the Aldrich-Vreeland Act, and our Republican friends seemed to think that was "safe and sane" grinding.

Now, the whole problem resolves itself into this one question: Are you willing to do for the farmer just what you have done and are by law doing now for the commercial banking associations of this country?

Some friend will ask, "Is the security good?" Why, bless God, I can prove by every man that has made a speech in the committee that it is the best security on earth—the earth itself. So the security is good. The discretion is handed over to the Reserve Board to retire the notes, and you will have no inflated currency. The bonds are to be sold if necessary at the discretion of the Reserve Board to retire the currency issued to the farmer. The limit is fixed at $200,000,000, and you need not be uneasy about "flooding the country with currency." The whole question comes now to this one point: Is this a measure to relieve the agricultural industries of this country? If it is, give them a just measure, a fair measure, one that will meet them on equal terms as it meets the commercial world.

But some man says, "It is class legislation to go to the farmer." Now, listen: I live on a farm, and it is perhaps natural, having been raised on the farm and having lived on a farm for the last 15 years, that my judgment is biased, because I am one of those who believe that class consciousness is just as natural as class interest. But I have spent 20 years in the courthouses, and my books tell me that the prime object of all government is to restrain the strong and vicious, to assist the weak and helpless, to establish and maintain that which is right, and to condemn and prohibit that which is wrong.

So I ask you whom are you seeking to benefit? Can you establish and maintain that which is right in relation to the farmer, and have him hawked on the money market and devoured by

greedy corporations. Several gentlemen on the Republican side of the House talked about the farmers being so wealthy and so prosperous. The reverse is true. There are over 2,000,000 farmers in this country whose life—one-fourth of it—under the tenant laws, regulations, and customs goes to the men who own the earth.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. LEVER. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five minutes.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] asks unanimous consent that the gentleman from Texas may proceed for five minutes more. Is there objection?

There was no objection.

Mr. DAVIS of Texas. I had the honor, Mr. Chairman, to be the national political lecturer, so designated by the Farmers' Alliance for nearly three years in its palmiest days. Their statistics developed the proposition that upon an average the tenant farmer vacated one-fourth of his life to the landlords. I come to you with the statement that just about two-thirds of the wheat, just about two-thirds of the corn, and far more than two-thirds of the cotton in this Republic are raised by men who do not own the soil upon which they are raised. I come to you with the statement that in the South, where we produce upon the average something like 15,000,000 bales of cotton, more than 5,000,000 bales of that cotton are raised under chattel mortgage, and that means a distress call in which the cotton is forced to go to market to liquidate and satisfy a mortgage. You can take the trade journals and consult the organs of the cotton factors of Europe and see therein statements of the fact that when the put-in calls take place in the money market in October there must be a rush to the market to sell the cotton even at a sacrifice. Maturing mortgages, representing so many millions of dollars, compel the farmers to sell. We have seen the same situation all over the country, and yet when you come to relieve the farmer by a just rural-credit measure, a lot of good-looking fellows rise up and ridicule the proposed law and others malign and abuse it as simple sophistry and demagoguery.

Now, I want to suggest if this House had left the preparation of this measure to JOE EAGLE, BOB HENRY, OTIS WINGO, and my old friend HUGHES and myself and others who have been working for years, we would have fixed a long ways better bill to my liking. But I am going to support the bill, and I am going to support it because it stands as a framework for what can be made a great system for the farmer. I am like John Smith was—you have heard of him—when he went to see his best girl and saw a fellow in the parlor sitting cross-legged, twisting his moustache at her. He thought it was no place for him, and so he went to see his second-best girl, and there he found a fellow with sweet ointment on his hair rolling his eyes at her; and about that time he heard the church bell ring and went to prayer meeting, and he got into the church just at the moment when the preacher was calling for the first prayer. He says, "Here is Brother Smith; he will lead the prayer." So Brother Smith dropped on his knees and said, "Oh, God, we come to Thee to-night because we have nowhere else to go." [Laughter.]

I am in the same shape. I have been fighting for rural credits for 20 long years. The best bill I have had the good fortune to see was the bill introduced by the Farmers' Union, presented by the gentleman from Arkansas. I voted for that; and the next best proposition was by my friend from Kansas [Mr. DOOLITTLE], and I voted for that. I did not get either of them, and now I have nowhere else to go.

The CHAIRMAN. The time of the gentleman from Texas has again expired.

Mr. HENRY. Mr. Chairman, I ask unanimous consent that my colleague may have five minutes more.

The CHAIRMAN. The gentleman from Texas [Mr. HENRY] asks unanimous consent that his colleague may have five minutes more. Is there objection?

Mr. GLASS. I would like to develop, Mr. Chairman, the number of amendments that will probably be offered to this section, so that we may agree upon some limit of time.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this section and amendments thereto close—in what time?

Mr. SMITH of Minnesota. I would like to have five minutes, Mr. Chairman.

Mr. THOMPSON. I reserve the right to object, Mr. Chairman.

Mr. GLASS. Thirty minutes is wanted over here.

Mr. MANN. Ten minutes is wanted over here.

Mr. GLASS. I ask unanimous consent, Mr. Chairman, that all debate on this section and all amendments thereto conclude at half past 5 o'clock—that is, in 45 minutes.

Mr. MADDEN. I would like to make a suggestion in connection with that.

Mr. MANN. This is Saturday night, and we have had an unbroken custom here of quitting at 5 o'clock on Saturday night when we meet at 11 o'clock in the morning. In fact, this is my week to take a bath. [Laughter.]

Mr. GLASS. Then let us say that the debate on this section and all amendments thereto close in 40 minutes.

Mr. MADDEN. And that 20 minutes of that time be given to this side.

Mr. SISSON. I would like five minutes.

Mr. THOMPSON. Reserving the right to object, I want to get five minutes of that time. If I can not, I will object.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that debate on this section and all amendments thereto close in 40 minutes. Is there objection?

Mr. FINLEY. I object.

The CHAIRMAN. The gentleman from South Carolina objects.

Mr. GLASS. Mr. Chairman, I move that all debate on this section and amendments thereto close in 40 minutes.

The CHAIRMAN. The gentleman from Virginia moves that debate on this section and amendments thereto close in 40 minutes.

Mr. THOMPSON. If I can get five minutes, I have no objection. If I can not, I will make the point of no quorum.

The question was taken, and the motion was agreed to.

Mr. HENRY. Now, Mr. Chairman, I renew my request that my colleague [Mr. DAVIS of Texas] may have five minutes.

The CHAIRMAN. The gentleman from Texas [Mr. DAVIS] is recognized for five minutes.

Mr. OGLESBY. Will the gentleman yield for a question?

Mr. DAVIS of Texas. I yield to the gentleman.

Mr. OGLESBY. I know something about the conditions in the cotton-raising section of the South that the gentleman has referred to, and I should like to ask the gentleman if he thinks this bill will aid in the solution of that problem; and if so, I should like to know in what way it will do it.

Mr. DAVIS of Texas. I was just reaching that point. The features of this bill that make its salvation for future service are, first, that it has established the fact that the Democrats and a large element of the Republican Party are carrying out their pledges to make a rural-credit system. It will settle the constitutionality of the law to be tested. It will commit the Government to a rural-credit plan, and thereby put the Government in shape to go on with the service. For I call to mind the fact that my old friend the gentleman from Georgia [Mr. HUGHES] and other older men here remember very well, as I do, that when the Interstate Commerce Commission was first created it was after a hard-fought battle, and the commission was a very crude machine for relief, but it was perfected and made a great power for public good. The same is true of most of our institutions. So this bill provides now for the man who can make a land estate available. It will follow that the farmers themselves will demand, and they will send representatives here pledged to, the proposition to enlarge the scope of the law and to apply its benefits to the people down below the man who owns the land. When you once admit the soundness of the doctrine, you have laid the foundation for the future service of the country, and the city man will be made to understand that his salvation depends upon the success of the farm. Why are foodstuffs so high to-day? Because four-fifths of the world are not making foodstuffs, but burning up and destroying them and consuming them, and the other fifth has to supply the world. So in the same way when you enlarge the productiveness of the country and make contented the man on the farm you have laid the foundation for the best system of preparedness this Republic can ever have. [Applause.]

For, my Republican friends, James G. Blaine said in 1884 that the farmer represented the bacon and greens of civilization. Thomas Jefferson said that the farmer represented the hope of civilization, and that in all ages civilization began and ended with the prosperity of the plowman, and that his condition gauged the progress of civilization. So we are making a start. I have helped in every way I could to make this bill as nearly what I wanted it as possible. It is not what I want, but I am going to support it, in the hope that it will be enlarged, amplified, and made a fine measure of relief for the people of the country. [Applause.]

Mr. FESS. Will the gentleman yield?

Mr. DAVIS of Texas. If I have time.

The CHAIRMAN. The gentleman has one minute remaining.

Mr. FESS. The amendment was originally $100,000,000. It has been enlarged to $200,000,000. Why does not the gentleman make it $500,000,000?

Mr. DAVIS of Texas. I took the figure of $200,000,000 on the theory that there is about $400,000,000 floating indebtedness on the farms of this country, and, in my judgment, I put the figure at about half that, which would stabilize the money market, give relief, and then the outside money market would be forced to compete with that agency, and we would have an open and sure method for the obtaining of money on reasonable terms, for I am one of those fellows who believe you can not legislate as to the rate of interest and make it an ironclad proposition. You must control the issue and movement of money. If there is anything that yields to the law of supply and demand, it is the money market.

Mr. FIELDS. Mr. Chairman, it is indeed gratifying to me to see the rural-credits bill nearing its completion in this body. Its ultimate enactment into law, which I trust may be within the next few days, will mark a new epoch in the economic life of the Nation, for it will extend to the farmers of the United States advantages in securing loans that can not be had under our present banking system or any other banking system not established and operated solely and exclusively for the benefit of the farming class of our people.

It is true that our present national banking system—the Glass-Owen law—is a decided improvement from the standpoint of the farmers' interests over the previous law. The Glass-Owen law, by a provision of which I was the author and the adoption of which I secured by an extremely hard fight in the Democratic caucus, permits national banks to make loans of not to exceed five years' time on improved farm lands. But it is optional with the bank whether or not it makes such loans, and even if it does, the period of time is too short for a farmer to buy a farm and pay for it from the proceeds of its own products, and that is what this bill is designed to do and will do, for the loans under this system are to extend over a period of not less than 5 years and for as long as 36 years, at the option of the borrower, and can only be secured on a guaranty that they will be used solely for the purchase or improvement of farms, which will include the purchase of farm implements or live stock to be used for the improvement of the farm or to increase the value of its products.

The system will be independent of State or National banking institutions and its operations confined solely and exclusively to farm loans. There will therefore be money at all times within the reach of the farmer, an advantage which he does not always enjoy under our present State and National banking systems, for the reason that our present systems as a rule give preference in loans to industrial and mercantile institutions, and naturally so, for they make the major part of their loans from funds deposited with them and the industrial and mercantile institutions handle more money and turn it more rapidly and make larger and more frequent deposits than the farmers do. It is therefore only natural and proper that the banks who do business on funds deposited with them should give preference to their best and most frequent depositors when such depositors need to borrow, which most industrial institutions do at frequent intervals. And under that method the slightest stringency in our financial system forces the banks to curtail their loans, which affects first the less frequent depositors who, as a general rule, are the farmers whose deposits to a great extent are governed by their sales of farm products, which are not made often.

Then, again, the bank which operates under the deposit system can not afford to make long-time loans except from its surplus, for the reason that it does not know at what time conditions may arise in the financial affairs of the country which will not only curtail deposits but will cause the heavy withdrawal of funds already on deposit. In fact, our present State and National systems were not designed to fully meet the needs of the farming interests of the country and especially those farmers who need to borrow money with which to buy farms and can not do so without endangering their solvency, and because of this condition a separate system of banking designed to accommodate the farmers and the farmers only is of great necessity and its necessity has long since been recognized. But until recently each attempt to inaugurate such a system has been met with the argument that it could not be properly installed or successfully operated in this country, notwithstanding the fact that such systems have long been in operation in the leading countries of Europe and also in Canada to the north of us and have worked most admirably.

We have all realized that a system of this character could not be put into operation without Government aid sufficient to start and support it until it could become self-sustaining, and that is where the barrier always arose. Everybody is interested in the welfare of the farmers, who feed the world. Some of us are interested in them to the extent that we have always been willing to put the support and the guaranty of the Federal Treasury behind them until they could, by cooperative methods, build up a self-sustaining banking system that would meet their needs. Others have been interested in them to the extent of kind words and beautiful phrases but were ever ready to revolt at every attempt to extend to them the aid of the Federal Government, without which they could not establish the much-needed system of "rural credits," and the class last referred to has until recently been in control of the Congress of the United States.

Why, Mr. Chairman, when I came to this body, only five years ago, a suggestion of Federal aid to public roads of the rural sections or Federal aid to the establishment of a system of rural credits for the benefit of the farming class of our population, was regarded by many as an absurdity and by others as an impossibility.

We saw pictured by even the city folk the beauties of country life. We heard shouted from every quarter the slogan, "Back to the farm." We heard advocated everywhere that true and indisputable doctrine that "No nation has ever achieved permanent greatness unless its greatness was based on the well-being of the great farmer class, the men who live upon and till the soil, for it is upon their welfare, material and moral, that the welfare of the rest of the nation ultimately rests." But even in the face of that doctrine and with a full and thorough knowledge of its efficacy, the controlling influences of Congress have until recently stubbornly declined to extend to the farmer class that one and all-essential necessity, the financial aid of the Federal Government in the construction of roads and the establishment of a system of rural credits, and, in addition to that, time has been lost by the failure of the proponents of rural credits to agree upon minor details.

But the present Committee on Banking and Currency is to be congratulated on bringing in a bill so comprehensive and so workable. The bill may not be all that we wish it to be. Many of us would have preferred certain changes. Personally, I would have preferred the major part of the bill which was prepared by the farmers' union and introduced by the gentleman from Arkansas [Mr. CARAWAY], and others preferred the bill introduced by the gentleman from Kansas [Mr. DOOLITTLE], and others preferred various other bills. But we all realize that we may each be forced to make concessions on some points in the enactment of a measure of the magnitude and importance of a measure like this one. By making concessions the individual members of the committee have been able to agree upon the bill which we all admit is a good bill and which may be a better bill than the others referred to. It is true that we may find defects in the bill after it goes into operation, but if we do we can correct those defects by future amendments. The question that we are most interested in at present is not the question of minor details, but the question of general principle. Let us adopt the principle and enact the bill into law and then correct the defects as they become evident if there prove to be defects.

Mr. Chairman, as I have previously said, it is the purpose of this bill to extend to the farmer class of our population financial assistance that they can not otherwise secure. The general plan of the bill is to divide the Continental United States into 12 Federal land-bank districts, with 1 Federal land bank to each district and such branch banks as the supervising board may deem advisable or authorize. Each district bank shall be organized with a capital stock of not less than $750,000, divided into shares of $5 each. The United States Government, through the Secretary of the Treasury, will subscribe for the original stock. Then each borrower will be required to purchase one $5 share of this stock for each $100 that he borrows, but may pay for same out of the fund borrowed. In other words, for each $100 loan the borrower will receive $95 in cash and a certificate for one share of stock, or for each $1,000 loan the borrower will receive $950 cash and certificates for 10 shares or $50 worth of stock in the district or branch land bank. By this method the entire stock of the district bank will pass from the Federal Government to the borrowers, after which the Federal Government will no longer be a stockholder in the institution.

The question has been repeatedly asked by those not familiar with the proposed plan how the system can endure after the Federal Government withdraws, with its loans nineteen times as great as its stock sales. Well, the plan is this: Before a farmer can borrow money from his district land bank or one of its branch banks he must join a local borrowers' association composed of not less than 10 members. When such local association is organized each of its members is permitted to borrow to the amount of 50 per cent of the appraised value of such property as he may offer as surety by executing a mortgage on the property. The mortgage is then indorsed by the local bor-

rowers' association of which he is a member. This mortgage is then deposited with the branch bank which makes the loan. The branch bank then indorses it and deposits it with the district land bank. The district land bank then indorses it and sells it or its equivalent in its own bonds in the stock or "bond markets" of the country. The mortgage reaches the stock market secured, first, by the property on which it is given; second, by the total assets of the members of the local borrowers' association; third, by the indorsement of the branch bank through which it passes; and, fourth, by the indorsement of the district land bank to which it goes, which makes it an absolutely safe investment. In fact, it will be the safest investment that can be made, for the farms of the country, which will constitute the fundamental basis of the surety of the whole system, will, under the operation of the system, with all of its safeguards, become more valuable each year, which will add to the solvency and strength of the whole system, which will be inviting to the money owners, who are seeking opportunities to make long-time investments on good paper, many of whom are to-day investing their money in foreign bonds of various kinds, many of which are not as secure as these mortgages or bonds will be.

The proceeds of the sales of these mortgages will come back from the district land bank to the branch banks in exchange for other mortgages and from the branch banks to the borrowers for additional mortgages.

There is but one conceivable chance for this system to fail to accomplish the purposes for which it is designed and that would be through the failure of the district land banks to find a market for their paper, which is almost inconceivable in view of the fact that investors are eagerly looking for an opportunity to make investments and, as I have previously stated are now making investments in foreign bonds, many of which are not as strongly secured as the paper of these banks will be. It is the theory of the best students of finance in the country that the system will work admirably, thereby calling the money which is now piled up in the great financial centers of the country into circulation among the farmers of the country, thereby keeping it in constant circulation, which constitutes the basic principle of a country's prosperity. Mr. Chairman, this bill, when enacted into law, will afford many monumental advantages to the farmers, some of which are, first, money will always be available to meet their needs in buying or improving their lands; second, they can borrow for a period of 36 years if they desire to do so, which will enable them to make the land pay for itself, and thereby they can borrow at a less rate of interest than is afforded under any other banking or credit system.

In my State the statutory rate of interest is 6 per cent, and we often pay 7 per cent or 8 per cent, and are glad to secure loans at that under certain conditions. Under this system a 6 per cent rate of interest will keep paid the annual or semiannual interest payments, and also pay the full principal in the maximum period of 36 years. For illustration: If it were possible, which it is not, for a farmer to borrow $1,000 for a period of 36 years under our present system, at 6 per cent interest, and keep his interest paid up annually or semiannually, as the case may be, at the maturity of the debt, 36 years hence, he would still owe the principal of $1,000. But under the system provided for in this bill his interest payments of 6 per cent, or, strictly speaking, 5 per cent interest plus 1 per cent of the original amount, will pay both the interest and principal. Therefore at the end of 36 years he will have satisfied both principal and interest under this bill, with the amount that would be required to pay the interest under our present banking system. In other words, he gains an advantage to the amount of the whole principal during the period of the loan.

And, Mr. Chairman, the great advantages that will accrue to the farming section of the country under this system by bringing the money that has become centralized in the large cities back to the rural sections will do more to induce the city folk to return to the country and the country boys and girls to remain on the farm than all the lectures that could be delivered from all the rostrums of all the cities on the beauty of country life.

Our people have drifted to the cities, not particularly because they preferred city life to country life, but because the bulk of the money of the country had drifted to the cities carrying with it the business opportunities, and to take advantage of these opportunities it became necessary for those who were eager to acquire wealth or secure employment to likewise drift to the cities. But turn the money of the cities back to the country and put it within easy reach of the people, as this bill proposes to do, and you will see the country blossom as the rose, and the drift of the population will speedily turn from the city to the country to enjoy the advantages and blessings of country life made possible by this legislation.

Mr. Chairman, I look with an optimistic eye upon the future possibilities of the country under this system which we are about to inaugurate. By looking 5, 10, or 20 years into the future I can see with my mind's eye the ragged and unprofitable farms of to-day converted into beautiful and profitable ones covered with herds of the finest blood, and I can see our millions of acres of waste lands of to-day converted into beautiful homesteads inhabited by a prosperous and contented people. And better still I can see the tenant and the landless man of to-day in possession of a farm and a home of his own, and further still it is a well-recognized fact that better farms always insures better roads. I can therefore see a busy, prosperous, and contented citizenry traveling to and fro on model roads through every community; and, in connection with all this, I can see greater social advantages and better schools with higher educational systems, attended by bright and contented pupils thrilled with the joys of country life and content to remain therein.

Mr. Chairman, when this vision is fully realized, which it will be if this bill is enacted into law, the inhabitants of the rural sections of the country will invoke the blessings of Providence upon the makers of the law that made such conditions possible.

Now, Mr. Chairman, one other thought and I close. I want to refer briefly to a minor provision of the bill that we have already passed over. I regret that I did not have the opportunity to do so at the time we were considering it. I trust that I may have the attention of the chairman of the committee and those Members who will serve with him as conferees. I trust that the correction which should be made and which was refused a while ago, when the amendment offered by my colleague, Judge BARKLEY, was defeated, may be made in conference. That is with reference to the provision on page 103, which reads as follows:

> Tenth. Every borrower who shall be granted a loan under the provisions of this act shall enter into an agreement, in form and under conditions to be prescribed by the Federal farm-loan board, that if the whole or any portion of his loan shall be expended for purposes other than those specified in his original application, or if the borrower shall be in default in respect to any condition of the mortgage, the whole of said loan shall, at the option of the bank holding same, become due and payable.

Mr. Chairman, the provisions contained in the last clause of the paragraph of the bill just quoted are objectional, and, in my opinion, will in some instances place unwarranted hardships upon honest borrowers by giving advantages to unscrupulous ones who may, perchance, hold membership in the local borrower associations or be in control of the bank holding the mortgage of some one whom misfortune may overtake.

The gentleman from Arkansas [Mr. WINGO] has called attention to the provision for a reserve fund, in section 21 of the bill, which is designed to take care of borrowers who find themselves temporarily unable to meet their interest payments which is amply sufficient to safeguard the legitimate interest of every borrower, provided there are no land sharks who desire to take advantage of the provisions of the law to which I have just referred. I am one of those who believe that every man is honest until he has proven himself otherwise, but we all recognize the fact that there are men in this country everywhere who will take advantage of their fellow men where the law permits them to do so; not a large class I admit, but there are some, and if a borrower should become delinquent it is possible under this provision of the law for the bank owning the mortgage, or for any member of the association which has indorsed it, to proceed to foreclose the mortgage, and there is no provision in the law to provide for the redemption of the property on which foreclosure is made. Mr. Chairman, I fear that this provision is too drastic; it would give a covetous, unscrupulous man the advantage of the delinquent borrower if the latter owned property that the former desired. It should be changed so that the unscrupulous strong man could not take advantage of his weaker neighbor.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. FIELDS. Yes.

Mr. MOSS of Indiana. The foreclosure will take place under the State law, and whatever provision the State law makes will be the same under this bill as before the bill passed.

Mr. FIELDS. All right; very well for that. But there are many conditions that may arise that would make it impossible for a man to meet the payment when due, by no fault of his own, and under such conditions the borrower should be given at least a reasonable time in which to meet the payment or a chance to redeem his property after foreclosure and the provisions for such safeguards should be carried in this bill and not made dependent upon State statutes, and I sincerely hope that the conferees will provide for such safeguards, so that there will be no room in this law for one man to take undue advantage of another. [Applause.]

Mr. THOMPSON. Mr. Chairman, I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from Oklahoma makes the point of no quorum.

SEVERAL MEMBERS. Move that the committee rise.

Mr. GLASS. I have no special objection, Mr. Chairman, but the gentleman from Texas [Mr. HENRY] wanted five minutes to-night, and I was willing that he should have it.

Mr. THOMPSON. I have been here trying to get recognition for an hour, and some gentlemen have spoken three or four times during the last three hours.

Mr. MANN. It is 5 o'clock, Saturday night; let the gentleman move that the committee rise.

Mr. GLASS. Mr. Chairman, I want to say that I have made no objection to the recognition of the gentleman from Oklahoma. I was hoping that he would get time.

The CHAIRMAN. The Chair will state that the Chair has the gentleman from Oklahoma down on the list for recognition immediately after the gentleman from Texas. The gentleman from Texas [Mr. HENRY] requested recognition earlier than did the gentleman from Oklahoma. The Chair promised to recognize the gentleman from Texas next, and the Chair is going to keep that promise.

Mr. HENRY. Mr. Chairman, I am willing to reverse it and let the gentleman from Oklahoma come in first.

The CHAIRMAN. If the gentleman from Texas will give way, the Chair will recognize the gentleman from Oklahoma.

Mr. THOMPSON. Mr. Chairman, I do not care to speak under those circumstances. I will withdraw the point of order of no quorum, but I do not now care to speak this afternoon.

Mr. HENRY. Mr. Chairman, I shall not consume more than the time allotted to me, and I hope I may have the attention of the committee for a brief time. The gentleman from Texas is right in his contention that the Government should place the farmer on the same footing as the commercial world.

From the very beginning I have said that there are admirable features in this bill, and I shall support it, but it does not go as far as it should in behalf of the farmer. To-day I picked up the report just issued by the Department of Commerce, and I want to read into the RECORD this statement for the benefit of the House and of the country:

The agricultural credits act passed by the British Columbia Legislature last year, became effective on April 26, 1916. Agricultural bonds to the amount of $1,000,000 have been disposed of by the provincial government, making available a fund for immediate use in loans to farmers. Another sale of bonds for farm loans is contemplated, and it is anticipated that the application of the new law will have a stimulating effect upon agriculture in the Province.

* * * * * * *

All money borrowed by the commission must be negotiated through the minister of finance, acting for and on behalf of the commission, the due payment of all securities, both as to principal and interest issued by the commission and sold through the department of finance, shall be unconditionally guaranteed by the Crown in the right of the Province of British Columbia.

Mr. Chairman, British Columbia guarantees these bonds based on farm loans. Every other country, practically, in the world guarantees them, and I say that there ought to be a specific provision in this bill guaranteeing these bonds by the Government of the United States.

Mr. MOSS of Indiana. I wish the gentleman would put into the RECORD the country that guarantees them.

Mr. HENRY. Your neighboring country guarantees the bonds based on the farmers' mortgages under the act that went into effect in April, 1916, and this House should write the same provision into this bill.

I continue to read from the provisions of that act:

No loan will be accepted for a less amount than $250 or for a greater amount than $10,000, and no loan will be accepted for an amount exceeding 60 per cent of the appraised value of the land offered as security, calculated on the basis of value and productiveness when the improvements in respect of which the loan is required shall have been effected. The commission may advance by proportionate installments as the work progresses * * *.

The rate of interest shall not exceed 1 per cent more than the interest paid by the commission on the bonds issued to secure the funds. The combined charge of interest and principal shall be payable half-yearly.

There is a case in point, where the loans may run to $10,000, where the Government guarantees the payment of the bond, the principal and interest, under this law just passed. Why should this House halt and fail to say that these bonds are guaranteed by this Government? You have guaranteed all of the money issued to the bankers of the country. Why should not we put the good faith of the Government behind the security of the farmer? It is better security than promissory notes; it is better security than bills of exchange, than the mere promises of men to pay. Why not follow in the wake of every civilized country and go right to the point and do as much for the farmer as you are doing for the business men?

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. SHERLEY having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed without amendment the following concurrent resolution:

House concurrent resolution 40.

*Resolved by the House of Representatives (the Senate concurring)*, That the Speaker of the House of Representatives and the President of the Senate be, and they are hereby, requested to cancel their respective signatures to the enrolled bill (H. R. 759) entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River, and for the building of a bridge in place thereof"; that upon the cancellation of said signatures the Clerk be directed to reenroll said bill with an amendment as follows:

On page 4, line 10, strike out the word "five" and insert in lieu thereof the word "four."

RURAL CREDITS.

The committee resumed its session.

Mr. THOMPSON. Mr. Chairman, this is the most important bill that will come before this Congress. It deals with a subject that vitally affects 40,000,000 of our people, and on its proper solution depends the happiness and the prosperity of the whole country, not for to-day but for to-morrow and all future time.

A rural-credits system, properly speaking, is not a banking system; it is the opposite. In commercial banking the money of a community is gathered up from all the people and congregated into a common fund—"mobilized"—and the banker loans out these deposits. The depositors, having placed their money in the bank subject to call, have the right to withdraw it whenever they desire. On the other hand, the rural-credits system collects the assets of a community, its mortgages, bonds, and other commercial securities, and secures money for that community.

The law makes the commercial bank insolvent the moment it is unable to pay in cash on demand any of its depositors, no matter how much property the bank may own or how solvent, as a matter of fact, it may be. The commercial banker is, therefore, compelled to loan the money of his depositors for such lengths of time and on such security as will enable him at all times to be in a position to repay any or all of his depositors on demand. In order to do this he is compelled to loan for short periods on first-class personal or chattel security. In other words, his loans must be what has come to be known as "liquid assets," which means they must be easily and readily convertible into money.

The farmers' requirements are of two kinds—a long-term land loan, to be repaid on the installment or amortization plan out of the proceeds of his farm products, and a crop loan advanced at planting time to assist in the cultivation of his crop and repaid from its proceeds. Neither of these loans comes within the definition of a liquid loan for two reasons—the length of the loan is for too great a length of time and the security is not such that the money advanced can be returned on demand. For this reason the farmers, as a class, have been discriminated against in the rate of interest they have been compelled to pay, from the period when our Government was established down to this time. While the Government of the United States has been able to borrow money at from 2½ to 4 per cent and States, cities, towns, and school districts at from 3 to 5 per cent, and railroads and other industrial corporations at from 4½ to 6 per cent, the farmers of the country have been required to pay two, three, four, five, and often ten and twenty times that rate of interest. No one can view this condition without alarm, and no one attempts to justify it. The farmers have been a long time waking up to the fact that they have been discriminated against. They have finally learned that credit systems have been established that enable practically every other character of business to secure money at a greatly reduced rate from that which they are compelled to pay, and they are demanding that they be treated with the same consideration that has been extended to all other lines of business and industry. The farmer has the best security in the world—the land out of which come the products that sustain the life of the world and the labor which produces those products. What he needs is some system that will connect him with the man who has money and wants to loan it on good security.

In order to enable the farmer to secure money at a reasonable rate of interest on long time a system must be devised that will mobilize the farmers' assets without making them jointly liable for each other's obligations or subjecting their property to the payment of the indebtedness of their neighbors, and at the same time do away with the large number of middlemen in every man that is negotiated between the farmer and the lender, who charge

large commissions for their services. The farmer is waking up and demanding that legislation bringing this relief be enacted. He is entitled to it, and not only will it benefit him but it will benefit every citizen of our country and the Government as a whole.

In 1770 Oliver Goldsmith wrote that greatest of his poems, The Deserted Village. It was a thrilling recital of English history, past and present, and an accurate forecast of its future. No one familiar with conditions existing in our country to-day can read these lines—

> Ill fares the land, to hastening ills a prey,
> Where wealth accumulates, and men decay;
> Princes and lords may flourish, or may fade;
> A breath can make them, as a breath has made;
> But a bold peasantry, their country's pride,
> When once destroyed, can never be supplied.
> A time there was, ere England's griefs began,
> When every rood of land maintain'd its man:
> For him light labor spread her wholesome store,
> Just gave what life required, but gave no more;
> His best companions, innocence and health,
> And his best riches, ignorance of wealth.
> But times are alter'd; trade's unfeeling train
> Usurp the land, and dispossess the swain;
> Along the lawn, where scatter'd hamlets rose,
> Unwieldy wealth and cumbrous pomp repose,
> And every want to luxury allied,
> And every pang that folly pays to pride.
> Those gentle hours that plenty bade to bloom,
> Those calm desires that ask'd but little room,
> Those healthful sports that graced the peaceful scene,
> Lived in each look, and brighten'd all the green;
> These, far departing, seek a kinder shore,
> And rural mirth and manners are no more—

without being convinced that we as a Nation are fast drifting into the unhappy condition that England found herself just prior to the American Revolution.

The increase of population in the rural districts is not keeping pace with the increase in the cities. The ratio of increase during the decennium between 1900 and 1910 was 3 to 1 in favor of the cities. During the same decade the increase in population in the United States was more than twice as great as the increase in farm products. During the same 10-year period the supply of meat animals—sheep, swine, and cattle—decreased a little more than 7 per cent. The census figures for the same period further disclose that the number of tenant farmers also increased. The average profit of the farmer on invested capital is about 5½ per cent, and the fact that he is compelled to pay an interest rate greatly in excess of his profit explains why so many farmers are abandoning the farms and moving to the congested centers of population. More than 60 per cent of our population reside in cities and towns having a population of more than 2,500, and less than 40 per cent reside in the country and towns containing a population of less than 2,500, and there is actually residing on the farm not to exceed one-third of our population.

Farming is the most important industry in the world. Without the farm all other business would stagnate and die, the railroads would cease to run, the banks and mercantile establishments could no longer operate, and grass would grow in the streets of our cities. No other business can succeed without the farmer, but the farming business can succeed, if left unfettered, without the aid of any other business.

The necessity for establishing a system of rural credits was recognized by the two great political parties that seriously contended for the Presidency in the campaign of 1912. The Democrats in the platform promulgated at Baltimore used this language:

> Of equal importance with the question of currency reform is the question of rural credits or agricultural finance. Therefore, we recommend that an investigation of agricultural credit societies in foreign countries be made, so that it may be ascertained whether a system of rural credits may be devised suitable to conditions in the United States; and we also favor legislation permitting national banks to loan a reasonable portion of their funds on real-estate security.

And the Republicans at Chicago said:

> It is of great importance to the social and economic welfare of this country that its farmers have facilities for borrowing easily and cheaply the money they need to increase the productivity of their land. It is as important that financial machinery be provided to supply the demand of farmers for credit as it is that banking and currency systems be reformed in the interest of general business. We therefore recommend and urge an authoritative investigation of agricultural credit societies and corporations in other countries and the passage of State and Federal laws for the establishment and capable supervision of organizations having for another purpose the loaning of funds to farmers.

This bill is before the House in response to the declaration of the Baltimore platform.

As I have said, agriculture calls for two kinds of credit—the long-term mortgage loan and the short-term credit loan. Advocates of rural-credit legislation are not agreed as to the form corrective legislation should take. Some believe in a system fostered by direct Government aid; others insist that the system should be organized wholly on the cooperative association plan. I believe in the direct Government-aid plan for the long-term mortgage loan, and I believe the cooperative credit-association plan, subject to conservative guidance and control of Federal authority, is best suited to the short-term personal or chattel loan. When the security is land and the loan advanced does not exceed 60 per cent of its value, there is absolutely no hazard to the Government in mobilizing the land mortgages of the country, issuing land-mortgage bonds on them, guaranteeing their payment, and giving the farmers of the country the benefit of the low rate of interest this plan would insure. This plan would not work in the short-term credit loan secured by personal indorsement or chattel mortgage, for the reason that the length of time between the making of the loan and its maturity would be so short as to render it impossible for the Government to make the loan, and, second, the Government would take too great a risk by accepting either personal or chattel security. The percentage of loss would be too great.

The people themselves, by organizing cooperative credit associations in a community where they are acquainted with one another, where they know who is honest and who is dishonest, who will pay and who will not pay, are better prepared to handle the matter of short-term credit loans than is the Government. A dishonest man is not entitled to credit, either by the Government or by his neighbor, and his neighbors would know if he were dishonest and could refuse him assistance. If the Government were to embark directly in the personal credit loan business, it could not discriminate as between borrowers, and the loss on this class of loans would be enormous. Of course whatever the Government loses the taxpayers must make good, because the Government can no more create wealth than can an individual. Wealth is created by labor, not by law. Property is obtained by one of two methods—by production or by plunder, by making it or taking it from another who has made it.

In February, 1915, after very careful consideration, I introduced a rural-credits bill for long-term land loans, which, in my judgment, is a better measure than the bill we are considering. In brief, my bill provided for the creation of a land-loan bureau in the Treasury Department, to be in charge of three farm-loan commissioners. Two of these commissioners were to be actual farmers at the time appointed and one a person skilled in the bond business. My idea was that the two farmers could look after the application for loans, the appraisement of the land, the taking of mortgages, the amount of the loan, and the accumulation of the mortgages in the farm-loan business. The third member could look after the issuing of farm bonds on these mortgages and the sale of these bonds. My bill constituted every presidential postmaster in the United States an agent for the farm-loan bureau to accept applications for loans. The bureau was required to supply these postmasters with blanks, on which applications for loans could be made, and all the borrower had to do was to go to the postmaster, call for one of these blanks, fill it out, describing his land, its character, amount in cultivation, improvements, the value of the land and the value of the improvements separate from the land, the amount of loan desired, and the term during which he wished it to run. This he filed with the postmaster.

The postmaster was required to call in three reputable citizens residing in the neighborhood where the land was located, and they were to appraise the land, giving a description, character, amount in cultivation, improvements, location, and so forth, and swear to this appraisement. The postmaster under his official certificate was to give a separate appraisal. The application, the appraisement, and the postmaster's official certificate were to be forwarded to the farm-loan bureau at Washington, accompanied by an abstract. The bureau, if it found any reason to doubt the value of the land or the improvements, was authorized to send its appraiser and to finally fix the value on which it would make the loan. When this was determined the farm-loan bureau prepared a mortgage containing the amortization principle, made out a check, and forwarded the mortgage and the check to the postmaster. The check represented 60 per cent of the value of the land and 25 per cent of the value of improvements in addition. The postmaster, on the execution of the mortgage, recorded it and turned over the check to the borrower. The mortgage contained a provision with reference to the borrower keeping the taxes paid, insurance on the improvements, and so forth. On these mortgages accumulated from all parts of the United States, the farm-loan bureau from time to time issued farm-loan bonds, the payment of which was guaranteed by the United States, and the rate of interest that the farmer paid was the interest at which the bonds could be sold at par plus whatever amount was necessary to take care of the amortization payments and the expenses incurred by the United States

in making the loan, and whatever fund the farm-loan bureau ascertained was necessary to add to each mortgage in order to create a guaranty fund to protect the Government against loss where the land and improvements did not sell for a sum sufficient to discharge the mortgage obligation. These bonds would sell on the market at the same rate Government bonds sell, because they would have borne the guaranty of the Government. There would have been no chance for the Government to lose, because every bond guaranteed would have been secured by land worth $1 where 60 cents was advanced, and improvements worth $1 where 25 cents was advanced, and in addition the Government would collect from each borrower a small per cent in the nature of a guaranty fund to save itself harmless in case of loss in isolated cases. In no case would the farmer have been required to pay more than 6 per cent for his money, and this 6 per cent would cover the interest rate, the amortization payment, the guaranty per cent and the overhead charge in the way of expenses incurred by the Government in carrying on the business.

I have a number of amortization tables which I desire to place in the RECORD and make a part of my remarks in order to demonstrate just how the amortization plan works.

In the first the amount of the loan is $1,000, the length of the term 16 years, the rate of interest 6 per cent, and the amount $100.

| Annual periods. | Total annual payment. | Interest at 6 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $100.00 | $60.00 | $40.00 | $960.00 |
| 2 | 100.00 | 57.60 | 42.40 | 917.60 |
| 3 | 100.00 | 55.06 | 44.94 | 872.66 |
| 4 | 100.00 | 52.36 | 47.64 | 825.02 |
| 5 | 100.00 | 49.50 | 50.50 | 774.52 |
| 6 | 100.00 | 46.47 | 53.53 | 720.99 |
| 7 | 100.00 | 43.26 | 56.74 | 664.25 |
| 8 | 100.00 | 39.85 | 60.15 | 604.10 |
| 9 | 100.00 | 36.25 | 63.75 | 540.35 |
| 10 | 100.00 | 32.42 | 67.58 | 472.77 |
| 11 | 100.00 | 28.37 | 71.63 | 401.13 |
| 12 | 100.00 | 24.07 | 75.93 | 325.20 |
| 13 | 100.00 | 19.61 | 80.49 | 244.71 |
| 14 | 100.00 | 14.68 | 85.32 | 159.40 |
| 15 | 100.00 | 9.56 | 90.44 | 68.96 |
| 16 | 73.10 | 4.14 | 68.96 | ..... |
| Total | 1,573.10 | 573.10 | 1,000.00 | ..... |

In the next the amount of the loan is $1,000, the length of term 19 years, the rate of interest 6 per cent, and the annual payments $90.

| Annual periods. | Total annual payment. | Interest at 6 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $90.00 | $60.00 | $30.00 | $970.00 |
| 2 | 90.00 | 58.20 | 31.80 | 938.20 |
| 3 | 90.00 | 56.29 | 33.71 | 904.49 |
| 4 | 90.00 | 54.27 | 35.73 | 868.76 |
| 5 | 90.00 | 52.13 | 37.87 | 830.89 |
| 6 | 90.00 | 49.85 | 40.15 | 790.74 |
| 7 | 90.00 | 47.44 | 42.55 | 748.18 |
| 8 | 90.00 | 44.89 | 45.11 | 703.08 |
| 9 | 90.00 | 42.19 | 47.82 | 655.26 |
| 10 | 90.00 | 39.32 | 50.68 | 604.58 |
| 11 | 90.00 | 36.28 | 53.72 | 550.85 |
| 12 | 90.00 | 33.05 | 56.95 | 493.90 |
| 13 | 90.00 | 29.63 | 60.37 | 433.54 |
| 14 | 90.00 | 26.01 | 63.99 | 369.55 |
| 15 | 90.00 | 22.17 | 67.83 | 301.72 |
| 16 | 90.00 | 18.10 | 71.90 | 229.82 |
| 17 | 90.00 | 13.79 | 76.21 | 153.61 |
| 18 | 90.00 | 9.22 | 80.78 | 72.83 |
| 19 | 72.20 | 4.37 | 72.83 | ..... |
| Total | 1,697.20 | 697.20 | 1,000.00 | ..... |

In the next the amount of the loan is $1,000, the length of term 20 years, the rate of interest 5 per cent, and the annual payments $80.24.

| Annual periods. | Total annual payment. | Interest at 5 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $80.24 | $50.00 | $30.24 | $969.76 |
| 2 | 80.24 | 48.48 | 31.75 | 938.00 |
| 3 | 80.24 | 46.90 | 33.34 | 904.67 |
| 4 | 80.24 | 45.23 | 35.01 | 869.66 |
| 5 | 80.24 | 43.48 | 36.76 | 832.90 |
| 6 | 80.24 | 41.64 | 38.59 | 794.31 |
| 7 | 80.24 | 39.71 | 40.52 | 753.79 |
| 8 | 80.24 | 37.68 | 42.55 | 711.23 |
| 9 | 80.24 | 35.56 | 44.68 | 666.56 |
| 10 | 80.24 | 33.32 | 46.91 | 610.64 |
| 11 | 80.24 | 30.98 | 49.26 | 570.39 |
| 12 | 80.24 | 28.51 | 51.72 | 518.67 |
| 13 | 80.24 | 25.93 | 54.31 | 464.36 |
| 14 | 80.24 | 23.21 | 57.00 | 407.34 |
| 15 | 80.24 | 20.36 | 59.87 | 347.46 |
| 16 | 80.24 | 17.37 | 62.87 | 284.60 |
| 17 | 80.24 | 14.23 | 66.01 | 218.59 |
| 18 | 80.24 | 10.93 | 69.31 | 149.28 |
| 19 | 80.24 | 7.46 | 72.78 | 76.50 |
| 20 | 80.24 | 3.82 | 76.50 | ..... |
| Total | 1,604.80 | 604.80 | 1,000.00 | ..... |

In the next the amount of loan is $1,000, the length of term 20 years, the amount of interest 4 per cent, and the annual payments $73.58:

| Annual periods. | Total annual payment. | Interest at 4 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $73.58 | $40.00 | $33.58 | $966.42 |
| 2 | 73.58 | 38.65 | 34.92 | 931.50 |
| 3 | 73.58 | 37.25 | 36.32 | 895.18 |
| 4 | 73.58 | 35.81 | 37.77 | 857.40 |
| 5 | 73.58 | 34.30 | 39.28 | 818.12 |
| 6 | 73.58 | 32.72 | 40.86 | 777.26 |
| 7 | 73.58 | 31.09 | 42.49 | 734.77 |
| 8 | 73.58 | 29.39 | 44.19 | 690.59 |
| 9 | 73.58 | 27.62 | 45.96 | 644.63 |
| 10 | 73.58 | 25.79 | 47.79 | 596.83 |
| 11 | 73.58 | 23.87 | 49.71 | 547.13 |
| 12 | 73.58 | 21.89 | 51.70 | 495.43 |
| 13 | 73.58 | 19.81 | 53.76 | 441.66 |
| 14 | 73.58 | 17.66 | 55.91 | 385.75 |
| 15 | 73.58 | 15.43 | 58.15 | 327.60 |
| 16 | 73.58 | 13.10 | 60.48 | 267.12 |
| 17 | 73.58 | 10.68 | 62.90 | 204.22 |
| 18 | 73.58 | 8.16 | 65.41 | 138.81 |
| 19 | 73.58 | 5.55 | 68.03 | 70.79 |
| 20 | 73.58 | 2.83 | 70.79 | ..... |
| Total | 1,471.60 | 471.60 | 1,000.00 | ..... |

In the next the amount of the loan is $1,000, the length of term 36 years, the rate of interest 4 per cent, and the annual installments $52.887:

| Annual periods. | Installments. | Interest. | Applied on principal. | New principal. |
|---|---|---|---|---|
| 1 | $52.887 | $40.000 | $12.887 | $987.113 |
| 2 | 52.887 | 39.484 | 13.403 | 973.710 |
| 3 | 52.887 | 38.948 | 13.939 | 959.771 |
| 4 | 52.887 | 38.390 | 14.497 | 945.274 |
| 5 | 52.887 | 37.810 | 15.077 | 930.197 |
| 6 | 52.887 | 37.207 | 15.680 | 914.517 |
| 7 | 52.887 | 36.580 | 16.307 | 898.210 |
| 8 | 52.887 | 35.928 | 16.959 | 881.251 |
| 9 | 52.887 | 35.250 | 17.637 | 863.614 |
| 10 | 52.887 | 34.544 | 18.343 | 845.271 |
| 11 | 52.887 | 33.810 | 19.077 | 826.194 |
| 12 | 52.887 | 33.047 | 19.840 | 806.354 |
| 13 | 52.887 | 32.254 | 20.633 | 785.721 |
| 14 | 52.887 | 31.428 | 21.459 | 764.262 |
| 15 | 52.887 | 30.570 | 22.317 | 741.945 |
| 16 | 52.887 | 29.677 | 23.210 | 718.735 |
| 17 | 52.887 | 28.749 | 24.138 | 694.597 |
| 18 | 52.887 | 27.793 | 25.094 | 669.503 |
| 19 | 52.887 | 26.780 | 26.107 | 643.396 |
| 20 | 52.887 | 25.735 | 27.152 | 616.244 |
| 21 | 52.887 | 24.649 | 28.238 | 588.006 |
| 22 | 52.887 | 23.520 | 29.367 | 558.639 |
| 23 | 52.887 | 22.345 | 30.542 | 528.097 |
| 24 | 52.887 | 21.123 | 31.649 | 496.448 |
| 25 | 52.887 | 19.857 | 33.030 | 463.418 |
| 26 | 52.887 | 18.536 | 34.351 | 429.067 |
| 27 | 52.887 | 17.162 | 35.725 | 393.342 |
| 28 | 52.887 | 15.733 | 37.154 | 356.188 |

An examination of these amortization tables will disclose that a loan of $1,000 bearing 6 per cent interest can be paid off in 16

years by the payment of $100 annually for 15 years and $73.10 for the sixteenth year. In other words, for a little less than 10 per cent straight interest not only can the interest and all overhead charges be taken care of, but the principal can be paid off and wiped out as well. Under the plan now followed, the farmer would have paid $960 interest during the 16 years of the loan, and the principal, $1,000, would still be due in a lump sum. A loan of $1,000, bearing 6 per cent interest and running for the term for 19 years can be paid off at a little less than 9 per cent straight interest. Under the plan now followed, the farmer would have paid $1,140 interest during the 19 years of the loan, and the principal, $1,000, would still be due in a lump sum.

A loan of $1,000, bearing interest at the rate of 5 per cent and running for 20 years, can be paid off in 20 annual installments of $80.24 each, or just a little more than 8 per cent straight interest. Under the plan now followed, the farmer would have paid $1,000 interest during the 20 years of the loan, and the principal, $1,000, would still be due in a lump sum.

A loan of $1,000, bearing interest at the rate of 4 per cent for 20 years, can be paid off in 20 annual installments of $73.58, or a little more than 7 per cent straight interest. Under the plan now followed, the farmer would have paid $800 interest during the 20 years of the loan, and the principal, $1,000, would still be due in a lump sum.

A loan of $1,000, bearing interest at the rate of 4 per cent, running for 36 years, can be paid off in 36 annual installments of $52.88, or a little more than 5 per cent straight interest. Under the plan now followed, the farmer would have paid $1,440 interest during the 36 years of the loan, and the principal, $1,000, would still be due in a lump sum.

The benefits the farmer would derive from this method of meeting his obligation is evident. The principal does not all become due at one time, but, like the interest, it is divided up into small annual and semiannual installments, which he is able to meet without imposing an impossible burden such as the present system does, paying it all at one time.

The great difficulty with which our farmers are confronted and compelled to struggle under the present system is in meeting the annual interest charge, overhead charges, such as abstract fees, commissions, appraisers' expenses, and recording fees. The loan runs but from 5 to 10 years and at the end of the terms the entire principal is payable in a lump sum. The bill which I introduced and the bill which we are now considering both contain the amortization plan, and under it a small amount in addition to the interest is paid at each interest-paying period, and these small sums paid in this way from time to time at the expiration of the term discharge the entire indebtedness. Under the present system the farmer can not maintain his family, pay the expenses of his farm, his labor, his taxes, insurance, keep up the repairs, and pay his interest charges, and at the same time within a period of 5 or 10 years set aside a sum sufficient to discharge the mortgage in a lump sum. As a consequence from time to time, as his mortgage matures, he is compelled to execute a new mortgage and incur new expenses which in time eat up the value of his farm. The virtue possessed by my bill was that there would be practically no overhead charges, no complicated machinery, no vast horde of employees. The postmaster could have been required to perform his services without additional compensation, and the expense of administering the act would have been inconsequential.

The bill we are now considering is 59 pages long, and it will require too much time to review all its details. It follows neither the direct Government-aid plan nor the cooperative credit association plan. Briefly it creates:

1. A Federal farm-loan board to consist of three members at an annual salary of $10,000 each and necessary traveling expenses.

2. A farm-loan registrar for each land-bank district.

3. Such number of appraisers, examiners, attorneys, experts, assistants, clerks, laborers, and other employees as the farm-loan board may deem necessary, all of whom, with the exception of the appraisers, shall be paid their salary and expenses out of the Treasury of the United States.

4. Continental United States shall be divided into 12 districts and a Federal land bank shall be established in each, with a capital of not less than $750,000, which may be increased from time to time for the purpose of providing for the issuing of shares to national farm-loan associations and stockholders, who may secure loans through agents of the Federal land bank.

5. These Federal land banks are to be officered by a president, vice president, secretary-treasurer, and such other employees as the board of directors may determine.

6. The board of directors consists of nine members—six to be elected by the national farm-loan association and three appointed by the Federal farm-loan board, one of the three to be made chairman, and all, in addition to any compensation for services, shall be allowed a reasonable amount for expenses.

7. The capital stock of each Federal land bank is divided into shares of $5 each, and may be subscribed for and held by any individual, firm, or corporation, or by the Government of any State or of the United States.

8. Stock held by the United States shall receive no dividend.

9. The farm-loan board is required as soon after the passage of the act as practicable, to open books for subscription for the capital stock of the Federal land bank in each district.

10. If within 90 days after the opening of the books any part of the $750,000 remains unsubscribed, the Secretary of the Treasury of the United States shall subscribe that amount.

11. Twenty-five per cent of all capital stock subscribed after the bank is established shall be applied semiannually to retire all original stock subscribed at par.

12. Federal land banks and joint-stock banks are made financial agents of the United States Government.

13. National farm-loan associations may be organized by persons desiring to borrow money on farm-mortgage security under the terms of the act.

14. Ten or more persons may unite to form such an association.

15. There shall be a board of directors for each farm-loan association, composed of five who shall elect a president, vice president, secretary-treasurer, and a loan committee composed of three members, the officers and directors except the secretary-treasurer to serve without compensation unless the payment of salaries to them is provided by the Federal farm-loan board. The duties of the secretary-treasurer as defined by the act are numerous and extensive. It is provided that he shall act as custodian of its funds, deposit the same in bank, pay over to the borrowers all sums received for their account, meet all other obligations of the association, collect, receipt for, and transmit all payments of interest, amortization, installments, or principal arising out of loans, act as the custodian of securities, records, papers, certificates of stock, and all documents relating to or bearing upon the affairs of the association, furnish a suitable security bond for the proper performance of his duties, make quarterly reports to the Federal farm-loan board, and, on request by said board, furnish information relative to national farm-loan associations for which he is acting, and carry out all orders of the board. It is made his duty to assure himself from time to time that loans made from the national farm-loan association, of which he is an officer, are applied to the purpose set forth in the application of the borrower, and to report to the land bank any failure of any borrower to comply with the terms of his application or mortgage. He is further required to ascertain and report any delinquent taxes and to name the delinquent.

16. No one can become a member of the association except a borrower, and no member can borrow a sum in excess of $10,000, nor less than $100.

17. Each member of a farm-loan association shall own stock to the extent of 5 per cent of his loan, and his stock is held as additional security for his loan, but it is provided that the dividends on it shall be paid to him, and he may include the amount of his stock in the face of his loan and pay it off on the amortization plan.

18. Shareholders are liable only for their own loans, except to the extent of double the value of the stock they may own.

19. On application made for a loan the land tendered as security is examined by the loan committee, who shall make a detailed written report, signed by all three members, giving the appraisal as found, which shall be filed with the directors of the association, and they are not bound by the report of the association committee. The Federal land bank again has the land appraised by one or more of its appraisers, and can make no loan unless the appraisers report is favorable.

20. Farm-loan associations can not accept deposits.

21. The Federal land bank can make loans only on first mortgages, providing repayment on an amortization plan by means of annual or semiannual installments sufficient in amount to cover the interest on the loan, the charge for expenses, and profits, which shall not exceed 1 per cent, and such further sum as will extinguish the debt in not less than 5 nor more than 36 years, provided that after 5 years from date on which the loan was made the borrower, at his option, may make additional payments in the sum of $25, or any multiple thereof, for the reduction of the principal.

22. It provides that in no case shall the interest exceed 6 per cent per annum.

23. Loans may be made to purchase land for agricultural use, for purchase of equipment and live stock necessary for the operation of the farm, for the erection of buildings, and the improvement of the farm, to pay off indebtedness of the owner

of the land mortgaged existing at the time the farm-loan association was organized or indebtedness subsequently incurred for one of the foregoing purposes.

24. No loan shall exceed 60 per cent of the value of the land and 20 per cent of the value of the improvements, the value to be ascertained by appraisal.

25. No loan can be made except to an actual farmer or a person who is to become an actual farmer.

26. If the land is sold, the purchaser shall have the option for 60 days to assume the mortgage and the stock of the borrower, and, in case of death of the borrower, his heirs have the same option.

27. Every borrower is required to pay, when due, all insurance premiums, taxes, and local assessments lawfully assessed against the land.

28. If the borrower uses the money for any other purpose than that stated in his application, or if he defaults in the conditions of the mortgage, the whole of the loan becomes due at the option of the holder of the mortgage.

29. Federal land banks may be authorized by the Federal farm-loan board, when no national farm-loan association is organized in any particular locality, to make loans through agents approved by the board, the borrower in such case to purchase stock to the extent of 5 per cent of his loan.

30. Only incorporated banks, trust companies, mortgage companies, or savings institutions can act as agents. These agents may be paid for their services not to exceed one-half of 1 per cent per annum on the unpaid principal for their services, and they must collect and forward to the Federal land bank all interest and amortization payments and indorse and become liable for all loans which they negotiate.

31. Corporations to be known as "joint-stock land banks," for carrying on the business of lending on farm-mortgage security and issuing farm-loan bonds, are authorized and are made subject to the provisions of the act, except that the Government is not required to take any of their stock.

These constitute the material provisions of the act in so far as they relate to the creation of the system, its scope, and purpose. The remaining provisions of the act are largely administrative and treat of applications for farm-loan bonds, the issuing of farm-loan bonds, the form of farm-loan bonds, special provisions of farm-loan bonds, application of amortization and interest payments, reserves and dividends of land banks, exemption from taxation, investments in farm-loan bonds, examination, dissolution, and appointment of receivers, State legislation, penalties, organization expenses, and limitation of court decisions. While the bill does not go as far as I would have it go, it is so much better than I had expected the committee to report that I am gratified to be able to support it.

In my judgment it presents a workable plan, and when established will result in reducing interest rates to our farmers. It carries a provision of Government aid to the extent of requiring the United States to subscribe the stock to the 12 land banks, which will be $9,000,000. It gives Government supervision, and this insures the ready sale of the bonds at a low rate of interest, not so low perhaps as if their payment were guaranteed by the Government, but it will at least enable the farmer who owns land to borrow money as cheaply as those engaged in other lines of business.

The establishment of these banks, these farm-loan associations, and all the multitude of officers—presidents, vice presidents, directors, examiners, attorneys, clerks, appraisers, and so on—will not have the effect of reducing overhead charges to that extent which ought to have been done in order to relieve the farmers of that burden. I have made an estimate of the cost of administration under this bill:

| | |
|---|---|
| 3 members Federal farm-loan board, each annually $10,000 | $30,000 |
| 12 farm-loan registrars, each annually $5,000 | 60,000 |
| 12 (at least) land-bank appraisers, estimated salary each $3,000 | 36,000 |
| 12 (at least) attorneys, estimated salary each $3,500 | 42,000 |
| 12 (at least) assistants, estimated salary each $2,500 | 30,000 |
| 12 assistant land appraisers, estimated salary each $2,000 | 24,000 |
| 1 Federal board attorney, estimated salary | 10,000 |
| 12 bank examiners, estimated salary each $3,000 | 36,000 |
| Mileage and expenses, estimated $5 per day | 18,000 |
| Expense preparing amortization tables | 2,500 |
| Mileage and expenses directors | 10,800 |
| 1,000 (estimated) secretaries farm-loan associations, each $250 | 250,000 |
| 108 directors for banks, estimated salary each $2,500 | 270,000 |
| Expense loan committees | 7,500 |
| Premiums on surety bonds | 50,000 |
| Cost of dies, engraving, and special papers | 20,000 |
| Fixtures for 12 banks, at least $5,000 each | 60,000 |
| Clerks, laborers, etc., estimated | 65,000 |
| Investigation of farm-loan associations, estimated $25 each | 25,000 |
| 5 per cent of association loans (for stock) | 100,000 |
| 5 per cent membership for loans | 100,000 |
| Special organization expense (bill appropriation) | 100,000 |
| Total | 1,346,800 |

Another provision of the bill which I believe ought to be left out is the double-liability provision. These farm-loan associations are not organized for the purpose of profit. They are essentially a borrower's institution. It was the intention of the committee that the institution should not be operated for gain, because it wisely prohibited anyone from owning stock except the borrower. I presume the double-liability provision was placed in this act because it is the national banking act, and stockholders in those banks are made doubly liable. There is a vast difference between farm-loan associations and national banks. Stockholders in national banks purchase their stock for the dividends it pays. The law permits national banks to accept deposits and to loan out these deposits. In this manner the stockholders make a profit on their investment. Stockholders who enjoy these privileges and the chance to make a profit ought to be required to give attention to the business in order to insure the depositor against loss. Not so with these farm-loan associations. The investment is not made for profit and the association is not permitted to accept deposits. Another thing, a farmer is naturally timid about going into something that he does not thoroughly understand, and, when the chance of loss in double the amount of his stock is put before him, it will cause a great many who otherwise might avail themselves of the benefits offered by taking stock to refrain from doing so.

The act very wisely provides that the Federal land bank may, where no other farm-loan associations are organized in any particular locality, make loans through agents, but it is further provided that only incorporated banks, trust companies, mortgage companies, or savings institutions, can act as agents, and these agents are required to collect and forward to the Federal land bank all interest and amortization payments and to indorse and become liable for all loans made through them. Now, I do not believe that it will be possible for any land bank to appoint an agent under those conditions. The land bank reserves the right to accept or refuse all loans sent it by the agents. It reserves the right to have the land and improvements appraised and to fix the amount of the loan; still the act requires the agent to indorse and become liable for the loan. It does not provide compensation for such liability assumed by the agent.

In a very large part of the United States it will be impossible to organize these farm-loan associations, and if section 15 is not amended the people of those sections where farm-loan associations are not organized will not be able to enjoy the benefits of this act. The fact that no one except an incorporated bank, trust company, mortgage company, or savings institution can be appointed an agent and the fact that these agents must indorse and become responsible for every loan made through them will make it impossible to secure agents. You might as well destroy the entire act as to expect it to be a workable law if this section is retained. There is no necessity for the restrictions contained in this section. The Federal loan bank reserves the right to reject applications made through its agents and the act provides that no loan can be made until it has been reviewed and a favorable report made by one of its appraisers. So finally the Federal land bank makes the loan itself and the agent has nothing to do with it.

Now, these restrictions ought not to have been placed in this section unless it was the idea of those who drew the bill to make it unworkable.

With section 15 amended as I have indicated, the bill will be a long step in the direction of the establishment of an effective rural-credits system that will do justice to the producing classes of our country. It is opposed by the Chamber of Commerce of the State of New York. I have before me their resolutions, passed at the one hundred and forty-eighth annual meeting of that body, held May 4, 1916, and, among other things, the resolutions say:

*Resolved*, That the Chamber of Commerce of the State of New York opposes any method of agricultural banking in the United States which requires the use of Government funds or the use of any postal savings deposits in any rural banking project, or any legislation exempting from taxation any particular class of obligations.

These resolutions are signed by many eminent financiers, and among them are Mr. Frank A. Vanderlip, president of the National City Bank of New York City; Cleveland H. Dodge, a director with J. P. Morgan, of the National City Bank of New York, and a director of the American Brass Co., Commercial Mining Co., Copper Queen Consolidated Mining Co., Detroit Copper Mining Co. of Arizona, Lackawanna Iron & Coal Co., Montezuma Copper Co., and the United Globe Mines; and George F. Baker, jr., a director of the First National Bank of New York and the son of a director of the United States Steel Corporation. If their advice were followed, it would be impossible to establish a system of rural credits in this country.

No successful system has ever heretofore been established by any country in the world without Government aid.

The "landschaften" system received subsidies from the German Government when it was organized, and the German Government now provides supervision and control. Under this system the farmers in Germany get money on land at 3½ per per cent, adding 1½ to 2½ per cent per year as amortization payment to apply on extinguishing the debt, and the total cost of their loan is from 5 to 6 per cent, which takes care of the interest and discharges the principal in a given number of years.

The Credit Foncier, when it was established, was subsidized by the French Government and given a monopoly for 25 years. It is a Government subsidized and controlled bank for loaning money on real estate, and the interest rate is 4.2 per cent. The Crédit Agricole Mutuel is subsidized by the French Government, money obtained from the Bank of France being supplied the district banks without interest, and these funds loaned to local associations upon suitable security.

In 1883 the Russian Peasant Land Bank was organized, and loans to the extent of 90 per cent of the value of land are made, repayable from 13 to 55½ years, with interest at 4 per cent, to which is added the amortization payment.

The Austro-Hungarian Government aided rural-credit institutions in starting.

Switzerland has 28 land-credit institutions, operated by the State, whose debentures are guaranteed by the State.

Denmark—about the size of the average congressional district—advanced $5,360,000, without interest, to establish the Mortgage Bank of the Kingdom of Denmark. This bank is of the same character as the land bank established under the provisions of this bill. It buys the debentures of the local land institutions, and, in addition, Denmark makes annual appropriations out of its treasury, which amounted in 1909 to $1,720,000, to be lent to small holders.

Sweden endowed the Sweden General Mortgage Bank at its founding with $2,144,000, and in 1890 the bank was given a subsidy of $8,040,000 in Government bonds. This is a central institution to aid the 10 local landowners' mortgage associations in the sale of their debentures.

The Agricultural Bank of Egypt is controlled by the State. The National Bank of Egypt, closely connected with the State, owns one-half of its capital stock, a 3 per cent dividend is guaranteed on the stock by the Government, and when it is necessary to sell its bonds at a reasonable rate of interest, the Government guarantees their payment.

Japan guarantees a 5 per cent dividend for 10 years on the stock of Kwango Ginko, or central land-credit bank of Japan. It also gives a subsidy of $4,980,000 to the 46 local or district land banks, called the Noko Ginko.

There is a class of farmers, Mr. Chairman, for whose interest this bill makes no provision. I refer to the tenant farmer, who owns no land and who is unable to pay 40 per cent of the purchase price of a farm before he can enjoy the benefits of this act. There are a large number of farmers in my State that belong to this class and they will compare with any other class of our citizenship in intelligence, in patriotism, and in industrious habits. They have been unfortunate, and they are struggling from 12 to 14 hours a day in order to take care of their families and to lay aside enough with which to purchase a permanent home. This class is perhaps larger in my State than in any other State in the Union, and this grows out of the fact that more than one-half of the area of our State, up until a few years ago, was an Indian reservation and no one owned a fee simple title to an acre of it. When this Indian reservation was divided up it was given in allotment to the members of the tribe and certain restrictions were placed upon their power to alienate it. So the larger part of the land in the eastern part of our State is cultivated by tenants. More than 60 per cent of the farmers of Oklahoma are renters, and practically 40 per cent of the farmers throughout the United States are tenants.

These tenant farmers are the ones who should receive our most earnest attention. To relieve their condition and make it possible for them to own a home is a duty which Congress not only owes them, but owes, as well, to all the people of the United States. No country occupied by those who are compelled to rent land, in all the history of the world, has ever maintained prosperity for any considerable length of time. It is only a question of time until dissatisfaction, disorder, riot, and anarchy break loose.

That conditions like these have not existed in the United States already is very largely due to the fact that heretofore the Government has had unlimited millions of acres of public domain to give away, or practically so, to actual settlers, but the desirable lands, suitable for cultivation, have all been homesteaded, and there remains but a few hundred million acres of arid or semiarid land that is not subject to occupation by farmers. As time goes on and our population increases in density this question will grow more pressing, and we had as well look it squarely in the face now as to be compelled to do so later. Being unable to locate our landless farmers on unoccupied public domain, the Government of the United States had just as well prepare to furnish them homes in another way. Not by giving them anything, but by assisting them, by their own industry, to acquire a home and thereby add to the prosperity of the whole country.

A few years ago England found herself face to face with this problem in Ireland, and in the last 35 years the English Government has purchased and taken over a large number of the landed estates in Ireland and sold them direct to the Irish farmer on long time, bearing a low rate of interest. The total appropriation out of the English treasury during the past half century for this purpose has been more than $2,000,000,000. As late as 1913 the English Parliament appropriated $500,000,000 to help Irish tenants buy land, they to become owners by paying 3½ per cent a year (2¾ per cent interest and ¾ per cent on the amortization plan), the annual payments to be extended over a period of 68 years.

The school districts of Texas and Oklahoma have been sold to actual settlers on 40 years' time at a low rate of interest. The amortization plan of payment was not included in the sale because the idea at that time was not thoroughly understood. Had it been included, the proposition would have been a great deal more ideal both to the purchaser and to the State.

Russia has gone even further than Great Britain in extending State aid to the purchasers of small farms. Through land-purchasing acts 20,000,000 small holdings to the value of more than $1,000,000,000 were created, the Government funds so advanced being repaid on long time and at a very low rate of interest.

Land is advancing in value, and the denser our population becomes the more valuable land will grow. The Government ought to establish the farm-loan bureau provided for in my bill, and, in addition to providing direct aid to the borrowers who already own land, it should be authorized to purchase good farm land and sell it out in small tracts to the farmers who now own no land on long time, at a low rate of interest, to be paid on the amortization plan. I know this idea will be frowned on at this time; that it will be called a dream and criticized as impossible; but within the next 25 years those of us who live that long will see the idea well advanced. The sooner it is begun the better off our people will be. It is not giving away anything. It is merely helping a worthy class of our people, who have been unfortunate, to acquire a home and permitting them to pay full value for everything they receive.

We appropriated $35,000,000 to build a railroad up in Alaska in order to develop that country and not render it necessary to turn it over to private greed and exploitation. We have spent nearly $400,000,000 to construct a canal across the Isthmus of Panama, and we will never be able to collect 2 per cent on that investment. We spent a thousand million dollars to free the people of Cuba, and in the 18 years that have elapsed since the close of the War with Spain we have expended nearly a billion dollars in uplifting and enlightening the people of the Philippine Islands. Since 1802, when we first commenced to make river and harbor appropriations, we have appropriated out of the United States Treasury more than $850,000,000 for deepening harbors, digging out rivers, and making dry creeks navigable. We have before us now a bill carrying an appropriation of $50,600,000 to levee the Mississippi and Sacramento Rivers and to prevent overflows and floods on the adjacent lands. We have been spending for a number of years more than $250,000,000 a year for the support of the Army and Navy, and some of our people are now trying to scare us into making appropriations of a billion dollars a year for that purpose.

Here is a bill more general in its application than any or all of the bills mentioned, a bill which will carry relief and encouragement to more people than any or all of the other bills combined; yet Members profess that it is a dangerous bill because it carries an appropriation of $9,000,000 to establish the system; and when it is suggested that the Government purchase land and sell it to the tenant farmers they almost go into hysterics.

Mr. Chairman, this bill will pass in some kind of form, and I am going to vote for it, not because I approve of its provisions as a whole, but because it is a long step in the right direction, and, in my judgment, will provide the opening wedge that will enable the people of the United States within a very few years to establish a system of rural credits that will take care of the three classes who need aid: First, those who own land or are able to pay 40 per cent on the purchase price of a farm; second,

those who own no land and are unable to pay any part of the purchase price; and, third, those who are compelled to borrow at planting time in order to cultivate their crop and make payment at gathering time; and an ideal system in my judgment would be: For the first class, Government aid; for the second class, Government purchase and sale on long time, purchase price to be repaid on the amortization plan and the loan to bear a low rate of interest; for the third class, the establishment of joint-stock associations, because this involves credits secured by a personal indorsement or mortgage on personal property, and, the property being destructible, an element in the credit is necessarily the honesty and integrity of the borrower. When a system has been evolved which contains these three elements the Government will have discharged its obligation to the producing masses of our country. This bill opens the way and it will not be long until a perfect system will have been established.

Mr. Chairman, all this talk about the Government being unable to collect these loans is balderdash. A number of our States are, and have been, engaged for many years in loaning their school funds to the farmers with great success. I have a letter from the secretary of the school-land board of my State, Mr. George A. Smith, and in it he says that since statehood in 1907 the State has made 6,686 loans on five years' time at 5 per cent, and that these loans aggregate $6,538,928.03; that the State has not lost 1 cent.

The farmers of the United States are among its best credit risks. They do not seek special favors; all they ask is fair terms.

I have given much attention to the subject of legislation for the benefit of the farmers since I have been a Member of Congress, and I am glad to have contributed, in a small way, to the passage of the bill appropriating $25,000,000 in aid of good-road construction; the Post Office appropriation bill, which extends better rural mail delivery service; the bill creating a bureau to investigate and establish a system of farm marketing which will increase the price received by the farmer for his products and at the same time reduce the cost of these products to the consumer by cutting out the profits of the middleman; a bill prohibiting dealing in cotton futures; the grain-grade bill, which makes the grading of grain uniform, so that the farmer may sell his products in his home market on the same grade that is applied to them in all the markets of the world; the bill creating a system of licensed warehouses for the storage of cotton, grain, and other farm products, and the issuance of warehouse receipts which are made negotiable instruments, enabling the farmer to warehouse his products and use the receipts as collateral security.

All of these laws have passed the House during this session of Congress, and it is a record of constructive legislation in the interest of the farmers unparalleled in the history of our country. The Democratic Party can very confidently go to the country on its record of constructive legislation for the relief of the producers of our country without fear of their verdict. [Applause.]

Mr. HAUGEN. Mr. Chairman, I very much dislike to differ with the chairman and members of this committee. I dislike it because I know that each and every one of them has given this matter most conscientious and careful consideration with the view of reporting and passing a workable bill. That is what is desired and that is what Congress ought to provide. I regret exceedingly to have to say that in my opinion the bill will not be operative and will not bring about the results so much desired.

This bill provides, first, for a Federal farm-loan board, which shall consist of three members appointed by the President, each receiving an annual salary of $10,000, together with actual necessary traveling expenses. Next, it provides for one farm-loan registrar in each of the 12 land-bank districts, one or more appraisers, one or more examiners, attorneys, experts, assistants, clerks, laborers, and others that may be deemed necessary to conduct the business of said board; the salaries to be fixed by the board, and all appointments made without regard to the classified civil service. Here it is proposed to employ a large army of people and make expenditures estimated at $500,000 annually in addition to the $9,000,000 capital stock to be subscribed by Uncle Sam. All appointments are to be made under the spoils system with no limit upon the board in fixing salaries, there being the possibility of nothing for them to do.

Mr. PHELAN. Let me point out that the farmers' loan board by this provision will not be paid by the farmers, except so far as the farmer pays taxes to the United States Government.

Mr. HAUGEN. Uncle Sam will have to pay the bill.

Mr. PHELAN. The system does not pay the bill.

Mr. HAUGEN. But Uncle Sam will have to pay a large share of the expenses and the borrower the balance. We will have a large army of employees, with salaries to be fixed by the various officers, which, I believe, is absolutely unnecessary.

We already have a Federal Reserve Board, with an army of employees, drawing large salaries, with very little to do. Why not turn this proposed branch of Uncle Sam's banking institution over to the Federal Reserve Board, already established, and thus do away with the proposed unnecessary overhead charges, so the $10,000 men already in the service, playing golf, may have something to do. That is, they will have something to do if the system is found workable and is proven to be a success, which, of course, is very much in doubt; in doubt, first, because of the red tape.

Mr. MOSS of Indiana. Who pays the salary of the present reserve board?

Mr. HAUGEN. It does not matter. I am not finding any fault with the board, but——

Mr. MOSS of Indiana. Paid by the commercial banks and not by the Government.

Mr. HAUGEN. I am merely suggesting that some of these overhead charges and the red tape that has been pointed out may be eliminated. Under the bill the borrower, in order to come in under the act, must subscribe for stock in the association to an amount equal to 5 per cent of the face of the desired loan, to be paid in cash upon the granting of the loan. So if a farmer desires to borrow $1,000 he must either pay $50 in cash or accept only $950 and a $50 stock certificate for his $1,000 mortgage. In either event he subscribes and pays for the stock and pays interest not only on the money received, but on the stock subscribed for, and also takes chances on ever getting anything in return for the money thus invested or dividends thereon. In order to become a member of the association he must be accepted by a two-thirds vote of the directors. He makes application, an appraisal is made, which is referred to the loan commission. The commission examines the land and in turn make a detail written report, which must be signed by all of its three members. The report goes to the Federal land bank, whose directors examine and refer it to one or more of the appraisers appointed, as provided for in this act, who investigate and make a written report. If that report is favorable, if the Federal farm-loan bank approves and accepts the report and application and if bonds can be or have been sold so that there is money on hand, Mr. Farmer finally gets $950 cash, less expenses incurred, and $50 stock certificate for every $1,000 mortgage, interest at 5 per cent, with 1 per cent added for subsequent expenses, aggregating 6 per cent. That is, provided the loan is made for the purchase of land for agricultural use, equipment, and live stock necessary for the proper and reasonable operation of the farm, or to provide buildings and improvements for the farm land, or to liquidate indebtedness.

If any of the $950 is expended for purposes other than specified in his original application the whole of said loan shall, at the option of the bank holding same, become due and payable. So if any borrower uses $1 of the money borrowed for buying groceries the whole loan becomes due and may be called in by the bank. If so, Mr. Borrower, instead of having 36 years in which to pay the loan, under the amortization plan, must pay upon call, and this, after having stood all the expense in obtaining the loan. Besides he has $50 stock pledged for every $1,000 loan, or made liable for losses incurred not only by one bank but by 12 banks.

Section 20 provides that every land bank issuing farm-loan bonds shall be primarily liable therefor, including interest payments; that bonds issued shall include a statement that the assets of all the Federal land banks are jointly and severally liable for the payment of each bond, and that the bond is legal and regular in all respects; and that the directors of every Federal land bank shall obligate the bank to become liable on farm-loan bonds as provided in this section. So there is no question about Mr. Borrower's bond being made liable for losses and expenses incurred by all of the 12 banks, a proposition which, I believe, will cause the borrower to think twice before making the investment. Though a borrower in Iowa may have confidence in the management of the bank in his district, he may question it in some of the other 11 districts. Furthermore, he may question the advisability of pledging his farm in part as security for loans more undesirable in other districts.

Next the bill provides that the amount loaned to any one borrower shall in no case exceed $10,000, and that no loan shall exceed 60 per cent of the value of the land mortgaged plus 20 per cent of the value of permanent improvements thereon. If a farmer in my section of the country owns, say, 160 acres of land valued at $125 an acre, although most of it is valued above

that, with permanent improvements worth $5,000, under the bill he might, if it were not for the limit, borrow 60 per cent of the value of the land, or $12,000, and 20 per cent of the value of the improvements, or $1,000; total, $13,000 in cash and bonds, but the limit is $10,000; that is, $9,000 in cash and $1,000 in stock. Hence if he needs more than $9,000 in cash he is barred from getting more.

With the red tape, the possibility of the expenses piling up into the hundreds, as, for instance, has been alleged was the case in perfecting title and passing on abstracts in acquiring title under the Weeks Act, the restrictions, the numerous items of expense, the time consumed in making the loan, and high rate of interest to be charged, it is fair to assume that few, if any, in my section of the country will come in under this act, certainly not as long as money can be had at a lower rate of interest.

In Iowa the rate of interest, including commissions, as shown by reports and tables here in evidence, is reported to average less than 6 per cent. If so, I take it that no one would pay 6 per cent on $1,000 for every $950 received, when he can get money elsewhere at a lower rate, at less expense, in a shorter time, and with less inconvenience.

But you say this bill is not in the interest of these people.

Mr. PHELAN. Of course, the committee does not say any such thing. Do not quote the committee as saying that.

Mr. HAUGEN. The committee will have to admit it.

Mr. PHELAN. We do not admit it at all.

Mr. HAUGEN. Evidently this bill is not framed in the interest of the borrower. If made operative it would, of course, be of great advantage to the capitalist. They were the first to suggest the legislation, as is well known. First, bankers and capitalists appeared before the Committee on Agriculture. Since then the matter has been referred to the Committee on Banking and Currency. I take it that heavy money lenders have been generous in offering suggestions as to the framing of this bill.

It goes without saying that capitalists, or anybody with money to loan, would much prefer to walk up to a counter and subscribe for bonds exempt from taxes, with title guaranteed, and with the land, permanent improvements, and Uncle Sam's $9,000,000 pledged as security, rather than employ fiscal agents, or they themselves receive and pass upon applications, abstracts, and look after the payment of taxes, insurance, interest, and principal when due. Certainly, if the security and rate of interest on the bonds are the same or better than the mortgages. But with the sane and conservative investor the first thing to be taken into consideration is the security offered. Insurance companies, savings banks, capitalists, and others who have money to loan, generally loan it expecting to have it repaid, and not for the purpose of getting the land; therefore, security is first considered. That is why money is loaned in the "corn belt" at a lower rate of interest than in other sections where the land is less productive. In the corn belt, where the soil is rich and productive, when industry is intelligently applied, foreclosures and sheriff sales are practically unknown. In other sections, with limited and uncertain rainfall, with large expenditures for commercial fertilizers, with adverse labor conditions, and with farms yielding small if any returns, mortgages are foreclosed and lands deeded by the sheriff to the mortgagee. As a result the securities offered there are less attractive than those offered in the corn belt and more fertile and productive sections. I take it that for that reason it is contended by some that the security of one should be made liable for the other, and thus make the undesirable security more attractive. But that has not been provided for, aside from the capital stock. Hence we are exactly where we started. Nothing has been added to the undesirable security in those districts except the capital stock subscribed.

I appreciate that Congress can, by legislation, safeguard the banking system, but it is beyond the power of Congress to legislate confidence or value into farm lands without adding something material in form to the land. Congress can appropriate money from the Treasury or pledge Uncle Sam's credit; it can provide for the necessary machinery to conduct the business; but, after all that is done, the soil and permanent improvements remain the same. If the land and permanent improvements are poor at the start, such legislation has added nothing to its productiveness, location, or value.

With this situation, I take it that the high rate of interest now charged will continue, especially with the provision granting authority to loan 60 per cent on the value of the land and 20 per cent on the value of the permanent improvements, which, in my opinion, would result in loading down the banks with real estate, and leave them without money to pay the interest or principal of the bonds. The 60 per cent and 20 per cent would equal probably 70 per cent of the value of the land. I know of no one now loaning such an amount. Several years ago millions and millions of dollars were loaned in some of the Western States on the bases of 40 per cent and 50 per cent. Crops failed, and mortgagors defaulted both in interest and principal. Mortgages were foreclosed. The mortgagee had costs and taxes to pay, and in many instances did not realize enough out of the land to pay the costs and taxes. From that time, interest on farm loans has been high in those sections and will be unless conditions materially change. If not deemed safe by the money lender to loan 40 per cent or 50 per cent of the value of the land in those sections, certainly they will not invest in bonds of a bank or corporation, such as Federal land banks, national farm-loan associations, joint-stock land banks, Government agencies, or agencies of Federal land banks, as provided for in this act, loaning 70 per cent of the value of the land. As we all know, there is a limit to everybody's credit, even Uncle Sam's when indiscriminately pledged. If so, the scheme of the money lenders has been interfered with.

If the farmer, with choice and attractive security to offer, will not borrow and pay the rate and expense demanded, there will be no securities against which to issue bonds. But the contention is, that the bill under consideration was not drawn with the view of benefiting the borrower in the corn belt or in sections of the country where the rate of interest is low, nor for the investor. The contention is that they need no help, as they are now able to borrow money on reasonable terms and rate of interest, but that we must help those now paying a high rate of interest, especially the poor people of the South. Again and again it is the South. Help the poor people down South.

If the investor will not invest in the less desirable security, there will be no one to buy, and as a result the proposed plan becomes inoperative, and the only ones to be benefited are the army of employees who are to be employed at Uncle Sam's expense. If so, and if we are to redeem pledges made in party platforms, we should enact laws to make money easy, not to the position holder but to the borrower. Instead of providing for more overhead charges, we should utilize the machinery which we already have. Instead of Uncle Sam's now subscribing for stock, we should, when loans are made on conservative bases, backed by proper and adequate security, and guaranty made that the business will be conducted in a safe and businesslike manner, rather deposit with the institution, for its use and the benefit of the borrower, some of the idle funds stored away in the Public Treasury. Instead of passing sectional measures, drawing on the funds of one community from the North to pay losses and expenses of another from the South, as is proposed in this bill; instead of appropriating $20,000,000 for a nitrate plant on Muscle Shoals or Coosa River, down South, to supply the South with cheap fertilizer; instead of appropriating $105,000,000 for the construction of levees and revetments, as is proposed in the floods bill and pointed out by the gentleman from Wisconsin, practically all of it for the Southern States; instead of appropriating $632,400 and $60,000 for the eradication of southern cattle ticks and live-stock demonstration, $661,300 for the eradication of the cotton-boll weevil, and numerous other like appropriations, particularly for the South, and sectional in their character; and in the same bill denying the people in the North and the corn-belt section $150,000 for the construction and maintenance of a hog-cholera serum laboratory, it seems to me that it is high time to enact practical legislation that will benefit people in all sections of the country. It is said that a hog-cholera serum laboratory, to give the department an opportunity to demonstrate the merits of the serum, is Government ownership and is socialistic in character, but $20,000,000 for a fertilizer plant in the South is not. No; it is the old story; it is the dog that wags the tail. It is the majority that rules. The South being in the majority and always in control of the Democratic Party continues to rule. And as the prospects for its party success are not the brightest, evidently the plan is to take no chances but take everything in sight. Therefore the process of lining up Democrats of the North for sectional measures favorable to the South through the caucus system goes on. With a majority in the caucus, all the important committee chairmanships, with the exception of the one held by Tammany, and the President back of them, the South has the unquestionable power as well as the inclination. As a result, the American people will have added to their burden not only the items referred to, but cotton and other war claims, aggregating hundreds of millions of dollars, made legal and proper by proposed legislation relieving claimant of proving loyalty.

Going back to the bill under consideration, this much can be said for it: At the start it will cost Uncle Sam only $750,000 for each district organized, and expenses incurred which are estimated at $500,000 annually for all of the districts, and as

amended $500,000 annually to pay interest on bonds. So far, every taxpayer must pay his share; beyond that it is permissive, not compulsory. If made operative, it may be worth the price. If inoperative and no organizations are made under it, no subscription by Uncle Sam will be required. Furthermore, in time of stress, when money can not be had from insurance companies, banks, or capitalists, it is possible that it may serve some good, and as it is the only legislation that can be had upon the subject it may be worth a trial.

For years the people in the rural districts have been promised relief. They have a right to expect and insist upon beneficial legislation along the lines suggested in this bill; hence in the hope that the bill will be amended and improved upon in conference, or if not and if found inoperative, that it will later be amended, I shall join with the many who doubt its being workable in voting for the bill—that is, if it is not loaded down with further unwise and impracticable amendments.

Mr. DILL. Mr. Chairman, I have sat here several days listening to discussion of this bill and, first, I desire to say that I hope the amendment of the gentleman from Texas will be adopted, because I believe farm-loan bonds are as safe a form of security upon which to base Federal reserve notes as any commercial paper that can be found anywhere. I shall vote for this amendment, just as I have voted for a number of other amendments to this bill, a few of which have been adopted, but most of which have been defeated. But whether this amendment is adopted or not, I intend to vote for this bill on final passage, because I desire to see some kind of rural-credits legislation enacted at this session of Congress. [Applause.]

During the past few months I have received a large number of letters from farmers in my district on the subject of rural credits, and many of them have urged me to vote against this bill. A number of granges and farmers' unions in my district have sent me resolutions asking me to vote against this bill, but I have uniformly replied that I hoped to see the bill so amended that it would enable the farmers of the country to borrow money for a long period of time at low rates of interest. Even though the bill before us does not contain all of the provisions we desire, I think it better to adopt it and thereby place upon the statute books some system of rural credits rather than to defeat it and have no legislation on the subject whatsoever.

IF THIS PLAN FAILS WE CAN AMEND IT.

If the theories of those who have written this bill are correct and we find that the farmers are able to secure money, as gentlemen here say they will be, we shall all rejoice that the bill was passed. If, on the other hand, the law should prove a failure, we can then amend the legislation in such a manner as to give the desired relief, and I feel certain that those who oppose some of the amendments now brought forward will then be glad to champion them. A law of this kind is at best an experiment and we shall certainly improve it as we learn of its defects.

WASHINGTON FARMERS ARE INTERESTED.

Mr. Chairman, I am indeed glad to have the opportunity to make a few remarks upon this bill. The people whom I have the honor to represent are most vitally interested in this legislation. They have suffered severe hardships because of the lack of a system of banking by which they could secure money at a low rate of interest for long periods of time. They live in a new State and in its settlement they have been beset by all of the misfortunes attendant upon the development of a new country. One of the greatest handicaps to the people of the State of Washington has been, and still is, the lack of capital with which to develop the land. I want a rural-credit bill passed, because I believe it will lead to the development of more land and thereby make more homes as well as better homes. I want this bill passed, because I believe it will result in more of our citizens having an interest in the land. This will mean a stronger and a happier people, because land and liberty are closely associated. I believe that the full fruition of rural-credit legislation will eventually draw thousands of people nearer the soil and inevitably bring a higher degree of physical and political health.

WASHINGTON'S INCREASE IN PRODUCTION OF WHEAT AND APPLES.

The State of Washington has made wonderful development during recent years along agricultural lines in spite of the exorbitant rates of interest charged our farmers. Two decades ago we produced only 8,000,000 bushels of wheat, while last year our production exceeded 50,000,000 bushels. Washington ranks fourth among the States in the production of spring wheat, and in 1913 ranked fifth in both fall and winter wheat. In the average yield per acre of winter wheat only two States surpassed the State of Washington.

The rapid development of the apple industry throughout that State, and especially in my district, has never been equaled at any time or in any place in the history of this country. In 1900 our apple production was 728,978 bushels. Last year we produced 7,299,000 bushels of apples. Not only do we produce large quantities of apples but we produce the finest apples in all the world. The apples which won the world's sweepstakes at the Panama-Pacific Exposition at San Francisco were grown in the State of Washington, in my district, near the town of Brewster. The apples of Wenatchee, the Okanogan Valley, North Yakima, and, in fact, of the whole inland-empire country surrounding Spokane are not surpassed anywhere in the world. Yet there are literally hundreds of thousands of acres of land in the State of Washington capable of producing fine fruit and grain which are barren because men are without capital to develop the land.

FARMERS NEED THIS ASSISTANCE.

This bill, however, is designed primarily to help the farmers already living on the land, and there are thousands of such farmers who need help. A friend of mine, in speaking against rural-credit legislation, said to me recently, "When you adopt a rural-credit law you will encourage the farmer to be extravagant, and within two years every farmer in the country will be owning and driving an automobile when he should be at work on his farm." I replied, "I do not believe it, but I hope it is true." It is just this sort of feeling which for years has been a stumbling block to the passage of legislation designed to aid the men and women who till the soil. God speed the day when every American farmer can have his automobile and enjoy life like other men. Speed the day when the farmer's boys and the farmer's girls will be able to enjoy the same advantages now enjoyed by the boys and girls of city folks. I am still young enough to remember the trials and disadvantages that come to a farmer's boy whose parents are poor. As long as I shall be able to remember anything I shall remember how the debts owed by my father when I was a boy seemed always to cast a shadow—sometimes almost a pall—over the sunlight of my hope for advancement in later years. Well do I remember when as a boy I was denied the purchase of books I wanted and subscriptions to newspapers and magazines for which I longed, and all because the burden of interest kept us so poor. This is a kind of poverty that pinches in places where boys do not soon forget. Nor was our family the only one in that condition. It was a condition common to many of our neighbors who had mortgages falling due and high rates of interest to pay on their debts. This condition existed, too, in a fertile farming country.

Nor have conditions changed greatly since those times. There are to-day literally hundred of thousands of farmers all over this country, who with their families struggle from year to year to pay off the interest on their mortgages, to say nothing of paying the principal, farmers who grow gray eking out an existence and trying to save a few dollars for the rainy day which is sure to come. And why? Primarily because of the high rates of interest they are compelled to pay and the terms upon which they must pay the principal. For my part I am willing and anxious to vote for any law that is designed to help that class of people. I am sure that those who do not need the help which such a law will give will have no objection to its passage, while those who do need it will never cease to be thankful. [Applause.]

FARMING BUSINESS NEEDS CREDIT.

One of the things which we should remember is that farming is a business just the same as manufacturing, railroading, or merchandising is a business, and like any other business it can be successfully developed only when given sufficient adequate credit. I submit that the farmer's needs are just as important to the farmer and to the country as the merchant's needs are to the merchant and the country. We all know that credit is the foundation upon which our commercial and industrial structure rests. Take credit from the merchant, the railroad president, or the manufacturer and their business must stop and go into bankruptcy. I am told that while their is only $4,000,000,000 of actual money in the United States, the people of this country deposited in the banks more than $19,000,000,000 last year. Where did the other $15,000,000,000 come from? Why, it is credit. If you go to the bank and borrow a thousand dollars you do not take out $1,000 in cash, or if you do you are the exceptional borrower. What you do usually is to get credit for $1,000 against which you check until that credit is exhausted. It is just such credit that is used by the entire commercial and industrial world. The trouble is, that this credit is industrial and commercial, and not agricultural.

The Sixty-third Congress performed what is probably the greatest achievement in the financial history of this country by passing the Federal reserve bank act, because it makes possible the expansion of credit in accordance with the needs of business,

but that law does not pretend to give the farmers any great amount of agricultural credit. It fails to supply credit to the millions and millions of American farmers with which to purchase land, farm implements, and better stock, all of which are necessary if the farming business is to thrive as it should thrive.

OUR GOVERNMENT THE LAST TO ESTABLISH A RURAL-CREDIT SYSTEM.

Of all the Governments of civilized peoples of which I have been able to learn, ours is the last to put its shoulder to the wheel of agricultural advancement. We have watched other countries prosper under rural-credit systems for years, while we have held aloof. Even now there is such tremendous opposition to the Government's giving direct aid to the establishment of a rural-credit plan that those of us who want real Government assistance admit we must take what we can get. Even in face of this condition, I desire to pause long enough to review briefly what other Governments have done toward the establishment of such systems, and thereby show the singular position in which this Government is placing itself by refusing substantial Government aid to this system.

WHAT OTHER GOVERNMENTS HAVE DONE.

As long ago as 1769 Frederick the Great inaugurated the landschaft system in Prussia to assist the impoverished peasant people of that country. They have developed the system under Government supervision to the point that they borrow money at 3½ to 4 per cent on land. Modern Germany has organized agriculture on such a plane of efficiency that to-day she feeds her people at home and her armies in the field, although surrounded by a ring of steel on both land and sea.

France has the Credit Foncier system, under which the Government advances large sums to a central organization. By means of a kind of a lottery this organization sells lands and distributes the profits to its members, bringing interest rates down to 4½ per cent. The Credit Agricole Mutual is subsidized by the Federal Government. The Bank of France furnishes large sums of money to the district banks without interest, and the district banks loan these funds to local associations upon suitable security at low rates of interest.

Even in oppressed and benighted Russia as early as 1883 the Government provided for the organization of the Russian Peasant Land Bank. It loans money up to 90 per cent of the value of the land for periods ranging from 13 to 55 years at an interest charge of 4 per cent. Through land-purchasing acts 20,000,000 small farms, worth more than $1,000,000,000, were bought by peasants who borrowed Government funds, to be repaid on long-time and low rates of interest.

The Austro-Hungarian Government also gave aid to rural-credit institutions at the time of their establishment.

In Switzerland the State operates 28 land-credit institutions and guarantees the bonds which are based on the land as security.

Denmark, a little Kingdom not as large as two counties of my district, advanced $5,360,000 to aid in the establishment of the Mortgage Bank of the Kingdom. This bank is similar in many ways to the banks provided for by this bill, and the Danish Government makes an annual appropriation, amounting to between $1,000,000 and $2,000,000, to be lent to small borrowers.

A few years ago England determined to aid the Irish peasants. The Government bought up many large estates in Ireland and sold them direct to the Irish farmer on long time at a low rate of interest. The Government appropriations for this purpose have amounted to more than $2,000,000,000. In 1913 the English Government appropriated $500,000,000 to be loaned to Irish peasants at 2¾ per cent interest for 68 years. The payments amount to 3½ per cent, three-fourths per cent being for amortization, so that in 68 years they will have paid both the loan and the interest.

Sweden endowed the Sweden Mortgage Bank at its founding with $2,144,000, and in 1800 gave the bank a subsidy of $8,040,000 in Government bonds. This is a central institution to aid the 10 local landowners' mortgage associations in the sale of their debentures.

The State controls the Agricultural Bank of Egypt. The National Bank of Egypt, closely connected with the State, owns one-half of its capital stock, a 3 per cent dividend is guaranteed on the stock by the Government, and when it is necessary to sell its bonds at a reasonable rate of interest the Government guarantees their payment.

Japan guarantees a 5 per cent dividend for 10 years on the stock of Kwango Ginko, or central land-credit bank, of Japan. It also gives a subsidy of $4,980,000 to the 46 local or district land banks, called the Noko Ginko.

YET SOME OPPOSE GOVERNMENT AID.

Yet when it is proposed that this Government give real and substantial assistance to the establishment of a rural-credit plan we are told such action would be favoritism to our farmers. Why, Mr. Chairman, there are more farmers in the United States than in any other nation on earth except Russia. There is more capital in this country than anywhere on earth. The farming lands of this country are worth more than the farm lands of any other nation. Our farmers produce more than the farmers of any other nation in the world. Yet with all this farm land, all this production, all the tremendous possibilities of America's resources in the form of fertile soil and home-loving, industrious people, the American farmers must pay a higher rate of interest and submit to more stringent terms of borrowing than any other farmers in any civilized country, or than the men in any other line of business in our own country.

DIFFICULTIES CONFRONTING THE FARMERS.

Why have the farmers of this country been compelled to pay such high rates of interest? The men with money to loan say that it is because he is often unable to pay his debts at maturity. Unfortunately there is some truth in that statement. But let us consider for a moment the conditions under which the farmer lives. He is at the mercy of the seasons. He may plant his crop ever so industriously, but nature determines how long he must wait for the new crop to mature and again and again refuses to hasten the time of harvesting. When he gives his note he knows that its payment depends upon maturity of his crop. He may figure out the price at which he must sell his grain or stock if he is to make any profit, but he is absolutely helpless to really fix or even affect the selling price. Not even the seasons are more merciless than those who gamble in the prices of farm produce. The very fact that he is at the mercy of the seasons and the manipulators of the markets is all the more reason why the Government should do everything that can be done to establish a credit system for the farmer so that he may secure money at lower rates of interest than in the past.

INTEREST RATES TO FARMERS DOUBLE THAT TO RAILROADS.

Consider a few figures for a moment. The farms of this Nation are valued at $41,000,000,000. They produce annually $10,000,000,000 in wealth. The farmers borrow about $6,000,000,000, and they pay from 7 to 9 per cent for their money.

Let us compare these figures with figures touching another kind of business, the railroad business. The railroads, including all their watered stock, are valued at less than $20,000,000,000. They have an annual income of $3,000,000,000, and they borrow $11,000,000,000, and, according to Poor's Manual on Railroads, they pay from 3½ to 4 per cent for their borrowed money. In other words, the farmers, with property worth $40,000,000,000, producing $10,000,000,000, and borrowing $6,000,000,000, pay more than twice as much interest on borrowed money as the railroads, with property worth $20,000,000,000, producing $3,000,000,000, and borrowing $11,000,000,000, pay for their borrowed money. What is the reason? The answer is simple. The farmers borrow for short periods of time on small amounts of property, while the railroads borrow for long periods of time on large amounts of property. What we should do by a rural-credits bill is to make it possible for the farmer to borrow money for long periods of time by means of an organization by which the investor will be assured that his security is absolutely sound.

AVERAGE INTEREST RATE TOO HIGH.

The average rate of interest to farmers throughout the United States is 7.5 per cent, but to most of the farmers of my district it is nearer 9 or 10 per cent. As I understand it, this bill will limit the rate of interest to 6 per cent, and it is believed that money can be loaned to farmers at 5 per cent. Although I believe this rate still too high, the change will be a great relief. No business can prosper permanently on borrowed money at the rate of 9 or even 8 per cent.

HOW $1 GROWS.

The difference in the burden of interest charges caused by a lowering of the rate by 2 or 3 per cent is far greater than would seem at first glance. A great mathematician, Ainsworth R. Spofford, has figured out this difference in a most amazing manner by computing the sums to which $1 will amount at different rates, where the interest is compounded. While it is true that most farmers do not permit interest to be compounded, because they pay it as it falls due, yet if they were able to keep this money themselves they undoubtedly could make it earn the same amount as though it were compounded. The figures as given by this mathematician are as follows:

| | |
|---|---|
| $1 loaned for 100 years and compounded at 3 per cent will amount to | $19.25 |
| At 6 per cent, to | 340.00 |
| At 8 per cent, to | 2,203.00 |
| At 10 per cent, to | 13,809.00 |
| At 12 per cent, to | 84,075.00 |
| At 18 per cent, to | 15,145,007.00 |
| At 24 per cent, to | 2,551,799,404.00 |

Thus, the difference in the interest which accumulates on $1 in a hundred years at 6 per cent and 8 per cent is $1,863, and at 6 per cent and 10 per cent is $13,469. For every $1,000 borrowed at the higher rates the above sums change to millions, and for every million borrowed they change to billions. Thus we can get some slight idea of the burden of high rates of interest upon the agricultural industry of the Nation in a hundred years. When we remember that the sums borrowed by the farmers of the Nation aggregate between $5,000,000,000 and $6,000,000,000, the importance of lower rates of interest to the future development of the agricultural business becomes evident.

INTEREST IS A GREEDY CANNIBAL.

Interest is the greediest creature ever invented by the human mind. It feeds alike by daylight and by dark and eats both ways. The more it eats the hungrier it becomes. It is both civilized and savage. It whets its appetite on the natural food of time, until, no longer able to satisfy itself with that, it turns cannibal and fattens upon its own growth. Then, with ever-increasing rapidity, it doubles and redoubles so often and so fast that only the brain of the trained mathematician can follow the course of its geometrically enlarging circles as it adds to its size. More burdensome than taxes, relentless as time, and certain as death, it has become a blight upon the future growth of American agriculture, a blight which, in part at least, this Congress should destroy.

WILL SAVE LARGE SUMS TO WASHINGTON FARMERS.

Now, let me for a moment apply this proposed law to the farmers of my own State and see just what the benefits will be. According to the last census, the mortgage indebtedness of the farmers of the State of Washington was $43,000,000, and the Agricultural Department gives the average interest rate on real estate mortgages there at 8 per cent, which does not include the charges for commission, examination of title, and abstract fees. Thus the interest alone is $3,440,000. Should these same farmers be able to take advantage of a rural-credit law, as a majority of them should be able to do if this bill is properly drawn, and secure their money at 5 per cent, they will save approximately $1,300,000 in interest alone, to say nothing of the excessive additional charges they are now compelled to bear. But greater than this will be the encouragement it will give to the development of the land and the happiness it will bring by making money more plentiful.

HOW IT WILL WORK.

Assuming that the rate of interest of the proposed bill is 5 per cent and accepting the report of the Secretary of Agriculture that our farmers under the present system are paying on an average of 8 per cent interest, the results of the present bill are easily ascertained. Were the farmers to continue paying the present rate of interest under the amortization plan, they would pay off the entire principal and interest in 20 years and 6 months, while under the present manner of securing money they would not have reduced the principal a single dollar in 20 years and 6 months. This is not a mere statement or guess. It is a problem in simple interest that any seventh or eighth grade boy or girl in the State of Washington can solve. To show how this will work out I shall place in the RECORD as part of my remarks a table illustrating just how the principle of amortization is applied in paying off a loan. If a farmer borrows $1,000 and wishes to pay annually $80, when the rate of interest is 5 per cent, the principal will be eliminated as follows:

| Number annual payments. | Amount annual payment. | Interest at 5 per cent. | Paid on principal. | Amount of principal unpaid. |
|---|---|---|---|---|
| 1 | $80.00 | $50.00 | $30.00 | $970.00 |
| 2 | 80.00 | 48.50 | 31.50 | 938.50 |
| 3 | 80.00 | 46.93 | 33.07 | 905.43 |
| 4 | 80.00 | 45.27 | 34.73 | 870.70 |
| 5 | 80.00 | 43.53 | 36.47 | 834.23 |
| 6 | 80.00 | 41.71 | 38.29 | 795.94 |
| 7 | 80.00 | 39.80 | 40.20 | 753.74 |
| 8 | 80.00 | 37.79 | 42.21 | 713.53 |
| 9 | 80.00 | 35.68 | 44.32 | 669.21 |
| 10 | 80.00 | 33.46 | 46.54 | 622.67 |
| 11 | 80.00 | 31.13 | 48.87 | 573.80 |
| 12 | 80.00 | 28.69 | 51.31 | 522.49 |
| 13 | 80.00 | 26.12 | 53.88 | 468.61 |
| 14 | 80.00 | 23.43 | 56.57 | 412.04 |
| 15 | 80.00 | 20.60 | 59.40 | 352.64 |
| 16 | 80.00 | 17.63 | 62.37 | 290.27 |
| 17 | 80.00 | 14.51 | 65.49 | 224.78 |
| 18 | 80.00 | 11.24 | 68.76 | 156.02 |
| 19 | 80.00 | 7.80 | 72.20 | 83.82 |
| 20 | 80.00 | 4.19 | 75.81 | 8.01 |
| 21 | 8.41 | .40 | 8.01 | ..... |
| Total | 1,608.41 | 608.41 | 1,000.00 | ..... |

In other words, if the borrower can pay at the rate of 8 per cent interest before the end of 21 years he will have paid off both the interest and the principal under the new rural-credit system, while under the present system he would be forced to pay the $1,608 as interest and would still be owing the $1,000 as principal. If he could pay $90 per year he would pay off both principal and interest in 17 years, and if $100 each year, in 14 years and 6 months. Not only will such a plan save the farmer money, but it will lighten his load by making it unnecessary to raise the whole amount of money at a stated period, only a few years after securing the loan. Such a plan will enable the farmers of the State of Washington and of every other State to do one of two things—either they can pay off their entire indebtedness in a few years without great inconvenience or they can secure much larger amounts of money with which to develop their land.

THIS BILL A COMBINATION OF TWO PLANS.

This bill covers 59 pages, and I have not the time to review all of the details it contains, but I am impressed that this bill is a combination of the Government-aid plan and the cooperative association plan.

FARM-LOAN BOARD AND GOVERNMENT AID.

It provides first for a Federal farm-loan board of three members, at an annual salary of $10,000 each and necessary traveling expenses. This board will have general charge of the whole system. These men are to be appointed by the President and to divide the United States into 12 districts, with a Federal land bank in each district, with a capital of $750,000, all of which will be furnished by the Federal Government if not subscribed within 90 days after establishment. In other words, the Government will place $9,000,000 in these banks to help start the system if necessary.

THE LAND BANKS.

The capital stock of the land banks is to be divided into shares at $5 each, and any individual, firm, corporation, or the Government may purchase the stock, but no dividends shall be paid the Government on its stock. These Federal land banks and the joint stock banks are to be financial agents of the Federal Government.

HOW TO BORROW MONEY.

Any 10 farmers who desire to borrow money on farm-mortgage security can form a farm-loan association and apply to the Federal land bank for the loans desired, but only borrowers can be members of the farm-loan association. Members of the association can borrow not less than $100, nor more than $10,000, for not less than 5 years, nor more than 36 years, and no loan can be made except to an actual farmer or to one who is to become an actual farmer. The loan can not exceed 60 per cent of the value of the land and 20 per cent of the value of the improvements. Rates of interest shall not exceed 6 per cent and payments can be arranged on the amortization plan. Every borrower must purchase stock to the value of 5 per cent of his loan, although this may be taken out of the amount borrowed, but he can arrange to pay this on the amortization plan also. The joint-stock banks referred to are corporations to be organized for carrying on the business of lending on farm-mortgage security and issuing farm-loan bonds. The loans may be made for the following purposes:

1. To purchase land for agricultural purposes.
2. To purchase live stock and equipment.
3. For erection of buildings.
4. To refund existing mortgages.
5. To liquidate indebtedness incurred for any of the foregoing purposes.

OTHER FEATURES.

These are the principal provisions of interest to the borrower. Other parts of the bill treat of the safeguarding of the bonds, reserves, and dividends, exemptions of the bonds from taxation, penalties, and limitations on court decisions. While the bill does not go as far as I would like to have it go in aiding the farmers, it is such a marked improvement over present conditions and will at least establish a rural-credit system that I think the passage of the legislation is in reality a great achievement.

BETTER DAYS FOR AMERICAN FARMERS.

I believe this bill is only the first step in rural-credit legislation. I know there are some who will be dissatisfied with this measure and say it should never have been passed. They will criticize it not for the provisions it does contain, but for the provisions it fails to contain. They are as honest as we are and mean as well, but just because I can not secure all I desire does not preclude me from taking what I can get.

The same kind of criticism was made of those who voted the first rural mail-delivery law some years ago. We have amended and improved this law year by year. Think of the millions and

millions of country people who now receive their daily mail, but who otherwise would be compelled to travel miles and miles to get it, and then consider whether or not those Members of Congress acted wisely in starting the system, imperfect though it was. We heard the same sort of critics decry the beginning of the parcel-post system and the postal savings bank, yet now we hear only proposals to enlarge and improve them, without even a suggestion of their abolition. Just so I believe it will be with the establishment of a rural-credit system. We shall improve and extend it, but once established we will never abolish it. The wheel of progress always moves forward and the passage of this law means that the American farmers as a class are on the threshhold of better days. We have been slow to establish a rural-credit plan, but we shall develop it into an American system. Just as the American people are the product of the assimilation of the best blood of every nationality, so will the American rural-credit system eventually be the product of the best parts of the rural-credit systems of every nation.

AMERICA THE MELTING POT.

The history of the world nowhere records anything like the assimilation of peoples now going on in America. We mix here the rugged people of the bleak, frozen lands of northern Europe with the smiling, happy sons and daughters of vineclad France and sunny Italy. Here meet and mingle on a common plane the persecuted of every part of earth with those descended from the same ancestry as their one-time persecutors. The stubborn, thrifty Scotchman here finds himself matched against the systematic and industrious Teuton, and the sons of Erin often lord it over those of English descent, sometimes by a swinging policeman's club, and at other times by the less potent scepter of political power. Here in America we are blending every people into one general type which the world knows as the American, the finest citizenship in all the world.

IDEAL TYPE OF AMERICAN TO BE ON BANKS OF COLUMBIA.

As a representative of the West, I say to you that in that new land as nowhere else the gates of opportunity still swing ajar. When that great empire builder, James J. Hill, said that the ideal type of American citizen will develop somewhere on the banks of the majestic Columbia, he spoke the words of a seer. We who live there urge you to come and abide among us. We have inscribed above our portals the invitation of the legend, "All hope and none despair." [Long and continued applause.]

Mr. DILL. I yield the balance of my time to the gentleman from Missouri [Mr. HENSLEY].

[Mr. HENSLEY addressed the committee. See Appendix.]

Mr. GLASS. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that the committee had had under consideration the bill S. 2986, the rural-credit bill, and had come to no resolution thereon.

AQUEDUCT BRIDGE BILL.

The SPEAKER announced the cancellation of his signature to the bill H. R. 759, an act to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River and for the building of a bridge in place thereof, in accordance with House concurrent resolution 40.

Mr. MANN. Mr. Speaker, did we receive a message from the Senate to the effect that the concurrent resolution had passed?

The SPEAKER. Yes; it has come over.

Mr. MANN. I did not recall it.

The SPEAKER. I did not, either.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 562. An act to amend the act approved June 25, 1910, authorizing the Postal Savings System, and for other purposes.

MOTHERS' DAY.

Mr. BRUMBAUGH. Mr. Speaker——

The SPEAKER. The gentleman from Ohio [Mr. BRUMBAUGH].

Mr. BRUMBAUGH. Mr. Speaker and gentlemen of the House, at the close of this day, which we have spent considering how to benefit the home life of the people, I deem it not inappropriate before we adjourn to call the attention of the House to the greatest, strongest, and sweetest influence not only in the home but in all our lives for the joy of the home and for the joy of our lives. Two years ago to-day the Heflin resolution designating the second Sunday in May as Mothers' Day was signed by the President of the United States.

Because the House is now about to adjourn, I can do no more at this time than to call attention to the fact that to-morrow is Mothers' Day, and in my time I want to have read the very beautiful editorial which I have clipped from the Ohio State Journal, of Columbus, Ohio. I know we will all approve and be delighted with the beauty, sentiment, and holy and sacred memories which it awakens in every heart.

I shall also print in this connection the no less beautiful editorial which I have clipped from the Catholic Columbian, of Columbus, Ohio.

[From the Ohio State Journal, Columbus, Ohio.]

MOTHERS' DAY.

Next Sunday is Mothers' Day. It ought to be more popular than all other public days, for it is in recognition of the finest personality on earth. When one suggests the name of "mother" it calls up all the sweet and noble qualities of human life. From her radiate all the purest and hollest aspirations of one's nature.

To honor this tender memory, this loving personality, next Sunday is selected as the day of all the year on which we are to wear our white flowers and offer our tributes of praise to the one person who is greater than all the greatest of earth. The tribute may not be in grand demonstration or in magnificent display and noise, but, what is better, in the silent homage of the heart or in the quiet expression of a tender memory.

Nor is the day to honor the mother alone, but ourselves. It is we, the people, who need the inspiration of her unselfish spirit. We are all nobler for thinking of mother, for paying tribute to her virtues, and for remembering her many sacrifices. No man or woman can afford to get beyond the sway of her gentle spirit, and to keep within its influence and to honor her memory next Sunday is set apart. Wear a white flower to keep you constantly in mind of the meaning of the day.

[From the Catholic Columbian, Columbus, Ohio.]

MOTHERS' DAY.

Let every mother's son not forget to wear on next Sunday the white flower betokening love for her to whom, after God, he owes devotion. On Mothers' Day the wanderer from the rooftree of home reverts tearfully to other times when the little family encircled the board where mother's good things smiled or steamed. On Mothers' Day those at home should sing sweet songs to her who in the olden time gave lullabies that hushed fears and invited quiet slumber.

Mother! There is no dearer name. Mother, who is the personification of sacrifice. Mother, who is incarnate love. Mother, who is the light of the home. Mother, whose hands never grow tired, whose heart never weakens in solicitude. Mother, whose zealous work is prayer, whose prayer is zealous work. Mother, who first told us of God, who first pointed to heaven. Mother, a heavenly name, for it tells us of Him who was all devotion to blessed Mary, queen of May, as she is queen of the countless thousands who sing forever in heaven the story of the Christ.

Mr. ASHBROOK. Mr. Speaker——

The SPEAKER. The gentleman from Ohio [Mr. ASHBROOK].

Mr. ASHBROOK. I read this editorial in the Ohio State Journal to-day, and I want to thank my colleague from Ohio [Mr. BRUMBAUGH] for calling the attention of the House to this beautiful editorial.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. HOLLINGSWORTH, for one week, on account of illness in his family.

To Mr. DALE of New York, indefinitely, on account of illness of his wife.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 22 minutes p. m.) the House adjourned until Monday, May 15, 1916, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Ancortes Harbor, Wash., with a view to improving Cap Sante waterway (H. Doc. No. 1117); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

2. A letter from the chief clerk of the Court of Claims, transmitting a certified copy of the order filed by the court dismissing the petition in the case of Robert K. Scott *v.* The United States (H. Doc. No. 1118); to the Committee on War Claims and ordered to be printed.

3. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Nancy E. Stewart, widow of John F. Stewart, *v.* The United States (H. Doc. No. 1119); to the Committee on War Claims and ordered to be printed.

4. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Sarah A.

McNally, widow of John McNally, deceased, *v.* The United States (H. Doc. No. 1120); to the Committee on War Claims and ordered to be printed.

5. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of George H. Losey *v.* The United States (H. Doc. No. 1121); to the Committee on War Claims and ordered to be printed.

6. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Charles W. Lockman *v.* The United States (H. Doc. No. 1122); to the Committee on War Claims and ordered to be printed.

7. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of James T. Joslin *v.* The United States (H. Doc. No. 1123); to the Committee on War Claims and ordered to be printed.

8. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Otis G. Gerould *v.* The United States (H. Doc. No. 1124); to the Committee on War Claims and ordered to be printed.

9. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Solomon F. Flint *v.* The United States (H. Doc. No. 1125); to the Committee on War Claims and ordered to be printed.

10. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Adeline Benjamin, sister of William H. Benjamin, deceased, *v.* The United States (H. Doc. No. 1126); to the Committee on War Claims and ordered to be printed.

11. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Ettie Pope, widow of Byron Pope, deceased, *v.* The United States (H. Doc. No. 1127); to the Committee on War Claims and ordered to be printed.

12. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Timothy L. Baldwin *v.* The United States (H. Doc. No. 1128); to the Committee on War Claims and ordered to be printed.

13. A letter from the chief clerk of the Court of Claims, transmitting a copy of the findings of the court in the case of Sallie J. Boyd, widow (remarried) of Aurelius Hight, deceased, *v.* The United States (H. Doc. No. 1129); to the Committee on War Claims and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. KITCHIN, from the Committee on Ways and Means, to which was referred the bill (H. R. 12954) for the establishment of Northport, Chopaka, and Laurier, in the State of Washington, as ports of entry and delivery for immediate transportation without appraisement of dutiable merchandise, reported the same with amendment, accompanied by a report (No. 684), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 5708) for the establishment of Winston-Salem, in the State of North Carolina, as a port of delivery under the act of June 10, 1880, governing the immediate transportation without appraisement of dutiable merchandise, reported the same without amendment, accompanied by a report (No. 685), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. HENRY, from the Committee on Rules, to which was referred the resolution (H. Res. 233) providing for the consideration of House bill 15455, reported the same without amendment, accompanied by a report (No. 686), which said bill and report were referred to the House Calendar.

Mr. KITCHIN, from the Committee on Ways and Means, to which was referred the bill (S. 3536) to provide for the storing and cleansing of imported Mexican peas, commonly called "garbanzo," reported the same without amendment, accompanied by a report (No. 687), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ALLEN, from the Committee on Ways and Means, to which was referred the bill (H. R. 9542) to amend the second paragraph of section 3264 of the Revised Statutes of the United States as amended by section 5 of the act of March 1, 1879, and as further amended by the act of Congress approved June 22, 1910, reported the same without amendment, accompanied by a report (No. 688), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 3861) to amend an act entitled "An act for the withdrawal from bond tax-free of domestic alcohol when rendered unfit for beverage or liquid medicinal uses when mixed with suitable denaturing materials," approved March 2, 1907, reported the same without amendment, accompanied by a report (No. 689), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. STEPHENS of Texas, from the Committee on Indian Affairs, to which was referred the bill (H. R. 9621) for the relief of J. W. Dellinger, reported the same without amendment, accompanied by a report (No. 690), which said bill and report were referred to the Private Calendar.

Mr. MILLER of Delaware, from the Committee on Claims, to which was referred the bill (H. R. 14889) for the relief of the estate of Jackson J. Mash, deceased, reported the same with amendment, accompanied by a report (No. 691), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (H. R. 1571) for the relief of Albert T. Huso, reported the same with amendment, accompanied by a report (No. 692), which said bill and report were referred to the Private Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 12360) granting a pension to Charlie Forbes; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 15083) granting an increase of pension to Melvina J. Jarvis; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. ADAMSON: A bill (H. R. 15652) extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting the health, sanitation, quarantine, taxation, and police powers on the Canal Zone, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. SABATH: A bill (H. R. 15653) for the relief of the victims of the *Eastland* disaster; to the Committee on Claims.

By Mr. HENRY: Resolution (H. Res. 236) providing for the consideration of the bill H. R. 15455; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 15654) granting a pension to Gifford Ramey; to the Committee on Pensions.

Also, a bill (H. R. 15655) granting an increase of pension to Edgar G. Spaid; to the Committee on Invalid Pensions.

By Mr. BENNET: A bill (H. R. 15656) for the relief of Charles W. Anderson; to the Committee on Claims.

Also, a bill (H. R. 15657) granting a pension to Mrs. Max Ferber; to the Committee on Pensions.

By Mr. CHANDLER of New York: A bill (H. R. 15658) granting a pension to Ellen Merritt; to the Committee on Pensions.

By Mr. ESCH: A bill (H. R. 15659) granting an increase of pension to James Livingstone; to the Committee on Invalid Pensions.

By Mr. FESS: A bill (H. R. 15660) for the relief of Samuel B. Dump; to the Committee on Naval Affairs.

Also, a bill (H. R. 15661) to confer jurisdiction upon the Court of Claims to try and determine the validity of any claims George C. Jenkins, late second lieutenant, First Regiment Alabama Volunteer Cavalry, may have against the Government for services rendered in the military service of the United States during the War of the Rebellion; to the Committee on War Claims.

By Mr. FINLEY: A bill (H. R. 15662) for the relief of J. R. Howe; to the Committee on Claims.

By Mr. FOSS: A bill (H. R. 15663) granting a pension to George R. Rowling, helpless child of Charles J. Rowling, deceased; to the Committee on Invalid Pensions.

By Mr. HILLIARD: A bill (H. R. 15664) granting an increase of pension to Belle Corey; to the Committee on Invalid Pensions.

By Mr. HOLLINGSWORTH: A bill (H. R. 15665) for the relief of Mary A. Horning, widow of Frederick Horning; to the Committee on Military Affairs.

By Mr. HOUSTON: A bill (H. R. 15666) granting an increase of pension to John M. Gilbert; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15667) granting a pension to George Morris Shaw; to the Committee on Pensions.

By Mr. NELSON: A bill (H. R. 15668) granting a pension to Mrs. Aurora C. B. Kinnie; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 15669) granting a pension to Frank A. Smith; to the Committee on Pensions.

By Mr. PATTEN: A bill (H. R. 15670) for the relief of Richard Henry Greene; to the Committee on Military Affairs.

Also, a bill (H. R. 15671) for the relief of Walter Franklin Jones; to the Committee on Military Affairs.

By Mr. RAMSEYER: A bill (H. R. 15672) granting an increase of pension to Reuben Kinder; to the Committee on Invalid Pensions.

By Mr. REILLY: A bill (H. R. 15673) granting a pension to Alice J. Selden; to the Committee on Invalid Pensions.

By Mr. SHERWOOD: A bill (H. R. 15674) granting an increase of pension to Matilda E. Cole; to the Committee on Invalid Pensions.

By Mr. STEPHENS of Texas: A bill (H. R. 15675) for the relief of W. M. McCord; to the Committee on Claims.

Also, a bill (H. R. 15676) granting a pension to Arthur H. Brady; to the Committee on Pensions.

By Mr. THOMAS: A bill (H. R. 15677) granting an increase of pension to Samuel B. Morris; to the Committee on Invalid Pensions.

By Mr. TILLMAN: A bill (H. R. 15678) granting an increase of pension to Benton Allen; to the Committee on Invalid Pensions.

By Mr. THOMAS S. WILLIAMS: A bill (H. R. 15679) granting an increase of pension to George A. Greenwood; to the Committee on Invalid Pensions.

Also, petition of H. G. Crego and 4 citizens of Burlington, Mich., favoring House bill 5308; to the Committee on Ways and Means.

Also, petition of H. B. Williams and 5 citizens of Tekonsha, Mich., favoring House bill 5308; to the Committee on Ways and Means.

By Mr. STEPHENS of Texas: Memorial of Texas Live Stock Association, at Fort Worth, Tex., January 26, 1916, adopted by their fortieth annual convention, requesting the passage of a law to require the Federal Trade Commission to investigate the beef-packing interests of the United States; to the Committee on the Judiciary.

By Mr. WINGO: Petition of citizens of Arkansas, relative to amending rural-credit bill; to the Committee on Banking and Currency.

## SENATE.

### MONDAY, *May 15, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we have assembled in Thy name. We have come out of the rest of the holy Sabbath day, after its refreshment, with its refining power, with its Divine inspirations, to address ourselves once more to the task committed to us in the providence of God. We pray that we may come to this task with the spirit of the God of our fathers resting upon us. We thank Thee that back of us is that patriotism which is not founded upon a narrow community of interests, but upon the great spiritual ideals that have been wrought into the fundamental laws of our land. We pray that we may be true to Thee and that Thou wilt guide the ship of state onward in its course. We pray that over us there may be constantly the hand of God guiding to the fulfillment of the Divine plan in us as a Nation. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of the proceedings of the legislative day of Tuesday, May 9, 1916, when, on request of Mr. STONE and by unanimous consent, the further reading was dispensed with, and the Journal was approved.

WORKING CONDITIONS OF RAILROAD EMPLOYEES.

The VICE PRESIDENT laid before the Senate a communication from the United States Board of Mediation and Conciliation, transmitting, in response to resolution of the 3d instant, a report on the effects of arbitration proceedings upon rates of pay and working conditions of railroad employees, which, with the accompanying papers, was referred to the Committee on Interstate Commerce.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of sundry officers of the Porto Rico Regiment of Infantry, praying that they be invested with the full rights and privileges of American citizenship, which was referred to the Committee on Pacific Islands and Porto Rico.

Mr. MYERS presented a petition of the Chamber of Commerce of Butte, Mont., praying for the enactment of legislation to regulate the price of gasoline, which was referred to the Committee on Agriculture and Forestry.

He also presented a petition of the Chamber of Commerce of Baker, Mont., praying for the enactment of legislation to provide arbitration of disputes between railway companies and their employees, which was referred to the Committee on Interstate Commerce.

He also presented a petition of sundry citizens of Anaconda, Mont., praying for the enactment of legislation to prohibit the use of stop-watch devices in the work of Government employees, which was referred to the Committee on Education and Labor.

Mr. GALLINGER presented a petition of Camp Derwin, No. 5, United Spanish War Veterans, of Manchester, N. H., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was referred to the Committee on Pensions.

Mr. GALLINGER (for Mr. BURLEIGH) presented petitions of sundry citizens of Maine, praying for national prohibition, which were referred to the Committee on the Judiciary.

Mr. MARTIN of Virginia presented a petition of Colonel A. M. Higgins Camp, No. 8, United Spanish War Veterans, National Soldiers' Home, Va., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was ordered to lie on the table.

Mr. WEEKS presented petitions of sundry citizens of Massachusetts, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of George H. Patch Camp, No. 80, United Spanish War Veterans, of Malden, Mass., praying for an increase in armaments, which was ordered to lie on the table.

He also presented a petition of the Woman's Relief Corps of Worcester County, Mass., praying that an appropriation be made for the construction of a building as a memorial to the women who served during the Civil War, which was referred to the Committee on Public Buildings and Grounds.

Mr. THOMPSON presented petitions of sundry citizens of Kansas, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a memorial of Wheat Belt Grange No. 1735, Patrons of Husbandry, of Lewis, Kans., remonstrating against any change being made in the parcel-post law, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Reno County Ministerial Association, of Hutchinson, Kans., praying for prohibition in the island of Porto Rico, which was referred to the Committee on Pacific Islands and Porto Rico.

He also presented a petition of Manila Camp, No. 1, United Spanish War Veterans, Department of Kansas, National Military Home, Kans., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was ordered to lie on the table.

He also presented a petition of Manila Camp, No. 1, United Spanish War Veterans, Department of Kansas, National Military Home, Kans., praying for the enactment of legislation to grant pensions to survivors of certain Indian wars, which was ordered to lie on the table.

Mr. O'GORMAN presented a petition of the Board of Trade and Transportation of New York City, N. Y., praying that an appropriation be made for the improvement of the East River at New York City, which was ordered to lie on the table.

He also presented a memorial of the Board of Trade and Transportation of New York City, N. Y., remonstrating against the proposed discontinuance of the pneumatic-tube mail service in that city, which was referred to the Committee on Post Offices and Post Roads.

Mr. PHELAN presented a memorial of the Central California Conference of the Seventh-day Adventists, held at Fresno, Cal., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented a memorial of Guenoc Grange, Patrons of Husbandry, of Middletown, Cal., remonstrating against any change being made in the parcel-post law, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of Local Grange No. 342, Patrons of Husbandry, of Dinuba, Cal., praying for national prohibition, which was referred to the Committee on the Judiciary.

He also presented a petition of the California Associated Societies for the Conservation of Wild Life, of Berkeley, Cal., praying for the establishment of a national-park service, which was referred to the Committee on Appropriations.

He also presented a memorial of Cremieux Lodge, No. 325, Independent Order of B'nai B'rith, of San Francisco, Cal., remonstrating against the enactment of legislation to further restrict immigration, which was ordered to lie on the table.

Mr. WARREN presented memorials of sundry citizens of Campbell and Sheridan Counties, in the State of Wyoming, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

Mr. STONE presented a petition of the Engineers' Club of St. Louis, Mo., praying for the enactment of legislation to establish engineering experiment stations in connection with the land-grant colleges, which was referred to the Committee on Agriculture and Forestry.

Mr. WADSWORTH presented a memorial of sundry citizens of Albany, N. Y., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented memorials of sundry citizens of New York, remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented petitions of sundry citizens of New York City, N. Y., praying for the enactment of legislation to prohibit the exportation of materials used in making paint, which were referred to the Committee on the Judiciary.

Mr. THOMPSON. Mr. President, I have here a letter from Mr. Ewing Herbert, a prominent editor of my State, and who is also the publisher of the St. Joseph Daily Journal and Stockyards Daily Journal at St. Joseph, Mo., calling attention to the extremely high price of print paper charged by the paper houses and paper mills of the country. I desire to have the letter printed in the RECORD that the Congress and the proper departments of the Government may have the information. It seems to me that some decisive action should be taken to remedy the evil complained of.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

ST. JOSEPH, MO., *Tuesday, May 9, 1916.*

Hon. WILLIAM THOMPSON,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: I wish that you would look into the prices being made on print paper by the various paper houses and paper mills. They are dealing most unfairly with the newspaper publishers.

On account of war conditions they can sell their products for high prices to foreign countries, and they are making the home publishers pay those high prices. In all fairness they should continue the same prices that have prevailed heretofore to home publishers, and sell the surplus to foreign countries at the war prices.

The hardship of the raise in prices is borne by the small publishers of the country. I presume the great newspaper publishers in the cities are amply protected because most of them either hold majority of stock in mills or have contracts to take the output of several different mills, and, of course, they are not affected by the war prices. The price of print paper has doubled, and many paper houses will not put a price on it, but sell it to the publisher at whatever price the mills make on it. This is an outrage that no publisher can stand and I think that it demands congressional action. I think it would be only right to forbid the sale of any paper for export except surplus products, and I think the prevailing prices for the last 5 or 10 years should be the prices for publishers in this country.

Very respectfully, yours,

THE ST. JOSEPH JOURNAL PUBLISHING CO.,
Per EWING HERBERT, *Manager.*

REPORTS OF COMMITTEES.

Mr. MYERS, from the Committee on Public Lands, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 529. An act creating an additional land district in the State of California, and for other purposes (Rept. No. 438); and

H. R. 4297. An act for the relief of Frances L. Llewellyn (Rept. No. 439).

Mr. NELSON, from the Committee on Commerce, to which was referred the bill (S. 5103) authorizing and directing the

Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or parcel of land owned by the United States Government on the Great Kanawha River, in West Virginia, reported it without amendment.

Mr. CLARK of Wyoming, from the Committee on Public Lands, to which was referred the bill (S. 4282) to permit the State of Wyoming to relinquish to the United States lands heretofore selected and to select other lands from the public domain in lieu thereof, reported it with amendments and submitted a report (No. 442) thereon.

Mr. POMERENE, from the Committee on the District of Columbia, to which was referred the bill (S. 681) providing for the election of a Delegate to the House of Representatives from the District of Columbia, and for other purposes, reported it with amendments and submitted a report (No. 443) thereon.

Mr. PITTMAN, from the Committee on Territories, to which was referred the bill (S. 5716) to establish the Mount McKinley National Park, in the Territory of Alaska, reported it without amendment and submitted a report (No. 440) thereon.

THE ALASKAN RAILROAD.

Mr. PITTMAN. From the Committee on Territories, I report back favorably with amendments the bill (S. 5790) to confer additional authority upon the President of the United States in the construction and operation of the Alaskan railroad, and for other purposes, and I submit a report (No. 441) thereon.

I wish to state that the committee have unanimously reported this bill, and in the report state that there is an emergency existing for this legislation. It empowers the President of the United States to make rules and regulations not inconsistent with the laws of the United States for sanitation along the Alaskan railroad. They are to be purely sanitary rules. There will be probably 15,000 men employed there in the very near future, and this measure seems to be a necessity.

Mr. SMOOT. Is it a Senate bill or a House bill?

Mr. PITTMAN. It is a Senate bill. As proposed to be amended it deals only with sanitation.

Mr. SMOOT. The bill ought to pass.

The VICE PRESIDENT. Is there objection to the consideration of the bill?

Mr. GALLINGER. Let the bill be read.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. PITTMAN. I will state that the amendments of the committee strike out the police power, so that it simply empowers the President to make regulations with regard to sanitation.

The amendments of the committee were, on page 1, line 3, after the word "construction," to strike out the word "and"; on page 1, line 4, to strike out the word "operation" at the beginning of the line; page 1, line 10, to strike out the word "police"; page 1, line 11, after the word "necessary," to strike out the words "to preserve order and"; page 1, line 13, after the word "railroad," to strike out the words "or railroads constructed" and the comma and insert the word "while"; page 2, line 3, after the word "fourteen," insert: ": *Provided*, That this shall not apply to incorporated towns"; and on page 2, line 10, after the word "not," to strike out the words "less than 10 days nor," so as to make the bill read:

*Be it enacted, etc.*, That in connection with and during the construction of the Alaskan railroad, under the provisions of the act of Congress approved March 12, 1914, entitled "An act to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes," the President is hereby authorized and empowered to make and promulgate such quarantine and sanitary rules and regulations as shall be necessary to preserve the public health along and in the vicinity of said railroad while being constructed, or located by survey, and within town sites established, or to be established, under and pursuant to said act of March 12, 1914: *Provided*, That this shall not apply to incorporated towns.

SEC. 2. That such rules and regulations shall become effective on a date to be named in proclamation of the President promulgating same, and any person violating such rules or regulations, or any of them, shall be deemed guilty of a misdemeanor, and shall, upon conviction thereof in the courts of Alaska, be fined not more than $500 or be imprisoned not more than one year, or both.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

LIGHTHOUSE RESERVATION AT SCITUATE, MASS.

Mr. LIPPITT. From the Committee on Commerce I report back favorably without amendment the bill (S. 5910) authorizing the sale of the lighthouse reservation at Scituate, Mass.

Mr. LODGE. I ask unanimous consent for the present consideration of the bill.

The VICE PRESIDENT. Is there objection?

There being no objection, the bill was considered as in Committee of the Whole. It authorizes the Secretary of Commerce to sell to the town of Scituate, Mass., for $1,000, that certain piece or parcel of land pertaining to the Lighthouse Service situate and lying on Cedar Point, Scituate, county of Plymouth, Commonwealth of Massachusetts, described April 4, 1811, by Seth Sprague, Joshua Thomas, and Nathan Rice, a committee appointed under the act of the Legislature of the Commonwealth of Massachusetts, ceding jurisdiction and authorizing the appraisement of land at Scituate Harbor, and recorded in Plymouth register of deeds, book 116, folio 183, and book B, page 159, as follows: All the land and beach that lies southeasterly of a line beginning on the easterly side of Cedar Point at a place that bears south 49½° west from the Old Sow, so called, and that bears north 4° east from the willow tree on the first cliff, so called, and from said place running south 74° west across said Cedar Point to the harbor, together with the right of way and shore privilege, including the improvements thereon, no longer required for lighthouse purposes: *Provided*, That the town of Scituate shall maintain the site and structure thereon as an historic landmark.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

E. C. HORNOR.

Mr. CLARKE of Arkansas. I ask unanimous consent for the present consideration of the bill (H. R. 8068) for the relief of E. C. Hornor. It is a local bill, not of very great importance to the country but of quite considerable importance to the beneficiary.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill. It proposes to pay to E. C. Hornor, of Helena, Ark., $1,000 on account of forfeiture of bond in case of Anna B. Taylor.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CURTIS (by request):

A bill (S. 5989) to create a Department of the Civil Service and to provide for its organization, and for other purposes; to the Committee on Civil Service and Retrenchment.

By Mr. CHAMBERLAIN:

A bill (S. 5990) to prohibit telephone companies and telegraph companies from engaging in the sale of merchandise; to the Committee on Interstate Commerce.

Mr. BORAH. I introduce a bill and ask that it lie on the table, to be called up later.

The bill (S. 5991) to prevent discrimination in prices and to provide for publicity of prices to dealers and to the public was ordered to lie on the table.

By Mr. PITTMAN:

A bill (S. 5992) authorizing the cutting of timber for mining purposes by corporations organized in one State and conducting mining operations in another; to the Committee on Public Lands.

By Mr. STERLING:

A bill (S. 5993) granting an increase of pension to Thomas McDonald (with accompanying papers); and

A bill (S. 5994) granting an increase of pension to Allen B. O'Connor (with accompanying papers); to the Committee on Pensions.

By Mr. GALLINGER (for Mr. BURLEIGH):

A bill (S. 5995) granting an increase of pension to Eliza J. Eddy;

A bill (S. 5996) granting an increase of pension to Francis A. Gilbreth; and

A bill (S. 5997) granting an increase of pension to Charles N. Chatto; to the Committee on Pensions.

By Mr. O'GORMAN:

A bill (S. 5998) granting an increase of pension to Elize King; to the Committee on Pensions.

A bill (S. 5999) for the relief of Watson B. Dickerman, administrator of the estate of Charles Backman, deceased; to the Committee on Claims.

By Mr. POMERENE:

A bill (S. 6000) for the retirement of public-school teachers of the District of Columbia; to the Committee on the District of Columbia.

A bill (S. 6001) to amend section 19 of the Federal reserve law relating to reserves; to the Committee on Banking and Currency.

By Mr. GORE:

A bill (S. 6002) granting a pension to Melvin G. Cornell;

A bill (S. 6003) granting a pension to Wylie Brown;

A bill (S. 6004) granting a pension to Frank H. Latham;

A bill (S. 6005) granting a pension to Evan Watson;

A bill (S. 6006) granting a pension to Lizzie J. McCollum; and

A bill (S. 6007) granting a pension to Percy Jones; to the Committee on Pensions.

By Mr. WARREN:

A bill (S. 6008) granting an increase of pension to Charles William Finley (with accompanying papers); to the Committee on Pensions.

By Mr. KERN (for Mr. TAGGART):

A bill (S. 6009) granting an increase of pension to Nathan Martin;

A bill (S. 6010) granting a pension to Reuben J. Powell;

A bill (S. 6011) granting a pension to Clarence McClintic; and

A bill (S. 6012) granting an increase of pension to John W. Shepherd; to the Committee on Pensions.

AMENDMENT TO AGRICULTURAL APPROPRIATION BILL.

Mr. CHAMBERLAIN submitted an amendment proposing to appropriate $200,000 for experimental well boring in the semi-arid regions of central and eastern Oregon, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was referred to the Committee on Agriculture and Forestry and ordered to be printed.

RESTORATION OF PEACE.

M. GORE. I submit a concurrent resolution and ask that it may go over under the rule. I ask that it may be read.

The concurrent resolution (S. Con. Res. 22) was read as follows:

*Resolved by the Senate of the United States (the House of Representatives concurring)*, That the Congress and the people of the United States are desirous of maintaining an honorable and lasting peace with all the nations of the world, and pending war among other nations are desirous of maintaining even-handed and undiscriminating neutrality;

Second. That the Congress and the people of the United States will support all efforts on the part of the President to preserve such a peace and to observe such neutrality;

Third. That the Congress and the people of the United States earnestly desire and would hail with profound satisfaction the return or restoration of permanent peace to the warring nations of the Old World:

Fourth. That the Congress and the people of the United States would approve and support all seasonable efforts on the part of the President to encourage or to facilitate the establishment of a permanent peace among the warring nations upon such principles as would best conserve the interest of civilization and insure, so far as may be, international peace and justice for the future.

The VICE PRESIDENT. The concurrent resolution will go over under the rule and be printed.

DEPARTMENT OF JUSTICE BUILDING.

Mr. SWANSON. I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 5854) to provide for the erection, furnishing, and equipping of a public building in the city of Washington, D. C., for the Department of Justice.

Mr. MYERS and Mr. STONE addressed the Chair.

Mr. SWANSON. I move that the Senate proceed to the consideration of the bill.

Mr. MYERS. I rose to ask the Senator from Virginia upon the question of unanimous consent how long he thinks it will take to dispose of the bill?

Mr. SWANSON. I do not think it will take very long. Its passage has been urged for years and years.

Mr. MYERS. I think we ought to call the calendar for the consideration of unobjected bills, but as the motion has been made I have nothing more to say.

The VICE PRESIDENT. The Senator from Viriginia moves that the Senate proceed to the consideration of the bill.

Mr. GALLINGER. Mr. President, pending the motion I make the point of no quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Fall | Jones | Norris |
| Bankhead | Gallinger | Kenyon | Page |
| Beckham | Gore | Kern | Pittman |
| Broussard | Gronna | Lane | Poindexter |
| Catron | Harding | Lea, Tenn. | Pomerene |
| Chamberlain | Hardwick | Lippitt | Ransdell |
| Clapp | Hitchcock | Lodge | Saulsbury |
| Clarke, Ark. | Hollis | McLean | Shafroth |
| Colt | James | Martine, N. J. | Sheppard |
| Curtis | Johnson, Me. | Myers | Sherman |
| du Pont | Johnson, S. Dak. | Newlands | Simmons |
| Smith, Ariz. | Sterling | Thompson | Wadsworth |
| Smith, Md. | Stone | Tillman | Warren |
| Smith, S. C. | Swanson | Underwood | Weeks |
| Smoot | Thomas | Vardaman | Williams |

Mr. CLAPP. I desire to announce that the junior Senator from Michigan [Mr. TOWNSEND] has been called from the city by serious illness in his family, and that he has a general pair with the junior Senator from Florida [Mr. BRYAN]. I will let this announcement stand for the day.

Mr. SWANSON. I desire to state that I am paired with the junior Senator from Pennsylvania [Mr. OLIVER], who is absent. I will let this announcement stand for the day.

Mr. KERN. I wish to announce the unavoidable absence of the Senator from Indiana [Mr. TAGGART]. I will let this announcement stand for the day.

Mr. JAMES. I desire to announce that the following Senators are absent attending a meeting of the Judiciary Committee:

The Senator from Texas [Mr. CULBERSON], the Senator from North Carolina [Mr. OVERMAN], the Senator from West Virginia [Mr. CHILTON], the Senator from New York [Mr. O'GORMAN], the Senator from Florida [Mr. FLETCHER], the Senator from Missouri [Mr. REED], the Senator from Montana [Mr. WALSH], the Senator from Georgia [Mr. SMITH], the Senator from Wyoming [Mr. CLARK], the Senator from Minnesota [Mr. NELSON], the Senator from Vermont [Mr. DILLINGHAM], the Senator from Utah [Mr. SUTHERLAND], the Senator from Connecticut [Mr. BRANDEGEE], the Senator from Idaho [Mr. BORAH], and the Senator from California [Mr. WORKS].

The VICE PRESIDENT. Sixty Senators have answered to the roll call. There is a quorum present. The Senator from Virginia has moved that the Senate proceed to the consideration of the bill (S. 5854) to provide for the erection, furnishing, and equipping of a building in the city of Washington, D. C., for the Department of Justice.

The motion was agreed to, and the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That a commission, consisting of the President of the United States, the Secretary of the Treasury, and the Attorney General, be, and is hereby, created, with full power and authority to obtain, through competition, under such conditions as the commission may prescribe, or from an architect specially selected by said commission, such designs, plans, estimates, specifications, etc., and such modifications therein as may be necessary, in connection with the construction of a suitable fireproof building, hereby authorized to be erected in the city of Washington, D. C., for the Department of Justice.

SEC. 2. That payment for the architectural services hereinbefore authorized shall be made from the appropriation for the building for the Department of Justice, at such prices or rates of compensation as may be fixed by said commission, not in excess, however, of the customary and prevailing rates for similar services, and said commission is hereby authorized to enter into contract to such extent as it may deem necessary for such architectural services, or to delegate its authority to enter into such contract to the Secretary of the Treasury: *Provided*, That nothing herein contained shall be construed as including the superintendence or local supervision of the work of constructing said building as a part of the architectural services hereinbefore authorized.

SEC. 3. That the limit of cost of said Department of Justice building, with fireproof vaults, elevators, equipment, and furnishings, ready for occupancy, and including compensation for architectural and other expert technical and clerical services, but exclusive of approaches and apparatus for generating electric current and heat, shall not exceed the sum of $3,000,000.

SEC. 4. That said Department of Justice building shall be located upon such portions of squares 226 and 227 immediately south of Pennsylvania Avenue between Fourteenth and Fifteenth Streets northwest as may be designated by the above-named commission.

SEC. 5. That upon the approval of the designs, plans, etc., and the designation of the location as aforesaid, by said commission, the Secretary of the Treasury be, and he is hereby, authorized and directed to enter into contracts for the construction, equipment, and furnishing of the said Department of Justice building, and to employ such expert technical and clerical services as he may deem necessary and specially order in writing, to be employed exclusively in the Office of the Supervising Architect in connection with the work on said building, all within the total limit of cost hereinbefore fixed: *Provided*, That the contracts for the furnishings for said building shall be made for only such articles as may be approved by the Attorney General.

SEC. 6. That the adoption and approval of the design, plans, etc., for said Department of Justice building by the above-named commission shall not prevent subsequent changes in the design, arrangement, materials, or methods of construction, or cost which may be found necessary or advantageous: *Provided*, That no changes shall be made involving an expense in excess of the limit of cost hereinbefore fixed.

SEC. 7. That for the payment of architectural and other expert technical and clerical services and necessary expenses in obtaining designs, plans, estimates, specifications, etc., and for beginning the construction of said Department of Justice building, the sum of $500,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to be immediately available.

Mr. LODGE. Mr. President, I am very glad that there is pending here a bill providing for the construction of a building for the Department of Justice, which, in my judgment, ought to have been undertaken long ago; but I wish that the plans and designs for the building might be open to competition, and that its construction should not be confined to "an architect specially selected by said commission." I think the results of competition heretofore have been extremely good. Of course under this

bill there will be no competition. The architect, I take it, has already been selected.

Mr. SWANSON. If the Senator from Massachusetts will permit, I wish to say that the plans for this proposed building have been practically paid for, though there might be some alteration in them as prepared by Mr. Barber.

Mr. LODGE. I take it that the Senator from Virginia refers to the plans for the building which it was intended to locate opposite Lafayette Square?

Mr. SWANSON. Yes; some time ago.

Mr. LODGE. I remember that.

Mr. SWANSON. But I have no objection to the Senator from Massachusetts having an amendment inserted to the effect that if new plans are adopted the matter shall be open to competition. I think that would be proper. I presume, however, that the plans have been paid for and that they will be practically adopted, except as I have stated there might be some modification in them. We might wish to pay the architect something for modifying, improving, or changing the present plans. I think we have appropriated heretofore $50,000 for the plans.

Mr. LODGE. Yes; and I remember that the plans were agreed upon, but the building was not constructed because the expenditure could not be brought within the appropriation, and the matter all went over.

Mr. SWANSON. As I understand, the reason why the provision was inserted in the bill was because we expected to modify the plans to a certain extent, and possibly there will be some expense incident to that. I shall not object, if the Senator from Massachusetts desires to have an amendment inserted in the bill to the effect that, if new plans are adopted, it shall be after competition. As I have stated, I think that would be perfectly proper.

Mr. LODGE. I move, in section 1, page 1, line 6, after the word "competition," to insert the words "if new plans are to be adopted."

Mr. SWANSON. I accept that amendment.

Mr. LODGE. Then, in section 1, page 1, line 8, after the word "commission," I move to insert "if existing plans are to be used."

Mr. SWANSON. I accept the amendment.

The VICE PRESIDENT. The amendments proposed by the Senator from Massachusetts will be stated.

The SECRETARY. In section 1, page 1, line 6, after the word "competition," it is proposed to insert "if new plans are to be adopted;" and in line 8, after the word "commission," to insert "if existing plans are to be used," so as to read:

That a commission, consisting of the President of the United States, the Secretary of the Treasury, and the Attorney General, be, and is hereby, created, with full power and authority to obtain, through competition, if new plans are to be adopted, under such conditions as the commission may prescribe, or from an architect specially selected by said commission, if existing plans are to be used—

And so forth.

Mr. SWANSON. I accept the amendments.

The VICE PRESIDENT. Without objection, the amendments are agreed to.

Mr. NEWLANDS. Mr. President, I presume the Senator from Virginia will have no objection to inserting an amendment in this bill providing that, before entering into the contract for the building herein provided for, the plans shall be submitted to the National Commission of Fine Arts?

Mr. SWANSON. I shall have no objection, if the amendment is framed in the language of the act previously passed, to the effect that the commission "shall advise" with the Fine Arts Commission.

Mr. NEWLANDS. That they shall have their advice?

Mr. SWANSON. I shall have no objection to a provision to the effect that they shall advise with the Fine Arts Commission. I shall be very glad to accept an amendment to that effect, if the amendment which the Senator from Nevada desires to have inserted is in section 2, page 2, after line 17, to insert:

*Provided*, That the Commission of Fine Arts shall be advised with before such plans are adopted.

Mr. OVERMAN. That must be done, anyhow, under the law.

Mr. SWANSON. No; the law provides that the Fine Arts Commission shall be advised with. That is the language of the statute, I think.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 2, line 17, after the word "authorized," the last word in section 2, it is proposed to insert a colon and the following words:

*Provided*, That the Commission of Fine Arts shall be advised with before each plans are adopted.

The VICE PRESIDENT. Without objection, the amendment is agreed to.

Mr. WILLIAMS. Mr. President, I do not think that is the amendment which the Senator from Nevada wants to offer.

Mr. SWANSON. I will accept an amendment of similar purport at the same place, if the Senator from Nevada is not satisfied with the one suggested.

Mr. NEWLANDS. I will suggest to the Senator from Mississippi that the act creating the Fine Arts Commission provides that matters of art shall be submitted to the Fine Arts Commission for their counsel and advice. That is the language, I think, There is nothing in the original law that absolutely requires their approval.

Mr. WILLIAMS and Mr. STONE addressed the Chair.

The VICE PRESIDENT. The Senator from Mississippi.

Mr. WILLIAMS. Mr. President, I should like to ask the Senator from Virginia, who is in charge of the bill, a question about it, with a view of getting some information. Why did the committee come to the conclusion that $3,000,000 was needed for the proposed building for the Department of Justice?

Mr. SWANSON. That was the estimate made last year and is the estimate which has heretofore been made from time to time by the Supervising Architect's Office and the commission in charge of the plans. They have all estimated that it will require $3,000,000 to erect the building.

Mr. WILLIAMS. Mr. President, it seems to me that if we were going to erect all the buildings which the Government needs and make them adequate to house the various departments and at the same time make works of art out of them we do not need to appropriate $3,000,000 for each building. I can understand that if it were the design to construct a building to house other departments in addition to the Department of Justice a very large building might be required; but it seems to me it is wasting public money to appropriate $3,000,000 to erect a building simply to house the Department of Justice, and in order to get the sense of the Senate upon it and to get the matter fully ventilated in debate I shall move to strike out the numerals "$3,000,000" and substitute the numerals "$1,000,000" at the proper places in the bill.

I understand that the building for the Department of Agriculture cost only a million dollars, and that a number of other buildings here cost no more than that. A million dollars is a right large sum of money, especially now when we will have to spend all sorts of money for all kinds of new purposes.

When it comes to beautiful buildings Greece and Rome both taught us years and years ago that it did not require $3,000,000 to erect them. You can construct a very cumbersome, ugly building, like the present Department of State, War, and Navy, for example, very easily by the expenditure of a whole lot of unnecessary and wasted money. Unless there is some satisfactory explanation of the necessity of expending this very large amount of money I shall insist upon a motion to amend.

Mr. SWANSON. Mr. President, I do not care whether the Senate makes the appropriation $2,000,000, $1,000,000, or what not. The plans for the building have been practically adopted, and an estimate has been made by the Supervising Architect's Office as to what the new department building will cost to construct in accordance with those plans. I have no doubt that architects can erect an office building for a million dollars, but the proposed new building for the Department of Justice is to be constructed opposite the Treasury Department on land heretofore purchased by the Government for this purpose. The plans call for a very handsome structure, a very beautiful building, to be located, as I have said, opposite the Treasury, between Fourteenth and Fifteenth Streets. The department thinks it impossible to construct a building in accordance with the plans which have been agreed upon for a less sum of money than is provided for in the bill. I repeat that that estimate has been made by the Supervising Architect's Office and those who prepared the plans for the building. If the Senator thinks——

Mr. WILLIAMS. Mr. President, as I understand the Senator, the only reason is that somebody has recommended the $3,000,000 building.

Mr. SWANSON. It is not that some one has recommended that kind of a building, but the estimates have been made on the plans which have been adopted.

Mr. WILLIAMS. Undoubtedly, for $1,000,000 a magnificent and beautiful Department of Justice building can be erected in this city, especially as we already own the site, and we are going to need the other $2,000,000 very soon for a great many things. There is no use in our trying to make a reputation among the nations of the earth for architecture, which is simply the most stupendous that exists, and there is no use founding our reputation in architecture on the size of the buildings we erect or their cost. I can reproduce the Pantheon for half a million dollars or less, and I can reproduce the Parthenon probably for a similar sum.

If it were proposed to erect a building for a great department which had a large number of employees and required and demanded very large accommodations, perhaps such an expenditure might be justified—the mere item of stone would, of course, cost a great deal; but the Department of Justice is one of the smallest departments, so far as the number of its employees are concerned, in the entire Government; and if we are going to spend $3,000,000 for it, I presume, in proportion, we should spend $5,000,000 for the Department of Commerce and perhaps $6,000,000 for some other department.

Mr. SWANSON. Mr. President, if the Senator will permit me, an estimate was made as to how much such buildings will cost per cubic foot according to the architectural design; but if the Senator can erect the needed building for a million dollars, I think it would be very well to save the money.

Mr. VARDAMAN. Mr. President——

Mr. WILLIAMS. By the way, before I yield, the Senator from Indiana [Mr. KERN] makes a very valuable suggestion. The appropriations for the present session are going to exceed past appropriations by hundreds of millions of dollars.

Mr. KERN. By over $200,000,000.

Mr. WILLIAMS. We do not want to waste the public money.

Mr. VARDAMAN. Mr. President, I should like to ask the Senator in charge of this bill if the building to be constructed is to be used for any other purpose than the occupancy of the Attorney General and officers and employees of his department?

Mr. SWANSON. It is to be used for the Department of Justice. At one time it was contemplated to have the Departments of Justice and of State combined in one building, but the plans which have been prepared recommend that the building be devoted to the purposes of the Department of Justice alone.

Mr. VARDAMAN. Will it be occupied by the Supreme Court?

Mr. SWANSON. No; it will not be occupied by the Supreme Court.

Mr. VARDAMAN. It would take the place of the building now occupied by the Department of Justice?

Mr. SWANSON. I presume it will include the Court of Claims and everything that pertains to the work of the Department of Justice.

Mr. VARDAMAN. Mr. President, I agree with my colleague that a million dollars would be ample to construct a building for the purposes for which this building may be desired, and I do not see any necessity for extravagance in such a matter.

Mr. STONE. Mr. President, I rise merely to supplement what the Senator from Mississippi [Mr. WILLIAMS] said. The Senator from Mississippi asked the chairman of the committee, who has charge of this bill, whether a suitable and adequate building for the Department of Justice could not be constructed for a much less sum than that carried in the text of the bill, $3,000,000. The Senator from Virginia [Mr. SWANSON] said you can make it three millions, two millions, or one million, as you please. There is a significance to that answer. The Senator from Virginia did not intend, perhaps, that the answer should bear the significance I have in mind.

Mr. SWANSON. Mr. President, if the Senator will permit me, I say you can construct an office building for a million dollars. If you are going to put a building there that is in accord with the architecture of the Treasury, and in accord with the architecture of the plans that have been adopted for this building, the estimate is, as I have stated, that it will cost about $3,000,000. They have advertised for plans for a handsome building there.

Mr. STONE. Yes; the Senator has made that statement several times, and what he said is understood. What I wish to impress is that whether you make it one million, two millions, or three millions, the Senate can very reasonably depend upon the assurance that before the building is completed large additional appropriations will be asked.

Mr. President, I am as conscious as any Senator of the fact that the Department of Justice is not housed as we would like to see it.

Mr. OVERMAN. This is only an authorization.

Mr. STONE. It authorizes the construction of this building.

Mr. OVERMAN. It does not appropriate any money.

Mr. STONE. Well, it starts in that way. I should like to see the Department of Justice accommodated with a structure ornate and adequate. My friend from Virginia stated when he moved to take up this bill that there was a constant complaint that we were expending large sums for rentals. That is true; and that is the reason why, as soon as it can be done and ought to be done, always having in view our circumstances and environment, a building for this department should be in some way provided better than it now has at its service. But, Mr. President, the Senator from Mississippi [Mr. WILLIAMS] well remarked—I think both the Senators from that State so remarked—that we are now entering, and have already entered, upon a program of legislation that involves unusual and extraordinary expenditures, mounting into hundreds of millions of dollars. Already the Committee on Ways and Means of the House of Representatives are struggling with great difficulty to find ways and means for providing the revenue necessary to meet these extraordinary and enormous expenditures. I agree with the Senators from Mississippi that this is a time when we ought not to make appropriations that are not absolutely imperative or at least in some way of commanding importance.

We have gone along for a good many years without a building for this purpose. Perhaps it ought to have been constructed long ago. Let that be conceded. But at this time this Congress is facing the difficult proposition of providing very large and unusual revenues that must be collected in some form of taxation. I think we could defer expenditures of the kind covered by this bill for a while. Three million dollars is a considerable sum. My friend from Virginia and others in both Houses who are members of Public Buildings and Grounds Committees have led us to believe that at this session there would be no general buildings bill, and I have heartily approved that policy. I approved of it for the reason I have indicated, that this is peculiarly a time when we ought to husband our resources and limit our expenditures, where expenditures are not of greatest importance—of such importance, indeed, as to make appropriations almost imperative—with a view to meeting more easily the vast appropriations we are going to be compelled to make. I call the attention to this fact to the Senate generally, but to Democratic Senators especially, for Senators on this side bear the responsibility attaching to those representing the responsible majority.

I do not know when or where we can better begin than now. This large expenditure is not absolutely essential. I have as much regard for the Department of Justice as has my friend from Virginia. I should love to see that department have a beautiful home. I would love to see such a building in Washington. But the Department of Labor is also without a permanent abiding place. That department is renting, as the Department of Justice is renting, and perhaps others are also renting. That has been going on for a long time.

Mr. NELSON. Mr. President, will the Senator yield to me?

Mr. STONE. Certainly.

Mr. NELSON. I want to say that this bill never ought to pass. The Department of Justice building, which will include the Supreme Court and the Law Library, ought to be up here within the reach of Congress. The Department of Justice building ought to be here on Capitol Hill, right across from the Congressional Library. Senators have occasion time and again to go and consult the Law Library. We have occasion oftentimes to go before the Supreme Court and move the admission or our friends to the bar, and we have occasion to look up the decisions of the court. Now, why make the judges, and why make us, travel down to the lower end of Pennsylvania Avenue?

Mr. STONE. The Senator in charge of the bill has just stated that this building is not intended to be used by the Supreme Court. Possibly, he says, the Court of Claims and other inferior tribunals will assemble there and perform their duties in this building if constructed. He does not say that these inferior courts would use the building, but he says they might possibly.

Mr. NELSON. But they have ample room down here on Judiciary Square. There is a great big white building there. Is that to be pulled down, like the Department of Justice building, which formerly stood next to the Riggs Bank?

Mr. STONE. Mr. President, I am not disposed to enter upon that line of the argument. My one purpose is to impress, if I can, upon the minds of Senators on both sides of the Chamber, but particularly upon this side, since this is the majority side, the fact—and call that fact to their minds to reflect upon—that we are appropriating, and will be almost compelled to appropriate enormous sums of money, running into hundreds of millions, beyond the ordinary appropriations hitherto made by the Congress. It is a question of economy I am talking about. In view of this situation I insist, with such energy as I can, that common prudence, to say nothing of common sense, demands of us, especially those of us in the majority, that we strip out of our line of appropriations every measure that is not absolutely necessary and imperative for the immediate uses of the Government.

Mr. WILLIAMS. Mr. President, if the Senator will pardon an inquiry there, does he not believe that even if this building were imperatively and vitally necessary this amount of money is out of all proportion for the mere purpose of housing the Attorney General and his employees?

Three per cent upon $3,000,000 is $90,000 per annum. The upkeep at 1 per cent, which is a very low estimate, would amount to $30,000. There is $120,000 per annum that the Government would have to spend; and certainly we are not paying that amount now for rents for the Attorney General and his employees. So, if we are going to capitalize the rents, which is what we ought to try to do, we should also capitalize the expense the Government would incur if this building should be erected.

Mr. STONE. Mr. President, I have been impressed by what the Senator said—for it was in accord with my own thought—that $3,000,000 was very much in excess of the amount needed to construct a building adequate for the uses of the Department of Justice; and I am impressed by what he says about the comparative expense of renting quarters for the department and constructing a $3,000,000 building and maintaining it; although, of course, the cost of maintenance will apply in some proportion to rented property as well.

Mr. SWANSON. Mr. President, if the Senator will permit me, Congress authorized a competition for this building. The competition was held. Fifty thousand dollars was appropriated for plans. The plans were accepted. We have never made an appropriation to construct the building. The lots were bought years and years ago at this place for the Department of Justice. It is estimated that the building will cost about $3,000,000. There will be nothing spent which is unusual in the case of buildings of this kind. We have a commission of three persons—the President, the Attorney General, and the Secretary of the Treasury—who will have charge of this building, the plans, and the amount expended. This bill was prepared after consultation with these three departments and persons as to the kind of building they would like to have there.

I know you can construct an office building for a smaller sum than this; but as soon as an office building is constructed between Fourteenth and Fifteenth Streets on Pennsylvania Avenue opposite the Treasury Department—which is recognized as being the finest piece of art in Washington—as soon as an office building is constructed there without art, without beauty, and not in accord with the Treasury Building there will be universal condemnation for it. Now, I want the responsibility to rest with the Senate.

Mr. WILLIAMS. What did the Treasury Building cost?

Mr. SWANSON. I do not know what the Treasury Building cost.

These plans have been prepared. The amount of square feet necessary has been computed. They make an estimate of the space that is needed for the department and its growth in the future, and figure over what it will cost, and then an estimate is made, approximating about this sum.

I felt this way, if the Senator will permit me—I do not want to interrupt him: There has been complaint here all the time that we are paying six or seven hundred thousand dollars a year for rent. I, for one, think this Government ought not to pay rentals in Washington. In some places the rentals are extravagant. For the Department of Justice they are not extravagant. They only amount, I think, to forty or fifty thousand dollars, somewhere between those figures, and they have been housed for 10 years in the most wretched condition of any department of this Government.

Mr. STONE. Mr. President, we all understand that. The Senator merely enforces upon our attention a knowledge common to us all.

Mr. President, I would not have a structure put up at a point angling across from the Treasury Department—which, I agree with the Senator from Virginia, is the most artistic structure among the public buildings in Washington—that did not comport in architecture, style, and character with the Treasury Building. I would not wish this building, if constructed, to jar, so to speak, upon artistic taste, when men and women having artistic taste look upon both of them. I would not wish that. But I am not at all sure that what my friend from Minnesota [Mr. NELSON] said was not wisely said. We have discussed this question here before—that when we come to construct a building of this kind, it ought to house the Supreme Court, whose quarters here we know to be inadequate.

Mr. WILLIAMS. And the law library.

Mr. STONE. When I say "the Supreme Court" I mean everything connected with the Supreme Court.

Mr. SUTHERLAND. Mr. President, why does the Senator say that the quarters of the Supreme Court are inadequate? The court room is large enough to accommodate the court. Rooms have been set aside for the judges in this wing of the building, and the rooms that have been set aside have not been occupied by them, with the exception of one or two.

Mr. SWANSON. Mr. President, if the Senator will permit me——

Mr. STONE. I can not permit further interruption just now.

Mr. SWANSON. I simply wish to say that I think the Supreme Court is not desirous of moving. The members of it with whom I have consulted in reference to this matter are desirous of remaining where they are.

Mr. SUTHERLAND. That is my information about it.

Mr. SWANSON. That is my information. I approached some members of the court with a view of having it included. I think they desire to remain where they are.

Mr. STONE. Mr. President, I do not know as to that. I do know that if we or the court merely wish a little room where judges can assemble and hand down decisions, the present room will answer that purpose; but if we wish a place as big as a good country courthouse court room, where the people of the United States who come here and who would like to see the Supreme Court in session and witness its proceedings and learn something about this great tribunal, then they need better and larger accommodations. I have stood out here in the corridors day after day and seen hundreds of people lined up waiting to get into the court room just to see the Supreme Court of the United States in session. Ought the people not to have that privilege? Would it not be educational?

Mr. NELSON. Mr. President, if the Senator will allow me to make a suggestion, everybody who has been in the quarters knows that our Supreme Court library has utterly insufficient quarters. I never knew a law library to be cooped up in such miserable quarters as our Supreme Court library. We ought to have ample room for that library, so that it could be utilized by Congress and by the members of the bar.

Mr. STONE. Mr. President, the time is up and I must quit. But at this point, I wish to say that I understand the rental now paid for the buildings occupied by the Department of Justice is, in round numbers, only about $36,000 a year.

### EXECUTIVE SESSION.

The VICE PRESIDENT. The hour of 1 o'clock having arrived, in accordance with the unanimous-consent agreement heretofore entered into, the Senate will go into executive session. The Sergeant at Arms will clear the galleries and close the doors.

The Senate thereupon proceeded to the consideration of executive business. After 4 hours and 25 minutes spent in executive session the doors were reopened.

### PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had on this day approved and signed the act:

S. 4432. An act to amend section 8 of an act entitled "An act to supplement existing laws against unlawful restraints and monopolies, and for other purposes," approved October 15, 1914.

### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that, in accordance with the provisions of the concurrent resolution of the two Houses, the Speaker of the House had canceled his signature to the enrolled bill (H. R. 759) to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof.

### ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 562) to amend the act approved June 25, 1910, authorizing the Postal Savings System, and for other purposes, and it was thereupon signed by the Vice President.

### THE NEW AQUEDUCT BRIDGE.

The VICE PRESIDENT. The Chair announces the cancellation of his signature, in accordance with the concurrent resolution of the two Houses, to the enrolled bill (H. R. 759) to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof.

### NOMINATION OF GEORGE RUBLEE.

Mr. HOLLIS. Mr. President, I ask unanimous consent that the injunction of secrecy be removed from the vote on the confirmation of the nomination of George Rublee as a Federal trade commissioner and that the vote be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The vote was—yeas 36, nays 42, as follows:

YEAS—36.

| | | | |
|---|---|---|---|
| Ashurst | Johnson, Me. | Myers | Ransdell |
| Beckham | Johnson, S. Dak. | Newlands | Shafroth |
| Chilton | Kenyon | Norris | Sheppard |
| Clapp | Kern | Overman | Simmons |
| Culberson | La Follette | Owen | Smith, Ariz. |
| Fletcher | Lane | Phelan | Stone |
| Hitchcock | Lea, Tenn. | Pittman | Thompson |
| Husting | Lee, Md. | Poindexter | Tillman |
| James | Lewis | Pomerene | Walsh |

NAYS—42.

| | | | |
|---|---|---|---|
| Bankhead | Dillingham | Martin, Va. | Smoot |
| Borah | du Pont | Martine, N. J. | Sterling |
| Brady | Fall | Nelson | Sutherland |
| Brandegee | Gallinger | O'Gorman | Underwood |
| Broussard | Gronna | Page | Vardaman |
| Catron | Harding | Reed | Wadsworth |
| Chamberlain | Hardwick | Saulsbury | Warren |
| Clark, Wyo. | Hollis | Sherman | Weeks |
| Clarke, Ark. | Lippitt | Smith, Ga. | Works |
| Colt | Lodge | Smith, Mich. | |
| Curtis | McLean | Smith, S. C. | |

On the vote on the confirmation of the nomination of George Rublee to be a Federal trade commissioner the following pairs were announced:

Mr. BRYAN with Mr. TOWNSEND;
Mr. ROBINSON with Mr. BURLEIGH;
Mr. SWANSON with Mr. OLIVER;
Mr. HUGHES with Mr. GOFF;
Mr. THOMAS with Mr. MCCUMBER;
Mr. WILLIAMS with Mr. PENROSE; and
Mr. SHIELDS with Mr. JONES.

Mr. KERN. I move that the Senate adjourn.

The motion was agreed to; and (at 5 o'clock and 28 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, May 16, 1916, at 12 o'clock meridian.

## NOMINATIONS.

*Executive nominations received by the Senate May 15, 1916.*

APPOINTMENT IN THE ARMY.

CHAPLAIN.

Rev. John Granville Breden, of Illinois, to be chaplain with the rank of first lieutenant from May 3, 1916, vice Chaplain Michael G. Doran, Tenth Infantry, resigned April 14, 1915.

PUBLIC HEALTH SERVICE.

Asst. Surg. Charles L. Williams to be passed assistant surgeon in the Public Health Service, to rank as such from May 23, 1916. This officer has served the required time in his present grade and has passed the necessary examination for promotion.

POSTMASTERS.

ARIZONA.

Milville C. Hankins to be postmaster at Douglas, Ariz., in place of Fred E. Cadwell. Incumbent's commission expires June 7, 1916.

Hugh E. Laird, to be postmaster at Tempe, Ariz., in place of James W. Woolf, resigned.

CALIFORNIA.

Charles F. Evers to be postmaster at Fortuna, Cal., in place of Charles E. Tucker. Incumbent's commission expired March 21, 1916.

FLORIDA.

T. J. Hammond to be postmaster at Hawthorn, Fla., in place of W. H. Berkstresser. Incumbent's commission expired April 25, 1916.

GEORGIA.

T. B. Banks to be postmaster at Grantville, Ga., in place of C. D. O'Kelly. Incumbent's commission expires June 7, 1916.

J. Frank Stovall to be postmaster at Madison, Ga., in place of James F. Boughton. Incumbent's commission expires June 14, 1916.

IOWA.

Arthur A. Dingman to be postmaster at Aurelia, Iowa, in place of William C. Marsh. Incumbent's commission expires June 14, 1916.

KANSAS.

Alexander Burgess to be postmaster at Mulvane, Kans., in place of T. C. Conklin. Incumbent's commission expires June 5, 1916.

LOUISIANA.

J. A. Melton to be postmaster at Coushatta, La., in place of Robert A. Giddens. Incumbent's commission expires June 12, 1916.

Albert Nunez to be postmaster at Arabi, La., in place of Alexander Latil. Incumbent's commission expired December 18, 1915.

Lou E. Russell to be postmaster at West Monroe, La., in place of Lou E. Russell. Incumbent's commission expires June 12, 1916.

MAINE.

Harry E. Roberts to be postmaster at Kittery Point, Me., in place of Edgar M. Frisbee, deceased.

MASSACHUSETTS.

Charles W. Swift to be postmaster at Yarmouth Port, Mass., in place of Elmer W. Hallett, deceased.

MICHIGAN.

R. W. Doyle to be postmaster at Merrill, Mich., in place of Charles E. Johnston, resigned.

Walter G. Fogel to be postmaster at Pittsford, Mich., in place of Charles N. Spear. Incumbent's commission expires June 5, 1916.

C. W. Hartwell to be postmaster at Reading, Mich., in place of E. C. Corbett. Incumbent's commission expires June 5, 1916.

MINNESOTA.

John Engebretson to be postmaster at Elbow Lake, Minn., in place of Oscar T. Stromme, resigned.

Edward L. Wurst to be postmaster at Richmond, Minn. Office became presidential January 1, 1916.

MISSISSIPPI.

Andrew J. Darden to be postmaster at Centerville, Miss., in place of Andrew J. Darden. Incumbent's commission expires June 12, 1916.

George C. Gunn to be postmaster at Agricultural College, Miss., in place of L. M. Joyner. Incumbent's commission expires May 28, 1916.

Kirk M. Heflin to be postmaster at Baldwyn, Miss., in place of Effie DuBerry. Incumbent's commission expired May 10, 1916.

MISSOURI.

Thomas F. Benson to be postmaster at Sturgeon, Mo., in place of Roy C. Barnes, resigned.

Hefner F. Hoover to be postmaster at Hardin, Mo., in place of William H. Howe. Incumbent's commission expires June 5, 1916.

NEW HAMPSHIRE.

Elmer T. Ford to be postmaster at Hanover, N. H., in place of H. E. Hurlbutt. Incumbent's commission expired February 13, 1916.

Frank L. Marston to be postmaster at Conway, N. H., in place of Albert H. McLain, declined.

NEW JERSEY.

Richard M. Crawford to be postmaster at Westville, N. J., in place of Daniel M. Fox, resigned.

James D. Moriarty to be postmaster at Orange, N. J., in place of Edward S. Perry. Incumbent's commission expired December 11, 1915.

Sol Needles to be postmaster at Cape May, N. J., in place of James E. Taylor. Incumbent's commission expired January 11, 1916.

NEW YORK.

Lewis O. Davis to be postmaster at Port Jefferson, N. Y., in place of John M. Brown, resigned.

Richard J. Gilmer to be postmaster at Kings Park, N. Y., in place of Patrick H. Lyons, deceased.

Richard F. Hayes to be postmaster at Ticonderoga, N. Y., in place of Albert Weed. Incumbent's commission expires May 24, 1916.

Florence L. Johnson to be postmaster at Elmsford, N. Y., in place of Florence L. Johnson. Incumbent's commission expired December 18, 1915.

John Lemmon to be postmaster at Churchville, N. Y., in place of J. A. C. Knapp, removed.

Timothy D. Mulcahy to be postmaster at Lawrence, N. Y., in place of J. E. Morgan Dodge, resigned.

L. G. Quackenbush to be postmaster at Oneida, N. Y., in place of Jay Farrier. Incumbent's commission expired February 1, 1915.

Benjamin B. Tooker to be postmaster at Center Moriches, N. Y., in place of E. S. Robinson. Incumbent's commission expires May 24, 1916.

Frederick M. Welsh to be postmaster at Patchogue,, N. Y., in place of John T. Dare. Incumbent's commission expired April 23, 1916.

Wilber W. Wilcox to be postmaster at Lacona, N. Y., in place of Peter G. Hydorn. Incumbent's commission expires May 24, 1916.

OHIO.

Fred H. Hart to be postmaster at Beverly, Ohio, in place of Samuel Bailey. Incumbent's commission expires June 12, 1916.

D. A. Muskoff to be postmaster at Navarre, Ohio, in place of H. A. Shafer. Incumbent's commission expires June 12, 1916.

Augustus S. Tuttle to be postmaster at Creston, Ohio, in place of John McGuff. Incumbent's commission expires June 12, 1916.

OKLAHOMA.

H. A. Seaton to be postmaster at Mooreland, Okla., in place of Omer Schnoebelen, resigned.

PENNSYLVANIA.

E. R. Criss to be postmaster at New Kensington, Pa., in place of A. M. Frederick. Incumbent's commission expired April 2, 1916.

Henry M. Good to be postmaster at New Castle, Pa., in place of David A. Moore. Incumbent's commission expires June 14, 1916.

SOUTH DAKOTA.

D. C. Campbell to be postmaster at Wolsey, S. Dak., in place of Harry E. Barnes. Incumbent's commission expired February 14, 1916.

G. A. Miller to be postmaster at Conde, S. Dak., in place of Albert Lewis, removed.

Frank E. Riley to be postmaster at Dupree, S. Dak., in place of James D. Stewart. Incumbent's commission expires June 14, 1916.

VIRGINIA.

Nannie B. Campbell to be postmaster at Amherst, Va., in place of C. M. Campbell, resigned.

Samuel R. Gault to be postmaster at Scottsville, Va., in place of Samuel R. Gault. Incumbent's commission expires June 12, 1916.

WISCONSIN.

Christian F. A. Mau to be postmaster at West Salem, Wis., in place of William A. Bradley. Incumbent's commission expired January 15, 1916.

Frank E. Poll to be postmaster at Almond, Wis., in place of W. F. Prochnow. Incumbent's commission expired April 17, 1916.

Henry B. Taylor to be postmaster at Iola, Wis., in place of Buck Williams. Incumbent's commission expired February 6, 1916.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate May 15, 1916.*

UNITED STATES DISTRICT JUDGE.

J. Warren Davis to be United States district judge for the district of New Jersey.

REGISTERS OF LAND OFFICES.

John L. Wiley to be register of the land office at Spokane, Wash.

William H. Canon to be register of the land office at Roseburg, Oreg.

PROMOTIONS IN THE NAVY.

The following named to be lieutenants:

Earle F. Johnson.
Henry K. Hewitt.
Felix X. Gygax.
Guy E. Davis.
Weyman P. Beehler.
Lemuel M. Stevens.
Joseph S. Evans.
John W. W. Cumming.
Charles R. Clark.
Roy LeC. Stover.
Chester H. J. Keppler.
Charles A. Dunn.
John W. Lewis.
James J. Manning.
Charles G. Davy.
Louis H. Maxfield.
Raymond F. Frellsen.
Alfred W. Atkins.
Philip H. Hammond.
Claud A. Jones.
Harry Campbell.
George W. Kenyon.
Allan S. Farquhar.
Lucien F. Kimball.
Harvey W. McCormack.
Harold M. Bemis.
Ernest D. McWhorter.
John M. Schelling.
Bert B. Taylor.
William O. Wallace.
Frank R. King.
Bruce R. Ware, jr.
Carl T. Osburn.
William S. Farber.
Archibald D. Turnbull.
Harry J. Abbett.
George McC. Courts.
Charles W. Crosse.
Lieut. (Junior Grade) Albert M. Cohen.
Lieut. (Junior Grade) Emil A. Lichtenstein.
Lieut. (Junior Grade) George M. Ravenscroft.
Lieut. (Junior Grade) Arie A. Corwin.

Assistant Paymaster Oscar W. Leidel to be a passed assistant paymaster.

Assistant Paymaster John H. Colhoun to be a passed assistant paymaster.

Ensign Herbert A. Ellis to be a lieutenant (junior grade).

Ensign Robert E. P. Elmer to be a lieutenant (junior grade).

Ensign Joseph E. Austin to be a lieutenant (junior grade).

POSTMASTERS.

ALABAMA.

J. F. Manley, Citronelle.

CALIFORNIA.

Sarah B. Anthony, Williams.
John B. Barnard, Niles.
Joseph Charles Beard, Burlingame.
John F. Conkey, Santa Maria.
Daniel McSweeney, South San Francisco.
Isidore J. Proulx, Willows (late Willow).

IDAHO.

Christopher O. Dice, Glenns Ferry.
M. P. Strecker, Stites.

ILLINOIS.

Eli Preston Sanders, Pawnee.
James E. Simpson, Collinsville.
Thomas P. McCann, Oglesby.

INDIANA.

Guy C. Hart, Kendallville.
Elmer Ritter, Fremont.
J. Ross Robertson, Brownstown.

KENTUCKY.

J. B. Stears, Nicholasville.

LOUISIANA.

George H. Thoede, Gretna.

MISSISSIPPI.

Harry L. Callicott, Coldwater.
Malcolm S. Graham, Forest.
Bennett A. Truly, Fayette.
Martha Ann Womack, Bogue Chitto.

NEBRASKA.

Calvin L. Demarest, Bethany.
George McCawley, Seneca.

NEW JERSEY.

S. L. Boone, Penns Grove.

NEW YORK.

Thomas Havey, Orangeburg.
Thomas McMahon, Poland.
Mary L. McRoberts, Tompkinsville.
Henry J. Neumann, Tuxedo Park.

NORTH CAROLINA.

Bettie Belle Pearson, Moravian Falls.

NORTH DAKOTA.

F. O. Hunger, Hankinson.

OHIO.

John L. Norris, New Matamoras.

PENNSYLVANIA.

Frederic J. Dahlen, Belleville.
George W. Lutz, Ambler.

SOUTH CAROLINA.

George L. Hardy, Johnston.

VIRGINIA.

Samuel R. Gault, Scottsville.
Joseph H. Nave, Broadway.

WEST VIRGINIA.

J. H. Long, Huntington.

## REJECTIONS.

*Executive nominations rejected by the Senate May 15, 1916.*

POSTMASTER.

Hugh C. Dever to be postmaster at South Glens Falls, N. Y.

FEDERAL TRADE COMMISSIONER.

George Rublee, of New Hampshire, to be a Federal trade commissioner.

## HOUSE OF REPRESENTATIVES.

MONDAY, *May 15, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father in heaven, we lift up our hearts unto Thee, from whom cometh all wisdom, power, and goodness. Impart unto us plenteously of these gifts, that we may be wise to comprehend, strong to act in accordance with our highest convictions. Fill our hearts with love and good will to all men, that we may do unto others as we would be done by, and so fulfill the law and the prophets, to the honor and glory of Thy holy name. In the spirit of the Lord Jesus Christ. Amen.

The Journal of the proceedings of Saturday, May 13, 1916, was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the amendments of the House of Representatives to the bill (S. 5221) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

RURAL CREDITS.

The SPEAKER. The House automatically resolves itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2986, the rural-credits bill, with the gentleman from Texas [Mr. GARNER] in the chair.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill S. 2986, the rural-credits bill, with Mr. GARNER in the chair.

The CHAIRMAN. The Clerk will report the bill by title.

The Clerk read as follows:

A bill (S. 2986) to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositaries and financial agents for the United States, and for other purposes.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas [Mr. DAVIS].

Mr. GLASS. Mr. Chairman, I would like to inquire how much time remains.

The CHAIRMAN. Fifteen minutes' more debate on this section and all amendments thereto. The question is on agreeing to the amendment offered by the gentleman from Texas [Mr. DAVIS].

The question was taken, and the amendment was rejected.

Mr. DAVIS of Texas. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is asked for.

The committee divided; and there were—ayes 6, noes 26.

So the amendment was rejected.

Mr. SMITH of Texas. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SMITH of Texas: On page 106, in line 6, add a paragraph to section 13, to read as follows:

"Ninth. To accept time deposits, as defined by the Federal reserve act, subject to the same reserve requirements as therein provided, and to pay interest on the same."

Mr. SMITH of Texas. Mr. Chairman, I believe this amendment ought to be adopted. By this bill we are creating Federal land banks, into which we hope and expect to gather a large amount of the investment funds of the country to be loaned to farmers at low rates of interest, and yet we have denied to them the right to receive time deposits—the source from which investment bankers usually get their investment funds. I can see no good reason why this is so unless it is out of deference to the wishes of existing investment bankers and of commercial bankers who enjoy this privilege and who largely, contrary to the purposes of their creation, are engaged in investment banking. The records of the Comptroller of the Currency will show that the national banks of this country alone are carrying more than a billion and a half dollars of time deposits which they have invested in stocks and bonds of various kinds, notwithstanding the fact that their function is to serve the commercial interests of the country through the handling of liquid capital and not to carry on an investment banking business.

However, it is not the purpose of this amendment to deprive the commercial banks of the right to receive time deposits. It is only to give the land banks the same privilege. If adopted, I believe it will result in placing much ready money within the reach of the farmer borrowers, that it will tend to reduce the rate of interest to them, and that it will strengthen the Federal land banks and promote their success from the beginning.

What objection can there be to this amendment? Would it weaken the banks in any respect or impair the solidity of their bonds in the least? Not at all. It is absurd and ridiculous to say that deposits have ever impaired the strength of a bank or weakened any of its obligations. It is true deposits add to the liability of banks, but they also add equally to the banks' resources and increase confidence in their strength, solidity, and obligations. While the committee has brought in a splendid bill, in my judgment the adoption of this amendment would greatly improve it, and I trust it will be favorably acted upon.

Now, Mr. Chairman, before I take my seat let me make some observations with regard to this proposed legislation and point out some of its best features. The time at my disposal will not permit a discussion of the details of the bill.

First. It provides legal processes through which lands as security may be marshaled and mobilized so as to attract investment capital and place it within the reach of farmers at a low rate of interest and on long time. The interest rate can not run higher than 6 per cent per annum, and the most expert opinion is that it will very likely run lower after the system is in operation.

It provides that loans may run from 5 to 36 years and be made payable under the amortization plan of payment. In explanation of what this plan is, let me here read from the report of the committee:

Under this plan a definite installment is paid regularly by the borrower, semiannually or annually, as the case may be. This installment includes the interest charge, the expense charge, and also an additional payment on principal larger or smaller in accordance with the length of the period for which the mortgage runs. The installment does not vary in amount, but remains equal during the term of the mortgage. As the principal is reduced by the application of the amortizement to the reduction of principal, a constantly greater portion of the installment is applied to the extinguishment of principal.

Some conception of what may be accomplished through a low interest rate, secured from the operation of the rural-credit system, in combination with the amortization principle, may be obtained from a consideration of the following calculation:

The general average farm-mortgage interest rate has been conservatively estimated at 7.5 per cent. It has furthermore been estimated that the total farm-mortgage indebtedness of the Nation approximates $4,000,000,000. Accepting these estimates, the annual interest charge will equal $300,000,000 annually, with no reduction of principal.

If this indebtedness could be refunded under the provisions of this bill at a rate of 5 per cent per annum, and the farmers would engage to pay annually $300,000,000—the same sum as is now being paid for interest alone—the entire debt, principal and interest, would be paid in 22 years and 6 months. This would mean a net saving of more than $175,000,000 per annum. It would mean the extinguishment of the entire existing farm-mortgage debt by the operation of the system provided for in the bill in 22 years and 6 months, without increasing the annual payment over that now made to meet interest charges alone.

Secondly, it will give the farmers of the country an exclusive financial system of their own. Loans are to be made to farmers only, and the borrowers are to be the exclusive owners of the capital stock. So profit-seeking persons and concerns are completely debarred from ever acquiring any interest in the system. It is controlled by the borrowers themselves under the general supervision of a board of three members, appointed by the President by and with the advice and consent of the Senate, whose salaries are paid out of the public Treasury and not out of the profits of the system.

It may be pertinently asked how the system is to be started if the stock of the banks is to be owned exclusively by the borrowers. It seems anomalous to say that persons who need money can borrow it from themselves. The answer is the system is started by Government aid. The capital of the 12 Federal land banks, which is fixed at $750,000 each, is, to start

with, advanced by the Government if same is not subscribed for within 90 days. Thus we will have $9,000,000 as capital at the beginning, and borrowers thereafter are required to take stock to the amount of 5 per cent of the loans they secure upon their mortgages, and if they so desire the stock thus taken by them may be retained out of their loans. Provision is made for the gradual retirement of all the original stock. No dividends are paid on the stock held by the Government. The intention of the framers of the bill, as I have already said, is for the borrowers to own the system, to secure loans at a minimum cost, but should profits accrue they are to be paid back to the borrowers in the nature of dividends; and the provisions of the bill are such as to gradually effect such a system.

Thirdly, the chief object of the bill is to enable farmers to own their own homes and make them productive. It is for real farmers—those who are actually engaged in farming or who desire to engage in that occupation; for the man who wants to pay for or improve the farm that he already owns, or who wants to acquire a farm if he does not already own one.

Mr. Chairman, there are more than 200,000 tenant farmers in my State, and the number is increasing yearly. It is an alarming situation and I believe this bill will go a long way toward correcting it. It is not pretended that it will enable every man engaged in farming to acquire a home any more than it could be contended that every man of any other occupation and calling may be able, under any other system, to acquire a home. We can legislate for the average man—the man who is industrious and provident and who earnestly strives to help himself. Those of us who have been most anxious to help the landless man without means have earnestly endeavored to find some way to place the benefits of this measure within his easy reach; but it is difficult to place money and credit at the command of any person who has absolutely no margin of security. However, I believe this measure may prove a Godsend to many such men. Under this system loans may be secured to the amount of 60 per cent of the value of the land, and I have no doubt many honest, industrious, worthy men—in fact, a large majority of them—will, through the aid of friends or second mortgages or personal savings, be able to take care of the other 40 per cent. Those worthy farmers who may be unable to acquire farms under this measure, and I hope they may be few, will require additional legislation. It will be necessary for further governmental aid to be extended to them, as is done in many other countries, and I want to say here, where the widest publicity is given to my utterances, that I for one stand ready, in every constitutional way, to extend such aid. Measures are now pending in this Congress looking to that end.

Mr. Chairman, this legislation will infuse a new hope, a new vigor, and greater energy into the agricultural life of this country. It is greatly belated—it ought to have been passed long ago. We have lagged behind many of the other great nations of the world in this matter, but I am glad to feel and realize that the country has at last awakened to the needs and importance of this great basic industry. Coming as it does in this administration in its first term, this legislation gives further proof of the loyalty and devotion of the Democratic Party to the needs of the masses.

I do not mean to imply that nothing heretofore has been done by Congress for the farming interests of this country. On the contrary, I want to say that much has been and is being done, both in a special and general way. The great Agricultural Department has been created and maintained. Its educational and scientific work is of tremendous value in the preparation and cultivation of the soil, in the improvement and sanitation of live stock, in the eradication and prevention of destructive pests and disease, in the propagation and improvement of plant life, in farm and home economics, in marketing, and in many other ways.

Much benefit has also come to the farmer from the establishment of rural free delivery of mail and from the parcel post, and he will be greatly advantaged by the inauguration of the licensed warehouse system which has been provided for in a bill which has recently been passed in this body, and by the improvement of the country highways, which we will very likely set on foot before this session closes, and by many other acts of legislation. But the bill we now have under consideration will, in my opinion, tower above them all, for it will mean less land tenantry and more and better rural homes for the people. And homes mean more independence, more prosperity, more patriotism, and more happiness. The best citizen in this country to-day is the farmer who owns his own home and cultivates his own land—who gathers his family around his own fireside after the day's work is done and with his good wife teaches their boys and girls the principles of patriotism and Christianity and molds them into good and useful men and women.

Life on the farm is a wholesome life, and boys and girls raised there, away from the temptations and unnatural environments of the cities, constitute the bulwark of our Government and the pillars of our churches. Unfortunate is the boy or the girl who has never enjoyed the blessings of a country home. Not for all the honors and wealth of this world would I exchange the sweet memories of my old country home in eastern Texas, where my father and mother enjoyed the simple life, reared their children in the fear of God, and happily lived and died with the consciousness that they had tried to do their duty toward God and man. The training I there received, the principles there instilled into my life, have been worth more to me than would have been the riches of a Carnegie or a Rockefeller. It is not strange, then, that I feel an unusual amount of enthusiasm for this bill. I hope it will accomplish all that we expect of it and more for the farmers of this country. We are talking much about "preparedness." We are reorganizing our land and naval forces, but, in my judgment, the best preparedness we can have—that any nation can have—is a happy, contented, patriotic, and independent people, who feel that their Government is fair and just, and who possess the strength of character and feel the sovereign power which nothing gives to such a degree as the ownership of the soil.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Texas [Mr. SMITH].

Mr. PHELAN. Mr. Chairman, the suggestion that the gentleman makes is too important, perhaps, to pass unnoticed. The joint committee which sat between the Sixty-third and Sixty-fourth Congresses considered that matter very carefully. Some of the members of that committee were desirous of having savings deposits taken by these banks, and attempted to devise some system which would operate and which would be safe.

But we are met with these difficulties: In the first place, we had considerable difficulty in devising a system which would put sufficient capital behind these land banks to satisfy the prospective bondholder that everything would be safe. The man that buys the bonds has the mortgage, of course, as security, but something else is necessary also as a guaranty or as capital. As the bill is written, it is none too great. I think it is safe, but it is none too great. It amounts to at least 5 per cent of the amount of outstanding mortgages and probably a little more than 5 per cent of the outstanding bonds.

If we take these deposits we must make the banks responsible to the depositors therefor. If there should be some misjudgment in the investment of the deposits, or something of that sort, and the bank gets into difficulty, the man who has the first chance to come at the capital in that bank is not the man who buys the bonds, but the depositor, because his demand is a demand which must be met in 30 or 60 days, whatever it may be, whereas the man who buys the bond may not be enabled to make the demand for a longer time, perhaps 30 years. The funds in largest volume for loans to the farmer will come not from the savings deposits but from the bonds. Every member of the committee finally came to the conclusion that it would be making more doubtful the security behind the bonds if we allowed the banks to take the savings deposits, and therefore it would make the men who bought the bonds feel that they were not quite so safe if a large number of depositors would have the chance to come in ahead of them in case anything went wrong with the bank.

For that reason we tried another proposition which was suggested. In certain sections of the country—in New England in particular—we have a great many mutual savings banks, where the depositors get together and run their own banks without any capital whatever. We tried to put a provision into the bill whereby this could be done under this bill. At one time we had in the bill a provision to the effect that the capital of the bank would not be responsible to the savings depositor; that the bank could take the deposits and use them, but the bank would not be responsible, except in a most limited way. Inasmuch as the directors of these banks would be running the banks not for the savings depositors but would be administering the affairs of the banks in the interest of the borrowers, we thought it was an unsound and unsafe proposition to permit them to take the deposits from savings depositors and use those deposits.

If you could devise a system whereby depositors could run their own bank, that proposition might be safe. But when you are putting into a system a plan wherein the first object of the bank's directors is to represent the borrower, and when you let those directors handle the deposits without any liability upon the capital of the bank for those deposits, you are hardly establishing a sound system. As a result, we did not put the savings deposits feature into the bill at all.

Mr. SMITH of Texas. Will the gentleman yield?

Mr. PHELAN. Yes.

Mr. SMITH of Texas. I will suggest that I do not see that it is necessary to give depositors any preference representing the capital stock of the bank over the bondholders.

Mr. PHELAN. They will have it anyway.

Mr. SMITH of Texas. There is nothing in the bill that provides for it, and I see no reason why the deposits could not be invested in the bonds when received, the bonds being held as security.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. SMITH].

The question was taken; and on a division (demanded by Mr. SMITH of Texas) there were 10 ayes and 57 noes.

So the amendment was rejected.

Mr. DILLON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 105, line 20, after the word "appraisal" strike out the following words: "and determination of title."

Mr. DILLON. Mr. Chairman, I would like the attention of the committee with reference to my amendment striking out these words. Do the words "and determination of the title" include reasonable attorney fees?

Mr. MOSS of Indiana. It is not intended that it shall include attorney fees because of the fact that under the provisions of the bill the farm-loan board employ their own attorneys, who are paid out of the Treasury of the United States.

Mr. DILLON. It would seem to me from the language used that it would include reasonable attorney fees. I call attention to the phraseology—

To charge borrowers under rules and regulations promulgated by the Federal farm-loan board reasonable fees not exceeding actual cost of appraisal and determination of title.

Mr. MOSS of Indiana. That language was put in for the purpose of giving the boards power to say whether the expenses which are ordinarily paid by the individual borrower shall be paid exclusively by the borrower, or whether they shall be paid by the bank, or whether they shall part be paid by the bank and part by the borrower. For instance, it would give them the power to make small loans, say of $100, because the land banks could bear a portion of the expense of negotiating the loan.

Mr. DILLON. It seems to me, however, that the words "reasonable fee for determination of title" must include examination of abstracts. My motion seeks to eliminate that language. I think it is susceptible of that interpretation. We ought not to have a clause in this bill that will allow the board to charge the borrower a reasonable attorney fee for the examination of the abstract, because it is an uncertain quantity. In one instance the attorney fee might be $5 and in another $250 for the same service. It seems to me the language ought to be eliminated.

Mr. MADDEN. Will the gentleman yield?

Mr. DILLON. Yes.

Mr. MADDEN. Does the gentleman believe that a man should have his abstract of title examined without cost to him?

Mr. DILLON. I think so.

Mr. MADDEN. Does the gentleman know of any case where that is done now?

Mr. DILLON. Yes. I will say to the gentleman that in my State there are about $27,000,000 loaned out by insurance companies in farm loans, and the insurance companies examine their own abstracts. It is done by their own attorneys without any charge to the borrower.

Mr. MADDEN. How much commission do they charge?

Mr. DILLON. They are loaning, I think, at about 5½ per cent on the average.

Mr. MADDEN. Yes; but they get a commission besides that, do they not?

Mr. DILLON. No; that includes the commission.

Mr. MADDEN. I suppose a half per cent would pay for the examination of the abstract.

Mr. DILLON. I will say further that I know of no loan companies in my State that charge the borrower for the examination of an abstract. It is the universal custom for the mortgagee to pay the attorney for the examination of all abstracts. This bill ought not to be left in this indefinite way.

Mr. MOSS of Indiana. They do, however, charge for getting up the abstract?

Mr. DILLON. Certainly. I will ask the chairman of the committee if he would have any objection to an express provision in the bill that no charge shall be made against the borrower for the examination of the abstract.

Mr. MOSS of Indiana. I am not going to speak entirely for the committee, but the committee believes, where it has a farm-loan board representing purely the public interests, and when that farm-loan board hires its own attorneys and have been given the power to make rules and regulations, we have given all the power that ought to go for the protection of the borrower in this system.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota.

The question was taken, and the amendment was rejected.

Mr. DILLON. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Page 106, line 6, at the end of the line, add the following: *Provided*, That no charge shall be made to the borrower for attorney's fees for the examination of abstracts.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. DILLON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 106, line 6, after the word "twelve," insert a new paragraph, as follows:

"That whenever any Federal land bank, created under the provisions of this act, shall make application, through the Federal farm-loan board, for Federal reserve notes, and shall tender or deposit with the Federal reserve agent approved security, and shall in each and every particular comply with each and every provision of the act entitled 'An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes,' approved December 23, 1913, then the Federal Reserve Board may permit the issue of Federal reserve notes to the Federal land bank under the provisions of the last-mentioned act, which notes shall be redeemed in the mode and manner as provided in said act."

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota.

The question was taken, and the amendment was rejected.

Mr. HOWARD. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 106, after line 6, insert as a new paragraph, 9, the following: "That the postal savings-bank commission shall have power to invest 30 per cent of the funds in postal-savings banks in the bonds of the Federal land banks, to be prorated according to the amount of bonds issued by said Federal land banks."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. HOWARD. Mr. Chairman, I would like to consume about a couple of minutes.

The CHAIRMAN. The Chair will state to the gentleman that only one minute remains.

Mr. HOWARD. Mr. Chairman, I did not know that just one minute remained for debate on this proposition. Nearly all of the bills prior to this particular bill contemplated the investment of 30 or more per cent of the postal savings of the country in these bonds. I believe this provision, if adopted, will have a tendency to stabilize the bonds of these land banks by permitting the Government to invest 30 per cent of the postal savings, which is a safe margin to permit them to invest in these bonds. I believe if this provision is carried in this bill that at no time will the bonds of the several land banks provided for under this bill sell below par in the open market, and I believe it will have a most wholesome effect in stabilizing the price of the bonds. As a matter of fact, it will be the safest and most secure method of investing this portion of our postal savings. The postal savings come from a class of people who are in sympathy with the farmers, and they would feel safe if their money was invested in this character of security, which is just as safe and sound as any other security in which the general savings banks of the country are authorized by the law of the several States of the Union to now invest their funds.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. HOWARD) there were—ayes 26, noes 43.

So the amendment was rejected.

Mr. TAYLOR of Colorado. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 106, at the end of line 6, insert the following:

"Any lien reserved to or for the benefit of the United States to secure payment under the reclamation act of June 17, 1902, or acts amendatory thereof or supplementary thereto, shall not be held to prevent a loan under this act: *Provided*, That 50 per cent of the construction charge for such lands has been paid."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado.

Mr. TAYLOR of Colorado. Mr. Chairman——

The CHAIRMAN. All debate on this section and all amendments thereto is exhausted.

Mr. TAYLOR of Colorado. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. TAYLOR of Colorado. We are at the end of section 13, are we not?

The CHAIRMAN. Yes.

Mr. TAYLOR of Colorado. Can I withdraw the amendment and offer it as an amendment to section 14?

The CHAIRMAN. Does the gentleman withdraw his amendment?

Mr. TAYLOR of Colorado. I am making an inquiry. My inquiry is whether or not I could offer it as an amendment to section 14 and not have it ruled out on a point of order? Is it any less in order then than now?

The CHAIRMAN. The Chair will state to the gentleman from Colorado that we are at the end of section 13 and that all debate on the section and amendments thereto has been exhausted. Does the gentleman desire to withdraw his amendment in order to offer it to section 14 when it is read?

Mr. TAYLOR of Colorado. Yes.

Mr. KEATING. Mr. Chairman, I ask unanimous consent that the gentleman from Colorado be given five minutes in which to state his proposition.

The CHAIRMAN. The gentleman from Colorado asks unanimous consent that his colleague may have five minutes in which to discuss his amendment. Is there objection?

Mr. MANN. Mr. Chairman, I think there ought to be a chance for five minutes on the other side.

Mr. KEATING. Mr. Chairman, I will make it 10 minutes—5 minutes for the affirmative and 5 in the negative.

The CHAIRMAN. The gentleman from Colorado asks unanimous consent that 10 minutes may be had for debate on the amendment offered by his colleague. Is there objection?

Mr. GLASS. I understood that the gentleman had withdrawn his amendment.

Mr. TAYLOR of Colorado. I prefer to introduce it later on.

Mr. GLASS. I would rather the gentleman would make his remarks when his amendment is before the committee. The gentleman may as well offer his amendment to this section, because I do not think it is germane to the next section.

Mr. TAYLOR of Colorado. That is what I would rather do.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. RAKER. Mr. Chairman, I ask unanimous consent that the time be extended 15 minutes.

The CHAIRMAN. Is there objection?

Mr. GLASS. I object to that.

The CHAIRMAN. Unanimous consent has been granted for 10 minutes.

Mr. CANNON. Mr. Chairman, I ask unanimous consent that the amendment be again reported.

The CHAIRMAN. Without objection, the Clerk will again report the amendment offered by the gentleman from Colorado.

There was no objection, and the Clerk again reported the amendment offered by the gentleman from Colorado.

Mr. TAYLOR of Colorado. Mr. Chairman, the object of the amendment I have offered is to allow, under certain conditions, the owners of lands under the 32 Government irrigation reclamation projects to avail themselves of the provisions of this law. At the present time these Government reclamation projects throughout the West include over 3,000,000 acres of irrigable lands. The land is not all now under irrigation, but about one-half of it is and the greater part of the rest of it will be when these projects are completed. Under the existing bill none of the 60,000 farms under those reclamation projects can ever borrow any money or get a particle of benefit under this law. I believe that after a man has put, say, $50 an acre in improvements upon his land, and after he has paid the Government one-half of all the Government construction charges on the land, he ought to be permitted to borrow some money upon his land, the amount depending upon the circumstances of each case; that is, the value of this land and improvements and the amount of the Government charges.

Mr. SHOUSE. Mr. Chairman, what is the attitude of the Department of the Interior toward the gentleman's amendment?

Mr. TAYLOR of Colorado. I have no authority to speak for the Secretary of the Interior, and I do not think the department has ever made any official report on this provision, but I am confident that the reclamation officials themselves personally and unofficially feel very favorably toward some legislation of this kind. After a man who has paid the Government one-half of all the charges and has made the required improvements, he certainly has a very substantial property right and a basis of credit that, it seems to me, would entitle him to a loan of some money that would be of great benefit to him and also be a benefit to the Government. He would be the sooner enabled to pay off the Government lien.

Mr. MANN. Will the gentleman yield for a question?

Mr. TAYLOR of Colorado. Certainly.

Mr. MANN. Why can not you loan under this and pay off the balance of the construction charges with it?

Mr. TAYLOR of Colorado. Because, as I understand it, the Government lien for the construction and maintenance charges and the general supervisory governmental control would prevent a settler from ever for 20 years borrowing any money under the terms of this bill, while his neighbor across the road outside of the project can borrow money at 5 per cent.

Mr. MANN. He could pay it off at any time.

Mr. TAYLOR of Colorado. I think the Government's lien and control is such that this law will not apply to the settlers under these reclamation projects.

Mr. MANN. He would not be affected by this; there is a lien for taxes, but that has nothing to do with the title.

Mr. TAYLOR of Colorado. I doubt very much whether he can borrow money under this.

Mr. MANN. Certainly he could; there is not a particle of question about it.

Mr. TAYLOR of Colorado. Well, there is nothing in this bill indicating or authorizing it. It seems to me a man has to have an absolute clear title before he can borrow any money at all.

Mr. MANN. There is no more lien on the property for maintenance charges than on everybody's property for taxes.

Mr. TAYLOR of Colorado. Even if the gentleman is correct, I doubt very much whether the average settler could borrow enough money under the provisions of this bill to pay off the Government of the United States. For instance, suppose the Government lien on the land for construction charges is $100 an acre. No Federal land bank would loan him $100 an acre upon the land; and yet the land might be worth twice that much. But if the Government charge is $100 an acre, and he has paid off $50 an acre, and made valuable improvements, he might safely borrow, say, $25 an acre, or $10 an acre.

Mr. MANN. The gentleman wants the Government to take a second mortgage on a piece of property that is already mortgaged for more than it is worth.

Mr. TAYLOR of Colorado. There is no thought or intention of that kind. Besides, the first lien of the Government is different from a first lien of an individual or corporation.

Mr. STERLING. Will the gentleman yield?

Mr. TAYLOR of Colorado. Yes; certainly.

Mr. STERLING. Do they pay this assessment or interest now?

Mr. TAYLOR of Colorado. The settlers, under these irrigation projects, pay no interest now, except on overdue payments.

Mr. STERLING. Then you would not want to borrow money to pay interest on that.

Mr. TAYLOR of Colorado. Of course not. A farmer would not, if he could, want to borrow the entire amount of the Government's lien upon which he pays no interest and then pay the bank 5 or 6 per cent interest on the amount. But a man would often borrow some money and pay that rate of interest to put in crops and make improvements, if he could.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Illinois desire recognition against the amendment?

Mr. MADDEN. Yes, sir; and I would like to have the amendment again reported.

The amendment was again reported.

Mr. MADDEN. Mr. Chairman, we have already expended $100,000,000 on the reclamation projects. We have arranged to give the people who are living on the reclaimed land the right to pay for the land in 20 annual installments. We have allowed them to have this and without the payment of any interest. We have borrowed $21,000,000 in addition to the $100,000,000 we have expended for the purpose of carrying on these projects. We have expended money in the Yuma district, and that has all been lost, in connection with the development of the reclaimed land. We have to expend at least $75,000,000 more before the projects that are now under way are completed. Not a dollar of interest has been collected from anybody——

Mr. RAKER. Will the gentleman yield?

Mr. MADDEN. I can not yield. Not a dollar of interest has been collected from any settler on this land. The amount of Government aid given these few people——

Mr. RAKER. Will the gentleman yield in that connection?

Mr. MADDEN (continuing). Living in that section of the United States is greater than all the Government aid ever given to any people in all history before, and now, with this favorable condition prevailing in the arid regions of the United States, where

all the revenues from the sale of public lands are being converted to their benefit, gentlemen from that territory come in here and want advantages under this bill that are not given to anybody else.

Mr. HENRY. Will the gentleman yield?

Mr. MADDEN. I will yield to the gentleman.

Mr. HENRY. How does the gentleman think this amendment compares with the amendment I offered the other day?

Mr. MADDEN. The gentleman's amendment reminds me of a man who moved from Texas in the pioneer days and opened a bank in Denver, and all the people who had assembled around Denver made their deposits in his bank, but shortly after the bank was opened he failed. After the failure he called the depositors together and explained to them that there was none of their money left in the bank and that he had no assets to turn over to them. He said there was nothing he could do for them at all, except to offer himself as a sacrifice and that they could do with him what they pleased. There was one man in the audience who cried out when that statement was made, "Well, when you are cutting him up I speak for his gall." [Laughter and applause.] And I say to the gentleman from Colorado, that this amendment is unjustifiable, that the people living in the territory represented by him and by other gentlemen on the floor of this House, coming from that region of the United States, where we are reclaiming land, have had more favors granted by the Government of the United States at the expense of the Treasury than all the other people of the Nation combined.

The CHAIRMAN. The time of the gentleman has expired. The question is on the amendment offered by the gentleman from Colorado.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

RESTRICTIONS ON FEDERAL LAND BANKS.

SEC. 14. That no Federal land bank shall have power—

First. To accept deposits of current funds payable upon demand except from its own stockholders, or to transact any banking or other business not expressly authorized by the provisions of this act.

Second. To loan on first mortgage except through national farm-loan associations as provided in section 8 of this act, or through agents as provided in section 15.

Third. To accept any mortgages on real estate except first mortgages created subject to all limitations imposed by section 12.

Fourth. To issue or obligate itself for outstanding farm-loan bonds in excess of twenty times the amount of its capital or to receive from any national farm-loan association additional mortgages when the principal remaining unpaid upon mortgages already received from such association shall exceed twenty times the amount of its capital stock owned by such association.

Fifth. To demand or receive, under any form or pretense, any commission or charge not specifically authorized in this act.

Mr. SMITH of Minnesota. Mr. Chairman, if this bill remains in substantially the same form that it was when it came from the committee I shall vote for it. I do that not because my constituents have any special interest in it, but because I believe that it will be beneficial to the agricultural interests of the United States, especially those sections in which the rate of interest is high.

Interest rates are low in Minnesota and, therefore, there is not likely to be any demand in my State for the additional credit accommodations provided for in the bill under consideration.

The purpose of this bill is to afford those who are engaged in farming, or who desire to engage in that occupation, greater volume of land credit on more favorable terms and at lower and more uniform interest rates than at present. This is to be effected by the establishment of national chartered and Government supervised organizations, known as Federal land banks, that will make long-time amortizable loans at low interest rates upon agricultural lands, and will assemble in each organization individual farm mortgages, and issue upon this collective security credit instruments to be known as farm-loan bonds. It is confidently expected that the business of farming, by reason of the additional credit supplied through these Federal land banks, will develop and flourish as never before, and the increased production of farm products will benefit not only the farmer but the city dweller as well.

Mr. MORGAN of Oklahoma. Will the gentleman yield?

Mr. SMITH of Minnesota. Yes.

Mr. MORGAN of Oklahoma. I do not wish to interrupt the gentleman, but he says that money is cheap in Minnesota, and therefore he does not think that this bill will help the farmers of that State. What is the rate the farmers get?

Mr. SMITH of Minnesota. Over a large portion of our State money can be obtained for 5 per cent. Farmers make loans to each other, and in such cases there is no commission. In the northern part of the State the rate is from 6 to 7 per cent, including the commission.

Mr. MORGAN of Oklahoma. Does not the gentleman think that that will help at least the farmers of the northern part of the State?

Mr. SMITH of Minnesota. It is possible; but that section is so small I do not believe they will adopt it. Nevertheless, my thought is this: If it is going to affect any considerable portion of our country, it is well to adopt it. We have adopted the Federal reserve act, and by that act we have placed the Treasury of the United States at the command of the commercial interests of our country. This is paternalism pure and simple. By this rural-credit bill we are again placing the National Treasury behind the agricultural interests of the country, and in each case we are taxing the whole people for the benefit of two special classes, to wit, the commercial and the agricultural.

Now, I do not believe that paternalism should be practiced or adopted in cases where it can be avoided. Possibly this is a case where it can not be avoided, and, if so, let us adopt it; but if we are going to extend Federal aid to the commercial and agricultural classes, then there is every reason why it should be extended to the multitude of industrial workers of our land.

The larger share of our population to-day is engaged in industrial pursuits. The farm no longer has the attraction that it once had, because this country has changed from an agricultural Nation to an industrial Nation. We no longer depend upon the farm for the great amount of wealth that we are accumulating from year to year. We can not get along without the farmer, but the farm is not the sole source of our revenue.

Without Federal aid or assistance, private banks extend large credit to the business man on secured paper, and, likewise, the farmer has been able to secure credit on his farm from the loan agent.

There are no facilities in the banking systems of the United States, so far as the credit function, for the really laboring class of our citizenry. They are absolutely without any banking facilities except the simple facilities for saving, and in this respect the larger cities are well served by excellent savings banks and savings departments in our State and National banks. Within two hours' ride of New York City there are more than 50 settlements where neither credit nor saving facilities are at the disposal of the people.

There must be a new agency created to make the credit of an artisan effective for a loan.

The late Sir Robert Morier, addressing himself to cooperative banking, said:

All our people have security. The skilled artisans of a community are as good a subject for a mortgage as the steam mill which supplies it with flour, or the broad acres which furnish the corn for the mill.

Professional men, small tradesmen, and workingmen, in a limited sense, have more substantial security to offer than capitalists, if it can only be made effective. Of tangible, convertible security, however, it is true, they may have little, if any, of the description such as an ordinary business bank could take or be expected to take.

The problem in a nutshell is the creation of a new security which artisans can give a banking system where such security will be acceptable for a loan.

A number of countries have met the demand for this sort of banking by establishing cooperative banks, commonly known as people's banks. These banks have been successfully conducted for a number of years in Germany, Italy, Austria-Hungary, Switzerland, Belgium, Russia, France, Servia, Roumania, Bulgaria, Canada, Ireland, South Africa, Egypt, Japan, and China. The United States has given no attention to the establishment of a cooperative banking system to meet the necessities and demands of its industrial workers.

On Saturday, while addressing the House on the subject of rural credit, our distinguished Speaker, Mr. CLARK, called attention to the fact that all three parties in their platforms of 1912 adopted planks pledging their party to the enactment of rural-credit legislation. He might have added that they also pledged their party in the same platform to currency reform, meaning thereby the amendment of our banking and currency laws for the benefit of the business interests, and that these platforms were silent as to legislation that would meet the needs and necessities of the laboring class. I would suggest that since we are about to write new platforms for 1916 that some one, or all, of the political parties pledge its support to a system of cooperative banking that will take care of the needs and necessities of that numerous class of our citizens not provided for in either the Federal reserve act or the rural-credit system, for neither of these acts make any direct attempt to take care of the needs of the workingman.

The party that is far-sighted enough to recognize the necessity for a cooperative banking system deserves the loyal sup-

port and hearty cooperation of the laboring class. In the Federal reserve act provision is made to loan money on farm lands by national banks, while national banks are prohibited from loaning money on city property.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANDERSON. Mr. Chairman, I ask unanimous consent that my colleague may proceed for five minutes more.

The CHAIRMAN. The gentleman from Minnesota asks unanimous consent that his colleague may proceed for five minutes more. Is there objection?

There was no objection.

Mr. SMITH of Minnesota. There is no provision by which a cent can be loaned by a national bank on city property. If you are going to have industrial workers who are going to be satisfied with existing conditions, you will have to have them housed in comfortable homes, and unless you can furnish money for that purpose at reasonable rates they can not obtain and support these homes.

Mr. GLASS. Will the gentleman yield?

Mr. SMITH of Minnesota. I will yield to my colleague.

Mr. GLASS. I simply wanted to say to my colleague that I have introduced a bill, which has been referred to the Banking and Currency Committee, to permit national banks to loan money on urban property, and I hope I will have the gentleman's assistance to get a favorable report on it.

Mr. SMITH of Minnesota. You will have my hearty cooperation as you have had on both the Federal reserve act and the rural-credit bill, which largely through your able leadership and untiring efforts as chairman of the Banking and Currency Committee will be incorporated in the body of our laws. We are all citizens of the United States, whether we live in the country or whether we live in the city. What benefits one benefits the other; and it is on that theory that I am going to support this bill. The better our agricultural interests are taken care of, the better it is for us in the city. But the agricultural class should not have access to the Federal Treasury to the exclusion of the industrial class, since the Treasury is supported by a tax upon all the people. Considerable criticism has been leveled at the Federal Reserve System because of its neglect to take care in some way of the working class. You can allay that criticism by enacting legislation that will take care of their demands as fully and completely as the Federal reserve act and the rural-credit bill takes care of the merchant and the farmer. However, I am aware that is a hard task. The Federal reserve act and the rural-credit bill are much easier bills to draft and much easier laws to put into practice than a personal credits bill. Nevertheless, if we will go at it with the same determination that has been exhibited in framing this legislation, there is no doubt but what we can bring relief to that class of our citizens who sorely need it, and by benefiting them we are benefiting the farmer and the merchant as well. The Government can no longer shut its eyes to the requirements, needs, and demands of its industrial workers. They must be treated in a spirit of fairness and honesty.

And when it has satisfied them that it is trying to be fair and honest with them, recognizing their rights, dealing with them on the same plane that it deals with others, granting to no class of our citizens any special privileges, and that it is trying to bring home the benefits of government to all, the Government will forever establish itself in the affection, loyalty, and patriotism of the sons of toil, the main support of commerce, agriculture, and industry, and the principle defense of the Government itself.

Before the passage of the Federal reserve act postal savings were deposited in banks under Federal and State supervision, which qualified to accept them, and qualification was effected by a bank depositing with the Treasurer of the United States approved bonds as security for the payment of postal savings deposits on demand. The Federal reserve act, which went into operation November 15, 1914, under section 15 prohibited the deposit of postal savings in any bank except those belonging to the Federal Reserve System. In 1914 there were postal savings deposits of about $43,000,000. About twenty-five millions of this amount were deposited in State banks and trust companies not member banks of the Federal Reserve System. Since November 15, 1914, the date that the Federal reserve act went into effect, no postal savings deposits have been deposited by the Government in State institutions, but the surplus must be turned over to the banks belonging to the Federal Reserve System.

The Sixty-third Congress passed an act repealing section 15 of the Federal reserve act, in so far as that act prohibited the depositing of postal savings funds in State institutions. This bill was vetoed by the President on September 11, 1914. In his message the President stated that when the Federal reserve act was passed it was thought wise to make the inducements to State banks to enter the Federal Reserve System as many and as strong as possible. It was therefore provided in the act that Government funds should be deposited only in banks which were members of the Federal Reserve System, and that the principle of such a provision is sound and undisputable.

From the angle at which the President was viewing the question his conclusion is sound, but the question has a much broader aspect than simply the compelling of State banks to enter the Federal Reserve System, and I am confident that if the President had viewed the proposition from all its angles he would have arrived at a different conclusion.

The postal savings deposits are owned by the laboring classes residing in the industrial cities of the country. For example, 90 per cent of the postal savings deposits of the State of New York is in New York City, Brooklyn, Buffalo, Rochester, and Long Island City, and one-fourth of all the savings deposits—amounting now to $73,000,000—is in Greater New York. In the State of Minnesota 70 per cent of the deposits is in the cities of Minneapolis, St. Paul, and Duluth. What is true of New York and Minnesota is true of every other State in the Union. If these postal savings deposits are required to be deposited in banks belonging to the Federal Reserve System, which are organized and conducted solely for commercial purposes, the laboring masses of our great industrial cities who own practically all of the postal savings deposits will be unable to borrow a dollar of this money for the purpose of building or purchasing a city home.

It is an unwise policy to make all the financial institutions of the country subservient to the interests of the Federal Reserve System, which is a commercial banking system only. If the Federal Reserve System attempted to carry on, regulate, and control all classes of financial institutions, there would be some reason for turning over savings accounts and investment funds to that system.

The laboring man is discriminated against by placing deposits of postal savings banks in commercial banks, because these deposits are then used for commercial purposes, and the amount of money for long-time investment, such as mortgages, is lessened to the amount of savings deposited in the commercial banks.

These postal savings deposits naturally belong in a cooperative banking system such as I have suggested.

The CHAIRMAN. Does the gentleman from Virginia [Mr. GLASS] desire recognition?

Mr. GLASS. I wanted to inquire if amendments would be offered to this section?

Mr. MORGAN of Oklahoma. I have one.

Mr. GLASS. I have no doubt the gentleman from Oklahoma has one, but I wondered if any other gentleman had any.

Mr. FESS rose.

Mr. SWITZER. I want a little time. I have not said anything on the bill hitherto.

Mr. GLASS. I think the gentleman deserves it.

Mr. SWITZER. I have been here in attendance regularly.

Mr. GLASS. I would like to have a unanimous-consent agreement that all debate on this section and amendments thereto be concluded in 15 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto be concluded in 15 minutes. Is there objection?

Mr. MORGAN of Oklahoma. Reserving the right to object, Mr. Chairman, will it be understood that I shall be allowed five minutes?

Mr. GLASS. The Chair will judge of that. I ask unanimous consent to close in 15 minutes, Mr. Chairman.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate close in 15 minutes. Is there objection?

Mr. DOOLITTLE. Reserving the right to object, Mr. Chairman, I wanted to ask the gentleman from Virginia regarding the second and third subheads under section 14. I would like to have two or three minutes.

Mr. MANN. Several gentlemen over here would like to have 20 minutes.

Mr. GLASS. Then I ask unanimous consent, Mr. Chairman, that debate on this section and all amendments thereto close in 25 minutes.

The CHAIRMAN. Is there objection?

Mr. MANN. Reserving the right to object, do we get 20 minutes?

The CHAIRMAN. Will the gentleman indulge the Chair for just a moment? For the committee during the remainder of the consideration of this bill the Chair will undertake to recognize and give preference to gentlemen having amendments when he knows that gentlemen have amendments.

Mr. MANN. The gentleman from Ohio [Mr. FESS] has the floor now, and the gentleman from Oklahoma [Mr. MORGAN] and the gentleman from Ohio [Mr. SWITZER] and the gentleman from North Dakota [Mr. YOUNG] desire time.

Mr. GLASS. I understand that gentlemen on that side want 20 minutes. I have had request for only five minutes over here.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. FESS. Mr. Chairman, if I may have the attention of the committee, I wish to say that under general debate the question was asked whether you limited the number of Federal land banks to 12. It was understood that the answer was in the affirmative; that you did. Criticism has been made of the bill that the number of banks is unlimited, and, since the Government is to make a deposit of $750,000 to each bank, the amount of Government obligations would be therefore unlimited; and, since in this section now under consideration we allow an issue of bonds of twenty times more than the capital stock, that seems to me to be a very serious situation. The minimum capital in the banks would be $9,000,000 if you limited the number to 12 banks, and the minimum issue of bonds would be $180,000,000.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield?

Mr. FESS. Yes.

Mr. HASTINGS. I want to refer the gentleman to section 5, which is found on page 79 of the bill, which provides that as soon as practicable the Federal board shall divide the United States, including Alaska, into 12 districts.

Mr. FESS. I have looked that up. That is not a limitation in section 5. That is an authorization. There should be a limitation in this bill. You have a limitation in the Federal reserve act which limits the number of Federal reserve cities. But in this proposed act you do not limit—in section 5 or elsewhere—the number of banks. Section 5 simply says the Federal farm-loan board shall establish in each Federal land-bank district a Federal land bank. Under that language you can establish one, two, three, or any other number in a district, and each one will be a Federal land bank under the terms of this bill. There is no limitation there at all. If you were to say "but one" or "only one" or "not more than one" then there would be a definite limitation. Such language should be employed. All the other legislative enactments make a limitation. Even this bill, in other provisions, as in section 12, where the language is used, "Such loans may be made for the following purposes, and no more," the last three words are a limitation. If not necessary, then they should be omitted.

Mr. WINGO. Mr. Chairman, will the gentleman yield for a question?

Mr. FESS. Yes.

Mr. WINGO. Let me offer this suggestion to the gentleman, that the board would not have authority to do anything else than is authorized by the act, and they are only authorized by the act to establish 12.

Mr. FESS. They are to establish 12 districts.

Mr. WINGO. Yes; and they are authorized to establish only one bank in a district.

Mr. FESS. Oh, no. It says the Federal farm-loan board shall establish in each Federal district a Federal land bank, but it does not say it may not create more than one. You might have any number and still be within the language. So long as an authorization is unlimited in terms, the number is not defined. Why not say "not more than," as you do in the Federal reserve act? You put the limitation there. I have the law here in my hand.

Mr. WINGO. I suggest to the gentleman to compare the two.

Mr. PHELAN. It says, "not less than 8 and not more than 12."

Mr. FESS. It says each district shall contain only one. There can be only one Federal bank in a reserve city. Why not say but one Federal land bank, as you do in the Federal reserve act?

Mr. WINGO. The gentleman is certainly familiar with the legal determination of what that language means. Under that language, let me suggest to the gentleman, they would have authority to establish only one, in my judgment.

Mr. FESS. I differ from the gentleman on that. My contention is that we ought to limit it to one. I am asking the question of the gentleman from Arkansas, whether his intention is not to extend it beyond one?

Mr. WINGO. It is the intention of the committee that there shall be only 12.

Mr. FESS. I think it is worth looking into. I think there is no limitation there.

I simply wanted to state, Mr. Chairman, that while I have called attention to some things objectionable to me, outside of the one amendment, the Government guaranty of the bonds that has gone into the bill, I think I could support it without much of a strain of conscience. I want to say that much. I am not an opponent of the principle of the bill, but I think this thing should be looked into. My claim is this: Section 5 allows an unlimited number of land banks. Section 6 makes the minimum capital stock $750,000 to be subscribed by the Government. Section 14, the one now under consideration, allows a bank to issue twenty times the amount of its capital stock in farm loans. This means the 12 banks can issue $180,000,000 of bonds. But an unlimited number of banks would issue an unlimited amount of bonds. Why not? The Lever amendment which we adopted in the earlier stages of the consideration requires the Government to take care of the interest and principal in case the bank can not do it.

This amendment I regard as vicious, and unless stricken out and the number of banks limited I can not support the bill.

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. MORGAN of Oklahoma: Page 106, lines 10 and 11, after the word "deposits," in line 10, strike out the remainder of line 10 and all of line 11 preceding the word "to."

Mr. MORGAN of Oklahoma. Mr. Chairman, the first paragraph of section 14 of the committee bill provides that no Federal land bank shall have power "to accept deposits of current funds payable upon demand, except from its own stockholders, or to transact any banking or other business not expressly authorized by the provisions of the act." Under my amendment Federal land banks would be prohibited from accepting deposits of any kind or character. I am not an expert in the banking business. I am not certain that I know exactly what is a "deposit payable on demand." My impression is that time deposits are not payable on demand. If I am correct in this, the Federal land banks could accept time deposits from any person, corporation or municipality. I believe that we should create pure land-mortgage institutions. I know that in some countries in Europe they have land-credit institutions which do a general banking business. But the best type of land-credit institutions is the pure land-mortgage bank. That is to say, a banking corporation or institution which does strictly a land-mortgage business, secures mortgages from the farmers, and under the authority of law transforms these mortgages into debentures or bonds and sells those bonds on the market. The proceeds from the sale of those bonds are reinvested in farm mortgages. These farm mortgages are in turn transformed into bonds or debentures and sold. Thus the process goes on indefinitely. It is of the highest importance to the farmers that the institutions acting as the intermediaries between them and investors shall have the implicit confidence of investors. It is self-evident that the institutions that take the least risks, on the whole, will be the safest and thus will have the best credit among investors. Land-credit institutions strictly speaking are not banks. They are mortgage companies. Their business is to make mortgages, issue bonds, and dispose of those bonds; to collect the annual payments from borrowers and to use those payments to pay the annual interest on the bonds; and in the end to pay the principal of the bonds. If the business is conducted carefully and honestly, there is absolutely no chance for failure, but whenever a land-credit institution extends its business into other lines it takes additional risks and becomes less secure and increases the possibility of losses, failure, and bankruptcy. For this reason I have concluded that it is unwise to permit our land-credit institutions to accept even time deposits, but under the provision above referred to the Federal land bank would unquestionably have the authority and the right to accept deposits from its stockholders.

Mr. MOSS of Indiana. Will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. Who does the gentleman understand would be the stockholders of the Federal land banks?

Mr. MORGAN of Oklahoma. The stockholders of a Federal land bank start out with, maybe, any individual; it might be a State, might be a corporation.

Mr. MOSS of Indiana. Those are only temporary stockholders.

Mr. MORGAN of Oklahoma. Does the committee intend by this language to authorize time deposits? This says "deposits on demand." Does that mean time deposits? Are these banks prohibited from accepting time deposits? If so, you will simplify the language by allowing my amendment to go through prohibiting them from accepting deposits of any kind.

Mr. MOSS of Indiana. The gentleman will remember that the stockholders are the land farm-loan associations. If he will remember that, his fears will disappear.

Mr. MORGAN of Oklahoma. May not corporations subscribe to the original stock?

Mr. MOSS of Indiana. Yes; but they will hold it temporarily.

Mr. MORGAN of Oklahoma. They might hold it 50 years.

Mr. MOSS of Indiana. Oh, no; not 50 years. We have put short limitations on the matter.

Mr. MORGAN of Oklahoma. Well, I think I now understand the gentleman. This provision at least allows the stockholders of Federal land banks to make deposits therein. I do not think that this is wise policy to allow even stockholders to make deposits in these Federal land banks. It introduces an element of uncertainty, an element of weakness, and an element of risk that might get the institutions into serious trouble. What is the object of permitting these banks to accept deposits even from their stockholders? For what purpose would these deposits be used? Certainly they should not accept such deposits and assume the responsibility of the safe-keeping thereof unless such deposits can be put to some good use. We must assume, therefore, that these deposits will be used. Presumably they would be used to make farm-mortgage loans. These Federal land banks are not permitted to make loans for less than five years, and the presumption is that most of the loans will be made for a much longer period, and perhaps a great majority will be made for the maximum period of 36 years. It always has been true in the history of this and all other Governments that there are times when money is scarce and when times are hard and, indeed, when the country is overwhelmed with a panic. Even time deposits must be paid on short notice. Under this provision a Federal land bank might have many millions of dollars on deposit. It would no doubt have these funds loaned out on long-time farm mortgages, as this would be the only legitimate investments for which such deposits should be used. It is possible, therefore, that the Federal land banks might find themselves in serious financial difficulties because they would not be in position to return to the depositors their money. I am opposed to permitting these Federal land banks to conduct their business by accepting either demand or time deposits, either from stockholders or others. These Federal land banks are to be borrowers' institutions. In due time all the capital of these banks will belong to borrowers. These borrowers, the farmers, should not be permitted through the land-credit institutions we are creating to engage in any line or character of business that is not necessary to accomplish the fundamental purpose for which these institutions shall be created.

There is another important matter outside of obligations due for current debts which should be and will be met promptly every month. These Federal land banks will have but one set of creditors. These creditors will be the bondholders. The bondholders naturally will feel more secured if they know that they are the only creditors which these Federal land banks have. They will know that all their moneys, all their property, and all their assets of every kind, character, and description are held sacredly for the interest and principal of these bonds. I will therefore place myself unreservedly against permitting Federal land banks accepting deposits of any kind. I believe that to do so would injure the credit of these institutions, and that would mean to injure the credit of the borrowers, the farmers, who will be finally the owners of all the capital and all the assets of these banks. Their interest should be safeguarded above all others, and it is in their behalf that I plead.

Mr. RAKER. Mr. Chairman, it is fairly easy to criticize whether your criticism amounts to anything or not. This committee reported the Federal reserve-bank act, and after it passed the House was considered by the Senate and sent through conference and became a law, and it is recognized as one of the greatest pieces of legislation of the administration and of the last 50 years. The Senate has passed a rural-credit bill, the House committee has reported a substitute, and with some amendments which are always necessary, the committee's report to the House will and should pass, and the committee are not so tied up but that they will recognize proper and valid amendments to it, and no doubt the House will adopt some. But when the House in the Committee of the Whole gets through with the bill I believe we are going to have a fairly good rural-credit bill, and after it is through the conference it is going to be in a shape that the people of this country will be satisfied with, to a great extent. It can not be perfect, no one expects it to be perfect, because there are bound to be some alterations and additions which may be found to be necessary afterwards. But they are going to be enacted into law by amendment to the bill and it will be a workable bill.

It is no criticism of the bill that we have not all at once provided for industrial loans. The committee has not placed on the bill any individual credits provisions. We have passed a Federal reserve act, have taken up a rural-credit bill, and it is only a question of time when this committee of the House and the present administration will give to the country legislation along all these lines, so that those who have security, those who are honest and will pay their debts, will be able to buy their homes, will be able to help their business and secure all the benefits that come from such legislation.

But I want to say to the committee that it is a measure of satisfaction that this great body of people who have been desirous of having a rural credits bill in order that they might get a reasonable rate of interest—not 1 or 2 per cent, for that is all imagination—are going to get a bill that will work out on a business basis to the end that they may have sufficient length of credit so that a man may go on his farm, improve it, and know that he is going to hold it and not, as at the present time, at the end of thee or four years, have the loan changed, the rate of interest raised, the expenses of having it renewed charged up against him of 5 or 10 per cent bonus for renewing it—all that will be done away with. Legislation of this kind is going to be of interest not only to the farming community but to the industrial community on the ground that it will give all an opportunity to build up their homes and improve their farms, and I shall vote for this legislation. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

Mr. YOUNG of North Dakota. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 106, line 10, after the word "First," strike out the words "To accept deposits of current funds payable upon demand except from its own stockholders or."

Mr. YOUNG of North Dakota. Mr. Chairman, I think everyone will agree that what made the rural banks of France and Germany strong and powerful and so immensely helpful to the farmers of those countries was not Government aid. The thing that made those banks overloaded almost with money was the deposits made by the farmers themselves. Now, it appears to me that in this bill the fundamental weakness is that the resources of the farmers themselves are not to be marshaled. There is no provision in the bill which will at any time enable the farmers to collect an adequate loan fund, make them independent in finance, and furnish an adequate supply of money to take care of their own business in the purchase of land, stock, or machinery, or anything else connected with their business. The farmers do not fix the price of anything. Others fix the price of what they sell. Others fix the price of what they buy. By the terms of this bill others will fix the price or the terms upon what they borrow. That condition will last for all time unless you vitalize this bill by permitting the farmers without exception to deposit money in the rural banks.

Mr. LEVER. Would you confine it to farmers only? Why not let everybody in?

Mr. YOUNG of North Dakota. I say, let everybody in.

Mr. LEVER. Does the gentleman's amendment do that?

Mr. YOUNG of North Dakota. Certainly. It at least cuts out the restriction.

Mr. LEVER. If the gentleman would permit, I wish the gentleman would make his amendment broad enough to permit these land banks to accept deposits from any source.

Mr. YOUNG of North Dakota. I did that a few days ago. On Saturday I offered such an amendment, and to-day I am proposing to cut out this particular restriction. I want to call attention to the fact that these gentlemen who have drafted this bill only permit those to deposit in these banks who have no money. The qualification is that a man shall make application to borrow money, and after he has borrowed the money, thus demonstrating that he has not any money to deposit, they are going to permit him to deposit it, and he is the only one permitted to make a deposit. In other words, deposits can only be made by shareholders, and to become a shareholder one must become a borrower.

Mr. RUBEY. There is no provision in this bill for the land banks to do anything with any such money. What would they do with it if people were permitted to make deposits?

Mr. YOUNG of North Dakota. It is the business of this committee to say what shall be done with it. Of course, it would be loaned back to farmers. The system in Germany and France would have amounted to nothing if they had not let the people generally over there make deposits in those banks.

Mr. MOSS of Indiana. If the gentleman wishes to make that effective, why not offer an amendment to permit farm-loan associations to receive deposits?

Mr. YOUNG of North Dakota. I offered such an amendment a few days ago—on Saturday. A member of the committee ought not to ask somebody else to fix the bill in a matter of details. I am talking about a fundamental principle, and am calling attention to a fundamental weakness in this measure. It is the business of the committee to work it out, and if they accept the principle it will be a comparatively small task to work out the details. The farmers want a real bank, not a loan agency. It will never be more than a mere agency until the farmers are permitted to build up an institution of their own with their own money gathered and built up over a period of years. Such a bank would revolutionize the farming industry. This bill as it is may be helpful in some areas of the country, and I may vote for it upon that theory, but I regret exceedingly the disposition of the committee to refuse to make needful amendments.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. SWITZER. Mr. Chairman, if the representations made by the various Members from New England, New York, Pennsylvania, and the Central States and some of the Northwestern States are accurate as to the financial conditions through these particular regions respecting the prevailing rates upon loans made upon farm property, it seems to me that it would be well for the committee to reconsider a considerable portion of this bill. What would be the use of creating quite a number of these Federal land banks, I believe they are called, especially throughout these particular localities and entailing upon the Government this great overhead expense? I believe that this system—that is, the proposed popular methods under the system—will not be workable, and in my locality it will be of no benefit to my constituents, although I expect to vote for the bill, for it matters not how cumbersome, how complicated, may be the method for obtaining money under it, with the provision in the bill creating joint-stock land banks there may possibly be opportunity to get a little cheaper rate of interest, or at least another opportunity will be offered, and it will tend to hold rates down and possibly drive down interest rates on loans made on farm property. In order to make these bonds salable, in order to induce investors to take them, you undertake a system which seems to me is uselessly complicated. In other words, you require the borrower to put up a bonus of 5 per cent of the amount he proposes to borrow. You further obligate him to another 5 per cent, something like a double stockholder's liability to 5 per cent of his loan. In other words, quoting the language of Mr. Hulings, who was a Member at the last session of Congress, you are trying to make a wig without hair. You require a man who desires money, who has no money, or he would not be making the application to get money, to put up a $50 cash bonus on every thousand he borrows, or a paper bonus to that extent. It seems to me that my people, when they learn that they are paying interest on a $50 bonus on every thousand dollars they borrow, and possibly get not nothing back in return, with the possibility of losing the whole $50, and in addition to that being made security for their neighbors in their farm-loan association as well as to the whole country for another 5 per cent of the amount they borrow, provided you can get it from them if they default in the payment of their mortgage, will not come in and you will drive out all of the thrifty, go-ahead people from the community who are desiring assistance, and you will simply get the undesirable element of the community into this system.

You do that for what purpose? In order to raise the loanable amount on farm property. I know it is difficult to map out any system that will be beneficial to my constituency under the prevailing rates in my district, but I would make this suggestion to the committee, that instead of this complicated machinery it wipe out these associations, wipe out these farm-land banks and make it more direct, and instead of having a loanable value to the amount of 60 per cent upon the farm property and 20 per cent upon the permanent improvements, make it only 50 per cent, because the man only gets about 50 per cent anyway. You take away from him 5 per cent, with the possibility of taking another 5 per cent. You really only give him 55 per cent, and it is possible that the amount may be cut down to 50 per cent of the value of the farm, and then I would suggest that instead of this double liability the Government of the United States guarantee the proposed 5 per cent reserve, you are trying to create, to the extent of $500,000,000 of loans. The liability of the Government would be fixed, it would be only $25,000,000, and I believe those bonds would sell more readily than the ones you have provided for here, and I know that the people will make applications for loans more freely and in larger numbers.

You hold out to the borrower that he will receive a dividend on the stock which he is compelled to take in the loan association, and if the thrift of the system comes up to the expectations of its proponents, these dividends, together with other earnings, could be held in the banks or invested in Government bonds, for the purpose of creating an additional reserve fund to secure the bonds issued and sold by the banks for the purpose of obtaining loanable funds, and by the time $500,000,000 have been loaned, or within 10 or 15 years, a reserve will accrue sufficiently large to release the Government from the 5 per cent guaranty. If the system is successful, the Government can well afford to make the 5 per cent guaranty; and if it fails, the loss is limited to twenty-five millions plus the nine millions of capital proposed to be supplied by the Government, an amount not much larger than that recently provided for the building of railways in Alaska.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The question was taken, and the amendment was rejected.

Mr. YOUNG of North Dakota. Mr. Chairman, I desire to offer an amendment which I send to the Clerk's desk, which will have to have two words, "*Provided*, That," placed in front of it.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 106, at the end of line 3, insert, "*Provided*, That"——

Mr. YOUNG of North Dakota. Perhaps I can state it better: *Provided*, That the farm-loan board may make such rules and regulations for the deposit of money and the reloaning of the same as they shall adopt.

The Clerk read as follows:

*Provided*, That the farmers' loan board may permit the Federal land banks to accept deposits and to invest the same under such rules and regulations as may be prescribed by the farm-loan board.

The CHAIRMAN. All debate is closed.

Mr. YOUNG of North Dakota. Mr. Chairman, I ask unanimous consent that the gentleman from South Carolina [Mr. LEVER] may be permitted to proceed for five minutes.

The CHAIRMAN. The gentleman asks unanimous consent that the gentleman from South Carolina [Mr. LEVER] be permitted to proceed for five minutes. Is there objection?

Mr. MANN. Mr. Chairman, I would like to have five minutes here in opposition.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that he may be permitted also——

Mr. GLASS. Mr. Chairman, I object.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

AGENTS OF FEDERAL LAND BANKS.

SEC. 15. That whenever it shall appear to the Federal farm-loan board that national farm-loan associations have not been formed, and are not likely to be formed, in any locality, because of some peculiar local conditions, said board may, in its discretion, authorize Federal land banks to make loans on farm lands through agents approved by said board.

Such loans shall be subject to the same conditions and restrictions as if the same were made through national farm-loan associations, and each borrower shall contribute 5 per cent of the amount of his loan to the capital of the Federal land bank, and shall become the owner of as much capital stock of the land bank as such contribution shall warrant.

No agent other than a duly incorporated bank, trust company, mortgage company, or savings institution, chartered by the State in which it has its principal office, shall be employed under the provisions of this section.

Federal land banks may pay to such agents the actual expense of appraising the land offered as security for a loan, examining and certifying the title thereof, and making, executing, and recording the mortgage papers, and in addition may allow said agents not to exceed one-half of 1 per cent per annum upon the unpaid principal of said loan.

Actual expenses paid to agents under the provisions of this section may be added to the face of the loan and paid off in amortization payments as provided in subsection 8 of section 13 of this act.

Said agents, when required by the Federal land banks, shall collect and forward to such banks without charge all interest and amortization payments on loans indorsed by them.

Any agent negotiating any such loan shall indorse the same and become liable for the payment thereof, and for any default by the mortgagor, on the same terms and under the same penalties as if the loan had been originally made by said agent as principal and sold by said agent to said land bank, but the aggregate of the unpaid principal of mortgage loans received from any such agent shall not exceed 10 times its capital and surplus.

If at any time the district represented by any agent under the provisions of this section shall, in the judgment of the Federal farm-loan board, be adequately served by national farm-loan associations, no further loans shall be negotiated therein by agents under this section.

Mr. HASTINGS. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out all of section 15 and insert the following:

"SEC. 15. That whenever it shall appear to the Federal farm-loan board that national farm-loan associations have not been formed in any locality within 90 days after the establishment of the Federal land banks under this act, said board shall authorize Federal land banks to make loans on farms through agents approved by said board.

"Such loans shall be subject to the same conditions and restrictions as if the same were made through national farm-loan associations, and each borrower shall contribute 5 per cent of the amount of his loan to the capital of the Federal land bank, and shall become the owner of as much capital stock of the land bank as such contribution shall warrant.

"Agents appointed under the provisions of this section shall be paid by the Federal land bank which they serve, such compensation for supervising, making out, and forwarding each application for a loan not to exceed $2.50, as may be agreed upon: *Provided*, That postmasters of the first, second, or third class may be employed under the provisions of this section, but in the event postmasters are employed as agents, they shall not be paid nor permitted to receive or accept compensation therefor. For the purposes of this act an agent shall be authorized to take acknowledgments, administer oaths, and authenticate his acts with a seal.

"Each applicant for a loan under the provisions of this section shall make his application upon a form approved by the Federal farm-loan board duly verified, and each application shall be accompanied by the note and mortgage, and the affidavits of two landowners of the vicinity in which the land is located certifying to the value of the land, whose responsibility shall be certified to by the agent, and shall also be accompanied by an abstract or other evidence of title prescribed by said board.

"If at any time the district represented by any agent under the provisions of this section shall, in the judgment of the Federal farm-loan board, be adequately served by national farm-loan associations, no further loans shall be negotiated therein by agents under this section."

Mr. GLASS. Mr. Chairman, I would like to reach some agreement as to the time on this section and amendments thereto.

Mr. FERRIS. Mr. Chairman, I rather hope the gentleman will allow the debate to run a little while, as I might want to say a word, and there are some other gentlemen over here who desire to speak.

Mr. RUBEY. Mr. Chairman, I have an amendment to the original section which I desire to offer.

Mr. GLASS. Well, I would say on this amendment—I would like to know how much time——

Mr. MORGAN of Oklahoma. I would want five minutes on this amendment.

Mr. GLASS. May I ask my colleague how much time he desires?

Mr. HASTINGS. I would like to have about 10 minutes on the amendment, and I will ask the gentleman if he would not prefer to wait and then prefer his request? This might develop some inquiry from members of the committee, and I think if the gentleman will let me proceed for 10 minutes then he might close debate.

Mr. GLASS. I have no desire to shut off reasonable debate, but I would like to reach some agreement if I can.

Mr. FERRIS. Will the gentleman yield?

Mr. MANN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MANN. This is a motion to strike out and insert?

The CHAIRMAN. Yes; it is a substitute.

Mr. MANN. For the entire section?

Mr. HASTINGS. Yes, sir.

Mr. MANN. Pending that motion, will it be in order to offer an amendment to perfect——

The CHAIRMAN. It would.

Mr. GLASS. How much time is wanted on that side?

Mr. HAWLEY. On this amendment?

Mr. GLASS. On this section.

Mr. HAWLEY. I would like to have five minutes on the section.

Mr. MORGAN of Oklahoma. Mr. Chairman, I hope the gentleman will not try to close debate too quickly on this entire section.

Mr. GLASS. I want to reach some agreement. Does the gentleman want some time?

Mr. MORGAN of Oklahoma. I want five minutes on this amendment, but I have several amendments to the section which I desire to offer.

Mr. MANN. Suppose you close debate on the amendment first.

Mr. GLASS. Mr. Chairman, I suggest we agree to close debate on this particular amendment in 20 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this amendment close in 20 minutes. Is there objection?

Mr. GLASS. Of which 10 minutes is to go to the gentleman from Oklahoma, a member of the committee.

The CHAIRMAN. Is there objection?

Mr. DAVENPORT. Mr. Chairman, reserving the right to object, there are two or three of my colleagues who indicate they might want to be heard upon that, and I think the time ought to be a little extended.

Mr. GLASS. I have had no intimation to that effect. I asked if they wanted to be heard.

Mr. DAVENPORT. We are indicating it now by reserving the right to object, in order that they may discuss the amendment. I understand Mr. THOMPSON, Mr. FERRIS, and Mr. MORGAN desire time.

Mr. GLASS. Mr. Chairman, I make it 25 minutes.

Mr. MANN. How many Members are there from Oklahoma?

Mr. DAVENPORT. Eight, usually; and I think they are all here to-day.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on the pending amendment may close in 25 minutes, 10 minutes to be used by the author of the amendment. Is there objection? [After a pause.] The Chair hears none.

Mr. HASTINGS. Mr. Chairman and gentlemen of the committee, no man in this Congress is more interested in rural-credits legislation than I am. I would rather be the author of a real rural-credits bill than of any other legislation that is pending in this Congress, and I want to have the attention of the members of the committee upon this particular amendment for a few minutes. My fear is that you will have too many delays in securing the loans under the terms of this bill. Now, I want to call the attention of the members of the committee to the methods of securing loans under this bill. You can secure a loan from the Federal land bank in two ways: First, through your farm-loan associations; second, through agents; now, third, you can secure loans under the terms of this bill from joint-stock land banks. I am going to eliminate the third, namely, the loans from joint-stock land banks, as we are only discussing loans from Federal land banks. Now let us see how you get loans under the terms of this bill from the Federal land bank. First, there must be at least 10 natural persons and you must want to borrow at least $20,000. Now, I believe that the average loan that will be desired to be borrowed in my State will be about $500.

You can see it will take 40 persons who will have to unite themselves into a farm-loan association before a loan association can be formed. Now, suppose you do not find 40 persons, say, for instance, in Cherokee County, the county in which I live. Then this would not be a workable bill so far as that locality is concerned. This amendment provides that in the event that no local association is formed within 90 days after the formation of the Federal land bank in the district, the land bank shall be the means whereby you can secure loans through local agents.

It is admitted here in the general debate that this section 15 is not workable. It is admitted that no agents will ever be appointed under it. Let me arouse the Members of this House to the importance of this substitute. Suppose that the local loan associations are formed. Or, if they are formed, how are you going to get money through them? First, you have to make application to join the association. How long is it going to take you? You have to be admitted as a member of the association, have you not? Very well. Then you make an application for the loan. That is referred to your loan committee of three.

Suppose there are 40 members that belong to this local association who are scattered over an area of 10 or 12 miles. Your loan committee is not paid anything. They must view the land. They must make a detailed written report, which must be unanimous. When are you going to get your loan committee together, a committee that is not paid anything? That may extend over a week or 10 days. After the report is made, then it is to be approved by the directors of the local association. There can not be less than five and there may be a dozen or more of these directors under the terms of this bill. They are not paid anything. They may live 10 or 15 or 20 miles apart in any county, as the case may be. When are you going to get the directors of your local association together to approve this loan? It may be a week or 10 days. Now then, after that is approved, it only initiates your loan and sends it to the Federal land bank. It is then referred to the legal department that examines the title, and if the title is found good then it is sent to the appraiser for that particular district, and the appraiser goes down there some 30 or 60 days thereafter. Now, gentlemen of the committee, suppose that the man is in financial distress or a man who wants to purchase some land or some equipment and he wants to make a deal or he wants the money for any purpose that is allowable under this bill. My judgment is there is too much delay in getting the borrower connected with the Federal land bank. Now, let us examine the terms of this proposed amendment.

It is admitted that this section 15 as it is in this bill is not workable, for a number of reasons. First, the first clause makes it only permissible. Second, it provides that mortgage companies and State banks only may be appointed. Third, it requires these State banks to indorse and become liable for this 36-year paper, and you know that will never be done and that no agents will be appointed, and the committee admits in general debate it will never be done. Section 15 is not workable. How about the substitute I propose? Remember, gentlemen of the committee, this only initiates the loan. It only puts the borrower in connection with the Federal land bank, and I provide that if, after 90 days, no local association is formed, agents may be appointed in any particular locality, and it provides that the prospective borrower shall go to this agent and upon a form that is prescribed by the Federal farm-loan board may take out his application for a loan.

It provides further that two landowners of that locality shall make an appraisement of it, which shall accompany the application, and that the agent shall certify to the responsibility of all of these men. Attached to the application is the note and mortgage, and attached to that is the abstract or other evidence of title. This loan is not made upon that alone. It only initiates the loan. That only puts the borrower in connection with the Federal land bank, and that is all. If the amendment is adopted and the loan be applied for, he takes out 5 per cent of the stock, just the same as if application was made through the local association, and that application can be made out, and it will be in the Federal land bank in 24 hours.

What course will it take when it gets there? It first is referred to the legal department. There the abstract is examined. If the title is found good, then it is referred to the Government appraiser, and no loan is made until the man who is appointed by the government as appraiser goes and views this land. So, gentlemen, you can see that this substitute I have offered only cuts out about 30 days' delay in having an examination made through a local loan association, and allows him to get his application to the Federal land bank at once and without any expense.

Mr. HELVERING. Just for information, I would like to ask the gentleman if he contemplates that the adoption of his amendment will in any way curtail the formation of these associations?

Mr. HASTINGS. It will not curtail the formation of the association; but this provides if these associations are not formed within 90 days, in that event only will an agent be appointed. The substitute also provides if associations are formed at any time, then these agents may be done away with.

Mr. MOSS of Indiana. Has the gentleman taken into consideration the fact that all 12 land banks throw their assets together and guarantee the loans? Now, under his amendment, will there be as much guaranty behind these loans as there would be through the loan association?

Mr. HASTINGS. My idea is that there will be ample, because you require the individual to take out 5 per cent of the stock, just as through the local association. Besides that, he can only secure 60 per cent of the value of his land, and that must be appraised by the Government appraiser.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN of Oklahoma. Mr. Chairman, I shall vote for this amendment. It applies to section 15 of the committee bill. This bill is drawn upon a theory that the Federal land banks will make loans, as a rule, only to national farm-loan associations. The committee in preparing the bill no doubt recognized the fact that in many localities farm-loan associations might not be organized. To meet such a condition section 15 provides that whenever it shall appear to the Federal farm-loan board that national farm-loan associations have not been formed, and are not likely to be formed in any locality, said board may authorize Federal land banks to make loans on farm lands through agents through Federal boards, and further on in said section such agents are limited to incorporated banks, trust companies, and so forth. Now, this would not be so bad were it not that further on in the section such banking institutions are required to indorse and become liable for the mortgages which they negotiate and turn over to the Federal land banks. This destroys the value of the first part of the section to a large extent. While banking institutions are in close proximity to farmers throughout every section of the land, it is not probable that very many banks would want to complicate their business by entering into the farm-mortgage business and becoming liable for the payment of farm mortgages which might run for a period of 36 years before their payment. So that in a community where there were no banking institutions which would become agent and indorser on mortgages, and also where there were no farm-loan associations, such farmers would have no facilities to secure loans through the Federal land-bank system.

The amendment now pending strikes out all of section 15, and provides in substance that in localities where there are no farm-loan associations the Federal land banks may make loans through agents, such agents to be approved through the farm-loan board.

Under the amendment offered the agent may be a bank, an individual, or a postmaster of the first, second, or third class. The agents are not allowed to charge the borrowers anything for services. The Federal land bank is to pay its own agents and postmasters are required to do their work without charge. An application made through such agent must be accompanied by an appraisement made by three landowners in the vicinity, and after that, of course, a Federal land-bank appraiser will personally inspect and appraise the land so that every wise precaution is taken to secure to the Federal land bank all necessary information, as well as to ascertain the character of the applicant and the value of his land and what would be a reasonable loan thereon. One chief objection that I have to section 15 is the proposition which allows the banking institutions which are appointed as agents of the Federal land banks to receive from the Federal land banks one-half of 1 per cent annually upon the loan as compensation for their services and for indorsements which they give to the mortgages of the farmers. It seems to me that the committee in charge of this bill has wholly failed to grasp the necessity of economical administration to erect between the borrowers and the Federal land banks, who really make the loans, another middleman institution, and permit them to charge one-half of 1 per cent annually for each loan made through them for a period of 36 years seems to me to be unjustifiable. I can not understand how the committee could propose and report such a proposition.

Under this section you authorize these banks to charge one-half of 1 per cent annually, going on for 36 years upon the loan of the farmer who gets it. If this amendment is adopted, you will strike out of the bill what I regard as an infamous charge upon the farmers of this country.

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield there?

Mr. MORGAN of Oklahoma. Yes.

Mr. MOSS of Indiana. I would like to ask the gentleman from Oklahoma if that same provision is not in the bill which the gentleman from Oklahoma introduced, permitting the bank to make the charge and collect it off the borrower?

Mr. MORGAN of Oklahoma. That provision is not in the bill which "the gentleman from Oklahoma," myself, introduced. On the other hand, I authorize these Federal land banks to loan through agents and require national banks and authorized State banks to act as these agents. I will say to my friend, further, that I do not authorize these agents to charge one-half of 1 per cent annually running through 36 years upon the farmer.

Mr. MOSS of Indiana. What charge does the gentleman make?

Mr. MORGAN of Oklahoma. If I recollect correctly, I allow that fee to be fixed by the Federal farm-loan board, but the fee is small and every cent of it is required to be paid by the Federal land bank.

Mr. MOSS of Indiana. Precisely. I think I am more familiar with the bill than the gentleman. The gentleman allows the charge to be made by the Federal farm-loan board.

Mr. MORGAN of Oklahoma. But I call the attention of the House to the fact that under the provisions of my bill the agent does not become an indorser of the mortgage of the farmer. He simply assists in the negotiating and closing of a loan. He would be paid simply a small fee, which would compensate merely for the actual work performed. This would amount to but a few dollars on each loan, but the proposition which the committee presents in section 15 requires the banks to indorse the mortgages of the farmers and become liable for their payment and permit them to receive one-half of 1 per cent annually until the loans are paid. If a loan of $3,000 were made, the bank would receive $15 annually; in 10 years the borrower would pay to the bank $150; in 20 years he would pay to the bank $300. If the $3,000 loan should run the full time of 36 years, the borrower would have paid the bank for negotiating and indorsing his loan $540. All of this is absolutely unnecessary. No good purpose will be accomplished thereby. The note and mortgage of the farmer is absolutely secure without the indorsement of the local banking institution, and to require this useless and unnecessary indorsement and compel the farmers to pay this extra one-half of 1 per cent would be to my mind outrageous.

Mr. HASTINGS. Mr. Chairman, will the gentleman yield there?

Mr. MORGAN of Oklahoma. Yes.

Mr. HASTINGS. Under the provisions of this substitute it would not cost the prospective borrower a penny to initiate his loan.

Mr. MORGAN of Oklahoma. That is true, and that is the way it should be. There is no good reason why these Federal land banks should not be permitted to make loans through agents. This is the method used by existing private farm-loan concerns. The great insurance companies of the Nation conduct their farm-loan business through agents. They have conducted their business successfully. They have conducted their business economically. They have conducted their business safely. So far as we can we should follow the business methods found to be wise and safe by business corporations. There is not a business corporation in the world that would for a moment consider the proposition presented in section 15, to add one-half of 1 per cent annually upon the interest charge of each loan, or one-half of 1 per cent annually to the cost of operation in order to secure the indorsement of a farm mortgage that was absolutely secure before such indorsement was made. We do not know how many loans would be made through these agents as provided in section 15 if it were enacted into law. So far as we know a large proportion of the loans made might come through these agents, but whether the amount should be great or small it would be an absolutely useless and unnecessary charge upon the borrowers, and I am unalterably opposed to it.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. SUMNERS. Mr. Chairman and gentlemen of the committee, I only want about one minute. I represent in part the greatest agricultural State in the Union. I believe I know the condition which obtains among the farmers of the country, I know the lack of community and class solidarity among them.

The provisions in this bill, as the committee has drawn it, would be all right for Germany or one of those European countries where there is class and community solidarity in the rural communities. But it does not fit the American situation. After all, the loan under the present plan of this bill is to be made upon the recommendation of the appraiser, who goes to see the land. The same inspection and appraisement would be made under this amendment. This amendment ought to be adopted, so that if in any community 25 or 30 or 40 men can not be gotten together who want to procure money through this system, the individual farmer who wants a loan could get it. It is absolutely safe, and I hope the amendment of the gentleman from Oklahoma [Mr. HASTINGS] will be adopted. [Applause.]

Mr. FERRIS. Mr. Chairman, the section 15 in this bill is a section that is admittedly a nonworkable proposition. I interrogated some of the members of the Banking and Currency Committee on it, and other Members of the House have interrogated the members of the committee on it, and section 15 as it stands is not workable. It is just a cumbersome provision that everybody understands will not work.

Listen to this provision in section 15:

> Any agent negotiating any such loan shall indorse the same and become liable for the payment thereof, and for any default by the mortgagor, on the same terms and under the same penalties as if the loan had been originally made by said agent as principal and sold by said agent to said land bank.

I undertake to say that no bank in the country will underwrite and indorse and in all things become liable on any 36-year-old paper. I would like to have some one rise in his place and deny that proposition. I do not think any thoughtful Member here even surmises that provision will work.

Mr. NORTON. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. NORTON. Is it not a fact that under most of the State laws the banks would not be permitted to indorse it?

Mr. FERRIS. I do not know as to that. But whether they are permitted to indorse or not, I am as sure as that I live that they will not do it. We can rely on their common sense for that. I do not think anyone can defend it. No one has even tried to defend it so far as I know.

Now, that is criticism No. 1. If it is admitted by the committee and by the House that this section is a section in this bill that will not work, why not in seriousness and good faith take a moment of time and deal with the amendment offered by my colleague, the gentleman from Oklahoma [Mr. HASTINGS]?

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. HARDY. When the gentleman first raised the question it seemed to me absolutely unanswerable.

Mr. FERRIS. Yes.

Mr. HARDY. But after reading the bill it seems to me simply intended to make corporations in that way to make the loan. Of course, they indorse in that way in order to sell their own paper.

Mr. FERRIS. Yes; but the gentleman does not believe that any bank in the State of Texas or in the State of Oklahoma would become liable on paper for any 36-year term.

Mr. HARDY. It is their own paper that they sell.

Mr. FERRIS. Oh, not at all. The agent acts as a forwarding agent, but under this section he must become the indorser, and he thereby becomes liable for it. No bank in my section will take on any such liability as that for one-half of 1 per cent, or any other per cent, covering a long term like 36 years. I want the House to do something about this provision.

Mr. HARDY. Practically, these agent banks are the ones who take the money and loan it.

Mr. FERRIS. Oh, no; they are forwarding agents if they are anything. The gentleman from Oklahoma [Mr. HASTINGS], a member of the Banking and Currency Committee, has given considerable thought to this and offered an amendment which may not be perfect. I am not a banker nor a member of the Banking Committee, but in my opinion he has offered you a razor that will shave. He has offered an amendment that will at least look like it would work and be practical. I think it will do the business. It leaves large latitude in the board; they can work out the details and make it workable. If it is not perfect let us amend it. Let us not pass roughshod over the section that you members of the committee know will not work. The Banking and Currency Committee are entitled to great credit for their work, and I want you to help get this section straightened out. I hope the Hastings amendment or one like it may be adopted. Now, Mr. Chairman, I yield to the gentleman from Alabama [Mr. STEAGALL].

Mr. STEAGALL. Mr. Chairman, I ask unanimous consent to have three minutes, as I have not taken up much time in the debate.

Mr. DAVENPORT. Mr. Chairman, I ask unanimous consent that the gentleman from Alabama be permitted to proceed for five minutes.

The CHAIRMAN (Mr. FOSTER). The gentleman from Oklahoma asks unanimous consent that the gentleman from Alabama may proceed for five minutes. Is there objection?

There was no objection.

Mr. STEAGALL. Mr. Chairman, I want to say, first, that I have been impressed during the progress of this discussion that many men here are absolutely uninformed regarding business conditions in the section of the country which I have the honor to represent. I can understand well enough how it is that the gentleman from Oklahoma [Mr. FERRIS] should contend that the section of this bill now under consideration is without value. That is unquestionably true in many portions of the country, but I dare say this section would be of value in many instances. I believe that in the State of Alabama it would not infrequently happen that banks would indorse mortgages as provided in this section in order to obtain loans for their customers, and in that way reduce the accounts on their books. Many of them have numerous accounts that approach the limit allowed to be loaned under the laws prevailing in that State. I am confident this is true in many sections of the South and West.

I was interested in the speech made by the learned gentleman from Ohio, Dr. FESS, a day or two ago, in which he told of his difficulty in finding a borrower for a few thousand dollars of school funds in his county at 5 per cent, and how, after much effort, he succeeded in placing the money in small amounts at that rate. If this bill had been law at that time he would have found no difficulty in investing his funds in unquestionable security at the same rate on long term without the necessity for frequent renewals of his loan. This bill will assemble land securities where the investor can find them absolutely sound and upon suitable terms. That the gentleman from Ohio may understand the difference in conditions in his State and mine, I will say to him that in the county in which I live I could in 30 days loan $100,000 at 10 per cent on securities that I would unhesitatingly accept.

Mr. RAKER. And I could do the same thing in my State.

Mr. STEAGALL. I was impressed also by a speech of the gentleman from Georgia [Mr. HOWARD] made a day or two ago, in which he denounced the bankers down his way for charging exorbitant rates of interest. I have been inclined to follow him here. He is an older Member, and one of the ablest in this body. But on the occasion to which I refer I thought he was a

little reckless in his speech when he talked of putting so many bankers in the penitentiary. The gentleman used to be a prosecuting attorney in his district, and I spent a few years in that sort of service myself. I should be slow to talk much on this floor about putting my constituents in the penitentiary. The truth is, gentlemen, these bankers are not so much to blame as might appear upon first thought. They have to go to New York to get money, often paying as high as 6 per cent themselves. They have not in their capital and deposits sufficient funds to meet the demands upon them. The little country banks down there are usually capitalized from $50,000 to $100,000, and in many instances less than $50,000. The law, as a rule, provides that they can not loan more than 10 per cent of their capital. In that section a bank's deposits seldom more than doubles its capital. In the town in which I live, which has a population of 2,500, in a splendid agricultural county, the three banks there seldom have combined deposits of more than $250,000, which is about the amount of their combined capital.

My friend, Judge RAINEY of Illinois, has just been telling me of two small banks in his town about the same size as the town in which I live. He says the two banks in his town have deposits of about $1,000,000 each. So you see that different situations are presented in different sections. I believe that the section even as originally drawn and without being amended would carry some benefits to my section of the country, and that the banks there would avail themselves of its provisions.

Mr. DAVENPORT. Will the gentleman yield?

Mr. STEAGALL. Yes.

Mr. DAVENPORT. The reason that they have to go to New York to borrow money is because they have long-time loans that they have to carry, because the farmers raise crops that mature annually and can not be put on the market except at regular periods.

Mr. STEAGALL. That is true.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. STEAGALL. Yes.

Mr. SMITH of Michigan. I understand the gentleman to say that the banks in his section would readily indorse this paper.

Mr. STEAGALL. Not as a general thing, but in many instances they would.

Mr. SMITH of Michigan. Will the gentleman explain how a bank organized for 20 years' existence could indorse paper that would run 36 years?

Mr. STEAGALL. The liability incurred would be a valid obligation and would continue in operation until extinguished by payment or operation of law.

But I wanted to say a word about the amendment offered by the gentleman from Oklahoma [Mr. HASTINGS]. His amendment will make this section more workable and of greater practicable value. The amendment provides that the Federal farm-loan board shall authorize the Federal farm-loan banks to make loans through agents. It does not provide that this shall be done, but merely gives authority to the Federal land bank to make such loans. It will still be left entirely in the control of the Federal land bank. I agree that the farm-loan associations provided for in this system constitute a splendid plan, and out of them will come great good. But there are sections where the farmers are scattered. There are counties down my way where the lands are largely occupied by negro tenants. In some sections you can ride 10 miles without coming to a landowner. The association plan is not adapted to such communities. Not only is this true, but men are going to be slow in organizing these associations. The truth is, where help is worst needed you will find the least spirit of independence and initiative. Under the provisions of this amendment every man will find a plain, practical plan that will appeal to him. And there is no danger whatever to the system involved in this amendment. It is merely left optional to the Federal land bank to adopt this plan, and they will not make such loans except in rare instances, and upon unquestionable security. The Federal land banks will be sure to discourage this plan, except in cases where it is absolutely necessary. They will make loans with greater caution and care than in the cases where they are made through the associations with all the additional safeguards obtaining in that system. The Federal land banks will be absolutely under the control of the borrowers through the farm-loan associations. The bill provides that they shall elect two-thirds of the directors of the Federal land bank, so that they have positive control of the management of the banks at every step. The bill goes further and provides that no money shall be paid out of the Treasury to any Federal land bank until 10 farm-loan associations shall be formed in such bank districts and applications for loans are made. So you see, that there is no danger that the funds of the banks would all be loaned through agents as provided for in the amendment. The directors of the Federal land banks, the majority of whom are to be elected by the farm-loan associations, would never allow reckless loans through agents to endanger the safety of the system and involve the members of the farm-loan associations in loss. There is no danger in the amendment; on the contrary, it will constitute a benefit to the system, which, without it, would be incomplete in many sections of the country.

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from Oklahoma [Mr. HASTINGS].

The question was taken; and on a division (demanded by Mr. MANN) there were 59 ayes and 31 noes.

Mr. GLASS. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed as tellers the gentleman from Virginia [Mr. GLASS] and the gentleman from Oklahoma [Mr. HASTINGS].

Mr. SWITZER. Mr. Chairman, can we have the substitute again read?

The CHAIRMAN. Without objection, the Clerk will again report the substitute.

The Clerk read the amendment.

The committee again divided; and the tellers reported that there were 53 ayes and 60 noes.

So the amendment was rejected.

Mr. RUBEY. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

On page 108, strike out lines 14 to 21, inclusive, and insert:
"Every agent negotiating any such loan shall make a report and an appraisal of the land upon which application is made for the loan on blanks furnished by the Federal land bank, and such report and appraisal shall be referred to an appraiser as required in section 10 of this act, and no loan shall be made by the land bank unless the report of the appraiser is favorable. Every loan made under the provisions of this section shall be made to the applicant upon such forms and under such regulations as shall be prescribed by the Federal farm-loan board."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri.

Mr. GLASS. Mr. Chairman, I would like to see if we can not reach an agreement as to time on this section and amendments thereto.

Mr. NORTON. Mr. Chairman, I have a substitute I desire to offer.

The CHAIRMAN. Will the gentleman from Missouri yield for the purpose of permitting the gentleman from North Dakota to offer his substitute and have it pending?

Mr. RUBEY. I prefer to get through with this, and then the gentleman can offer his amendment.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in 15 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that debate on this section and all amendments thereto close in 15 minutes. Is there objection?

There was no objection.

Mr. RUBEY. Mr. Chairman, I think that every gentleman on this floor who voted in favor of the substitute offered by the gentleman from Oklahoma [Mr. HASTINGS], a member of the Banking and Currency Committee, will certainly support this proposition.

Mr. MORGAN of Oklahoma. Mr. Chairman, will the gentleman yield for a question before he gets into his argument, for information?

Mr. RUBEY. No. I regret that I can not yield; my time is limited and I desire to state what my amendment means, and get the matter clearly before the committee. This whole section 15 as has been demonstrated by those who have spoken to-day as now written is wholly inoperative. It does not amount to anything. Unless you put some provision, such as the amendment that I have suggested into the section, you may just as well strike it out of the bill. The whole section is optional. The Federal farm-loan board is authorized, in its discretion, to make loans on farm lands through agents. These agents shall be incorporated banks, trust companies, mortgage companies, or savings institutions, and all loans shall be subject to the same restrictions and conditions as if made through farm-loan associations. The paragraph sought to be stricken out provides that every bank, trust company, or corporation that is appointed an agent must indorse each one of these loans, the same as if it were the maker of the loan in the first place, and that can not and will not be done. The banks in the State of Missouri and in all of the Western States under the banking laws could not possibly do that sort of thing. Inside of five years their liabilities would be ten times the amount of their assets if they follow the provisions of this paragraph. I provide here that this

bank, this agent which is a bank, trust company, or some organization of that sort, not a postmaster as was provided in the amendment of the gentleman from Oklahoma [Mr. HASTINGS], but a banking institution—one selected by the farm land-bank board—shall make examination of this land, shall report upon it, and appraise it. My amendment further provides that when the Federal farm-loan bank receives the report from its agent then that report shall be referred to one of its own appraisers, and he shall go and appraise the land as provided in section 10 of this act. My amendment provides that no loan can be made unless that appraiser approves the loan. It further provides that the loan shall be made direct to the applicant upon forms provided by the Federal farm-loan board, and under such rules and regulations as the board may prescribe.

Mr. GLASS. Mr. Chairman, will the gentleman yield?

Mr. RUBEY. Yes.

Mr. GLASS. I did not hear the amendment read, there was so much noise and confusion. Is it the idea that the loans shall be made directly without any liability upon the part of the applicant by the land bank?

Mr. RUBEY. The loan shall be made directly to the applicant, but before doing that the loan must be reported on by the agent, which is a bank, must be appraised by it, and must also be appraised by an appraiser sent out by the Federal farm-loan board.

Mr. GLASS. Does my friend think that there will be a single one of these cooperative associations organized if we adopt an amendment like that in this bill? What incentive would there be to any farmer to join an association if he could deal directly with the land bank without any liability?

Mr. RUBEY. I do not seek to interfere with section 15 except as to this one paragraph. In the first paragraph it says that these agents shall be appointed by the Federal farm-loan board in its discretion. I do not seek to interfere with any of the rest of this section, and the last paragraph says that when these loan associations are organized then the agent part of it shall be discontinued.

Mr. GLASS. The point I am inquiring about is this: What possible incentive could any farmer have to join an association and assume a liability if he might be accommodated by a direct application to the land bank?

Mr. RUBEY. I will answer that by saying that this section 15 evidently was put into this bill for the purpose of accommodating somebody, and I can not see any reason for leaving it in there unless we are going to put some provision in it that will make it workable.

Mr. GLASS. I suggest to my friend that it was intended to accommodate somebody, but upon terms analogous to the terms that prevail in the organized association.

Mr. RUBEY. I will say in answer to the gentleman that, in my opinion, this section 15 will be used only in exceptional cases and under the control of the Federal farm-loan board, and will be used only in exceptional cases. In communities here and there, as described by my friend from Alabama [Mr. OLIVER], where there is an incorporated banking institution or mortgage company recognized by the State and organized under the laws of the State, where they can not organize these farm-loan associations, the provisions of this section as sought to be amended by me will be used by the Federal farm-loan board.

Mr. MORGAN of Oklahoma. Will the gentleman yield?

Mr. RUBEY. I will.

Mr. MORGAN of Oklahoma. What compensation would these banks be allowed?

Mr. RUBEY. They would be allowed to receive the compensation as provided in the paragraph preceding.

Mr. MORGAN of Oklahoma. Would they be allowed one-half——

Mr. RUBEY. Not to exceed one-half of 1 per cent for attending to that business, in the discretion of the Federal farm-loan board.

Mr. MORGAN of Oklahoma. And without becoming responsible?

Mr. RUBEY. And without becoming liable.

The CHAIRMAN. The time of the gentleman has expired, and the question is on the amendment offered by the gentleman from Missouri.

The question was taken, and the Chairman announced the noes appeared to have it.

On a division (demanded by Mr. RUBEY) there were—ayes 58, noes 29.

Mr. GLASS. Mr. Chairman, I ask for tellers.

The CHAIRMAN. Tellers are demanded. The Chair will count. [After counting.] Seventeen gentlemen have arisen, not a sufficient number.

So the amendment was agreed to.

Mr. SHOUSE. Mr. Chairman, I offer an amendment to strike out section 15. Mr. Chairman, in offering this amendment I desire to say that section 15 was left in the bill contrary to the judgment of a number of the members of the committee. It was admittedly not a workable section as it appeared in the bill. It was indefensible as it appeared in the bill, and no member of the committee and no other man on the floor of this House has attempted to defend it. It was left there because one or two gentlemen thought that in certain remote section of the country it might prove of some advantage.

Now, as section 15 has been amended by the gentleman from Missouri [Mr. RUBEY] it will absolutely destroy the whole superstructure of the bill as originally formed, because it stands to reason that if the farmer can get a loan, through an agent created under the machinery suggested by the gentleman from Missouri, without assuming any liability of any kind, that farmer is not going to join a national farm-loan association, where he has to assume liability, and you might just as well do away with every other section of the bill if you are going to leave this section in the bill. I therefore believe, and have believed all the time, and believe now more firmly than ever, that the bill will be vastly improved, and I think it is even now made absolutely necessary, if section 15 be stricken out.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas.

The question was taken, and the Chairman announced that the noes appeared to have it.

On a division (demanded by Mr. SHOUSE) there were—ayes 22, noes 46.

So the amendment was rejected.

Mr. MANN. Mr. Chairman, is the time all exhausted?

The CHAIRMAN. No; there are four minutes remaining.

Mr. MANN. Mr. Chairman, I move to strike out the last word. I desire to ask a question. At the bottom of page 107 appears this language:

> No agent other than a duly incorporated bank, stock company, mortgage company, or savings institution, chartered by the State in which it has its principal office, shall be employed under the provisions of this section.

Why this discrimination made against the country national bank?

Mr. GLASS. What is the question?

Mr. MANN. Why is a discrimination made against the country national bank?

Mr. GLASS. Well, as a matter of fact, it was not seriously thought by many members of the committee that there was any necessity whatsoever for that section in the bill. It was not thought by many members of the committee that there would be a single community——

Mr. MANN. Well, I know; but why, then, do you discriminate? You must admit that there will be something done under it, and why did the committee discriminate against the country national bank?

Mr. GLASS. The idea of the proponent of the proposition was that the necessity, if any should arise for these agencies, would be in sparsely settled parts of the country where there were no national banks, but small State banks.

Mr. MANN. Well, they have small national banks now in a good many places. They are allowed to take savings deposits and to do the business of the community.

Mr. GLASS. Yes; but not in very small communities.

Mr. MANN. Well, I know of some national banks in what you would call very small communities.

Mr. GLASS. The minimum capital of a national bank, as the gentleman knows, is $25,000; and it was thought by the proponent of this proposition that if applied at all it would apply in sparsely settled and God-forsaken communities of the country where there are no national banks.

Mr. MANN. Mr. Chairman, I do not know whether this provision will apply, whether it will ever become operative or not. I do not see why the opportunity should not be given to see which will work the better. No one here certainly can predict how this law will operate or how the different features of it will operate; but it might provide different features, all of which are safeguarded, and if any of them operate it will be to the advantage of both the borrower and the lender.

Mr. GLASS. Well, I do not know. I marveled at the gentleman awhile ago, and a good many other gentlemen on that side as well as this side who voted for an amendment to the section that lopped away all the safeguards that this section had.

Mr. MANN. Oh, Mr. Chairman, you might just as well have put into this bill a provision that every farm mortgage should be guaranteed by every Member of Congress as to put in the one we struck out. That is the reason we struck it out; it was so very ridiculous.

Mr. GLASS. The gentleman will admit that loans ought to be guaranteed by some responsible person or institution, whether a Member of Congress or otherwise.

Mr. MANN. I admit, certainly, that there ought to be restrictions which make the loan safe and which will make the bonds issued against the loan so secure that you can get the money on them absolutely. I agree with the gentleman.

Mr. GLASS. If my friend will vote that way——

Mr. MANN. I have been voting that way more consistently, I think, than any other gentleman in the House.

Mr. MORGAN of Oklahoma. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment which the Clerk will report.

The Clerk read as follows:

Page 108, lines 5 and 6, strike out all in line 5, after the word "agents," and strike out all of line 6 and insert the following: "such compensation as may be prescribed by the Federal farm-loan board.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma.

Mr. MORGAN of Oklahoma. Mr. Chairman——

The CHAIRMAN. All debate on this section is closed.

Mr. MORGAN of Oklahoma. I want half a minute.

Mr. GLASS. Mr. Chairman, I call for the regular order.

The CHAIRMAN. The question is on the amendment of the gentleman from Oklahoma [Mr. MORGAN].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. GLASS. Division, Mr. Chairman.

The committee divided; and there were—ayes 25, noes 43.

So the amendment was rejected.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask for tellers.

Tellers were refused.

Mr. SMITH of Michigan. Mr. Chairman, I ask unanimous consent to present an amendment and for five minutes to talk on the amendment.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 109, after section 15, insert:

"That the Government of the United States shall loan to the Federal land banks created and established (and to all member banks of the present Regional Reserve System) such public money as may be needed to loan on real estate mortgages under this act at 3 per cent interest, such Government loans to be secured by Government bonds or other acceptable bonds or the real estate mortgage bonds issued under this act: *And provided*, That such Government money shall be loaned to borrowers under this act at 5 per cent interest."

The CHAIRMAN. The gentleman from Michigan [Mr. SMITH] asks unanimous consent to address the committee for five minutes.

Mr. GLASS. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard. The question is on the amendment of the gentleman from Michigan [Mr. SMITH].

The question was taken, and the amendment was rejected.

Mr. NORTON. Mr. Chairman, since the guaranty provision was stricken out, in lines 14 to 21, I offer an amendment that on page 108, in line 4, after the word "papers," all the line be stricken out and that all of lines 5 and 6 be stricken out.

The CHAIRMAN. The gentleman from North Dakota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 108, by striking out all of line 4, after the word "papers," and lines 5 and 6.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Dakota.

The question was taken, and the amendment was rejected.

Mr. FERRIS. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 107, line 23, after the word "by," insert "the Federal Government or."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. FERRIS].

The question was taken, and the amendment was agreed to.

Mr. LA FOLLETTE. Should not that be after the word "the" instead of after the word "by"?

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

JOINT-STOCK LAND BANKS.

SEC. 16. That corporations, to be known as joint-stock land banks, for carrying on the business of lending on farm-mortgage security and issuing farm-loan bonds, may be formed by any number of natural persons not less than 10. They shall be organized subject to the requirements and under the conditions set forth in section 5 of this act, so far as the same may be applicable: *Provided*, That the board of directors of every joint-stock land bank shall consist of not less than five members.

Shareholders of every joint-stock land bank organized under this act shall be held individually responsible, equally and ratably, and not one for another, for all contracts, debts, and engagements of such bank to the extent of the amount of stock owned by them at the par value thereof, in addition to the amount paid in and represented by their shares.

Except as otherwise provided, joint-stock land banks shall be subject to all the restrictions and conditions imposed on Federal land banks by this act, so far as such restrictions and conditions are applicable: *Provided, however*, That the Government of the United States shall not purchase or subscribe for any of the capital stock of any such bank; and each shareholder of any such bank shall have the same voting privileges as holders of shares in national banking associations.

No joint-stock land bank shall have power to issue or obligate itself for outstanding farm-loan bonds in excess of fifteen times the amount of its capital and surplus, or to accept deposits of current funds payable upon demand, or to transact any banking or other business not expressly authorized by the provisions of this act.

No joint-stock land bank shall be authorized to do business until capital stock to the amount of at least $250,000 has been subscribed and paid in cash and a charter has been issued to it by the Federal farm-loan board.

Farm-loan bonds issued by joint-stock land banks shall be so engraved as to be readily distinguished in form and color from farm-loan bonds issued by Federal land banks, and shall otherwise bear such distinguishing marks as the Federal farm-loan board shall direct.

Joint-stock land banks shall not be subject to the provisions of subsection (b) of section 4 of this act as to interest rates on mortgage loans or farm-loan bonds, nor to the provisions of subsections 1, 4, 6, 7, and 10 of section 12 as to restrictions on mortgage loans: *Provided, however*, That no loans shall be made which are not secured by first mortgages on farm lands within the State in which such joint-stock land bank has its principal office. Such joint-stock land banks shall be subject to all other restrictions on mortgage loans imposed on Federal land banks in section 12 of this act.

Joint-stock land banks shall in no case charge interest on farm loans exceeding by more than 1 per cent the rate of interest established for the last series of farm-loan bonds issued by them.

Joint-stock land banks shall in no case demand or receive, under any form or pretense, any commission or charge not specifically authorized in this act.

Each joint-stock land bank organized under this act shall have authority to issue bonds based upon mortgages taken by it in accordance with the terms of this act. Such bonds shall be in form prescribed by the Federal farm-loan board, and it shall be stated in such bonds that such bank is organized under section 16 of this act, is under Federal supervision, and operates under the provisions of this act.

Mr. SMITH of Michigan, Mr. MOORE of Pennsylvania, Mr. OLIVER, and Mr. GLASS rose.

The CHAIRMAN. Does the gentleman from Virginia [Mr. GLASS] desire recognition?

Mr. GLASS. Mr. Chairman, this is a very important section of the bill, and I am perfectly willing to have it debated in a serious way, and I would like some agreement as to time.

Mr. MANN. I do not believe it would be wise to try to fix the time just at present.

Mr. GLASS. It is an important section of the bill, and I do not want to cut off debate unnecessarily, but I would like to have some understanding if we can reach one.

Mr. MANN. Suppose we let it run a little bit, and then we could get some idea as to how many amendments are offered, and whether they are simply motions to strike out, or otherwise.

Mr. GLASS. How would it do to agree to close debate on this section and all amendments thereto at 3 o'clock, which would be one hour and a half?

Mr. MANN. And then somebody might make the point of no quorum.

Mr. GLASS. The time to be divided equally.

The CHAIRMAN. The gentleman from Virginia [Mr. GLASS] asks unanimous consent that all debate on this section and amendments thereto be closed at 3 o'clock, one-half of the time to be controlled by the gentleman from Virginia and one-half of the time by the gentleman from Illinois [Mr. MANN]. Or, would it be the gentleman from New York [Mr. PLATT]?

Mr. MANN. I think we had best make it an hour on a side.

Mr. GLASS. I think we can conclude the debate in an hour and a half. I think that ample time, and I hope that the gentlemen on that side will agree to it.

Mr. MANN. I hope that my distinguished friend from Virginia will agree to an hour on a side.

Mr. GLASS. I will say to the gentleman that we want to get through with this bill to-day.

Mr. MANN. I fully cooperate with the gentleman, but after all it is more important to have a good bill than it is to dispose of it in a minute.

Mr. GLASS. Let us say two hours.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close at 3.30 o'clock, one hour to be controlled by the gentleman from Virginia himself and the other hour to be controlled by the gentleman from New York [Mr. PLATT]. Is there objection?

Mr. COX. Reserving the right to object, Mr. Chairman, I want five minutes.

Mr. JOHNSON of Washington. I object, Mr. Chairman.

Mr. MILLER of Pennsylvania. With the understanding, Mr. Chairman, that there will be objection to anybody that gets up getting more time. [Laughter.]

Mr. GLASS. Then I move, Mr. Chairman, that all debate on this section and amendments thereto close in 1 hour and 30 minutes.

Mr. MANN. I move to amend that by making it two hours.

The CHAIRMAN. The gentleman from Virginia moves that all debate on this section and amendments thereto close in one hour and a half, and the gentleman from Illinois [Mr. MANN] moves to amend that motion by making it two hours. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The question was taken; and on a division (demanded by Mr. GLASS) there were—ayes 43, noes 42.

Mr. GLASS. I ask for tellers, Mr. Chairman.

The CHAIRMAN. Tellers are demanded.

Mr. MANN. I make the point of order, Mr. Chairman, that there is no quorum present. If gentlemen want to filibuster, we will accommodate them. If they want to do that, they will have to keep a quorum here all afternoon.

The CHAIRMAN. The Chair will count.

Mr. MANN. I submit that the Chair has counted.

The CHAIRMAN. The Chair has counted. One hundred and one gentlemen are present. The gentleman from Virginia asks for tellers.

Tellers were ordered, and the Chairman appointed Mr. GLASS and Mr. MANN to act as tellers.

The CHAIRMAN. All in favor of the amendment of the gentleman from Illinois to close debate on this section in two hours will pass between the tellers.

The committee again divided; and the tellers reported—ayes 64, noes 59.

Mr. MANN. Mr. Chairman, two gentlemen who voted in the affirmative have stated that they intended to vote in the negative. We have no authority to change it. It can only be done by unanimous consent.

Mr. SIMS. Mr. Chairman, I will state that so far as I am concerned personally I went through on the side that closed debate.

Mr. MANN. The gentleman was correct about that.

Mr. SIMS. I did it with the understanding that it was the same as it was the other day. I want to change my vote from the affirmative to the negative.

Mr. MANN. I ask unanimous consent, Mr. Chairman, that the two affirmative votes be subtracted from the ayes and added to the noes.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the two affirmative votes be subtracted from the ayes and added to the noes. Is there objection?

There was no objection.

The CHAIRMAN. The vote stands ayes 62, noes 61.

So the amendment was agreed to.

The CHAIRMAN. The question is on agreeing to the motion as amended.

The motion as amended was agreed to.

Mr. MANN. I ask unanimous consent that the time be controlled equally by the gentleman from Virginia [Mr. GLASS] and the gentleman from New York [Mr. PLATT].

The CHAIRMAN. The gentleman from Illinois asks unanimous consent that the time be equally divided between the gentleman from Virginia and the gentleman from New York. Is there objection?

Mr. WINGO. Mr. Chairman, I object to any further unanimous-consent agreements.

Mr. OLIVER. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Alabama [Mr. OLIVER].

The Clerk read as follows:

Amendment by Mr. OLIVER: Strike out all of section 16.

Mr. OLIVER. I will ask the Chairman to give me 10 minutes. I will probably not use it. Mr. Chairman and gentlemen of the committee——

The CHAIRMAN. The committee has decided to have two hours' debate on this amendment upon the theory that it is at least of some importance and that the Members are interested in it. The committee will preserve order while this discussion is going on.

Mr. JOHNSON of Washington. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JOHNSON of Washington. Is the debate to be in five-minute periods?

The CHAIRMAN. That is true.

Mr. SMITH of Michigan. How is that to be controlled—that time?

The CHAIRMAN. The Chair will recognize gentlemen. The gentleman from Alabama [Mr. OLIVER] is recognized.

Mr. OLIVER. Mr. Chairman, in recent years there has been a compelling demand that this Government establish a modern system of rural credits. The three great parties in the campaign of 1912, responding to this widespread demand, solemnly promised it in their respective platforms.

The farmers are asking no gifts, no charity, but simply just legislation whereby the collective credit of the farmers of the Nation can be brought together in a sound, business way, so that it will command money on long terms at a low rate of interest, with repayment on the amortization plan. All agree that the security which the farmer has to offer entitles him to such credit. The Sixty-third Congress struggled with the question throughout its sessions without reaching an agreement on the legislation best suited to accomplish the results desired. The chief cause was the failure of the Senate to concur in the strong, persistent—and, in my opinion, wise—insistence of the lower House that Government aid should be extended in the inauguration of the system, and which came to be denominated as the "House" or "Bulkley" plan.

It is very gratifying to now find a general agreement between Senate and House on the real necessity of substantial Government aid, this being evidenced in the bill recently passed by the Senate, and also in the one now being considered by this House, but neither provides the amount of aid which should be and could be safely extended. The present bill, in many respects, does not meet with my approval, and I have tried and will continue to try to amend it, if possible, but am frank to say that even if all amendments fail I will still vote for it, since it is unquestionably a good start in the right direction. If it has defects which the House may now fail to recognize and remedy, such defects will be clearly shown in the actual try-out test and can be provided for by subsequent legislation.

Section 16, now under consideration, deserves careful thought and study, and my examination of it forces me to conclude that this section is not only unnecessary but that it is a serious, yea, actual menace, to the successful operation of the larger, the more comprehensive plan herein proposed, and the real plan emphasized, stressed, and urged by the committee.

It will be noted that two entirely different, distinct, and independent plans are here proposed for assembling the credit of farmers and offering it to investors on term loans ranging from 6 to 36 years, at a rate of interest not to exceed 6 per cent, including administrative charges, and repayable by amortization.

In the short time I have, these plans can only be referred to in a general way for the purpose of contrasting the two.

One plan provides that the whole territory of the United States shall be divided into 12 districts and a Federal land bank established in each, having a minimum capital of $750,000, which shall be subscribed for by the Government, unless taken by others within 60 days from date of authorization. These 12 land banks are brought in touch with the farmer borrowers through local national farm-loan associations, the membership of which is limited to farmers desiring loans on their farm lands, each borrower being required to take stock to the amount of 5 per cent of his loan and to assume an additional responsibility equal to the par value of such stock. These borrowers, in the course of time, will be the sole stockholders of the 12 Federal land banks, and will control, own, and direct the same. Every bond issued by any one of these banks will have as a pledge for its repayment first mortgages on lands properly appraised and held by the 12 Federal land banks, the said mortgages securing notes equal to the face value of all bonds issued by the Federal land banks; and, in addition to this, the assets and capital stock of all Federal land banks and their subordinate organizations will stand as further security for the redemption of said bonds. This, then, becomes a system nationwide, both in the scope of its operation and in the benefits promised. If the plan is practical and workable—and the committee assures us it is—then the securities thus offered for sale represent the safest, best, and highest ever offered to investors in any country. Behind these securities there stands as a mobilized pledge the collective credit of the farmer borrowers of the Nation, secured by first mortgages on lands carefully appraised, examined, and approved under Government supervision.

To insure ultimately the lowest rate of interest that such gilt-edged securities should command, the Federal farm board provided for in the bill is given control and supervision over these banks, with implied direction to regulate and reduce the

administrative charges and the rates of interest to borrowers, and to establish uniformity in such rates just as soon as the market price of the securities sold from time to time will justify. To protect the system against land speculators, loans can only be made to borrowers who are or immediately expect to become farmers, and no one can borrow more than $10,000, and this only for four specified productive purposes. Fraud in securing loans, or the using of any part of the loan for purposes other than those authorized, is made a criminal offense, subjecting the borrower to severe civil and criminal penalties.

This, then, can be truly denominated the "farmers' system," organized, owned, controlled, and managed by farmers, solely for their benefit, and designed to secure a credit market for farmer borrowers on long time at the lowest possible rate of interest that gilt-edged securities will command. To show the importance and emphasis placed on this system by the framers of the bill, it may be remarked that 30 out of 31 sections of the bill are devoted to providing primarily for the organization and operation of this cooperative farmers' system, whereas only one section, to wit, section 16, is devoted to what is denominated "joint-stock banks" privately owned and profit sharing.

Let it be clearly understood now that this system of banks proposed by section 16 controverts and is directly opposed to every sound, well-recognized principle underlying rural credits, and on which the other system proposed in this bill is founded.

Joint-stock banks organized under this section will primarily be for the benefit of the investors and not the borrowers. They are only State-wide in scope of operation and in the benefits promised. The stock of such banks can be owned by anyone, with no limit on individual holdings—a certain limited tax exemption is given by section 23. No restrictions are placed either on the purposes for which loans may be made nor on the amounts that can be loaned. No penalties or restraints of any kind are imposed on borrowers so as to prevent land speculation. The maximum interest rate is the only limitation placed on interest rates, and the Federal farm board is expressly denied the right to regulate, fix, and make uniform the rates of interest and administrative charges of joint-stock banks.

No reasons are assigned by the committee for making these discriminations and exemptions in favor of joint-stock banks. Thus favored and unhampered, in every State where they may be organized, they will be brought in direct competition, as a Government agency, with the local national farm-loan associations, which constitute the initial source and basic strength of the Federal land-bank system.

One is stimulated by the sense of gain and profit to its stockholders, who are investors desiring the maximum rates of interest; the other is stimulated to action alone by the patriotic and altruistic motives of its members to secure the lowest possible rate of interest for farmer borrowers, as admitted by a member of the committee in reply to questions propounded a few days since.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HEFLIN. Mr. Chairman, I ask unanimous consent that my colleague may proceed for five minutes.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent that his colleague may proceed for five minutes. Is there objection?

Mr. JOHNSON of Washington. Mr. Chairman, reserving the right to object, I want to ask if the gentleman voted against the amendment giving two hours' debate?

Mr. MANN. He did.

Mr. JOHNSON of Washington. I object.

Mr. MANN. I hope the gentleman will not do that.

Mr. JOHNSON of Washington. Well, reserving the right to object, I want to say that I dislike to see the time used up by gentlemen who voted against two hours' debate. I withdraw my objection.

Mr. FOSTER. That is hardly fair; the gentleman from Alabama had a right to vote as he saw fit.

A MEMBER. And the gentleman from Washington has a right to object if he sees fit.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. OLIVER. In those States where interest rates are now low, and where, in some instances, joint-stock banks are already organized and doing business, probably in anticipation of this legislation, sections 16 and 23 of this bill will offer great advantages to joint-stock banks, and they will quickly incorporate and qualify under the provisions of this bill. It is my fear that local national loan associations, with certain safeguards and handicaps imposed on them, which are not imposed, as I have heretofore pointed out, on joint-stock land banks, will be unable to compete with these private institutions. Just to the extent that desirable loans of farmer borrowers are taken from the Federal land banks, to that extent you weaken the Federal land-bank system.

Mr. MOSS of Indiana. Will it bother the gentleman if I interrupt him?

Mr. OLIVER. Oh, no.

Mr. MOSS of Indiana. Does the gentleman believe that under present conditions it will be possible for a joint-stock land bank to start out at a lower rate than 6 per cent?

Mr. OLIVER. In some States, yes; and I understand there are joint-stock banks, some of which are located in the gentleman's own State, which are already organized and prepared to take advantage of and qualify under section 16 of this bill. They have manifested no opposition to the bill for the very good reason that, as I have pointed out above, it extends many favors and advantages to them and places them in a position where they can greatly discourage, if not prevent, the organization of local farm-loan associations, as proposed in the other system set forth in this bill.

The committee, of which the gentleman is a member, in its report emphasizes the importance of farm-loan associations being organized in every State in the Union, and forcibly points out how the Federal land-bank system, thus organized in every State, will be the means of reducing the interest on farm loans to a low average rate in all States and eventually enable the Federal farm board to establish a stable and uniform rate. You have expressly denied this power to the Federal farm board over joint-stock land banks. To answer the gentleman further let us take a supposed case. The joint-stock bank is organized under this bill, we will say, in Indiana; it is thereby granted valuable tax exemptions; it can lend money in any sum, limited only to an amount equal to fifteen times its capital stock, the minimum capital stock being $250,000. No restrictions are placed by the bill on the purposes for which the loan is obtained nor the uses to be made of it by the borrower. The borrower is not required to take stock in the joint-stock bank in order to secure a loan nor to assume any liability other than the promise to pay the amount borrowed. Now let us assume that this joint-stock bank learns that a borrower is considering filing his application for a loan with the Federal land bank through one of its local national-loan associations. The joint-stock banks at once say to the borrower, "File your application with us; you are not required to take any stock in order to get your loan nor to assume any stockholder's liability. Furthermore, we will not ask you for what purposes you are borrowing the money, and no limitation will be imposed on your use of the money. You can never be subjected to the possibility of a criminal prosecution because you have diverted or may be reported to have diverted a part of the fund borrowed from the purposes which the national farm-loan association can alone lend it to you for. The administrative charges and expense will be the same, and we will only charge you the maximum rate of interest fixed in the bill."

To whom do you think this borrower would apply for his loan? Certainly not at first to the national farm-loan association. The danger is that the Federal land-bank system is untried and unestablished, and they can not offer at first to the borrowers any lower rate of interest than the maximum rate of 5 per cent fixed by this bill. This rate is on its face a reasonable rate, and the farmer will perhaps be willing to continue borrowing at this rate, especially where he is not subjected to the restrictions and conditions imposed on him by the Federal land-bank system. It is probably true that joint-stock banks will not at first be organized in States where a 6 per cent rate, including administrative charges, does not now prevail; but, as I have before pointed out, even if at first they are limited to a few States, they weaken the other system provided for in this bill, and under which, in States where a high rate of interest now prevails, borrowers may organize.

The essential difference between the joint-stock banks and the Federal land banks, as proposed in the bill, is this: That while both will probably charge the maximum rate of interest and administrative charges fixed by this bill to borrowers at first, yet the Federal land-bank system will, if it can have the active support of the farmer borrowers of the Nation, such as is contemplated in the bill, eventually establish a rate of interest for farmer borrowers much lower than the maximum rate fixed in this bill, and some members of the committee have even prophesied that it will eventually approximate the low rate of interest now enjoyed by our National Government. I am opposed to granting favors under this bill to private, profit-sharing institutions, who, when they once become intrenched under the favors extended hereby, will oppose all efforts that may hereafter be made to so amend the bill as to remedy any defects or shortcomings that its trial may demonstrate. If all effort and in-

terest can at first be centered on the Federal land-bank system, which you emphasize and stress as most important, I entertain strong hope that it will, in the course of time, prove a great benefaction to the farmers of our Nation and meet the very urgent need of a banking system whereby loans can be quickly and readily obtained on good farm mortgages on long terms, at a low rate of interest, repayable on the amortization plan.

In conclusion, I desire to say that I know that the motives which have prompted the committee have at all times been high and patriotic, and they have given unrelentingly of their time and labor to the preparation of this bill. If the bill has defects—and I feel it has—these defects are merely mistakes of judgment and probably superinduced by an overeagerness to reconcile the many divers and conflicting views submitted for their consideration, so as to best insure the passage of this important legislation without further delay. Whatever the shortcomings of the bill may prove to be, I hope the great farming interests, whose immediate needs it is designed to serve, will cherish the belief that these shortcomings will be speedily corrected by legislation hereafter. If the Federal land-bank system herein proposed is to be successful, then this is its message to rural communities:

Whatever you need, get together; organize yourselves; help to work out this plan, if feasible, and start it going.

The foundations of this plan are as broad as the country itself. It offers a cooperative plan of combining the forces of the farmers of the entire Nation and of the investment funds of the world for the common purpose of improving our agricultural conditions. It proposes to assemble the collective credit of the borrowing farmers of every section behind the obligation of the individual farmer so as to make his obligation pass current as a "courier without luggage" in the investment markets of the world. If it proves a success there will be a mere minimum of risk, and the farmer will be protected and provided for in one of his now most pressing needs and the investor will be as certain of the payment of his principal and interest as human foresight can make it. [Applause.]

Mr. JOHNSON of Washington. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JOHNSON of Washington. In order to secure five minutes under this limitation for debate, how does a Member proceed?

The CHAIRMAN. The Chair has been taking cognizance of what was going on and he has seen the gentleman from Washington rise twice, manifesting a disposition to talk, and so he has put him down on the list. [Laughter.]

Mr. JOHNSON of Washington. I thank the Chair. I have been trying to be recognized for four days.

Mr. McFADDEN. Mr. Chairman, I desire to call the attention of the committee to a few facts that are particularly pertinent just at this point in this discussion of the rural-credits bill. The gentlemen who went abroad, known as the American commission, to study the rural-credits plans in operation over there know very well from the results of their investigations of the various systems—and in this connection a very exhaustive and complete investigation was made, and their report has been filed and has guided the members of the joint commission, the committee which originally prepared the bill now under discussion—that where the association plan and the joint-stock plan were in operation side by side, the joint-stock plan is becoming the more popular of the two, and because of this fact is gradually driving the association plan out of existence, simply being a case of the survival of the fittest.

Now, the gentleman from Indiana [Mr. Moss], who is probably the best posted man on rural credits in the United States to-day because of his exhaustive study of this subject, having been a member of the joint commission appointed by the President in 1913 and later a member of the joint conference of the Senate and House, which held many hearings on this subject, and who is now and has been continuously during this rural-credits discussion a member of the Banking and Currency Committee, because of all of this he became an accepted authority, and is partial to the joint-stock plan of rural credits, and I believe would concur with me when I say that this joint-stock section creating joint-stock land banks, known as section 16 of this bill, is the most important part of the bill, and the gentleman's investigations, as well as the reports of the commission on file, of these European systems confirm this.

In the method of operation the joint-stock land bank is so much more simple that the prospective borrower invariably will choose these banks in preference to an association plan, and if these two systems should be started side by side in this country there is no question but that the joint-stock land banks would become so popular that the association plan would not develop, and in view of the many uncertainties of the workableness of this association plan in this bill, as has been evidenced by the many criticisms and the exhaustive debate of the many features contained therein, I want to ask this committee if it would not be better, in view of all this, if this bill were not recommitted to the Banking and Currency Committee for the purpose of perfecting a bill which we could all unitedly support, and thus fulfill the pledges which have been made by all the leading parties in their party platforms, which was referred to by the Speaker of this House [Mr. CLARK] in his very able address on this subject on Saturday last?

While I am opposed to and am criticizing many features of this bill I have done so with just and nonpartisan motives, because I appreciate fully the need in this country of proper rural-credits legislation. I sincerely believe that certain portions of the bill if enacted into law will be unworkable and obsolete. I believe we have the opportunity to correct and enact a proper rural-credits bill. A bill to fulfill the purposes should be so drawn that any farmer in good standing who wants to borrow 50 or 60 cents on a dollar of the value of his farm, may have an opportunity to do so, and that any worthy man who has by initiative and industry saved out of his earnings 40 or 50 per cent of the value of a farm he purposes to buy should be able to do so without embarrassment. I reiterate that I can not see in this bill much hope for the poor tenant farmer except the incentive held out to him to save and create the thrift habit with the full knowledge that when he has by diligent care and saving accumulated 40 or 50 per cent of the price of a farm he can go to one of these land banks and get the ballance of the money to complete his purchase. There is a serious question in my mind that if you go further than this with the tenant farmers you are not creating a condition of philanthropy, pure and simple, and whether this would be a proper function of government, I have some doubt. I believe the bill should be recommitted with instructions to the committee to strike out all of those clauses in the bill pertaining to the organization of Federal land associations and change the bill, taking out all inconsistencies, enlarging somewhat the function of the joint-stock land-bank section so that these joint-stock land banks can be started in any State of the Union where there is a demand for loans of the kind contemplated in this act, and thus to enact a bill that will be workable.

I believe it is quite possible to perfect this plan to enable it to do for the country the very thing which we all have been aiming for, namely, a simple and adequate rural-credits system for the American farmer worthy of the greatest lawmaking body in the world, the Congress of the United States.

Why not live up to our splendid traditions and in doing so bury all partisan feeling and work out a proper system now rather than a makeshift or create superfluous machinery which will not run. There are many ideas in the minds of the farmer as to what rural-credits legislation means to him, and if this bill does not come somewhere near meeting at least some of the requirements and expectations of the farmer the Members who are responsible for the enactment of this bill in this form will have a good deal of explaining to do. Would it not, therefore, be better to so change this bill that we will know beyond all question that it will do for the farmer what has been promised? [Applause.]

I desire to point out further the danger of referring this measure in its present status to a joint conference of the Senate and House for agreement, taking into consideration the fact that in the consideration which this House has been giving to this bill they have substituted the House bill, which is known as the Moss bill, for the Senate bill, known as the Hollis bill, and that in the Senate bill are many very objectionable features, and some of them may prevail and be made a part of this bill, to further encumber the working of the measure.

While I have great confidence in the men who will probably compose the committee that the Speaker will appoint, if he follows the usual custom, I am just a little fearful, under the guise of political expediency, as to the final draft of this bill when it emerges from the joint committee. I therefore urge that this bill may be recommitted to the committee for the purpose of eliminating the loan-association plan of the bill, and thus do away with the 12 district land banks with their Government-subscribed capital of $750,000 each, or a total of $9,000,000. If this were to be done, I could see my way clear to support this bill, because I am in favor of a proper bill on rural credits.

Mr. COX. Mr. Chairman, in my judgment the Banking and Currency Committee of the Sixty-third and Sixty-fourth Congresses will go down in history as reporting more wise, con-

structive financial legislation than any other committee in this House for the last quarter of a century. In the Sixty-third Congress it reported the Federal reserve act, so important, so good, and so strong that it commanded practically the solid Republican vote on that side. When I speak of the Banking and Currency Committee I do not reserve to my party all the credit that flows from it. It has upon it many able, honest, patriotic gentlemen on the other side of the Chamber who have worked for the interest of and the welfare of the country. For many years there has been a demand for rural-credits legislation.

This committee, beginning practically three years ago, worked in season and out of season, and it has brought a great, constructive bill before the Congress of the United States for its adoption. The bill may not be perfect; indeed, it would be strange if it were perfect; but it at least contains the skeleton of structural work for a great bill upon which Congress in the future can legislate to the end that eventually we will get a rural-credits system peculiarly fitting American conditions. This bill has been divided into two sections—not sections, either, for that is an unhappy turn—but two divisions have been made, one which aims to work and operate in a cooperative way through national farm-loan associations and the other which aims to operate and aid people through a joint stock bank plan. Judging from what various Members have said, it seems to me there are diverse conditions existing in various sections of the United States. I do not believe the cooperative plan outlined by the bill will do the farmers in the State of Indiana any good. That is my candid judgment about it. I have heard astounding statements made here that men are charged all the way from 10 to 20 per cent interest on mortgages in the South. I undertake to say that there are but few, if any, sections in the whole State of Indiana where the farmers can not get all the money they desire upon first mortgages at rates from 5 to 6 per cent, without any commission. That being true, I do not believe the cooperative plan will appeal to the farmer of the State of Indiana, because under that plan there is considerable machinery through which he must travel before he finally gets his loan from the Federal loan board. If there is any provision, therefore, which will benefit the farmer of the State of Indiana—and I take it that that is substantially true throughout the Northeast and the North—it is in this section 16, and I sincerely hope the section will not be stricken from the bill. [Applause.]

Mr. CANNON. Mr. Chairman, I am clearly in favor of the joint-stock land-bank scheme contained in section 16. The other part of the bill is not going to help the man whom gentlemen here claim. If the landless man has 40 per cent of enough to buy a farm, whether it be small or large, he can buy it under the provisions in section 16 to a much better advantage than he can under the cooperative section of the bill. I said the other day, and I repeat it, that I have had no petition, no letter from my district asking me to support this bill. Section 16, which provides for the joint-stock land bank, does not provide that the Government shall finance the bank, it does not provide that the Government shall relieve its stock from taxation, and in my judgment if you would amend it in one respect so that the banks under section 16 might operate anywhere in the United States, then you gentlemen in the Southland, where you say your interest rates are too large, would get your money at not exceeding 6 per cent, and under the regulations of the farm-loan board you will have it at less than that. I would be glad to vote to amend section 16 as indicated. The gentleman from Alabama [Mr. STEAGALL] said a little while ago that for 10 miles in his country you could go along and not get enough people together to organize a cooperative land bank, and therefore he desired to have the money paid direct upon the visé of the country postmaster.

I say again I hope I shall have an opportunity to vote to amend section 16 or to amend the bill so that joint-stock land banks may loan anywhere in the United States. Why restrict their operations to one State? Take our insurance companies, with forty millions of policies covering $20,000,000,000 of risk. Take the Northwestern Life Insurance Co. and all of our insurance companies and our trust companies. They would be very glad to have these bonds at 5 per cent, and under section 16 one bank is not responsible for another, and the stock under section 16 is not exempt from taxation, as under the other portions of the bill, where you organize under the cooperative system.

Mr. HAUGEN. The bondholder is exempt from taxation.

Mr. CANNON. The bond is exempt from taxation.

Mr. HAUGEN. In that way it discriminates against State institutions. The purchaser of a bond in a State institution pays taxes, and under this he is exempt.

Mr. CANNON. Yes. But the bond, under section 16, is exempt from taxation, and the stock of the bank is not exempt from taxation.

Mr. MOSS of Indiana. And the income is not exempt from taxation under section 16.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. FINLEY. Mr. Chairman, it strikes me that section 16 of this bill is wrongly named. It should be the national building and loan association. The gentleman from Illinois [Mr. CANNON], I think, is mistaken when he says that mortgages, and so forth, of joint-stock land banks will be subject to taxation. Section 23 provides, among other things:

EXEMPTION FROM TAXATION.

SEC. 23. That every Federal land bank and every national farm-loan association, including the capital stock and reserve or surplus therein and the income derived therefrom, shall be exempt from Federal, State, and local taxation, except taxes upon real estate held, purchased, or taken by said bank or association under the provisions of section 11 and section 13 of this act. First mortgages executed to Federal land banks, or to joint-stock land banks, under the provisions of this act, shall be deemed and held to be instrumentalities of the Government of the United States, and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation.

Farm-loan bonds issued under the provisions of this act and the income derived therefrom shall be exempt from Federal, State, and local taxation.

If that does not exempt mortgages——

Mr. MOSS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. FINLEY. I have only five minutes. The gentlemen can have ample time.

The CHAIRMAN. The gentleman declines to yield.

Mr. FINLEY. Mr. Chairman, if that does not exempt joint-stock land-bank mortgages from taxation, then the language I have read should be changed. So, in its last analysis, with section 16 in the bill there will be a contest between those who wish a higher rate of interest than will be received under the Federal land-bank provisions. I have no doubt in my own mind that after the system is in operation and at work 5 per cent interest will be ample, and more than that will not be charged. Under the joint-stock land-bank provision they are limited in one respect. They can only charge 1 per cent interest on farm loans in excess of the interest rate on the last issue of the bonds. The interest is limited in the bill elsewhere, I believe, at 6 per cent.

Very well, that simply means this, that they can raise that interest when they make a subsequent issue. They are entirely exempt from the limitations imposed by this bill on the Federal farm-loan banks in many respects.

Often there is criticism here and elsewhere that sufficient time is not allowed for debate on a bill of such far-reaching importance as is the rural-credits bill now under consideration. The time allowed for general debate on this bill is six hours. If this time should be equally divided amongst the 435 Members of the House, the time given to each Member would be less than one minute. This country, with its 100,000,000 population, its vast area of territory, and possessing nearly one-half of the wealth of the world, means that the measures to be dealt with by Congress are numerous and of the greatest importance. There will probably be from thirty-five to forty thousand separate bills introduced during the present term of Congress.

The bills making appropriations for the support of the Government during the next fiscal year will probably carry more than $1,250,000,000. In addition to this, there is a vast amount of new legislation carrying out the policies of the present Democratic administration; amongst these may be mentioned the Philippine Island bill, the Porto Rican bill, the Army and Navy bills (reorganizing, to a large extent, the Army and Navy), the good-roads bill, the water-power bill, the shipping bill, and the rural-credits bill now under consideration, and many other important measures I might mention. The result of all this is that legislation is prepared in committee rooms by the various committees of the House.

The important points to be considered in any rural-credits legislation is, first, the necessity for it; second, the security; and third, the rate of interest and payment of the principal.

I do not believe that there are six men in the House or Senate who are entirely satisfied with each and every provision in either the House or the Senate bill. When the legislation is finally enacted, it will be found that in many particulars the law should be amended.

Two systems or plans are provided for in both the House and Senate bills for the purpose of enabling the farmer to borrow money at a low rate of interest; first, Federal land banks and joint-stock land banks. I would be better satisfied if the Federal land-banks scheme were less complicated and the joint-

stock land-banks scheme were eliminated from the bills. The joint-stock land-banks scheme amounts to very little more than a national building and loan association with large powers and to a large extent exemption from all taxation. The Federal land banks have exemption in the matter of taxes. This will enable the bonds, carrying a low rate of interest, to be sold profitably. But the fact remains that the Federal land banks, although giving better terms in the matter of interests and payments of principals, will, on account of the national farm-loan association being able to offer inducements in loaning money for purposes not permitted under the Federal land-banks scheme, will make the latter a competitor of the former. However, time and experience will show the weak points, if any, in both systems.

Rural-credits legislation should be free from the taint of party politics.

Debt is one ill that is shared by a majority of men. Particularly is it true of the farmer. He has to save money first to buy his farm, and then to make his crop; and if he has not got the money, what must he do if he is not to borrow it? So many things enter into the possibility that he will be able to meet his obligations—wind, rain, too much or too little sun, a backward season, any number of things over which man has no control, but which have great control over man. The farmer gets behind in his interest; he must have renewals, and he ends very often by paying exorbitant interest charges. So far, nothing has been done by the Government for his relief along lines most needed, and rural-credits legislation is the only relief.

The United States is the last of the great nations to take up the all-important question of rural credits. The most important matter confronting any people is the maintenance of an adequate food supply, and this can be done only by a prosperous and contented rural population. The most startling development of the last 25 years has been the phenomenal growth of our cities. This has been somewhat at the expense of the farms, though not to such an extent as to give cause for great concern as yet. The countries of Europe have recognized the necessity for improving conditions for the farmers, who in turn are responsible for the food production of the country. The United States, through the Department of Agriculture, has been doing something of late years in the way of dispensing information, conducting experiments, and so forth, for the farmer along agricultural lines and better roads.

But there remains the question of credit for the farmer, and about this as yet nothing has been done. There are in this country about 12,000,000 farmers; the value of their farm property, including animals, amounts to $40,000,000,000. The value per annum of all farm products is about $10,000,000,000, and it has been estimated that the average gross income of a farmer in this country is $791. A large part of this is consumed on the farm; the remainder is sold, and out of the proceeds the farmer must pay all expenses incurred, including his debts or interest on same, if any. It has also been estimated that the farmers owe about $6,000,000,000, over two billions of which are secured by mortgages on their homes and farms. They pay interest at rates ranging from 6 per cent to 25 per cent per annum in the form of interest, commissions, lawyers' fees, and renewal charges making an estimated annual interest charge of $510,000,000, which is equivalent to a rate of about 8½ per cent. These figures are taken from reports of legislative committees and public officials, and I have no doubt of their accuracy. The rates vary in the different sections of the country—low rates in the northern section east of the Mississippi River, high in the section west of this river and in the Southern States.

This high rate of interest shows at once the heavy burden of debt carried by the farmers. This burden could be greatly lightened by securing money at more reasonable rates of interest. Only in the United States, of all the great countries of the world, must the farmers go into the money markets in competition with business men, whose profits are made in a shorter time, and, not being so largely dependent on the seasons, are made with greater certainty. Other countries provide a means for the farmer to borrow money for strictly agricultural purposes at rates of interest that make probable to the farmer some profit on the year's work. There is no reason why farmers should not borrow money without difficulty on first mortgages at 4 and 5 per cent, and, at most, 6 per cent. And this is what rural-credits legislation proposes to accomplish. It would save to the farmers at least $250,000,000 a year in interest charges alone. The plan is to issue bonds to the amount of the mortgages, sell the bonds to obtain money, loan this 20 times in all.

The Democratic Party, the Republican Party, and the Bull Moose Party have declared in their party platforms in favor of this legislation. It was attempted in the closing days of the last Congress, and it is confidently expected that at this session we will see a rural-credits bill enacted into law. What will be its exact form no one can say, as the Senate has passed a bill and the House is substituting its bill for that; but, to be a success, it will undoubtedly be with Government aid, money, or credit, and governmental supervision and control; with this the rate of interest should not exceed 5 per cent.

It is the object of rural-credits legislation to make money available on good farm loans at a low rate of interest anywhere in the country. Money will be loaned only on first mortgage, where the title is good, and it will be loaned only to the extent of 50 or 60 per cent of the carefully appraised value of the land. The Government will prevent speculation by allowing only a given amount—not more than $10,000—to be loaned to any one person, and only for certain specified agricultural purposes. With these first mortgages as security, and under strict Government supervision, farm-loan bonds will be issued which will find a ready market on a 4 per cent basis. Thus the loans may be made to the farmers mostly at 5 per cent at the outside. Rural credits will make possible the loaning of money to the farmer on long-time credit. All loans under such a system will be on the amortization plan; that is, a small sum to be paid on the principal with every payment of interest, so that at the end of 5, 10, 20, 30, or 36 years the last payment of interest will also be the last payment of the principal. In other words, the principal must be decreased gradually. That will be one of the greatest benefits of rural credits; it will make the repayment of debt no hardship, because only a small part must be paid at any one time. No bank or private money lender would want his money repaid to him in such small sums over a long term of years; but that is what rural-credits legislation will make possible. With the Government behind the rural-credits system, and the Torrens land-title law in operation, it will prove an entirely safe proposition and will be a success, as it has already proved to be in other countries, notably Germany.

The proposed rural-credits legislation is intended to supplement the Federal reserve act, and to do for the farmers what that act has done for the benefit of banks and commercial men. The Government owes it to the farmers to provide facilities for credit on proper security. This the farmers can not always get at this time; or if they can, the rate of interest charged is so high that it is extremely difficult, and often impossible, to make a profit on the investment. What rural-credits legislation will do will be to mobilize the resources of the great farming class and make them serve their possessors as a basis in securing credit—one of the most necessary factors in any enterprise. The majority of the farming class of the country want legislation of this sort passed, and until proper relief is had the rural-credits issue will not down, but the political party or parties refusing this relief will go down to defeat.

The principle underlying rural-credits legislation as passed in the House and Senate bills is that farmers may borrow, with their land as security, money at a low rate of interest for such period of time, not less than 5 years nor more than 36 years, as the farmer may wish. In addition to the interest, he is required to make a payment on the principal, and the payments, principal and interest, are so arranged that he makes some payment each year on the principal during the time the loan runs. As to how much the payment on the principal shall be annually rests with the farmer at the time he secures the loan. If the loan is for a long period of time, the annual payment will be comparatively small; if the loan is to run only for 5, 10, or 15 years, the annual payment will be correspondingly higher. In other words, at the end of the loan period, the last payment of principal and interest will be made and the debt satisfied. This is called the amortization plan. Included in each annual payment is the interest charge and allowance for the expense account and the amount paid on the principal of the debt. The result is reached that each year during the life of the loan the interest and the expense account continue to decrease and the amount paid on the principal continues to increase. To illustrate: $1,000 loan at 5 per cent, with $100 payment each year, the interest for the first year will be $50 and for the sixteenth year will be $3.47, and the expense account for the first year would be $10 and for the sixteenth year would be 67 cents. The amount paid on the principal for the first year would be $40 and for the fifteenth year would be $90.44, and for the sixteenth year $68.96, all the time the annual payment remaining the same, with the exception of the sixteenth year.

The following table will illustrate the payment or amortization of the loan where the interest and expense are 5 per cent, and, of course the rural-credits bond selling on the market at

4 per cent, the loan to run for 20 years and the last payment liquidating the debt:

| Annual periods | Total annual payment. | Interest at 5 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $80.24 | $50.00 | $30.24 | $969.76 |
| 2 | 80.24 | 48.48 | 31.75 | 938.00 |
| 3 | 80.24 | 46.90 | 33.34 | 904.67 |
| 4 | 80.24 | 45.23 | 35.01 | 869.66 |
| 5 | 80.24 | 43.48 | 36.76 | 832.90 |
| 6 | 80.24 | 41.64 | 38.59 | 794.31 |
| 7 | 80.24 | 39.71 | 40.52 | 753.79 |
| 8 | 80.24 | 37.68 | 42.55 | 711.23 |
| 9 | 80.24 | 35.56 | 44.68 | 666.56 |
| 10 | 80.24 | 33.32 | 46.91 | 619.64 |
| 11 | 80.24 | 30.98 | 49.26 | 570.39 |
| 12 | 80.24 | 28.51 | 51.72 | 518.67 |
| 13 | 80.24 | 25.93 | 54.31 | 464.36 |
| 14 | 80.24 | 23.21 | 57.02 | 407.34 |
| 15 | 80.24 | 20.36 | 59.87 | 347.46 |
| 16 | 80.24 | 17.37 | 62.87 | 284.60 |
| 17 | 80.24 | 14.23 | 66.01 | 218.59 |

| Total | 1,604.80 | 604.80 | 1,000.00 | ..... |

The amount paid annually so as to liquidate the debt in this time is only a fraction over $80. Eight per cent is usually the rate of interest charged in my State on real estate mortgages. The result to the farmer borrowing $1,000, as outlined in the above table will be that in 20 years, with the payment amounting to 8 per cent, he settles or amortizes the entire debt, whereas when 8 per cent is charged on real estate mortgages and the interest paid each year at the end of the 20 years, the farmer would still owe the original amount of the debt, $1,000. A loan of $1,000, interest at 6 per cent, with an annual payment of $100, paid in less than 16 years, as shown in the following table:

*Principal, $1,000; interest, 6 per cent, to include 1 per cent for expenses; annual installment, $100; to show status of loan each year.*

| Year. | Installment. | Interest. | Expenses. | Paid on principal. | Unpaid principal. |
|---|---|---|---|---|---|
| 1 | $100.00 | $50.00 | $10.00 | $40.00 | $960.00 |
| 2 | 100.00 | 48.00 | 9.60 | 42.40 | 917.00 |
| 3 | 100.00 | 45.89 | 9.17 | 44.94 | 872.66 |
| 4 | 100.00 | 43.63 | 8.73 | 47.64 | 825.02 |

| 10 | 100.00 | 27.02 | 5.40 | 67.58 | 472.77 |
| 11 | 100.00 | 23.64 | 4.73 | 71.63 | 401.13 |
| 12 | 100.00 | 20.06 | 4.01 | 75.93 | 325.20 |
| 13 | 100.00 | 16.25 | 3.25 | 80.49 | 244.71 |
| 14 | 100.00 | 12.23 | 2.45 | 85.32 | 159.40 |
| 15 | 100.00 | 7.97 | 1.59 | 90.44 | 68.96 |
| 16 | 73.10 | 3.47 | .67 | 68.96 | 0 |

A loan of $1,000 bearing 5 per cent interest will be discharged by a payment of 36 annual installments of $60.44 each.

The business question that has disturbed many minds is whether or not rural-credits bonds will sell on the market; if they do, rural credits will be a success; if they do not sell, then it will be a failure.

The friends of rural credits have no doubt that the bonds will sell, and the business proposition that most concerns the farmer is at what rate of interest. If the 4 per cent bonds can be easily disposed of, anyone can see that this will be a much better proposition for the farmer than if the bonds bear 5 per cent or 6 per cent. The rate per cent rural-credit bonds bear will measure the benefit to the farmer. The friends of rural credits have been active in their efforts to frame the law so that there will be the largest possible number of purchasers for the bonds.

There is a bill which recently passed Congress, has been signed by the President, and is now law that will aid in a large measure to increase the number of purchasers. With this bill I had something to do. It is public act No. 81, Sixty-fourth Congress, entitled "An act to amend the act approved June 25, 1910, authorizing the Postal Savings System, and for other purposes." This bill was introduced in the House at the beginning of this session and referred to the Post Office Committee of the House, where it was considered. We reported the bill to the House with a favorable recommendation. The bill recently passed the Senate and is now on the statute books.

Amongst other things provided for in section 2 of this act, the following is of interest to the friends of rural credits:

That postal savings funds received under the provisions of this act shall be deposited in solvent banks, whether organized under national or State laws, and whether member banks or not of the Federal Reserve System established by the act approved December 23, 1913, being subject to national or State supervision and examination, and the sums deposited shall bear interest at the rate of not less than 2½ per cent per annum, which rate shall be uniform throughout the United States and Territories thereof; but 5 per cent of such funds shall be withdrawn by the board of trustees and kept with the Treasurer of the United States, who shall be treasurer of the board of trustees, in lawful money as a reserve. The board of trustees shall take from such banks such security in public bonds or other securities, authorized by act of Congress or supported by the taxing power, as the board may prescribe, approve, and deem sufficient and necessary to insure the safety and prompt payment of such deposits on demand.

The postal-savings funds now amount to about $80,000,000. The Government pays 2 per cent interest on this sum to the depositors. Under the law the Government, when any part of this fund is deposited in banks throughout the country, is required to charge an interest rate of not less than 2½ per cent per annum; 5 per cent of the postal funds are required to be kept deposited with the Treasurer of the United States. The remainder of this fund may be deposited in banks. Deducting this 5 per cent leaves seventy-odd million dollars as available funds for deposit. The board of trustees may, under this act, take rural credits bonds for security for the reason that these bonds are authorized by act of Congress.

I am decidedly of the opinion that the provision mentioned will greatly aid in the selling of rural-credits bonds and at a low rate of interest.

Mr. PLATT. Mr. Chairman, it seems to me it would be a great misfortune if the amendment proposed should be agreed to and this section 16 should be stricken out of the bill. It is in large measure the original of the United States commission bill; that is, this section incorporates a considerable part of the bill which the gentleman from Indiana [Mr. Moss] originally introduced into this House, and which had the indorsement of a good many farmers' associations and of the most careful students of rural-credits legislation. In my opinion, as I have said several times before, if that original United States commission bill had been passed, if that could have been taken up and passed in the last Congress, it would have settled the whole rural-credits situation. Instead of trying to start a great big system all at once, which this bill does, that would have started in a natural way establishing individual institutions, which would have a chance to grow and spread in accordance with demand. Some of them, in fact, have already been organized under State laws, and ultimately, if we had passed that bill, the separate institutions could be federated together, just as we federated together the national banks under the Federal Reserve System. It would seem to me that that would be a more natural and economic way of getting at the problem than the effort made in this bill, which I am not against, of trying to establish a great big system all at once and force its establishment practically by Government aid, by the subscription of Government capital.

Now these joint-stock land banks are simple, easily organized institutions which will deal a little more directly with the people than the others, although there is no reason to believe that the others will not be organized. Certainly where the Government comes to a section and says, "Here is $750,000 in money on which no dividends are asked," somebody is going to organize farm-loan associations to get that money. It is absurd to suppose otherwise, and the joint-stock land banks can not possibly interfere with the organization of the cooperative associations and Federal land banks. The joint-stock banks can deal more directly with the people and can make loans without some of the restrictions which are rightly applicable to the cooperative institutions. They will therefore be exceedingly useful.

Mr. McFADDEN. Will the gentleman yield?

Mr. PLATT. I will.

Mr. McFADDEN. Does the gentleman think this is a consistent proposition, to have money sent into a district where it is not really required, but simply for the purpose of getting money from the Government——

Mr. PLATT. The gentleman understands that the bill provides that the money will not be subscribed by the Government unless there are 10 farmers' loan associations organized, and what I am saying is that with the money offered certainly the farmers in almost all communities, believing they can get a lower rate of interest, will organize these cooperative associations, and that the joint-stock banks can not interfere with them, but will accommodate a large class of borrowers who may need money for other purposes than those for which the cooperative banks are allowed to loan.

Mr. STEPHENS of Mississippi. Mr. Chairman, I desire to offer an amendment to the text of the bill.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

On page 110, beginning in line 19, strike out the following language: "(b) Of section 4 of this act as to interest rates on mortgage bonds or farm-loan bonds, nor to the provisions."

[Mr. STEPHENS of Mississippi addressed the committee. See Appendix.]

Mr. JOHNSON of Washington. Mr. Chairman, I favor the retention of section 16 in the bill for the reasons stated by the gentleman from Pennsylvania [Mr. McFADDEN] and for the further reasons, first, that it contains the one provision in the whole revamped rural-credits proposition which is likely to be quickly workable and usable, and, second, because if the first system of loans under a cooperative obligation scheme is taken advantage of by the farmers it will be able to continue in operation only because the plan outlined in section 16 will help to lift the load from the other plan. In other words, this plan, instead of killing the other, will help it, in my opinion. Of course there are objections, substantial ones, against both. No one seems to speak with great certainty about any section of this bill. No one seems to stand for it in its entirety. Even the distinguished chairman of the committee has stated during this debate that some doubtful things were being left in the bill in the hope they would be ironed out in conference between this and the other body. So there is no certainty what we are going to get. The vote is going to be, apparently, for a pig in a poke. In this connection I want to call the attention of the House to certain pledges made by members of the grange with regard to rural-credits legislation; also to warnings of the grange to two bills which were the immediate predecessors of this one, and to the grange indorsements of the Morgan bill. Here is a pledge, which reads:

FARMERS' RURAL-CREDITS AND NATIONAL MARKETING PLEDGE.

I hereby pledge myself not to vote for the reelection to Congress of the Member from my district unless his record shows active support of the farmers' demand for a real, efficient rural-credits law and a national marketing law that will be workable and that will give the farmer a chance to gain a fair return for his labor in raising farm produce; and also not to vote for any candidate for Congress who does not publicly define his position in these matters and state positively what the farmers may expect from him along these lines if elected.

Dated at Mount Pleasant, Wash., February 26, 1916, third congressional district.

These individual pledges are signed by farmers and by members of the grange and sent to Washington in considerable numbers.

Now, who knows what bill the signers want or what form of rural credits? Some of the pledges have a line written on them indorsing the Morgan bill and protesting against the Moss bill. Who knows how much of the bill soon to be voted on is the Moss bill? Who knows how many of the dozens of amendments and amendments to amendments have been adopted or how many amendments which were made to the Hollis bill in the other body have been dropped for good with the collapse of that measure and the substitution of this one?

I will read from a letter from the Washington State Grange, from the commissioner of its department of rural credits and national marketing, C. R. Cottrell, and addressed to members generally. He says, in part, under recent date:

The joint committee rural-credit bills (S. 2986 and H. R. 6838) will in no way bring that much hoped for justice to the farmers of the Nation. The fundamental principle is entirely wrong, and no amount of amending can change the principle involved.

Also he says:

Gentlemen, you also have before you for consideration another rural-credit bill, whose author has made an exhaustive study of this subject, and whose bill will meet the approval of farmers throughout the Nation, because its provisions will relieve present exploitation.

On behalf of the farmers of the Northwest, I urge you to vote *against* the joint committee bill, either in its original form (S. 2986 and H. R. 6838) or as amended and reintroduced by Mr. HOLLIS on February 15, and if you are desirous of giving the farmer equal opportunities with commerce vote *for* and *support* Representative DICK T. MORGAN'S bill (H. R. 10310).

Mr. Chairman, I have had some correspondence in which I undertook to keep the granges of my State informed as to the bills, both reintroduced and amended, and a short time ago I received this letter from the chairman of the department of rural credits and national marketing of the Washington State Grange, in which he says, after criticizing the last bill printed:

It seems a terrible injustice, when there is so much adverse criticism appearing from all quarters of the Nation to this bill, to have our Congressman vote for it when there is a good bill before them, does it not?

If there is no chance for the Morgan bill, we ask you to work tooth and nail for the right kind of amendments to the committee bill.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. JOHNSON of Washington. Now, then, the granges of the State of Washington asked, when they found that Congress would not in all probability pass the Morgan bill, that the present committee bill be amended, and they sent the amendments on. A number of those amendments were passed in the Senate, but they are dead as Hector now. The committee prefers to stick to its bill. I have tried earnestly to get opportunity to offer these amendments along with the grand smother of amendments that have been offered, and have failed to get recognition until now, when, after numerous protests on my part, it became apparent to the chairman, as he has said, that I had a speech brewing in my system.

Nearly all the granges in my part of the State of Washington have protested by resolution against the predecessors of this bill. I will read in part one of the protests, of which I have received several dozen:

Resolution.

Whereas the joint committee appointed by our president at the 1915 session to investigate rural credit having made its report to Congress and having caused to be introduced bills in both Houses, known as Senate bill 2986 and House resolution 6829, creating what shall be known as "the Federal farm-loan act"; and

Whereas these bills will in no sense improve the present financial condition of our farmers, but on the contrary will retard the growth of agriculture by providing another system of private, profit-sharing, dividend-paying, surplus-creating banks: Therefore be it

*Resolved*, That we, being the representatives of organized farmers in our community, do hereby DEMAND of our Senators and Representatives in Congress assembled that when these bills come up for consideration your vote shall be registered as "NO"; and be it further

*Resolved*, That we DEMAND that you use your influence and vote to secure for us adequate credit facilities at the actual cost of administration.

[SEAL.] MOUNT PLEASANT GRANGE, No. 73,
*Washougal, Wash., Rural Route 1, Mount Pleasant.*

Number of members, 58.

It is apparent that the granges of Washington do not want any part of the bill that our joint commission prepared.

Mr. PLATT. Mr. Chairman, will the gentleman yield there?

Mr. JOHNSON of Washington. Yes.

Mr. PLATT. Does the gentleman know whether the grange in the State of Washington indorsed the Bathrick bill in the last Congress?

Mr. JOHNSON of Washington. I do not know that as an organization they took action on it. I will say, however, that the members of the grange know at this moment very little more than the Members of Congress as to just what is in this particular bill. How could they? It has been radically changed every six days, and a lot of it is being left to be fixed up when the conferees of the two branches of Congress get together.

Mr. MOORE of Pennsylvania. Will the gentleman tell Congress which set of resolutions they ought to follow?

Mr. JOHNSON of Washington. I would like to, if I can get the time.

Mr. MOORE of Pennsylvania. Go ahead.

Mr. JOHNSON of Washington. It does not make much difference, because this bill is likely to be so amended in another legislative body of this Congress that its joint set of daddies will not know it.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. HOWARD rose.

The CHAIRMAN. The gentleman from Georgia [Mr. HOWARD] is recognized.

Mr. HOWARD. Mr. Chairman and gentlemen of the committee, I want to refer briefly, within the five minutes allotted to me, to this section. This bill reminds me very much of the old farmer who wanted to wean a calf, and he thought that the most economical way to wean the calf was to milk the cow and feed all the milk to the calf out of the bucket. [Laughter.]

Now, you have created the Federal land banks—a very good system, as far as it goes. Then you come along and create these private corporations that will do everything on the face of this earth to discourage the smooth and effectual operation of the Federal land banks that you create.

Now, what do you do? There is too much exemption here. I have had to switch backward and forward here and turn to page 5 of the old Moss bill, and then go to section 3 and section 4 and section 6 and section 7 and section 10 to see what you are doing for these private land banks that you do not do for the Federal land banks; and I find that you have exempted them from every restriction on the face of the earth. They are abso-

lutely exempted from taxation, although you have denied it here, but nevertheless you have done it. Lines 14 and 16 say, "Farm-loan bonds issued under the provisions of this act and the income derived therefrom shall be exempt from Federal, State, and local taxation." Now, then, on line 8 of section 23, page 124, you exempt them all from taxation except the capital stock.

Now, what do these banks make on the capital stock? They are allowed to incorporate with $250,000 capital. They are allowed to charge 1 per cent on fifteen times their capital stock in farm mortgages, to wit, $3,750,000 when they get out the full amount of bonds that they are allowed to guarantee under this system. They will net per annum over 12 per cent on their original capital stock. All of that you exempt from taxation.

Now, then, you are encumbering this bill with a very serious proposition, in my judgment, and I have looked into this question with some degree of care. You have no more right to exempt these joint-stock institutions from taxation in the State of Georgia or in the State of Ohio or Iowa than I have to go out here and say to any citizen of the District of Columbia, "Because I am a Member of Congress I exempt you from personal taxes or real taxes in the District of Columbia." You have no right to do it.

Another thing: These corporations do not perform the functions of a rural-credits bank. Gentlemen, let me warn you again, as I did the other day, that when you get away from the proposition of confining these loans strictly to the benefit of the farm upon which the loan is made, then you are going beyond the proper and beneficial limits of rural-credits legislation.

This system of private banks, private-capital banks, if it is organized, will do everything on the face of this earth—and if they do not do it they are fools—to discourage the smooth working of this system. Some gentlemen will say, "What do you care? It creates competition." It does create competition; but you have thrown such restrictions and limitations around your Federal bank that these fellows who are in these private banks have all the underhold of the Government's institution, and the result is that when we come back here to try to amend this bill, as we inevitably will, you will find that you have got all these corporate parasites that are sucking the lifeblood out of the Federal system to contend with here, and they will fight up to the last ditch, and you will never get the remedial legislation that the farmers are expecting. [Applause.]

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. MOORE of Pennsylvania. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. Without objection, the amendment will be offered and considered pending, there being already an amendment pending. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. MOORE of Pennsylvania: Amend, page 110, line 10, after the word "least," by striking out the figures "$250,000" and inserting "$100,000."

Mr. MOORE of Pennsylvania. Mr. Chairman, the purpose of this amendment is to give those who desire to organize these joint-stock land banks a better opportunity to do so. If this joint-stock land proposition is in the interest of the farmer, it certainly is in his interest to have the amount of capital reduced from $250,000 to $100,000.

I presume whatever is said in connection with this section 16 should also be considered in section 23 relating to exemptions. As to the latter there are certain joint-stock land banks under certain State jurisdictions at the present time, and they pay taxes on their bonds and securities. Section 23 would exempt those State organizations from payment of taxes, because section 23 exempts all securities of joint-stock land banks. Hence if any gentleman is in favor of these two sections, he is in favor of releasing his State organizations now existent and not under Federal control from the payment of taxes.

Mr. GOOD. Mr. Chairman, will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. GOOD. Does the gentleman think Congress has the authority to do that?

Mr. MOORE of Pennsylvania. I assume that Congress would have the power to exempt certain bonds from taxation, but I question whether it has jurisdiction as to some of these.

Mr. GOOD. State bonds that are executed by a State bank?

Mr. MOORE of Pennsylvania. If the gentleman will look at page 124, section 23, he will find that every Federal land bank and every national farm-loan association, including the capital stock and reserve and surplus therein, and so forth, all of which is contemplated in section 16 in the formation of joint land banks, shall be exempt from Federal, State, and local taxation, except taxes upon real estate, and so forth.

Mr. GOOD. The gentleman does not mean to say that any court in the State would hold that that was constitutional?

Mr. MOORE of Pennsylvania. I do not claim to be a constitutional lawyer as is the gentleman from Iowa.

Mr. GOOD. I do not claim to be a constitutional lawyer, but it does not take a constitutional lawyer to see that that could not be done.

Mr. MOORE of Pennsylvania. Then, in section 23, they have a provision exempting from taxation these mortgages——

Mr. GOOD. They do that by saying that the bonds shall be held to be instrumentalities of the Government. They may be black, but if the Congress declares that they are white, why white they are.

Mr. MOORE of Pennsylvania. These bonds are to be exempt from Federal, State, and local taxation. It says:

Farm-loan bonds issued under the provisions of this act and the income derived therefrom shall be exempt from Federal, State, and local taxation.

The gentleman may be right, and if he is he has raised an important constitutional question which may affect the validity of the bill.

Mr. WINGO. Will the gentleman yield?

Mr. MOORE of Pennsylvania. Yes.

Mr. WINGO. The gentleman from Iowa is proceeding on the assumption that these are State banks. They are not; they will have a Federal charter. Congress would not undertake for a moment to exempt from taxation State bonds.

Mr. GOOD. The gentleman knows that that would not alter the situation.

Mr. MOORE of Pennsylvania. If the amendment that I offered is adopted, it will be possible for 10 men to organize in the great metropolis of Philadelphia, or in that other great metropolis—New York—as easily as it would be for them to do so in remote country districts; and as most farmers come to town some time or other, when they are in need of money it will be possible under this section for city men to organize joint-stock land banks to accommodate them. We can do this in the cities as readily as it can be done in the country, and it can be done anywhere on a capital of $100,000 instead of $250,000, required by this section, if the amendment I have offered be adopted. If we are going to facilitate this matter so that farmers can obtain money from the city and elsewhere, let us pass this amendment. I favor section 16 because it approaches nearer to the building-association plan, free from Government aid, than any other proposition in the bill. [Applause.]

Mr. CARAWAY. Mr. Chairman and gentlemen of the committee, I hope you will indulge me while I reiterate some arguments that have been made in opposition to the retention of section 16 in this bill. The object sought by this legislation is to promote the ownership of land by those people who are engaged in agriculture. It is sought to discourage the accumulation of large holdings by speculators. It is admitted by everyone, I think, who has given the question any consideration that that country is best where people who till the soil are the owners of it. I know that the ownership of land in small farms promotes justice, law enforcement, the building of schools and churches, and all of those things for which our civilization stands.

Now, gentlemen, this bill, so far as Federal land banks are concerned, is an attempt to make the cultivator of the land the owner of it.

We by amendments wrote in the bill Saturday that if land should be purchased by a man not engaged in agriculture, not authorized to borrow under the system, the Federal land bank could declare the amount of the mortgage on the land due and payable; that if a man authorized to borrow should acquire other land upon which the aggregate of the loan was in excess of $10,000, the excess should become due and payable. The object sought, of course, was to limit the amount of benefits carried under the bill so that instead of raising the price of the land by cheap interest and encouraging the land speculators to buy it, we wanted to make it serve the man who is going to increase the production of the farm by tilling his own soil. [Applause.] Section 16 gives the tax exemption to the joint-stock land bank. It also exempts it from every one of the restrictions imposed on the Federal land bank except interest. All the restrictions under which the money should be borrowed, the restriction as to amount, and what shall be done with the money after you borrow it are waived as to the joint-stock land bank. In section 16 we negative much we do for home owning by other provisions of the bill.

Now, if you cheapen the interest rates you raise the price of land. That is illustrated in the State of Indiana, where, I understand, good farm lands sell for $200 an acre, while in my

State as good land as God ever made can be bought for $35 to $50 an acre. The interest rate will fix the price of land, and when you give cheap interest without restriction you encourage the speculators to acquire the land for speculation and thereby deprive the man of small means of an opportunity to become the owner of the roof which shelters him and his. [Applause.]

Mr. SMITH of Michigan. Mr. Chairman, there is not one here who does not know what he has to do at the present time when he goes to borrow money upon a farm. You simply take your wife with you, make arrangements for the loan, get your abstract brought up to date, get your money, and go back home. It does not very frequently occur——

Mr. RUBEY (interrupting). Mr. Chairman, will the gentleman yield?

Mr. SMITH of Michigan. Not just now, to my friend. In order to make a loan under the system provided for in this bill, you establish a new system of banks, and I want to ask any gentleman in this House whether or not it is necessary to establish a new system of banks all over the United States in order to loan money to the farmers at the rate you propose in the bill, when he has his farm half paid for. There are now some 8,000 member banks of Federal Reserve System existing in the United States.

If a proposition like the following were to obtain, it might of course accomplish something for the farmer, but it seems to me he ought to get his money with less red tape. If you would loan the Government money that you provide for in this bill to these member banks of the Federal Reserve System, 8,000 of them, situated one in almost every dooryard of every farm, at least readily accessible and already established, at, say, 3 per cent interest, and require those banks to give Government bonds or municipal bonds or acceptable farm-mortgage bonds as security, then you would not be loaning for nothing the funds of the people, that we are told so often when revenue bills are under consideration is raised by taxation from the backs of the poor people—if you would let these banks have that money at a 3 per cent rate, and then require them to give bonds, the best the sun shines on, Government bonds, upon the proviso and with the condition attached to the deposit that they shall loan this Government money out to the farmer who has his farm half paid for at 5 per cent, you would be accomplishing something.

Mr. PHELAN. Mr. Chairman, will the gentleman kindly repeat that?

Mr. SMITH of Michigan. I say loan this money to the Federal reserve member banks for 3 per cent, already established upon security of Government bonds or other acceptable security, and then the Government money would not be deposited at no rate of interest, as it is in these land banks, and make this loan of Government money to those member banks upon the express condition that the banks shall loan the money to the farmer who has his farm half paid for at a rate not exceeding 5 per cent—just as in the case of the requirement in respect to the cotton money down south, $50,000,000, which was deposited by the Government to be loaned at a rate not to exceed 6 per cent to the farmers, and when the southern banker undertook to loan it for 12 per cent he got called down by the comptroller. You could loan this money to these Federal reserve member banks that are already established, or you can establish this system of banks provided for in this bill if you desire to. Loan the money to these banks upon these mortgage bonds if you desire at 3 per cent, upon the provision and condition that they shall loan it to the farmers that have their farms half paid for as you have provided in this bill at a rate not to exceed 5 per cent.

Mr. PHELAN. Will the gentleman tell me how a national bank chartered for 12 years can loan money for 36 years?

Mr. SMITH of Michigan. If that is all there is to it, we could fix up the charter a little and provide that it should be loaned for 36 years. But, my friends, the 36-year proposition will not obtain. No farmer wants money for 36 years. He is not going to mortgage himself to his grave; no man is going to put a mortgage upon his soul when he goes to heaven and leave the payment of it for his children. [Applause.]

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. LEVER. Mr. Chairman, I did not expect to have anything to say as to section 16, but the more I have thought what I fear may be its effect upon the system we are organizing, the more I feel it to be my duty to present my views about it briefly.

We are setting up in this bill two kinds of banks, with the power to issue and sell bonds. One is the farm-land bank and the other is the joint-stock bank, each of them purporting to have the same general purposes in view, namely, the reduction of the rate of interest to the farmer upon his loans and the opportunity of the farmer to amortize his debt. The land banks are cooperative while the joint-stock banks are noncooperative and profit sharing. In both banks the important instrumentality is the bond. The bond taps the money chest and brings back credit to the farmers. If the bond is made so secure that the public will have no doubt of its safety, there will be no question about it selling readily at a low rate of interest. If, on the other hand, the public should for any reason come to have any suspicion of the integrity of the bond, the bond will either not sell at all or sell at a rate of interest which would make the interest to farm borrower prohibitive. What we desire to do is to have this instrumentality—the bond—control the situation. Let us see if we are doing this under this system, with section 16 allowed to stand.

The provision is made that any joint-stock bank may be organized with $250,000 capital, with power to issue its bonds, place them in the market, and in competition, as it were, with the bonds issued under the cooperative land banks provided for in the bill. Here you have two kinds of bonds competing for the same capital. What is the result? The man with capital, the man who is going to furnish the money, is thereby given the power to fix the terms upon which he will buy the bonds, instead of the bond, the farmer's credit instrument, retaining that power to itself. Why? Because the multiplicity of the bonds puts it in the power of the investor to fix the rate of interest at which he will take the bonds. The supply of bonds is so great that choice of kind of bonds and the terms must rest with the capitalist. Section 16, setting up the joint-stock banks, destroys absolutely the competition upon the part of capital for these bonds, which we have hoped to be the one thing that would make them sell on the most favorable terms. Let us see what that brings us to. Eliminate section 16, eliminate this other class of bonds, and then we only have one bond floating in the market, one bond that is making its appeal to capital, and one bond to which capital may look for investment. Capital can not go to any other source for such a bond, and therefore it must take the bond that we offer through the land bank, and what is the result of that? Capital will find itself competing to get this bond and capital will pay for it the most reasonable rate of interest, from the standpoint of the borrower, because, after all, the best terms under which the bonds sell will mean the most that the farmer can get out of this act in the way of lower interest. What we are trying to do by the elimination of the joint-stock banks is to put the bonds of the land banks in such a condition that capital will have to compete for them and bid for them on the most favorable basis.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MILLER of Pennsylvania. Mr. Chairman, I asked for time in order to ask the gentleman from Massachusetts [Mr. PHELAN] for categorical answers to five questions. The gentleman seems to have a clear conception of this bill, and I think his answers would settle some doubt in a good many Members' minds, at least in my mind. Question 1: Can the joint-stock banks organized under section 16 charge more than 6 per cent interest?

Mr. PHELAN. They can not.

Mr. MILLER of Pennsylvania. Second. Can they loan on other than farm mortgages?

Mr. PHELAN. They can not.

Mr. MILLER of Pennsylvania. Third. Have the bonds issued by such banks other security than the guaranty of the joint-stock land bank and all mortgages taken by such bank? Have they other guaranty than that?

Mr. PHELAN. I suppose the gentleman means, does any other bank guarantee these bonds? There is no other guaranty except the guaranty of the bank itself with all its assets. Does that answer the question?

Mr. MILLER of Pennsylvania. That answers my question. Fourth. Is the stock or profits of the banks organized under section 16 exempt from local, State, and United States taxation?

Mr. PHELAN. There is no exemption under the statute in the bill at all for the stock or the profits of the joint-stock banks.

Mr. MILLER of Pennsylvania. Fifth. Are they prohibited from receiving deposits?

Mr. PHELAN. The joint-stock banks?

Mr. MILLER of Pennsylvania. Yes.

Mr. PHELAN. They are.

Mr. MILLER of Pennsylvania. Now, Mr. Chairman, I think that section 16 should not be eliminated from this bill. I can readily see how a bank of this kind can be organized in my section of the State of Pennsylvania, or in other sections of the East or Northeast where a land bank such as provided by the other provisions of this bill could not be organized at all, and a bank of this kind can find a place to do business profitably in

my section of the State, and I believe in other States of the North and East, and I hope that this section will be kept in the bill. I want to say at this time that I shall vote for this bill because I believe it will help the farmers of the South and the Southwest and the West, and that with this section 16 in it will help the people of the East and Northeast. I hope the bill will pass. [Applause.]

Mr. FINLEY. Will the gentleman permit an interruption?

Mr. MILLER of Pennsylvania. I will.

Mr. FINLEY. I want to ask the gentleman, Does the gentleman understand that anything is taxable except the stock of these banks?

Mr. MILLER of Pennsylvania. Well, I will let the gentleman from Massachusetts answer that. I asked that question of him.

Mr. FINLEY. Nothing is taxable except the stock.

Mr. HOWARD. Will the gentleman yield to me for just one minute? In section 23 of this bill, as I interpret it, the bonds and income from the bonds of joint-stock companies are exempt from taxation.

Mr. MOSS of Indiana. That is true; that is admitted by the committee.

Mr. HOWARD. The only taxable asset of a bank is the stock. Now, you say the income from the bonds themselves——

Mr. MOSS of Indiana. The income from the bonds goes to the man who owns the bonds—not the bank that issues them.

Mr. HOWARD. What about the 1 per cent above the 5 per cent?

Mr. SHOUSE. That is taxable.

Mr. MILLER of Pennsylvania. With all deference to the gentleman from Georgia, I think it is still a good bill. [Applause.]

Mr. BARKLEY. Mr. Chairman, the question of land credits which is involved in the bill now under consideration is one which has engaged the serious attention of America for more than a quarter of a century and of Europe for more than a century and a half. This movement in behalf of devising methods for enabling farmers to obtain capital to conduct their enterprises at reasonable rates of interest and for longer periods of time, like all other movements of similar character, was born of necessity. It has had longer existence in Europe and has become more firmly grounded in the agricultural systems there than here because the need for it has hitherto been greater there than here. But all men who have thoughtfully considered the inevitable tendencies in the United States, tendencies some of which are perfectly natural and therefore to be expected, now admit that the time has come when we must make a start here toward setting up a sound, practicable, and economical system of rural credits which shall afford facilities for financing the gigantic agricultural enterprises of this Nation upon terms of equal advantage with enterprises of a commercial or industrial nature.

For many generations after the settlement of this country the problem of the farmer was that of clearing up and preparing the land for cultivation. It was a question of subduing the forest, the prairie, and the valley, and making them immediately responsive to the demands of a generation of pioneers. It was a virgin soil, fertile beyond imagination, and as there was in the beginning and for a long time thereafter more land than there were men to cultivate it, it was but natural that instead of attemping to enhance or even to maintain the fertility and productivity of the soil first cleared and cultivated, the early settlers in many instances abandoned the exhausted or partially exhausted lands and moved to newer and fresher fields.

By reason of this process of exhaustion there are in the United States to-day millions of acres of wasted and abandoned lands which ought to be under cultivation for the feeding and clothing of the nations of the world. Not only is this true, but we have learned the *folly of* permitting our lands to go to waste or become less productive, so that to-day we in this country are not only turning our attention to the reclamation of wasted and unproductive lands but we are appropriating every scientific method known or that can be discovered for retaining and increasing the fertility and productivity of the soil, not alone for the benefit of those who now live upon it but for the inheritance of those who shall come after us in the generations of the future. In this work the Government of the United States has blazed the way, and now all the States of the Nation are cooperating with the National Government in extending to our farmers every possible aid in the more economical, intelligent, and scientific cultivation and distribution of the products of the soil.

These things are not being done merely as a matter of "enlightened selfishness," but because we realize that we are trustees to some extent in use and occupation of the natural resources of this Nation for the benefit of those who shall in the generations yet to come look to and depend upon them for life and the enjoyment of prosperity.

We are beginning more and more to recognize, as the nations of Europe long ago recognized, that as population increases and becomes more dense, each acre of land in any given year must support and feed more people than it did the year before, which makes it self-evident that we must husband our resources and increase not only the ability of the soil to yield larger products, but that we must also increase the facilities and instrumentalities by which the farmer may more easily, scientifically, and economically distribute to the world's markets these products which have come forth at the touch of his hand.

Admitting the obvious truthfulness of these observations, it is easy now to understand the need in this country for a workable system of rural credits; and in this connection let it be known that there is no system of rural credits in Europe that can be bodily superimposed upon the farmers of America, because conditions in Europe and America with respect to agriculture are widely different. The system of rural credits which has been developed in Europe came about largely by reason of the abandonment of the feudal system of land tenure, a system which happily could never flourish on American soil.

But while it is true that no European system can be wholly adapted to American needs, there is much that we have learned from the European farmer which may guide us in attempting to frame a system which will be suitable to the needs of the United States. The committee which has after years of labor and exhaustive investigation and study framed the measure now before Congress, upon which we are soon to vote, has attempted to weave into it so much of the experience of other nations as will be of practical use in guiding the farmers of the United States in the establishment of a system of cooperative rural credits which will, we hope, be as great a blessing to the struggling farmers of America as the European systems have been to the struggling farmers of Europe.

It is now acknowledged by all classes of men that the commercial bank is not prepared nor equipped to meet the demands of agricultural credit. Commercial banks are compelled in the very nature of things to turn their money over and over many times in a year in order to make the dividends which will satisfy their stockholders. Consequently the short-term loan is more attractive to the commercial bank than the long-term loan. But the thing which is needed by the farmers of the United States is some place where they can go and obtain for productive agricultural purposes money at a reasonable rate of interest and for long periods of time. If a farmer is able to obtain the loan of money at a commercial bank for a period of six months or one year he is constantly haunted with the fear that failure of crop, sickness in his family, or other misfortune may make it impossible for him to pay the debt when due. In the new banking and currency system we made it possible for national banks to loan money upon unencumbered farm lands for periods as long as five years, a thing which they could not previously do; but it is recognized that even this extension of agricultural credit is not sufficient to meet the needs of the American farmer for the very reasons which I suggested before, to wit, that banks organized for purely commercial purposes will not embark upon the long-term loans needed by so many farmers in our country for the completion and development of their agricultural enterprises.

The bill now before Congress, which, in my opinion, will soon pass, lays the groundwork for the establishment of a cooperative system of farm credits in this country which will eventually place agricultural credit upon the same firm basis now enjoyed by commercial credit. Under the provisions of the bill the United States will be subdivided into 12 districts, in each of which is to be organized a Federal land bank with a capital stock of not less than $750,000. In order to insure the establishment of these Federal land banks, it is provided that if the stock necessary to make up this amount of capital shall not have been subscribed for at the end of 90 days from the opening of the books, the Government of the United States is authorized to subscribe for whatever portion remains unsubscribed at the end of that time. If the Government should be compelled to subscribe for the total minimum capital stock in each and all of these Federal land banks, it would mean that the Government would invest the sum of $9,000,000 in the establishment of these land banks for the purpose of inaugurating a system of rural credits in this country in accordance with the provisions and the intentions of the measure now under consideration.

In each of these Federal land-bank districts it is contemplated that farm-loan associations and joint-stock land banks will be organized, through which money will be loaned to farmers upon their land. The farm-loan associations are to be composed of those who are engaged in, or are about to become engaged in, agriculture and who desire to borrow money upon

their land for agricultural purposes, for improving or equipping their land, or for paying off a debt already in existence, or for such other purposes as the bill itself defines and indicates. Those who compose the farm-loan associations are required to take stock in the association to the extent of 5 per cent of the loan requested. In other words, the farm-loan associations will be composed of borrowers who through their local associations obtain the loans from the Federal land banks in the several districts. When loans are applied for each association will be expected to cause an appraisal to be made of the property to be mortgaged through its loan committee, which appraisal is to be forwarded to the Federal land bank, and in turn the land bank may cause the property to be appraised by one of the official appraisers provided in the bill. Of course, the necessary formalities of appraising, abstracting, and other matters necessary to insure the legality of the transaction would have to be attended to; and if these necessary preliminary steps were found to be favorable the loan would be made to the extent of 60 per cent of the value of the land and 20 per cent of the value of the improvements. The loan may run for periods of from 5 to 36 years, according to the desires of the borrower, and the bill provides that the rate of interest can not exceed 6 per cent per annum, and it is hoped that it may be much less. It is provided that, in addition to the interest, the borrower shall pay a certain stipulated annual or semiannual payment for the purpose of amortization; or, in other words, for the wiping out of the entire debt by the end of the loan period.

The joint-stock land banks which are provided for in the bill are somewhat different from the farm-loan associations heretofore referred to in that the borrower does not have to take stock in them and they are exempted from some of the regulations with respect to the farm-loan associations. The capital stock of the joint-stock land banks can not be less than $250,000, and they are not permitted to do any other banking business except that of loaning money upon farm lands, but there is a wider scope allowed them in the purposes for which loans may be made. Both the farm-loan associations and the joint-stock land banks are to be under the control and supervision of a Federal farm-loan board to be appointed by the President, which board shall have power to administer the law generally and to fix rates of interest that may be charged, not, however, to exceed 6 per cent, and shall have general supervision over the whole system.

When a loan is made upon farm land by any of these land banks they are authorized to issue upon the mortgages so obtained what will be known as farm-loan bonds. These farm-loan bonds will be placed upon the market in the same manner as other bonds, sold to those who have money to invest in safe interest-bearing securities—and there is no bond that could be safer than bonds issued upon and secured by real estate—and the money obtained by the sale of these farm-loan bonds will be, in turn, loaned to other farmers in the same way that the original loans were made, other mortgages will be taken, and other farm-loan bonds issued upon them, and so on in an endless chain from year to year. In order that the rate of interest may be kept as low as possible for the farmer who is compelled to borrow money on his land, it is provided that these farm-loan bonds shall be exempt from taxation, either Federal, State, or municipal.

In order to demonstrate how the amortization plan of paying interest and principal under the system proposed in this rural-credits law operates, I desire to incorporate at this point what is known as an amortization table showing the process by which the loan and interest are paid. The first table is for a loan of $1,000 for 20 years at 5 per cent interest, and the annual payment is $80.24.

| Annual periods. | Total annual payment. | Interest at 5 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $80.24 | $50.00 | $30.24 | $969.76 |
| 2 | 80.24 | 48.48 | 31.75 | 938.00 |
| 3 | 80.24 | 46.90 | 33.34 | 904.67 |
| 4 | 80.24 | 45.23 | 35.01 | 869.66 |
| 5 | 80.24 | 43.48 | 36.76 | 832.90 |
| 6 | 80.24 | 41.64 | 38.59 | 794.31 |
| 7 | 80.24 | 39.71 | 40.52 | 753.79 |
| 8 | 80.24 | 37.68 | 42.55 | 711.23 |
| 9 | 80.24 | 35.56 | 44.68 | 666.56 |
| 10 | 80.24 | 33.32 | 46.91 | 619.64 |
| 11 | 80.24 | 30.98 | 49.26 | 570.39 |
| 12 | 80.24 | 28.51 | 51.72 | 518.67 |
| 13 | 80.24 | 25.93 | 54.31 | 464.36 |
| 14 | 80.24 | 23.21 | 57.02 | 407.34 |
| 15 | 80.24 | 20.36 | 59.87 | 347.46 |
| 16 | 80.24 | 17.37 | 62.87 | 284.60 |
| 17 | 80.24 | 14.23 | 66.01 | 218.59 |
| 18 | 80.24 | 10.93 | 69.31 | 149.28 |
| 19 | 80.24 | 7.46 | 72.78 | 76.50 |
| 20 | 80.24 | 3.82 | 76.50 | ..... |
| Total | 1,604.80 | 604.80 | 1,000.00 | ..... |

An examination of the above table will show that if a farmer borrows $1,000 on the amortization plan for a period of 20 years at 5 per cent interest, by the payment of $80.24 annually for 20 years all the interest and the entire debt is wiped out at the end of that period. Under the methods heretofore followed the borrower at the end of 20 years would have paid $1,000 in interest and the original loan of $1,000 would still be due in a lump sum. The same proportions would hold true as to any other amount for any other given period of years at any other rate of interest.

The following table shows the process for the loan of $1,000 for 16 years at 6 per cent interest, the annual payment being $100 except the last year, which is $73.10:

| Annual periods. | Total annual payment. | Interest at 6 per cent. | Paid on principal. | Amount of principal still unpaid. |
|---|---|---|---|---|
| 1 | $100.00 | $60.00 | $40.00 | $960.00 |
| 2 | 100.00 | 57.60 | 42.40 | 917.60 |
| 3 | 100.00 | 55.06 | 44.94 | 872.66 |
| 4 | 100.00 | 52.36 | 47.64 | 825.02 |
| 5 | 100.00 | 49.50 | 50.50 | 774.52 |
| 6 | 100.00 | 46.47 | 53.53 | 720.99 |
| 7 | 100.00 | 43.26 | 56.74 | 664.25 |
| 8 | 100.00 | 39.85 | 60.15 | 604.10 |
| 9 | 100.00 | 36.25 | 63.75 | 540.35 |
| 10 | 100.00 | 32.42 | 67.58 | 472.77 |
| 11 | 100.00 | 28.37 | 71.63 | 401.13 |
| 12 | 100.00 | 24.07 | 75.93 | 325.20 |
| 13 | 100.00 | 19.61 | 80.49 | 244.71 |
| 14 | 100.00 | 14.68 | 85.32 | 159.40 |
| 15 | 100.00 | 9.56 | 90.44 | 68.96 |
| 16 | 73.10 | 4.14 | 68.96 | ..... |
| Total | 1,573.10 | 573.10 | 1,000.00 | ..... |

From the latter table it will be seen that if a farmer borrowed $1,000 for 16 years at 6 per cent, under the amortization plan he would pay a total of $1,573.10 during the whole period, which would wipe out interest, debt, and all at the end of the loan period. But under present methods, even if he could get a loan for that length of time, he would have paid $960 in interest during the 16 years, and at the end of that time the original loan of $1,000 would still be due in a lump sum. Other tables might be given, all to the same end, showing the undoubted advantage of the amortization plan contained in this measure over the old expensive, and in many cases exorbitant system of obtaining money upon farm lands.

This is a new system of credit, so far as the United States is concerned. For many years, it is true, efforts in the direction of cooperation among farmers have been made from time to time, many of which have in a local and more or less temporary way proved to be successful; but this is the first time an organized national effort has been made to coordinate and combine the potential credit of the farmers of this Nation for their own exclusive benefit. The bill which we are considering is not all that I would like to see it. Mistakes will undoubtedly be discovered. It would be a miracle if the establishment of an entirely new system such as this in any nation did not reveal mistakes which experience will be relied on to correct. But even if the new system authorized by this bill should not result in a material reduction in interest charges to the farmer, although it is my hope and belief that such reduction will be accomplished, I would still feel justified in supporting it, because of the fact that it affords a sort of clearing house for farm credit where loans may be obtained for a long term of years, a thing which can not be done now except in rare cases by the farmers of the United States. I would like to see every man a home owner who wants to be one. I want to see every man enjoy the fruits of his labor, and I am glad the Government of this Nation recognizes its obligation to cooperate, in so far as it can, for the establishment of a system which we all hope

will prove of great advantage to those who till the soil, and thus enhance the prosperity, the happiness, and the pleasure of those who live upon the farm and produce the wealth that makes our Nation great. [Applause.]

There has been some objection to this legislation in certain quarters because of the fact that a measure of Government aid is afforded under the bill for the purpose of getting the system started and offering encouragement to farmers in the formation of the land banks and the farm-loan associations. This same cry has always been heard when any effort has been made to aid the farmer. There are those among us who can swallow the doctrine of levying taxes against the workingman and the consumer to protect the wealthy. There are those who advocate taking money out of the Treasury in the form of a ship subsidy to be donated to private owners of steamships without any return to the Government for the outlay. But when a measure designed to aid the farmers of this Nation in establishing the stability and availability of their credit for the purposes for which a farmer needs money, carries in it a provision for Government aid in putting the system on its feet, these same gentlemen revolt with sanctimonious hypocrisy at what they are pleased to call the paternalism upon which we are embarking this great Nation of ours! In their opinion, if the Government aid is for the benefit of a special class of favored and usually wealthy interests, it is patriotism; but if the proposed aid is for the benefit of the farmer or laboring man who produces the real wealth of this and every other Nation, it is to them the grossest sort of paternalism. [Applause.]

One of the great objects kept in view by the founders of this Nation was to promote the general welfare of all the people, without regard to class or creed. Following up that object from the beginning until now, we have seen the Government of the United States embark upon the expenditure of money for multiplied thousands of enterprises that were deemed to be in the interest of the general welfare and prosperity of all the people.

It was for this purpose that in the early days of the Republic the Government donated millions of dollars worth of public lands to railroad companies as an inducement for the construction of lines of railway into the desert and the wilderness in order to develop the country and furnish homes for the constantly increasing population. It was for the same reason that money has been and is being expended in the improvement of our inland rivers and the harbors along the coast for the development and enlargement of our commerce with one another and with foreign nations. It was a proper recognition of the fact that the Government was the agent of all the people for the benefit of all the people in the development of their educational, commercial, political, and social relations; and thus we have seen our Government cooperating with every branch of human endeavor that may characterize the life of a great people gathered on these shores from the ends of the earth into a melting pot of true Americanism which challenges the admiration of less free and less enlightened people. So whether it be for the advancement of agriculture, commerce, banking, invention, reclamation, education, law, sanitation, health, morality, or any of the other varied and diversified interests of the people, we have always welcomed the efforts of the Government as the servant of us all to cooperate in any legitimate and lawful manner within the scope of its authority where such cooperation might result in the common good.

If the people have extended the arm of their Government in every other direction for their own welfare and prosperity, why withhold it in the establishment of a system of rural credits which is designed to aid the farmer by affording him what we hope will be a cheaper and easier method of cultivating and marketing those crops concerning which the Government is seeking to impart to him so much scientific knowledge?

In practically every rural-credit system of the Old World there has been some form of government aid and supervision in the establishment and administration of the systems. In Germany the landschaft, or German land-mortgage system, which was founded more than 150 years ago through the instrumentality of that great German soldier and statesman, Frederick the Great, is operated under the control and supervision of the German Government. Under this system the German farmers are able to borrow money on their land for 3½ per cent interest, plus 1½ to 2½ per cent as an amortization fund for extinguishing the debt at the end of the loan period.

In 1913 the Government of Great Britain appropriated the sum of $500,000,000 to be used in assisting the Irish farmers to buy and pay for land, and this money was loaned or advanced to Irish tenants at the small rate of 3½ per cent per year, divided as follows, 2¾ per cent as interest, and three-fourths of 1 per cent to be applied on the principal until the debt is extinguished.

In France what is known as the Credit Foncier, which is an institution or land bank for the loaning of money on real estate, is aided and controlled by the French Government, and the rate of interest is 4.2 per cent. Another institution known in France as the Credit Agricole Mutual obtains advancements of money from the Bank of France without interest, and in turn loans this money to local associations upon securities that are deemed safe and suitable.

Russia has established a more advanced principal of Government aid than any of these nations above mentioned for the purpose of aiding her farmers and peasants to purchase small farms. Through the means of the land-purchasing acts adopted by that Government more than 20,000,000 people have been able to become small landowners, and their total value is now estimated at more than $1,000,000,000. These funds were advanced by the Government upon long-term loans and at low rates of interest. More than three years ago in Russia the Peasant's Land Bank was organized, through which loans are made upon land at the rate of 4 per cent, payable in from 13 to 55 years from the date of the loan.

Switzerland has now 28 land-credit banks which are owned or operated by the State, and the bonds or debentures based upon land mortgages are guaranteed by the State.

The little Kingdom of Denmark advanced without interest nearly $6,000,000 for the founding of the Mortgage Bank of the Kingdom of Denmark, and in addition it buys this bank's bonds or debentures and appropriates annually more than $1,500,000 to be loaned to small landowners.

Sweden has likewise aided in the establishment of institutions for loaning money to farmers and endowed the Swedish General Mortgage Bank when it was founded to the extent of more than $2,000,000, and in 1890 this bank was given a subsidy in the form of Government bonds.

In Japan the Government gives aid and encouragement to the land-bank system by guaranteeing a 5 per cent dividend for a period of 10 years on the stock of the Central Land Credit Bank of Japan, and gave nearly $5,000,000 in the form of a subsidy to the 48 local or district land banks scattered throughout the empire.

In Austria-Hungary, in Egypt, in Australia, in Queensland, in New Zealand, and in other countries some form of Government aid is afforded, either in establishing or the maintenance of land banks for loaning money to farmers.

The farmers of the United States do not expect that the Government will loan them all the money they need directly out of the Treasury, because they know that under our system of government money can not be raised by the Government except by taxation, and that taxes are levied to raise revenue to carry on the expenses of the Government. The farmers of the United States are not mendicants, begging for a "hand-out" at the back door of their Government, which they love, respect, and would fight for if it were necessary. But the farmers of the United States are willing that their Government shall aid in putting on its feet a system by which the farmers will ultimately be able to obtain that credit which is so necessary at times for the proper development of their energies along agricultural lines.

If after the system is established the aid of the Government is no longer needed in a financial way, that aid can be withdrawn; but even if the financial aid of the Government should in the future become unnecessary there will always be need for governmental supervision and control in order that the system may be properly managed and the interests of the farmers and investors in farm loans may be properly safeguarded. But even if the Government should never have returned to it the amount necessary to insure the successful establishment of a workable rural-credit system it would be doubly repaid for its outlay in the increased fertility, development, and success of the farms and farmers for whose benefit this measure is intended. Surely if all the other great nations of the world cooperate in establishing and carrying on their systems of farm-loan banks for their farmers this great, prosperous, and growing Nation can afford to give its financial indorsement to the institution which it proposes to create as an instrumentality by which farmers all over the country may be aided and encouraged in the hard and exacting duties upon which they each year embark in order that the world may be clothed and fed, and that they themselves may enjoy not only the necessaries of life, but some of the luxuries as well. [Applause.]

It is not intended that this bill shall be a substitute for thrift and industry. No system of credit was ever devised that could relieve men who are forced to earn their bread in the sweat of their brow from the necessity of labor. No Government would desire to discourage labor in order to replace it with indolence.

And the man who expects to prosper upon a farm without the exercise of industry, frugality, and painstaking economy, is doomed to disappointment. If prosperity could be brought about on the farm, in business, in the professions, in the workshop, or elsewhere, by the mere stroke of a pen or by the mere enactment of a law, we would not now be in need of a rural-credit system, because we would all have been enacted into prosperity and affluence long ago. But if the Government can by its cooperation and supervision give encouragement and impetus to industry, economy, and initiative effort, then the Government is doing a good work and one which will be appreciated by people of every class and in every part of this great and wonderful country. That is what is intended by the measure now under consideration, and it is my sincere hope that it will prove to be one of the greatest movements ever inaugurated in the history of this country for the benefit of those who hew the wood and draw the water and endure alike the discomforts of the blistering sun and the shivering winds. [Applause.]

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer two amendments, to have them pending.

The CHAIRMAN. The gentleman from Oklahoma offers two amendments, which the Clerk will report.

The Clerk read as follows:

Page 110, line 6, after the word "deposits," strike out the following: "of current funds payable upon demand."

Page 111, line 5, after the word "than," insert "one-half of."

Mr. MORGAN of Oklahoma. Mr. Chairman, the first amendment which I offer is simply to make it clear that these joint-stock land banks can not accept the deposits. The second amendment is to limit their profit to one-half of 1 per cent per annum. Now, I will not discuss those amendments further at this time, but devote the time I have to a discussion of the main proposition to strike out section 16.

Now, gentlemen of the committee, this same proposition was before the Sixty-third Congress. You remember that the Banking and Currency Committee of both Houses appointed subcommittees on rural credits, and those subcommittees held hearings extending over many months. Representative Bulkley, of Ohio, was chairman of the subcommittee of the Banking and Currency Committee of the House that conducted these hearings. That subcommittee prepared a bill and a report, and that subcommittee, so to speak, was the author of this plan of 12 Federal land banks that the joint committees of the two Houses adopted and that the present Banking and Currency Committee has adopted and presented to us.

I think you who know Mr. Bulkley know that he is a man of sound judgment and an able man. He gave this question very great consideration. When the bill was before the House on the 1st of March, 1915, Mr. Bulkley made a motion to strike from the Senate bill, which was then before the House, section 17. In that bill the joint-stock provision was section 17. That will be found in the CONGRESSIONAL RECORD of March 1, 1915, on page 5049.

Now, that amendment presented by Mr. Bulkley carried by a vote of 130 to 81; so that this House by a decisive vote struck out of the bill before the House in the last session of the Sixty-third Congress the provision which created joint-stock banks.

Now, then, I will just read to you a part of a speech made by Representative Bulkley before this House, and which seemed to carry conviction. He said:

Mr. BULKLEY. Mr. Chairman, this amendment proposes to strike out a section which is not a part of the original bill. Section 17 provides for the incorporation of private institutions, each with a capital of not less than $250,000, to do business in competition with the local farm-loan associations which are created by the bill.

The farm-loan associations would be cooperative associations, owned and controlled by the farmers who are borrowers from the system. These banks which are proposed by section 17 would be money-making institutions.

There are two principal objections to having such institutions brought in competition with local farm-loan associations. The first is that if they did any business at all they would be taking it away from the local institutions; they would then be dividing the field, and therefore relatively increasing the overhead expenses of the local institutions which are owned and controlled by the farmers themselves.

But a more fundamental objection than that may be urged against these $250,000 private banks. It is this: The original Hollis-Bulkley bill contemplated a complete system without anybody interested in raising interest rates. Everybody connected with the system would be interested in reducing the rates of interest to the farmers, who are the borrowers. But if this section 17 is written into the bill, you at once have great and powerful institutions, with heavy financial backing, who are interested in a direction opposite to the interests of the farmers. They are interested in keeping the interest rates high as against the interest of the farmers.

The new Hollis bill proposes too many of these institutions competing with each other in the bond market. In the original bill the bonds would have a national market and all farm-loan bonds would be the same throughout the United States. All would sell at the lowest possible interest rate. Under this amendment as proposed in the new Hollis bill 48 institutions would be competing with each other for the market. There would be 48 different classes of bonds, and the investor would be confused, and there would be room for commissions and rake-offs for brokers.

I hope the Democratic majority in this House will follow Representative Bulkley, of Ohio, who, as many of you know, was one of the most distinguished Democratic Representatives in the Sixty-third Congress.

Mr. Chairman, in the general debate on this bill I was granted 30 minutes of time in which to discuss it. I devoted practically all of that speech to discussing section 16 of this bill, which authorizes the organization of joint-stock land banks. There is a motion pending now to strike out section 16. I am in favor of the amendment. I am opposed to creating joint-stock land banks as a part of our land-credits institutions.

In discussing this question we should bear in mind that this bill provides for two kinds of land-credits institutions. The bill authorizes the organization of 12 banks, called Federal land banks. The entire United States is to be divided into 12 districts. One of these Federal land banks is to be organized in each of these 12 districts. Each of these 12 Federal land banks has subsidiary corporations known as national farm-loan associations. Ten or more persons, prospective borrowers, may organize one of these associations. No one can secure a loan from one of these 12 Federal land banks, except by becoming a member of a local farm-loan association, except in certain cases. He must subscribe to the capital stock of the national farm-loan association an amount equal to 5 per cent of his loan. In turn the national farm-loan association subscribes for an equal amount of stock in the Federal land bank. The borrower is also liable for an additional amount equal to the stock which he owns in the farm-loan association. In other words, the borrower actually puts up an amount equal to 5 per cent of his loan in stock and becomes liable for an additional 5 per cent of his loan. The Federal Government, to start Federal land banks, is expected to subscribe $750,000 in stock to each one of them, but in time the Government stock is all to be retired, so that the farmers who are borrowers will in the end be required to furnish all the capital upon which these 12 Federal land banks operate. The fact that the farmers furnish all the capital with which to operate these Federal land banks is not so great a hardship after all, because, if the banks make any profit whatever, it will be returned to the farmers in a form of dividends upon the stock which they hold. These 12 Federal land banks are bound together and are made responsible for each other's bonds and liabilities. A national system of land banks is thus created. As these banks are responsible for each other's bonds and other liabilities, I believe they will have practically equal credit and that the bonds of one bank will sell at as low a rate of interest as will the bonds of the other banks. These 12 land banks will, I think, provide practically equal credit facilities to the farmers in the various sections of the United States. They will be farmers' institutions conducted in their interests. There will be no private stockholders and absolutely no inducement to the managers to charge high rates of interest. Three of the directors will be appointed by Federal authority and six of the directors will be elected by the farmers or borrowers through the farm-loan associations. To me, one of the splendid features of this system of Federal land banks is that it binds the farmers of the entire United States into what is in reality one great national land-credit system.

I have made a somewhat careful study of the land-credit institutions of the other countries. I believe that the system of 12 Federal land banks will present to investors securities as safe, sound, and desirable as the bonds or debentures issued by any land-credit system of the world. Now, there is one system. It will be a great land-credit system, owned and dominated by the farmers of the United States and directed solely in their interests. This is not all. The National Government not only supervises this system of land credit, but by the appointment of a part of the directors aids and assists the farmers in the management and control of these Federal land banks.

But section 16 of the bill presents to our minds another picture. This section authorizes the organization and incorporation of what are called joint-stock land banks. These banks are to be purely private, profit-sharing, surplus-creating, dividend-paying banks, organized, managed, controlled, and directed in the interest of stockholders, directors, officers, and employees of these institutions. The men who put their money in these joint-stock land banks will do so solely for the purpose of making money. Men will not organize these banks or invest their money in the capital stock thereof for any other purpose. Men will organize and operate these joint-stock land banks just for the same purpose that men engage in any other private business. The owners of the joint-stock land banks can not and will not have any inducement or desire to reduce the rates of interest. It will not be their duty especially to promote the development

of agriculture or to increase the profits or prosperity of the farmers. This bill proposes, therefore, to require the farmers to furnish the capital to operate one system of land banks, and then it proposes to authorize private capital to organize another system of land banks. The joint-stock land banks owned by the private capital will be in direct competition with the system of land banks owned by the farmers. This will not mean competition in interest rates. It will be competition in the sense that the joint-stock land banks will run in opposition to the banks owned by the farmers. In other words, the joint-stock land banks will be stumbling blocks standing in the way of the success of the other system. The creation of two kinds of land-credits banks means that the farmers of the United States who are borrowers will be divided. The competition between these two kinds of land banks will not be banks competing against each other, but it will be farmers competing against each other. This is the great difficulty with agriculture to-day. Every farmer is competing against every other farmer. Our farmers do not cooperate with each other in business. Men in other businesses cooperate. Our farmers must always be at a great disadvantage until they learn to cooperate more extensively in business matters. I had hoped that when we came to organize a new system of land credits that we would provide the farmers of the United States with the necessary machinery whereby in purchasing credit they could act as one man. With section 16 in the bill, they will not do this. But that is not all. Every joint-stock land bank will be a separate independent institution. Under section 16 there may be many joint-stock land banks organized. As to how many there will be in existence we can not tell. It will be a purely voluntary matter. However, it is safe to assume that many of them will be organized. Each one of them will be competing against the others, and that will mean that the farmers will be competing with farmers. This may appear to be a contradictory statement. It is not. You must remember that the joint-stock banks, as well as the 12 Federal land banks, will secure their money to loan to the farmers by the sale of farm-mortgage bonds. Farm-mortgage bonds, then, is the credit instrument that must be sold to investors. All these joint-stock land banks, as well as the 12 Federal land banks, in a large measure, will be offering their bonds for sale to the same investors. Investors will buy these securities from banks which are bidding against each other.

Now, when banks bid against each other to sell their bonds, the tendency will be to facilitate sales by increasing the rates of interest on the bonds. Other things being equal, people with money to invest will purchase securities bearing the highest rates of interest. However, when the interest rate on the farm-mortgage bond is increased, there must be a corresponding increase in the interest charged the farmer who borrows. Thus it will be seen that the whole tendency of this dual system of land banks is to put farmers in competition with each other in selling their bonds. The inevitable consequence must be to increase the rates of interest which the farmers pay on their mortgages. We must also bear in mind that we are taking a step here that in all human probability can never be recalled. If the joint-stock banks are to be created by this bill, they will be organized in various parts of the United States. Bonds extending for a period of 36 years will be sold. Once established, we can not abolish them. They will be a part of our land-credit system probably for all time to come. Now, I honestly believe that this will mean on the average a higher rate of interest to the millions of farmers who for the next century are to be borrowers.

There is another proposition I wish to present to the Members of this House. A farmer, as I have already pointed out, must subscribe to the capital stock of the farm-loan associations an amount equal to 5 per cent of his loan, and in addition to that he becomes liable for the obligations of the farm-loan associations for an additional 5 per cent. This in itself will be objectionable to many farmers. They can secure loans through the joint-stock land banks without subscribing to their capital stock or in any way becoming liable for their financial obligations. Undoubtedly many farmers will prefer to borrow from the joint-stock land banks even if they pay a higher rate of interest. I have made a summary of what I call the restrictions and limitations which are placed upon borrowers who make loans through the farm-loan associations. I do not know that I have collected all of them, but I present the following list:

1. Ten or more persons necessary to form associations.
2. Twenty thousand dollars in loans must be subscribed for.
3. An amount of cash equal to 5 per cent of loan must accompany application for charter—to be invested in capital stocks.
4. Appraiser must investigate solvency and character of the applicants.
5. Organization subject to approval of the director of district bank.
6. Federal farm-loan board may for good cause shown refuse charter.
7. Members of association must pay their share of salary of secretary-treasurer, his reasonable expenses, and also the reasonable expenses of the other officers and agents and assessments without limit may be levied on members to meet expenses of associations.
8. Dividends of district banks are paid to associations, not to borrowers who have put up 5 per cent of their loan in capital stock.
9. Borrower must pay cash in advance for 5 per cent of face value of his loan or borrow the amount from the district bank.
10. Members are liable for debts of associations "to the extent of the amount of the stock owed by them at the par value thereof in addition to the amount paid in and represented by their shares." (Sec. 9, lines 8 to 13, p. 24.)
11. After association has been once organized, a prospective borrower "may become a member only by two-thirds vote of the directors."
12. He must also pay in cash 5 per cent of his loan in stock.
13. His application must first be approved by appraisement committee, by an appraiser or appraisers sent by the district bank, and finally by the directors of the bank.

Loans can be made only for the following purpose, and for no other:

14. For the purchase of land for agricultural uses.
15. For the purchase of equipment and live stock necessary for the proper and reasonable operation of the farm.
16. For the improvement of farm lands.
17. For the purpose of liquidating indebtedness existing at the time of the organization of the first national farm-loan association established in or for the county in which the land mortgaged is situate or indebtedness subsequently incurred for one of the purposes above mentioned.
18. Loans can only be made to persons engaged, or shortly to become engaged, in the cultivation of the land mortgaged.
19. Use of loan or any portion thereof for any other purpose "than specified in his original application" makes loan due and payable forthwith.
20. Inasmuch as the 12 Federal land banks are liable for each others' debts and obligations, every borrower from these banks assumes this financial responsibility to the extent of the par value of his stock plus the amount invested in said stock, which makes a total liability of 10 per cent of the amount of his loan.

The most of these limitations and restrictions are entirely unnecessary. Farm-loan associations should be organized solely to aid the Federal land banks in conducting business and to aid borrowers and not to place burdens and restrictions upon them. I believe that the farmers, in order to provide capital for a great land-credit system, conducted solely for the benefit of the farmers, may justly be asked to subscribe 5 per cent of their loans to the capital stock of this great land-credit system. This is not any great hardship, because in the end the entire amount of stock held by the farmer would be credited upon his loan and in the meantime he, as I believe, would receive more than enough dividends on his stock to offset the interest he had paid on the amount invested in stock. But I am opposed to adding the additional 5 per cent liability upon the borrower. I am opposed to permitting farm-loan associations to go to any expense whatever or to have power to levy assessments or fines upon its members. I feel sure that the average farmer will not want to go in an association where the liabilities are indefinite and uncertain. A borrower has a right to know just what his loan will cost him, and he can not know this if the farm-loan associations have financial responsibilities and may levy fines and assessments upon its members to meet its obligations. Whatever may be the object of all these restrictions and limitations, the effect thereof must be to drive the farmers away from the Federal land banks, which are to be owned by the farmers, and to drive them into the joint-stock land banks, owned, controlled, and dominated by private capital. I have not the time to further discuss this subject, but for one I will vote to strike out section 16, which authorizes the organization of private joint-stock land banks, and in so doing I believe I am acting for the best interest of the farmers in the United States as well as for the best interest of the Nation at large.

Mr. MOSS of Indiana. Mr. Chairman, I would like to ask unanimous consent, before I begin speaking, to speak for 15 minutes on this amendment.

The CHAIRMAN (Mr. FERRIS). The gentleman from Indiana asks unanimous consent to proceed for 15 minutes. Is there objection?

Mr. RUBEY. Reserving the right to object, I would like to have it included in that request that everybody be quiet and cease conversation, in order that we may hear clearly what the

gentleman has to say on this proposition. I will not make any objection, however.

Mr. MOSS of Indiana. Mr. Chairman and gentlemen of the committee, I feel that the members of the Committee of the Whole have arrived at the point where they must make an important decision regarding the proposed system of rural-credit legislation. I have listened attentively to the debate on this bill running through the past week, and I desire to say that it will go down in literature as a discussion of a very high order.

It has been assumed that the members of the committee framed section 16 because they wished to extend favors to private joint-stock banks. This criticism is on a par with that indulged in by those who favored striking out 6 per cent as the maximum rate of interest and then assumed, from the fact that other gentlemen voted against the motion, that such were in favor of charging the farmers of this country a high rate of interest.

Every member of the Banking Committee, I feel sure, I may say, is absolutely in favor of the cooperative system and has given weeks and months of work in order to make that cooperative system strong and effective. We believe we have done this. But if we have not succeeded, this House ought to amend the bill in a way that will make it successful. This House ought not to strike out one system in order to make the other system successful.

There are two elements that are fundamental in this discussion: First, we have two systems of banks. Gentlemen of the House have the right to know why there are two systems of banks proposed. The first, or the cooperative one, is a special system designed by the committee for the service only of the more necessitous classes among farm borrowers. You will recall that when that section was under discussion some gentlemen felt that we ought to make these restrictions more severe, while others thought that we ought to make them more liberal. This shows the presence of an honest difference of opinion on this subject which only confirms the decision of the committee to organize two distinct systems of banks to serve separate classes of farm borrowers.

Now, it is the opinion of the committee that among the great class of farm borrowers some have better business capacity and better credit facilities than others, thereby resulting in a multiplicity of interest rates. In order to make such rates more uniform and to give loans to those persons who are most necessitous we have organized a special system and given it favors from the Government Treasury. I know we have given large favors under this bill to the cooperative banks, and that we have excluded a large number of American farmers from the opportunity of coming under the system. We may have made the mistake of permitting too many men to come into the system. It might have been better to say that none should borrow over $5,000. It may be that that would have been better. But the point that I make is that we have designedly made it a special system, and have given it a large degree of favors in the way of Government aid.

But if we are to create a special system and by legislation exclude some farmers from its operations, then we ought to permit such farmers to come into another system in a way to get the benefit of organized land credit.

If this section is stricken from the bill the remaining sections will constitute a special and not a general system of rural credits. It will be a bill under which thousands of farm owners can not borrow a dollar. I do not present this statement as a criticism upon the special or cooperative system of banks. These limitations were written in the bill designedly and for a good purpose. The committee, however, had in mind the creation of a general credit system, as proposed in this section. The two taken together make a system under which any American farmer can secure organized credit on favorable terms and at a reasonable rate of interest. I am in favor of a limited system of land credit under which the more necessitous classes of farmers may secure credit on more favorable terms than they can otherwise do. Such a system is very common in all countries where land credit has been organized under statute, and it is to such limited systems that Government aid is wisely granted. Some very strong men have pointed out in this debate that we have included too many men in this special system of ours. That argument has a strong base and is not easily answered. It may be correct. Other able men have argued that we have excluded many worthy men by setting the entrance limit too high.

I have listened with the most profound interest to the views of these men, and I am willing now to go on record in predicting that some of these suggestions will be written into law before another decade goes by. It is inevitable that the arbitrary limits which we have set up in this bill will be modified by experience. The principle we have adopted is sound, namely, that the favors of the Government shall be extended to certain classes among farm borrowers for certain worthy purposes. We here meet the common difficulty of framing any special legislation where the favors of the Government are extended to its citizens. It is impossible to include all, so a struggle ensues as to who shall enjoy the special benefits. France loans money to any French citizen who has a family and who desires to purchase a farm home not exceeding 2½ acres. The rate of interest is fixed by the number of children. Five children in the family will secure a loan at 2½ per cent interest; four children, 2½ per cent; three children, 2¾ per cent; and two children, 3 per cent. This is an extreme example of special systems, but in every European country there will be found one or more special systems where State aid is given for special purposes.

I have no apology either for the Government aid granted in this bill or for the fact that these favors are confined to certain classes of our farm borrowers. It may be that we have not adjusted our limits right, but we propose to grant the more necessitous preferential rates of interest for certain purposes. In that declaration of purpose I am in hearty accord, and will vote to amend the bill in a future Congress if I shall continue to enjoy the confidence of my district and experience shall demonstrate that we have failed to accomplish our full purpose in this draft.

I am confident that the bill in its present form will not fail, but I am willing to extend this assurance to any who are fearful. But while I am thus willing to help organize this special system and to grant it large favors from the Public Treasury to make certain of the results we desire to secure, I am also well aware that there are large numbers—hundreds of thousands—of patriotic, industrious American farmers who have been designedly excluded from the benefits of this special system, intending that they might come in and secure favorable credit under this section. These men need a larger volume of credit on more favorable terms. The results of such credit on American agriculture will be beneficent. And that is the great, big purpose of land credit. It is not primarily to benefit the individual farmer. It is to benefit the people of the entire Nation. It is for the purpose of better organizing agriculture and of increasing the national wealth and of increasing and making more certain our future food supply.

Now comes the second fundamental question, and that is the question of capital stock for the land banks. One of the chief difficulties in organizing land credit is to secure the guaranty capital. One of the commonest forms of State aid is subscription to the capital stock of land banks by the Government. I know of no country where loans are advanced in cash to the borrowers that extreme difficulty has not been encountered in acquiring capital to organize land banks. The distinguished Speaker of this House on Saturday referred to the landschafts of Germany; but I beg to remind him and this House that these associations have no capital stock and do not grant loans in cash.

Mr. SMITH of Michigan. And the present bill provides capital, does it not?

Mr. MOSS of Indiana. Yes; certainly; but I will come to that in a moment. An association without capital stock does not make loans in cash. Of necessity they make loans in bonds. The farmer takes his mortgage to the association and the association hands him a bond and he sells it for whatever he can get.

Mr. MADDEN. Will the gentleman yield?

Mr. MOSS of Indiana. Yes.

Mr. MADDEN. The landschaft is a cooperative association like a drainage district.

Mr. MOSS of Indiana. Most assuredly; but no borrower ever received a loan in cash money from a landschaft. These forms of land credit have been organized where it has been difficult or impossible to secure cash capital for land banks and only illustrates one of the difficulties your committee labored under in framing this bill. It has been taken for granted that American farmers would demand loans in cash, and this necessitated the organization of banks which would sell their own securities and deal in actual money and not simply exchange credit instruments with their patrons. The ratio between capital of a land bank and the volume of its loans has never been wider than $1 in capital to $20 in loans. This means, in the aggregate, an enormous bank capital in a nation the size of ours. If we assume that we desire only to refund the present volume of farm-mortgage indebtedness, it will require a gross capitalization of $200,000,000. But if this bill accomplishes the hopes of its authors—if it meets the imperative needs of the American people—it must largely augment credit facilities and encourage a like increase in mortgage indebtedness. We can not secure additional farm owners through the operation of any rural-credit

law without increasing the volume of debt. Speaking for myself, I register the conviction and the hope that through the operations of this law the total volume of mortgage debt in the United States will rise to at least $10,000,000,000. If so, under the terms of this bill the capital of all land banks in the Nation must aggregate at least $500,000,000.

No committee of House or Senate has ever proposed to impose a burden of raising this vast capital exclusively upon the necessitous classes of farm borrowers of the Nation. Gentlemen in this debate have apparently assumed that they were conferring a peculiar privilege on farm borrowers by seeking to limit the right to subscribe capital to land banks to mortgagees. I am glad to observe that some of the clearest thinkers have reckoned rightly, that this requirement is a burden and not a privilege. No nation in the world has ever enacted a rural-credit law imposing such a burden upon borrowers and prohibiting private capital from engaging in the work of organizing land credit and thereby improving and encouraging the higher development of agriculture in that nation. It was a common claim—and always one of pride—advanced before the United States commission that such work in Europe was often engaged in from altruistic motives. The Bulkley-Hollis bill was dependent upon private capital for its successful operation. The land bank under the provisions of that bill secured $9 in capital from the general public to $1 from the farm borrower. If the public failed or refused to subscribe this ratio of capital, the growth and operation of the system was suspended. It was this fatal defect that caused the joint committee to reject that plan as being impracticable and unworkable. If you strike this section from this bill, you will impose the whole burden of organizing land credit upon those who are in debt, and by so doing will take an action which has never been recommended by any committee of either branch of Congress and which has never been imposed upon borrowers by any legislature in any country in the world. If you take this action and it impedes or impairs this legislation, then the responsibility will be upon those who are willing to go upon record in support of this radical action.

Mr. FESS. Will the gentleman yield?

Mr. MOSS of Indiana. Yes; with pleasure.

Mr. FESS. What has the gentleman to say about the charge that this section 16 will nullify the balance of the bill?

Mr. MOSS of Indiana. I do not share the fears of those who honestly believe that this section is inimicable to the cooperative system; I am absolutely confident that we have so favored that system that it will prosper and give its patrons rates below that possible in any general credit system. If this were not true, the remedy is to strengthen the cooperative system and not deny to all farmers better credit on more favorable terms than they now enjoy. My ambition has been to make this the best rural-credit system of any nation in the wide world. I am aware that many Members of this House have much greater ability than I possess, but none have had greater opportunities to study at first hand the rural-credit systems of European countries, and none are more intimately acquainted with the environments and necessities of our farm population.

I believe confidently that we have organized a cooperative system in this bill that all the adverse powers in this country can not prevent working successfully. I believe that we have given by it so many great advantages that it will be signally successful.

Mr. SMITH of Michigan. The gentleman thinks he has organized a system that is workable and one that will be popular.

Mr. MOSS of Indiana. Mr. Chairman, how much time have I remaining?

The CHAIRMAN. The gentleman has two minutes.

Mr. MOSS of Indiana. Then, I can not yield to the gentleman from Michigan. We have created systems which will be successful for the classes that are to be served by them.

Without section 16, you have only a partial credit system; you will have created a system, granted large favors from the Public Treasury designedly for a part of our farm population, and by your vote to strike out this section you go on record as being opposed to better credit facilities for all farmers. Such a law is not fair or equitable; it is not a redemption of the promises made to the people; it is not defensible on any grounds of public policy.

I may not be willing to vote Government aid to a land bank to make loans to farmers to send their children to school, and thus fit them for life's struggle, but I will not vote to forbid them access to organized credit for such purposes. My father borrowed money to send me to Purdue University that I might have the benefit of a better education, and I have occasion to bless his memory for this kindness every day of my life. Such help was far more beneficial to me in later life than would the purchase of an additional 40 acres of land to be willed to me at his death; and I do not propose to cast a vote which will exclude all farmers in the United States from borrowing money under favorable terms to educate their children and to give them the civilizing influences which at present more abundantly surround the lives of children in the city as compared with those on a farm. This section is the only one in this bill which will permit credit to be freely extended to all farmers for any good purpose; but if you strike it out, you deny absolutely to many farmers all opportunity to mobilize their credit and use it for their business interests, their family, their country, and their God. [Applause.]

Such action on the part of this committee, in my opinion, will place the enactment of this legislation in jeopardy, and will go far to justify any Member who may feel compelled to cast his vote against the enactment of a statute which taxes all the people and whose benefits are designedly limited to only a part of the farm population of our Nation.

Mr. MANN. Mr. Chairman, you can not loan money unless you have it. In order to loan money you must be able to get it. The prime object of this bill is to give to the farmer an opportunity to borrow money on the best terms possible.

Now, there are two ways in which that money can be furnished; either have the Government put its printing presses at work and loan the farmers money printed in that way or to loan money which you can get from those who have it. This bill proposes to adopt the policy of giving credit to farmers so they can obtain money from those who wish to loan it. People who have money want to loan it. Farmers want to borrow it. This bill undertakes to say to those who have it to loan, We will give you good security if you will loan your money. It undertakes to pass that money on to the farmer. There are two essential methods provided in the bill. It is proposed by some to strike out this section which includes one of the essential methods. The argument has been made that if this section remains in the bill it will interfere with the other method. I do not know whether it will or not; it is not essential. The essential thing is to find some method by which the people who have the money will advance it in order that those who want it may get it.

The farmers are not interested in the method, they are interested in the results; the investors are not interested in the methods, they are interested in the results. If both methods are successful, so much the better. If only one method is successful, that is a great thing; but when you say that you will strike out one method in order to force people to adopt the other method you are throwing away your case. We can not determine here which method will appeal most to the investor.

The prime thing that we want is to establish the credit of the farmers so that they can obtain the money from those who have it to loan. No one here can tell whether either method will obtain the credit, but anyone ought to have knowledge enough to know that if you propose two methods, both safe, one of them is more likely to prove successful out of two than merely one by itself. I think this section is one of the most important, if not the most important, section in the bill. I am inclined to believe both methods will obtain credit from those who have money to invest, and if we can establish a plan by which the widow who has money left by her husband, which she wishes to invest, can safely invest it, which money can be loaned to the farmer, then we have done a great thing. If we can establish the credit of the farm as the country has established the credit of the railroad, in order that bonds may be sold at from 4 to 5 per cent and the benefit of that go to those who need it, we have done a great thing.

The history of banking itself is one of the wonderful histories of the world. It is possible—I believe it is probable—that through this legislation we will enable combined farmers to establish combined credit, and that those who have money to loan will be willing to advance it, feeling secure with the low rate of interest, and that the farmers may get the benefit of it. I think we ought to try both ways. [Applause.]

Mr. CANDLER of Mississippi. Mr. Chairman and gentlemen, up to the present time I have not participated in the debate, but have been here listening with intense interest to all the discussion which has preceded me and voting for what I believed to be the best interest of my people. I agree with the gentleman from Indiana [Mr. Moss] and the gentleman from Illinois [Mr. MANN] with reference to the situation presented to us under the two provisions of the bill now under discussion. They both oppose striking out section 16, providing for joint-stock land banks.

This bill provides for a system of Federal farm-loan land banks, and in section 16 it provides for joint-stock land banks. The gentleman from Alabama [Mr. OLIVER] moves to strike out

section 16, providing for joint-stock land banks, and I am also opposed to this being done.

I believe it will be best to try both, rather than to eliminate one and try only one by itself, because if one interferes in the least with the other then we will by competition between the two, if it result in competition, arrive at the best method, and it will be the survival of the fittest which will secure the best and most beneficial result for the people. Whenever you eliminate one to accept the other then you limit the people to one source, whereas if you give them the benefit of both systems provided in this bill you have two sources to which to go, and when you have two it is better than one, and the people can have their choice as between one or the other and have the benefit of both. What I am anxious to do is to help the people in this country that we have been promising to help during all of these years passed and gone. Both political parties, all political parties, have promised the people this legislation for many years, and what we want to do now is to secure this legislation and to secure it quickly.

I received a letter from a constituent of mine only a day or so ago in which he described the conditions confronting him and appealing to me for help, and I always respond to my constituents. [Applause.] He owns 160 acres of land and he purchased 40 acres more. He had to borrow the money with which to buy the 40 acres. He has five children, and he says that his great desire is to leave those children each 40 acres of land as a heritage when he should pass from this old earth. He also says that by reason of conditions existing at the present time he has been unable to meet his debt for the 40 acres of land, and he sees ahead possible failure and the possible loss of the 40 acres, which will prevent him from carrying out his cherished plan with respect to his children. He writes me and appeals through me to the Congress of the United States to furnish the relief which we have been promising in order that he may secure the land that he desires, and I am here pleading his cause.

I am in favor of the long-time loan. I am in favor of the lowest rate of interest it is possible to obtain, in order that we may reduce the expense as much as possible. Hence, a few days ago I voted for 4 per cent, and when that failed I voted for 5 per cent. In this bill it is provided that the rate shall not exceed 6 per cent, and that the actual loan shall not exceed 1 per cent above the rate of interest on the bond. I at least see a prospect that the bond may be sold for 3 per cent, and that the loan, therefore, will be had for 4 per cent. If the bond is sold for 4 per cent, the loan may be had for 5 per cent, but it can not go above 6 per cent. If we can get even that relief, we will confer some of the blessings to those who are entitled to them and for which they have been looking so long. Do not take away from the people the hope which may be secured either by the other part of this bill or by section 16. Give them the benefit of both resources and open up the avenues as broadly as you can, giving them money at the cheapest rates of interest at the longest time possible, in order that they may have the benefits to which they are entitled. [Applause.]

The letter of my constituent, to which I referred, is as follows:

AMORY, MISS., *May 8, 1916.*

Hon. E. S. CANDLER,
*Washington, D. C.*

MY DEAR SIR: Having noticed that the rural-credits bill is before your honorable body, I am constrained to write you.

Our people, so many homeless as they are and others who claim homes really needn't hope to own them under present conditions, sorely need such aid as is indicated in this legislation.

Personally, in 1901 I bought 40 acres to add to my 160 which was and is half woodland bottom, hoping to leave my five children 40 acres each. I owe more on this 40 acres than the purchase price. I have been "diligent in business," economical, and have some fertile land to aid me. But I see that I am bound to lose this land unless I get lower interest rate and longer time. I am sure you will agree that 40 acres each for the children, with nearly half wet bottom woodland, 5 miles from small town (Nettleton), will be small holdings.

* * * * * * *

We believe 5 per cent interest, plus other expenses, on long-time loans and on only 50 per cent of the value is high, though we prefer this to no aid.

Please do your best for us.

Sincerely and truly, yours, ——— ———.

Now, Mr. Chairman, I am here doing my best for him and others situated like him, and it is just the class of our citizenship as is described in this letter I am most anxious to help. I want to help those who have bought homes to pay for them and those who do not own homes to secure them. In order to do this for the good of the country and the happiness of our people let us pass a rural-credits bill which will secure for the people, by Government aid, plenty of money to meet their wants, and at least their necessities, on the longest time possible and at the lowest available rates of interest. Let us help these farmers' banks at least as much as we have helped commercial banks, and even more, for to help agriculture is to help every man, woman, and child in this country. When we build up agriculture we will establish homes, and the home, at last, is the foundation and security of the Republic. [Great applause.]

The CHAIRMAN. The question is first on the amendment offered by the gentleman from Mississippi [Mr. STEPHENS].

Mr. SMITH of Michigan. Mr. Chairman, may we have the amendment reported?

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

There was no objection, and the Clerk again reported the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi.

The amendment was rejected.

Mr. STEPHENS of Mississippi. Mr. Chairman, I desire to offer another amendment.

The CHAIRMAN. Will the gentleman wait until we dispose of those that are now pending?

Mr. STEPHENS of Mississippi. Yes.

The CHAIRMAN. The next vote will be taken on the amendment offered by the gentleman from Pennsylvania [Mr. MOORE].

The question was taken, and the amendment was rejected.

Mr. MOORE of Pennsylvania. Mr. Chairman, is there any objection to having that amendment reported? I know it is too late, but I ask unanimous consent to have the matter reconsidered.

The CHAIRMAN. The gentleman from Pennsylvania asks unanimous consent to return to the amendment which has just been voted upon, have it again reported, and again vote upon it. Is there objection?

There was no objection.

The amendment of Mr. MOORE of Pennsylvania was again reported by the Clerk.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Pennsylvania.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The next vote is on the amendment offered by the gentleman from Oklahoma.

Mr. MORGAN of Oklahoma. Mr. Chairman, I ask unanimous consent that it be again reported.

The amendment was again reported.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The next vote is on another amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The gentleman from Mississippi [Mr. STEPHENS] offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 111, at the end of line 7, add the following: "But the rate of interest on such bonds shall not exceed 4 per cent."

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Alabama [Mr. OLIVER]. Without objection, the Clerk will again report the amendment.

The amendment was again reported.

The question was taken, and the Chair announced the noes appeared to have it.

Upon a division (demanded by Mr. MORGAN of Oklahoma), there were—ayes 22, noes 112.

So the amendment was rejected.

The Clerk read as follows:

FORM OF FARM-LOAN BONDS.

SEC. 19. That bonds provided for in this act shall be issued in denominations of $20, $50, $100, $500, and $1,000. They shall run for specified minimum and maximum periods, subject to payment and retirement at the option of the land bank at any time after five years from the date of their issue. They shall have interest coupons attached, payable semiannually, and shall be issued in series of not less than $50,000, the amount and term to be fixed by the Federal farm-loan board. They shall bear a rate of interest not to exceed 5 per cent per annum.

The Federal farm-loan board shall prescribe rules and regulations concerning the circumstances and manner in which farm-loan bonds shall be paid and retired under the provisions of this act.

In order to furnish suitably engraved bonds for delivery to Federal land banks and joint-stock land banks, the Comptroller of the Currency shall, under the direction of the Secretary of the Treasury, cause plates and dies to be engraved in the best manner to guard against counterfeits and fraudulent alterations, and shall have printed therefrom and numbered such quantities of such bonds of the denominations of $20, $50, $100, $500, and $1,000 as may be required to supply such land banks. Such bonds shall be in form and tenor as directed by the Federal farm-loan board under the provisions of this act and shall bear the distinctive numbers and names of the several land banks by which they are issued. They may be exchanged into registered bonds of any amount, and reexchanged into coupon bonds, at the option of the holder, under rules and regulations to be prescribed by the Federal farm-loan board.

When such bonds have been prepared they shall be deposited in the Treasury or in the subtreasury or mint of the United States nearest

the place of business of the land bank for which such bonds have been prepared, and shall be held for the use of such bank, subject to the order of the farm-loan registrar of the district.

The plates and dies to be procured by the Comptroller of the Currency for the printing of such bonds shall remain under his control and direction, and the expenses necessarily incurred in executing the laws relating to the preparation of such bonds and all other expenses incidental to their issue and retirement shall be paid by the land banks. The Federal farm-loan board shall levy semiannually against the respective Federal land banks and joint-stock land banks, in proportion to the issue of bonds by each, a sufficient amount to cover such expenses.

The examination of plates, dies, bed pieces, etc., and regulations relating to such examination of plates, dies, etc., of national-bank notes provided for in section 5174, Revised Statutes, are hereby extended to include bonds herein provided for.

Any appropriation heretofore made out of the general fund of the Treasury for engraving plates and dies, for the purchase of distinctive paper, or to cover any other expense in connection with the printing of paper currency, and any distinctive paper that may be on hand at the time of the passage of this act may be used in the discretion of the Secretary of the Treasury for the purposes of this act, and should the appropriations heretofore made be insufficient to meet the requirements of this act, the Secretary is hereby authorized to use so much of any funds in the Treasury not otherwise appropriated as may be required for the purpose of furnishing the bonds aforesaid, adequate reimbursement being duly made therefor under the provisions of this section.

Mr. GLASS. Mr. Chairman, I offer an amendment which is a substitute for section 19, proposed by the Treasury Department as a better form for these bonds, and I offer it as a committee amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Substitute for section 19:

"SEC. 19. That bonds provided for in this act shall be issued in denominations of $20, $50, $100, $500, and $1,000; they shall run for specified minimum and maximum periods subject to payment and retirement at the option of the land bank at any time after five years from the date of their issue. They shall have interest coupons attached, payable semiannually, and shall be issued in series of not less than $50,000, the amount and term to be fixed by the Federal farm-loan board. They shall bear a rate of interest not to exceed 5 per cent per annum.

"The Federal farm-loan board shall prescribe rules and regulations concerning the circumstances and manner in which farm-loan boards shall be paid and retired under the provisions of this act.

"In order to furnish farm-loan bonds for delivery to Federal land banks and joint-stock banks, the Secretary of the Treasury is hereby authorized to prepare suitable bonds in such form, subject to the provisions of this act, as the Federal farm-loan board may approve, such bonds when prepared to be held in the Treasury subject to delivery upon order of the Federal farm-loan board. The engraved plates, dies, bed pieces, etc., executed in connection therewith shall remain in the custody of the Secretary of the Treasury. Any expenses incurred in the preparation, custody, and delivery of such farm-loan bonds shall be paid by the Secretary of the Treasury from any funds in the Treasury not otherwise appropriated: *Provided, however*, That the Secretary shall be reimbursed for such expenditures by the Federal farm-loan board through assessment upon the farm-land banks in proportion to the work executed."

Mr. HAWLEY. Mr. Chairman, I desire to offer an amendment to the committee amendment. In that part of the amendment, in the second sentence of it, which reads, "they shall run for specified minimum and maximum periods subject to payment and retirement at the option of the land bank at any time after five years from the date of their issue," I wish to strike out the word "five" and insert the word "ten."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend the amendment by striking out, in line 5, the word "five" and inserting "ten."

Mr. HAWLEY. Mr. Chairman, the bill reported by the joint committee on rural-credit legislation provided that the bonds should not be called until after a period of 10 years. The bill as passed by the Senate provided also that the bonds should not be called until after a period of 10 years. The bill as reported by the Banking and Currency Committee of the House put in a limitation of 5 years. I understand the reason moving the committee to make that change to be this: That with the deduction of the semiannual amortization payments and the advance payments from the face of the mortgages taken by the bank they feared that if the period during which the bonds could not be called exceeded five years there might be such a reduction as to make it difficult to earn enough money from the mortgages to pay the interest on bonds and the bonds as they mature. Now, if that is not a fair statement I will yield to any Member of the committee who wishes to correct it, as I desire to make an accurate statement so that the Committee of the Whole may judge upon this proposition.

Mr. SMITH of Michigan. Will the gentleman explain how the holder of the bond can follow it through to the land, or could they realize the difference in bonds upon the particular land that they represent? How could you follow it to the land?

Mr. HAWLEY. I can not take up that question, as it has no reference to this particular matter now before the committee. In answer to the difficulty above alleged I have taken the compound-interest tables published by Baker & Vawter, and I find the following facts: That in a period of five years, on a $1,000 mortgage, there will be paid on the face of the mortgage $58.02, and on a $1,000 mortgage taken for a period of 10 years there will be paid $132.07 of the principal sum. Let me restate that. On a mortgage of $1,000, paying an amortization of 1 per cent, or $10 a year, there will be paid at the end of five years, including compound interest on these five annual payments, $58.02. On a $1,000 mortgage, with 10 payments of $10 in a period of 10 years, with compound interest on each of those payments for the period they have to run, there will be paid $132.07. On a million dollars worth of mortgages there would be paid in 10 years $132,070, which is about one-eighth of their face value. Now, the money that comes into the bank from the amortization payments and advance payments can be reinvested at once in other mortgages and can be put to work immediately to earn for the bank returns to meet the payments of interest on the bonds and in the same amount, or practically the same amount, that was being earned previously thereon.

Now, the purpose of my amendment is this: Time is an essential factor in the value of a bond and materially affects its salability. The amendment by the distinguished gentleman from Virginia [Mr. GLASS], the chairman of the committee, contains the provision that the bonds shall run for minimum and maximum periods.

But it also says that they can be called at the end of five years. That means that none of these bonds will ever be sold above par for a longer period than five years. The real strength and value of a bond is evidenced in the premium it commands. I would like the committee to take particular notice of that. If the banks should offer bonds, the market would absorb them at a lower rate of interest than is provided in the face of the bonds; that is, the market would absorb them at a premium. You can not sell them at a premium for any period beyond five years, because when any investor buys the bonds he will have the notice that at the end of five years the bonds may be called, and if time sufficient is not allowed to amortize that premium in the interest paid he will lose it, and no investor will buy bonds at a premium and run the risk of losing a part of that premium.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HAWLEY. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from Oregon asks unanimous consent to proceed for five minutes more. Is there objection? [After a pause.] The Chair hears none.

Mr. HAWLEY. Now, I have some figures on that.

Mr. LEVER. Before the gentleman reads that let me ask the gentleman—and the gentleman has had a great experience in handling of bonds—what effect the period will have on the bonds in the open market?

Mr. HAWLEY. I will answer that immediately, and I thank the gentleman for his question. A 5 per cent bond running for five years before it is to be called, selling at a price of 102.22, would earn 4½ per cent during that period; but that same bond running for 10 years, earning the same rate of interest during the period, would sell for 103.99, or $17.70 more for each $1,000 bond. A 5-year bond bearing interest on the face of it at 4½ per cent, earning 4 per cent during that period, would sell for 102.25. That same bond running for 10 years, with the same rate of 4½ per cent, to earn 4 per cent would sell for 104.90, or, a $1,000 bond would bring in that same market, selling for 10 years, as against the same bond if it sold for 5 years, $26.50 more. And I could multiply the illustrations without number. Time added to the life of a bond before it can be called materially increases its value.

Mr. KINCHELOE. Will the gentleman yield?

Mr. HAWLEY. I will.

Mr. KINCHELOE. If your amendment were to carry, what effect would that have upon the system if an individual borrower wanted to pay his obligation in five years?

Mr. HAWLEY. That would only add whatever he paid to the money in the hands of the Federal land bank, which would take the money and invest in other mortgages. The bank would take new mortgages with the money so paid in.

Mr. MOSS of Indiana. I know the gentleman has given this a great deal of consideration, but is it his opinion that you can in this bill give the farmers the option of paying off their mortgage any time after five years and at the same time deny the bank the privilege of bringing in their bonds within the same period?

Mr. HAWLEY. I would say it was impossible if the bank did not have the opportunity to loan that money out again at once. And undoubtedly the bank will have the opportunity to loan out the amortization and advance payments at once on a satisfactory earning basis. If you make the bonds callable after five years' time, the life of the bond is five years—that is

the term that can be absolutely counted upon—and you make them sell in a market at a disadvantage, and, no matter how good the bond is, you can not take advantage of a favorable market, get a premium, and reduce the rate of interest to the borrower.

Mr. RAGSDALE. In other words, the idea is that the longer the life of the bond——

Mr. HAWLEY. The higher its price and the greater its value.

Mr. RAGSDALE. The lower will be the rate of interest.

Mr. HAWLEY. Yes. The purchaser will pay a premium for it, depending upon the time it is to run, which means that he buys it upon a lower interest-earning basis than that provided on the face of the bond, and this lower rate is the rate of interest he would have bought the bond for on a par basis. It sells for a higher rate, which means that a 10-year bond which sold for 4.50 and earned 4 per cent in that same market could have been sold at par on a 4 per cent basis with a resultant reduction of one-half of 1 per cent in the rate at which the money received could be loaned to borrowers.

Mr. RAGSDALE. Does not the gentleman think that this market would be created that would not be created under the five-year loan? For instance, if the gentleman was trying to make an investment for a State, or a fiduciary investment, for a long period of time, whereas he might not be willing to invest it in a 5-year bond, he would be willing to invest it in a 20-year bond?

Mr. HAWLEY. Certainly the long life of a bond makes it more attractive. I will say to the gentleman frankly if this limit stays at five years it will seriously reduce the opportunity of selling these bonds and deprive them of a large part of their natural market.

Mr. PLATT. Will the gentleman yield?

Mr. HAWLEY. I will.

Mr. PLATT. I wanted to ask the gentleman whether it is his experience in buying bonds that the minimum period in which the bonds may be called determines the rate, or is it usual in a bank when the bond may be called in five years to consider it will be called in five years?

Mr. HAWLEY. The period after which a bond may be called and before it becomes due is the optional period. The time at which the issuer of the bond may call it in for payment determines the period after which it will not sell for a premium. In 15 years, in handling millions of bonds, I do not recall an instance where the bondmen of the United States—and we have them from all parts of the country—have ever offered us bonds and expected a premium on them after the beginning of the optional period. So, answering the gentleman's question, it can be said that the minimum period the bonds have to run is a very important factor in determining their value. When a bond is called, or the optional period is reached, it goes to par.

Mr. PHELAN. If what the gentleman says is so, why limit the bonds to 10 years? Why not make them 20 years?

Mr. HAWLEY. For the reason that I stated in the beginning, that I wish to make them as attractive as is consistent with safety. The period can be safely fixed at a 10-year minimum. The gentleman will remember that we had a long, earnest but pleasant discussion in the joint committee on that subject, and I have the highest esteem for the gentleman from Massachusetts. But——

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. HAWLEY. I ask unanimous consent, Mr. Chairman, that I may have five minutes more.

The CHAIRMAN. The gentleman from Oregon asks unanimous consent to proceed for five minutes. Is there objection?

There was no objection.

Mr. HAWLEY. I do not think I will use the five minutes unless questions are asked.

Mr. LEVER. I would like the gentleman to draw out, for the benefit of the committee, what effect the situation he has described will have on the farm borrower. The gentleman has not made that entirely clear to me, although I think I know what he has in his mind upon it.

Mr. HAWLEY. It will reduce the rate to the borrowers, I will say to the gentleman from South Carolina. Now, if we provide that they are to run for a minimum period of 10 years, they are a better and more desirable bond, will have a wider market, and they will bring a better price than if offered for a minimum period of five years. A 5-year bond in a given market sells for $26.50 lower on each $1,000 than the 10-year bond. A 5-year bond on another basis will sell for $27.10 lower than a 10-year bond for each $1,000. If we make these bonds 10-year bonds, we will take advantage of this condition in the market, we will get our money cheaper, and therefore we can lend it to the farmer cheaper, without endangering the system.

Mr. HELVERING. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. HELVERING. I would like to have the gentleman explain a little more clearly how you can predicate upon a 5-year bond a 10-year redemption on a 5-year mortgage. That is to say, if the mortgage can be paid in 5 years, how can you make it run for 10 years? I would heartily favor the proposition if the gentleman can explain it satisfactorily.

Mr. HAWLEY. The answer to the gentleman's question is that the money received can be immediately reinvested. The whole difficulty of the matter which led the committee of the House to make the minimum 5 years, as against 10 years, as provided in the Senate bill and in the joint committee's bill, is this: The Committee on Banking and Currency think that with the amortization payments coming in and with the advance payments the farmers are authorized to make, and with the face value of the mortgages upon which any bonds are based being correspondingly reduced, the earning power would be similarly reduced. We depend upon the interest earnings of the mortgages to pay the interest on the bonds. If the mortgage earnings are reduced and less interest is collected we do not have money to pay the interest on the bonds. But this difficulty is eliminated for all practical purposes, since the land banks will immediately invest the money so received in new mortgages and receive interest from them to replace the interest lost on amortization and advance payments. One hand will wash the other. As the payments of the principal sums of the mortgages are reduced by these amortization payments, the Federal land banks will call for additional mortgages to be placed behind the bonds.

The whole proposition is this: If the Committee of the Whole House now can see its way clear to the conclusion that the interest on the unpaid principal sum of the mortgages behind any bonds, with the interest on the mortgages they can buy, with the amortization payments and the advance payments will pay the interest on the bonds outstanding—and I think undoubtedly that they will, and I can not conceive of any condition that could arise where it would not be so—then by adding five years to the life of these bonds we can reduce the rate of interest to the borrowers a very appreciable amount. The whole purpose of the bill is to do three things: To get money to loan to the farmers, to make it repayable in amortization payments, and to loan it at the lowest rate of interest consistent with safety.

I would not support any other proposition. My experience in the buying of bonds shows that the bonds must be safe. With a 10-year period they will have a wider market and will sell more readily than five-year bonds under the conditions under which we propose to issue them and collect the money to pay them; and it is perfectly safe to sell them on a 10-year basis.

Moreover, if any land bank desires to reduce the amount of its outstanding bonds at any time it can do so by purchases in the open market. When tens of millions of them are issued, before any can possibly become due many will be returned to the market. In this regard they will have the same history as other bonds. To sum up, we can safely make the minimum period 10 years. That will give the bonds a wider market, make them more attractive, enable us to sell them at a lower rate of interest, and make the rate of interest the farmer borrowers will be asked to pay lower. The bill proposes to get money to loan through the sale of bonds. The system will fail if the bonds do not sell in large quantities. We can not afford to circumscribe the market in which they can be sold. [Applause.]

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. PHELAN. Mr. Chairman, I hope that this amendment will not prevail. I dislike very much to disagree with the gentleman from Oregon.

Mr. GLASS. Mr. Chairman, how much time does the gentleman desire?

Mr. PHELAN. I may get through in five minutes; perhaps not.

Mr. GLASS. I ask unanimous consent, Mr. Chairman, that the debate on this section and amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the gentleman's request?

Mr. MORGAN of Oklahoma. Reserving the right to object, Mr. Chairman, can I have five minutes?

Mr. GLASS. You have just had on that side 10 minutes on that proposition.

Mr. MORGAN of Oklahoma. I shall object unless I have five minutes.

Mr. GLASS. Then I move, Mr. Chairman, that the debate close in 10 minutes.

The CHAIRMAN. The gentleman from Virginia moves that the debate on this section and amendments thereto close in 10 minutes. The question is on agreeing to that motion.

The motion was agreed to.

Mr. PHELAN. Mr. Chairman, I have great respect for the opinion of the gentleman from Oregon [Mr. HAWLEY], but I wish to call to the attention of the committee a thing we have had to combat with all through this bill, and I say it with the greatest deference and respect to the gentleman: That when a man specializes in a particular thing he is likely to exaggerate the importance of that thing. The gentleman has given attention to bonds. I yield to him in his knowledge of bonds and in what he says about the desirability of getting a long-time bond. I will not dispute that with him. But the important thing to remember is this: That we must have in these banks the money to meet these bonds when they are due, and we must invest the money that the bank has to advantage. The gentleman, I think, has not given important enough consideration to those two things.

Let us see. We issue a bond which can not be called inside of 10 years, and yet right in the same bill we provide that there shall be payment upon the principal every time the installment is due, cutting down the principal. And, perhaps more important that that, we have a provision in the bill whereby the farmer can, after 5 years, pay his entire principal.

Now, what is the bank going to do when it gets its payment of the principal through amortization or gets the principal in full, as the case may be, at the end of five years? What will it do with the money? It can invest it in mortgages, but when it does that it must be sure that those mortgages shall not run for a longer period than the period in which those bonds become due.

In other words, if the bonds are due in 1920, then the bank is absolutely obliged to loan a certain amount of money which it will be certain to get back in 1920. What does that mean? When the farmer comes up and wants to borrow for 35 years, although the bank may have the funds in the possession of the bank, it will say, "We are sorry we can not give you a loan for 35 years, because we have obligations coming due in 10 years, and we have to loan our funds so that we can get the money back and meet those obligations.

Mr. MANN. Will the gentleman yield?

Mr. PHELAN. I will.

Mr. MANN. Is it expected that there will be some market for the bonds where they will be bought and sold?

Mr. PHELAN. Yes; we expect it will have a very wide market.

Mr. MANN. If I have a bond that I want to dispose of, will there be a chance to sell it?

Mr. PHELAN. Yes, indeed.

Mr. MANN. Then what is to prevent the bank from buying its own bond?

Mr. PHELAN. Nothing at all, but here is the disadvantage. If the bank is borrowing money at 4 per cent and invests money at 4 per cent, then the bank is not making any profit. The whole theory of the cooperative plan is that the funds of the bank shall be used to the best advantage so that the farmer will be getting a profit out of the system and not be absolutely obliged to suffer in lack of profits to the bank because the bank is handicapped and tied hand and foot by explicit provisions of the law from investing its money.

Mr. MANN. The gentleman says the farmer may pay in money when no bond comes due, but if the bank can go out and buy on the market, what is the difference?

Mr. PHELAN. I do not quite follow the gentleman.

Mr. MANN. Suppose the farmer pays in some money which the gentleman says ought to be applied to the payment of the bonds, what is to prevent the banks buying the bonds?

Mr. PHELAN. And canceling the bonds? The danger is that they would have to pay a premium, and if we put into effect a provision that will oblige them to pay a premium——

Mr. MANN. If we make a premium on the bonds by lengthening their term, is not that an advantage to the farmer, if you make the bonds so that they sell higher?

Mr. PHELAN. I think it may at times be more of a disadvantage than an advantage.

Mr. MANN. If the bonds sold at a premium when the bank wanted to buy, they would be at a premium when they wanted to sell. They would be engaged in buying and selling bonds all the time.

Mr. PHELAN. It might just happen——

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. The gentleman from Illinois asks that the time of the gentleman from Massachusetts be extended five minutes. Is there objection?

There was no objection.

Mr. PHELAN. The trouble is, it is the bank's demand that may make the premium, and maybe the bank is the only one that will be obliged to pay it. The principle is that if you are going to have the money paid in at a certain time you ought to enable the bank when it gets the principal to call the bonds so as to reduce their indebtedness at the same time. That is the way it is done in the foreign system. They write a bond so that they are enabled when they get the payment of the mortgage principal into the bank to reduce the debt of the bank by paying off bonds of the bank. I do not want to see the hands of the directors of the land banks so tied that they are absolutely obliged to issue bonds and not be able to cancel any of those bonds inside of 10 years. I want to see it so arranged that they can pay off some of the bank's indebtedness, namely, the indebtedness which is brought about by the issuing of the bonds by calling in some of these bonds if that shall be advantageous.

Mr. LEVER. Will the gentleman yield?

Mr. PHELAN. Yes.

Mr. LEVER. I wish the gentleman would address himself to the proposition of the gentleman from Oregon [Mr. HAWLEY], that these bonds may be invested in new mortgages for the time being.

Mr. PHELAN. I have already said that if you get any amortization payments, or if you get any large payments of principal, as you are likely to do when the farmer is prosperous, you can, of course, under the amendment offered by the gentleman from Oregon, reinvest the funds, but here is a danger. You are likely to be in a position where, in the reinvestment, you are obliged to reinvest for a limited period in order to have the mortgages come due when the bonds issued come due. In other words, you are likely to find the bank in a position so that it will be obliged to say to the farmer when he comes to borrow for 35 years, "We are sorry we can not give you the funds for that length of time; all we can do is to give you them for 15 years, because we have so many bonds coming due in 15 years."

Mr. MADDEN. Will the gentleman yield?

Mr. PHELAN. Yes.

Mr. MADDEN. Why not have the bill provide for the bonds to run 35 years without the right to call them in?

Mr. PHELAN. That would be more dangerous than the proposition of the gentleman from Oregon. If you issue bonds in 1916 making them due in 35 years, that would make them due in 1951. If in 6 years from now large sums of the mortgage principal are paid in, the banks may not be in a position to invest these funds except for such a period as shall return these funds to the banks to meet the bonds when they shall fall due.

Mr. MADDEN. There will be a certain percentage that you can loan, and you can arrange the loans you make to meet the situation.

Mr. PHELAN. Maybe you can and maybe you can not. That is the trouble. Nobody can foresee how the loans are going to be made, what the demands are going to be; nobody can tell in what year there will be a great demand, in what year there will be a moderate demand, in what year there will be a small demand, so that if you tie the hands of the directors of these banks in a way that they are absolutely prohibited, as the amendment would provide, from calling their bonds, you are likely to put the bank in a position where it is going to be limited as to how it is going to loan its money, and that is what I do not want to see done.

Mr. HAWLEY. There will in time be an immense amount of these bonds offered for sale.

Mr. PHELAN. Yes.

Mr. HAWLEY. And the gentleman will agree with me that there will be millions on the market at any time?

Mr. PHELAN. Yes.

Mr. HAWLEY. And from these millions the banks can select such bonds as may suit their purposes.

Mr. PHELAN. Yes.

Mr. HAWLEY. As they approach the period of maturity, the bonds will be running up to the 10-year period all the time, and there will be always on the market available for purchase millions and millions of bonds at par. How could that be otherwise?

Mr. PHELAN. I hope so, but I do not know.

Mr. HAWLEY. They will all go to par after 10 years.

Mr. PHELAN. That is just the trouble. You have to wait that long before this thing gets working, and it is during those 10 years when you are in danger, before the bank can go out and buy them.

Mr. HAWLEY. But only the first 10 years of the history of the institution. Would there possibly be any danger of what the gentleman suggests after that? There will be millions of these bonds at par, because every bond that has reached the age of 10 years goes to par and stays there.

Mr. PHELAN. After 10 years it may be there will not be so much danger; it may be there will not be any danger, but the dangerous period for this whole system is during the first 5 and 10 years of the system.

Mr. HAWLEY. There will be no bonds to buy, coming due within the 10 years.

Mr. PHELAN. That is the time I want to see those banks able to reduce their indebtedness.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. PHELAN. Yes.

Mr. SMITH of Michigan. As I understand it, member banks or national banks that belong to the regional reserve association can purchase these bonds?

Mr. PHELAN. Under the provisions of this bill member banks can; yes.

Mr. SMITH of Michigan. I will ask the gentleman whether or not it would not make them more popular to furnish a short-term bond to those national banks, in order that their funds may be more mobile? They would prefer a five-year bond to a bond of longer period.

Mr. PHELAN. It may work that way. I will state that I yielded to the opinion of the gentleman from Oregon on the question of the advantage of long-time bonds over short-time bonds; but we had some testimony, as perhaps the gentleman will recollect, from people who dealt in bonds, who did not believe that. Personally, I will be frank in stating that I think the gentleman is correct.

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The question is on the amendment to the amendment of the gentleman from Oregon.

The question was taken; and on a division (demanded by Mr. HAWLEY) there were—ayes 43, noes 69.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Virginia.

The amendment was agreed to.

The Clerk read as follows:

SPECIAL PROVISIONS OF FARM-LOAN BONDS.

SEC. 20. That the form of farm-loan bonds issued under this act shall be prepared by the Federal farm-loan board. The form of farm-loan bonds issued by a Federal land bank shall include, among other provisions, a copy of this section of this act, and a statement that the assets of all the Federal land banks are jointly and severally liable for the payment of each bond, and shall further state the physical basis of such bonds in farm lands, and such other information as may be prescribed by the Federal farm-loan board.

Each bond shall also contain a certificate in the face thereof, signed by the farm-loan commissioner, to the effect that this bond has the approval in form and issue of the Federal farm-loan board and is legal and regular in all respects. It shall be signed by the president of the bank issuing the same and attested by its secretary.

Each land bank shall be held to be bound in all respects by the acts of its president in signing farm-loan bonds, and by the acts of the Federal farm-loan board in authorizing their issue.

There shall appear in the face of each farm-loan bond provided for in this act the statement that such bond is not taxable by National, State, or municipal authority.

Every Federal land bank issuing farm-loan bonds shall be primarily liable therefor, and shall also be liable, upon presentation of farm-loan bond coupons, for interest payments due upon any farm-loan bonds issued by other Federal land banks and remaining unpaid in consequence of the default of such other land banks; and every such bank shall likewise be liable for such portion of the principal of farm-loan bonds so issued as shall not be paid after the assets of any such other land banks shall have been liquidated and distributed: *Provided*, That such losses, if any, either of interest or of principal, shall be assessed by the Federal farm-loan board against solvent land banks liable therefor in proportion to the amount of farm-loan bonds which each may have outstanding at the time of such assessment.

Every Federal land bank shall by appropriate action of its board of directors, duly recorded in its minutes, obligate itself to become liable on farm-loan bonds as provided in this section.

Mr. HUGHES. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

At the end of section 20, amend by adding:

"All farm-loan bonds issued by the Federal land banks shall be deemed the obligation of the United States Government."

Mr. HUGHES. Mr. Chairman, I represent an agricultural district, in which cotton is the money crop, and wherever cotton is the money crop that section is a credit section. The farmers who are cotton growers feel that they are absolutely given a special privilege when they can obtain money at 8 per cent interest for a time no longer than for six months. There are land banking companies loaning money on farm mortgages in my section, in my district, and in my State. They loan this money for from three to five years. In the majority of instances this money is loaned at a straight rate of interest of 8 per cent plus the overhead charges, which means the lawyer's fees, and so forth, and that makes the farmer pay an interest of at least 8½ per cent per annum. Hence, you can readily see the great interest felt by those in the cotton-growing belt of the South who are to-day forced to borrow money. They are anxious that a bill suited to their conditions and their wants, a banking bill of this nature, may pass this House. I wish to give the history of an incident in my own knowledge. I wish to call the attention of my distinguished friend from Michigan [Mr. SMITH], whom I consider one of the best business men in this House, always fair, to this fact. I know a gentleman who owns 1,000 acres of land upon which he has borrowed $5,000. He pays 8 per cent interest on that loan and renews it every three years. I know that that 1,000 acres of land would bring $25,000. I do not know of a single bank in the great State of Georgia which would make a loan of $5,000 on that property at less than 8 per cent and for more than 12 months.

Mr. SMITH of Michigan. Will the gentleman yield for a question?

Mr. HUGHES. I will, sir.

Mr. SMITH of Michigan. Would a farmer under such circumstances want to give a mortgage which would compel him to keep the money five years before there was any opportunity to pay?

Mr. HUGHES. I think he would. I think he would be very glad to get a mortgage for five years.

Mr. SMITH of Michigan. Is it not true that a person owning $25,000 worth of real estate, free and clear, could go to New York, Baltimore, Savannah, or any place and get money for less than 8 per cent?

Mr. HUGHES. He can not do it in Georgia from banks on land for five years.

The ultimate successful accomplishment of this bill depends on the validity and market attraction for the land bonds, for these bonds must be sold to obtain the cash to loan on land mortgages.

Every political party has indorsed rural credits. Therefore it is not a partisan but a national question, and if this House fails to pass a bill to meet agriculture banking needs and demands this House will have committed a national injustice and wrong, if not a crime.

This Government stood sponsor for the Federal reserve act, thereby making it the best commercial banking system ever written. It has stood the test and met every emergency, though the very world was on fire. Follow the precedent and have this Government stand sponsor for this rural-credit bill, making it the best rural-credit bill every written.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HUGHES. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to proceed for five minutes. Is there objection?

Mr. GLASS. Mr. Chairman, reserving the right to object, I would like to get a unanimous agreement to conclude debate on this section and all amendments thereto.

Mr. HAWLEY. I want five minutes.

Mr. GLASS. In 10 minutes—I will say 15 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 15 minutes. Is there objection?

Mr. HAWLEY. Reserving the right to object, does that give gentlemen the opportunity to get five minutes each who want to speak?

Mr. MANN. We want 10 minutes over here.

The CHAIRMAN. The Chair will say he will recognize the gentleman from Georgia and one gentleman on this side and one gentleman on that side.

Mr. MANN. That would shut out the gentleman from Georgia. He has not got the other five minutes yet.

Mr. GLASS. I think gentlemen readily understand the proposition, and I think if we can not reach an agreement on 15 minutes, I shall move to close debate in 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 15 minutes. Is there objection?

Mr. MADDEN. Mr. Chairman, reserving the right to object, do we get 10 minutes over here?

Mr. GLASS. Mr. Chairman, I move that we close debate in 15 minutes on this section and all amendments thereto.

Mr. MANN. Will not the gentleman make that 20 minutes? Mr. Chairman, I move to amend by making it 20 minutes. That lets the gentleman from Georgia have 5 minutes.

The CHAIRMAN. The gentleman from Illinois moves to amend by making it 20 minutes.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. MANN. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 52, noes 68.

Mr. MANN. Mr. Chairman, I ask for tellers.

Tellers were ordered.

The committee again divided; and the tellers (Mr. GLASS and Mr. MANN) reported that there were—ayes 67, noes 83.

So the amendment to the amendment was rejected.

Mr. MANN. Mr. Chairman, I move to amend by making it 15 minutes.

Mr. GLASS. That is exactly what my motion was.

Mr. MANN. No; the gentleman's motion was for 10 minutes.

The CHAIRMAN. The Chair was under the impression that the motion of the gentleman was for 10 minutes.

Mr. MANN. It was stated at 10 minutes.

Mr. GLASS. I do not know how the Chair stated it, but I know how I offered it.

Mr. MANN. It was made at 10 minutes, and stated at that.

The question was taken, and the motion was agreed to.

The CHAIRMAN. The gentleman from Georgia.

Mr. MANN. The gentleman from Georgia has had five minutes and his time has not been extended.

Mr. HUGHES. I asked for an extension of time.

Mr. MANN. I know the gentleman asked for it, but he has not obtained it yet.

The CHAIRMAN. The point of order is well taken if the gentleman makes the point of order that the gentleman from Georgia has already spoken on this amendment.

Mr. HUGHES. I have only taken five minutes, and I would be very glad to get an extension of five minutes. I have occupied very little time of this House.

Mr. MANN. If the gentleman has a request to make——

The CHAIRMAN. Does the gentleman from Georgia make any request?

Mr. HUGHES. I ask unanimous consent to proceed for five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that he may proceed for five minutes. Is there objection?

Mr. MANN. Reserving the right to object, I desired to have five minutes on this section myself. I shall not object, although courtesy is entirely lacking on the other side of the House. I shall not object to the gentleman from Georgia having five minutes, although he would not vote to give me five minutes.

Mr. GLASS. Mr. Chairman, when I moved to terminate the discussion in 15 minutes, it was distinctly with the view of giving the gentleman from Illinois [Mr. MANN] and the gentleman of the committee from New York [Mr. PLATT] five minutes each, and the gentleman who had requested the extension of his time five minutes. I have not been guilty of discourtesy to the gentleman from Illinois or any other Member of this House. [Applause.]

Mr. MANN. The gentleman from Texas [Mr. HENRY] was asking for five minutes and the Chair stated he was recognizing alternately on the two sides.

Mr. GLASS. I am not saying what the Chair said but what I had in view when I made my motion.

Mr. MANN. The gentleman should carry it out.

Mr. GLASS. The gentleman was accusing me of discourtesy.

Mr. MANN. I did not. I accused that side of the House of discourtesy.

The CHAIRMAN. The gentleman from Georgia [Mr. HUGHES] asks unanimous consent that he may proceed for five minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. HUGHES. Mr. Chairman, in Germany 86 per cent of the farms are worked by the owners. Germany's agricultural policy has brought about this condition. Germany has a rural-credit system made great by Government aid. Had it not been for Germany's agricultural perfection and condition she could not have withstood the allies, for she could not have sustained her army.

Germany can not be starved. Though England's rock wall surrounds her she is defiant, for her agricultural products are abundant. In Great Britain only 50 per cent of the farms are worked by owners. Hence that great nation, with all its money, like a miser locked in a vault with gold which he can not digest, is a dependent nation. She does not rely on her agricultural resources but upon her mighty navy to keep the markets of the sustaining world open to her. Had she to depend on her own agriculture she would starve in 90 days.

In the United States only 64 per cent of the farms are worked by owners of land.

In my own State, Georgia, there are 80,000 white tenants. This is not a healthy agricultural condition. A rural-credit bill should be enacted not alone for the landowner but also for the industrial, economic tenant. In any section where the farms are occupied by owners who work them, you find a prosperous, happy, progressive section, and vice versa. This does not apply alone to Ireland, but to our great Nation, and the same is true everywhere on this earth. I hope this amendment will be adopted. [Applause.]

Mr. PLATT. Mr. Chairman, when the Agricultural appropriation bill was under discussion several weeks ago one of my colleagues from New York [Mr. BENNET] spoke of the fact that New York is first in the production of apples and some other agricultural products. Now, as a matter of fact, New York is one of the greatest agricultural States of this Union, and its Representatives in this House are just as vitally interested in the enactment of rural-credits legislation along right lines as the Representatives of any Western or Southern State, although it is true that our New York State farmers can, as a rule, borrow such money as they need at rates not exceeding and often lower than 6 per cent by mortgaging their farms.

By way of proving my assertion as to the greatness of the great agricultural State of New York let me state to you a few of the agricultural products in which it leads all the States, and let me point out that several of them are vital necessities.

The first is milk and dairy products, perhaps the most vital of all agricultural products—

We can live without corn, wheat, cotton, or silk;
But civilized youngsters can't live without milk.

Next come potatoes, and then apples, in which New York has a long lead over the next State, and then cabbages and sweet corn. Now, with milk, potatoes, apples, cabbages, and sweet corn, we up-State New Yorkers could get along very well; but those prime necessities are not the only agricultural products in which New York leads. Let me enumerate some of the others. New York is not only first in dairy products, potatoes, apples, cabbages, and sweet corn, but also in bush fruits, celery, green peas, in vegetable acreage, in timothy and clover mixed, in miscellaneous tame grasses.

New York is second in the production of onions, in fruits and nuts combined, in grapevines—California first—in cheese factories, in buckwheat, and in total hay and forage crops.

It is third in the number of creameries and in dry, edible beans.

It is fourth in acreage of coarse forage. In alfalfa it does not make a very large showing alongside of Kansas, but New York has a larger acreage of alfalfa than any one of the great agricultural States of Iowa, Ohio, Illinois, Wisconsin, Indiana, or Arkansas.

New York is not often thought of to-day as an important grain-growing State, but it grows more grain than some States that have a reputation for grain. It is fifth in rye, eleventh in wheat, eleventh in oats, and above the average in corn.

I could go on and show that New York is sixth in receipts from poultry and eggs, sixth in value of live-stock products slaughtered on the farm, sixth in colonies of bees, sixth in plums and prunes, but I think I have gone far enough to show that New York stands up with any other State in the Union as an agricultural State. The figures I have quoted are all to be found in the last Agricultural Yearbook recently published.

I may add that of the 43 Representatives of the great State of New York in this House 14 represent districts that are chiefly agricultural. How many agricultural States have more than 14 Representatives here?

New York is vitally interested in this bill, and those who represent that great State are naturally doing all they can to make this a sound, sensible, workable bill.

Mr. HENRY. Mr. Chairman, we are now approaching the conclusion of this bill, and I want to congratulate the committee on the many admirable features it contains. A year ago, when we suggested a separate and independent system for the benefit of agriculture, some gentleman said the enactment of such a law was not possible. But we have a separate and distinct system in this bill, with a Federal farm-loan board to control it. And when we pressed direct Government aid it was answered that such a thing was not to be considered; and yet we have written into this bill a provision that the Government shall place $9,000,000 at the disposal of the farmers for the purpose of taking the capital stock of 12 Federal land banks.

And we go further. On the second day of the proceedings, while considering this bill, the gentleman from South Carolina [Mr. LEVER] offered an amendment, which was adopted. In effect it provides that the Government shall guarantee the payment of the interest on farm-loan bonds. It goes almost far enough, but not quite enough. The gentleman from Georgia has offered an amendment providing that the Government should guarantee the bonds. His amendment is correct. You voted for a provision in the Federal reserve act that guaranteed every Federal reserve note. Why not extend the Government credit in the fullest measure and go a little further than the Lever amendment?

On Saturday I read to this House a report recently issued by the Department of Commerce, to the effect that Canada had passed a rural-credit bill and provided for the issuance of farm-loan bonds. It provided that the Crown should get behind their bonds and guarantee the payment of principal and interest.

Mr. Chairman, I hope gentlemen will be able to see their way clear to go as far as Canada and other countries when they established rural-credit systems. You have done well. You have reduced interest rates to 6 per cent in many sections of this country, and I predict that under the provisions of your act millions of homeless men will be able to come in under its terms and acquire broad acres on which they may establish their homes.

The amendment offered by the gentleman from Oklahoma [Mr. MURRAY] should have been adopted. And yet there are still abundant provisions for taking care of numbers of landless and homeless men. If the interest rate is reduced, if the man without a home is given time to pay for it in a long period of years, extending from 5 to 36 years, as this bill provides, then it is possible for the man without land to go to the Government and get 60 per cent of its valuation and turn it over to the original owner who has the land for sale, and let the seller take a second mortgage on the land. Then every year the second mortgage becomes more valuable, because under the amortization plan the first 60 per cent is being gradually paid off.

So the three things for which we have struggled during our three-year fight are in the measure, to wit, *interest not exceeding 6 per cent, a distinct and separate system for the farmer, and direct Government aid.*

The CHAIRMAN. The time of the gentleman from Texas has expired. There are three minutes remaining.

Mr. MANN rose.

Mr. GLASS. Mr. Chairman, I was going to ask unanimous consent that the gentleman from Illinois should have five minutes if he wants it.

The CHAIRMAN. The gentleman from New York [Mr. PLATT] did not use all of his time, and, without objection, that will be added to the three minutes if the gentleman from Illinois desires it.

There was no objection.

Mr. MANN. I may not want three minutes. I want to ask what this means on page 117 with reference to farm-loan bonds?—

And shall further state the physical basis of such bonds in farm lands.

What do you mean by stating "the physical basis of such bonds in farm lands" on the face of the bond? I yield to any member of the committee to explain it.

Mr. STEPHENS of Texas. What page and line?

Mr. MANN. Page 117, line 18. Everybody understands.

Mr. GOOD. They are holding a caucus on the subject. [Laughter.]

Mr. MANN. I do not want some mere opinion that some man imagines here. I want the opinion of the man who wrote it or of the men who have considered it.

Mr. MOSS of Indiana. I am not the man, then, to answer the question, but I can tell you what I think it is.

Mr. MANN. Nobody in the House knows what it is. I will not occupy any longer time. [Laughter.]

Mr. HELVERING rose.

The CHAIRMAN. The gentleman from Kansas is recognized.

Mr. HELVERING. Mr. Chairman, it is unnecessary to argue along the line that a system of agricultural credits is absolutely necessary if the rural sections of our Nation are to be built up, interest encouraged in farm work, and opportunity given to the tillers of the soil to produce at the minimum cost. Intelligent men everywhere are agreed on the proposition that the interest charged on farm loans is too great a handicap to the borrower, but, while agreed as to the disease, differences of opinion exist as to the particular remedy needed and the one best adapted to meet conditions existing here in America. That legislation is imperatively needed may be taken for granted.

Now, granting the need of rural-credits legislation, which all political parties recognized in the last campaign and indorsed, it behooves us as Representatives of the people, regardless of party allegiance, to carry out our promises by enacting general legislation on this important subject.

The bill now under consideration as a whole is not such a measure as I would propose, nor is it a bill that any individual of this House would recommend in its entirety, but it represents the conclusions reached by the very able committee having in charge this particular legislation and represents their judgment after months of deliberation. I therefore believe that we can accept the bill with such amendments as may seem advisable to incorporate into it during its course of consideration. Of one thing we can rest assured, and that is we will have on our statute books a law which will aid farmers very materially in many sections of our country and which will become operative immediately upon its enactment.

In my particular district the resulting advantages will not be so pronounced as in those sections of the country where interest rates range from 10 to 16 per cent; but, viewing the matter as I do, I plainly predict that there will be a decrease of the interest rate from 40 to 60 per cent in many sections of the United States, and in the very prosperous parts of our country, where land values are high and loan rates average from 5 to 7 per cent, there will be a reduction which will not be so marked, but a reduction with other advantages, such as the long-term loan extending from 5 to 36 years, with the privilege under the amortization plan of paying part of the principal each year; a standardization of farm loans; encouragement of cooperation and self-reliance among the farmers by giving them a uniform rate of interest and the control of their own borrowing facilities.

It was a step in the right direction and very gratifying to me when we adopted the amendment offered by the gentleman from South Carolina [Mr. LEVER] and made it possible for this Government, in times of stress or great financial depression, to come to the assistance of the regional land banks to the amount of $6,000,000. I supported that amendment because, in my opinion, it greatly strengthens the stability of the bonds issued by the different land banks. As has been ably stated on a previous occasion, the bonds issued by this system "serve as the bridge connecting the borrowing farmer on one side of the stream with the investing public on the other side." If these bonds are guaranteed to be absolutely secure, then they will sell more readily and the rate of interest to the farmers will thereby be reduced.

As this bill provides, the rate charged the farmer on his loans is to be gauged by the rate, plus 1 per cent, at which the bonds sold at the last issue. If, however, there is a speculation in the minds of the investing public that during some future years there might occur a drought in some sections of the United States, or other calamity, such as floods, cyclones, hailstorms, or insect pests, then the bond is not looked upon with such favor and would not sell as readily as it should, and, naturally, would not be disposed of at as low a rate of interest; but if back of the bond itself the investor has the assurance that the strong arm of the National Government will come to the rescue of any section so afflicted, then there is no such speculation and indecision. This amendment is a valuable provision to place in this bill, and I hope that the conferees on the part of the House will insist upon retaining it in the bill, because I deem it an essential feature to the success of a rural-credits measure. It can not be doubted that the investor, whether he be one of a large insurance company or a wage earner who desires safe investment, and one that will not fail in an emergency, will look favorably upon farm-loan bonds when he is assured that this bond is safeguarded not only by a mortgage on real estate, the reserves of the farm-land banks, and the joint responsibility of the 11 other land banks of the country, but, above all, and in addition to these securities, he is assured that in event of any dire catastrophe, one not probable but possible, the Federal Government will come to the rescue by depositing in the particular bank so affected $500,000 to take care of the situation.

This is Government aid of the right sort, under Government control, given for the benefit of the agriculturist.

The amendment offered by the gentleman from Indiana [Mr. CULLOP] relative to the interest rate should have been accepted. I realize that on account of the overhead charges the bonds which will be issued during the first few months of the operation of this law will not be as readily salable as they will be when the system is finally running smoothly, but at the same time I believe that the 4 per cent interest rate on the bonds is such as would take care of the situation.

As I called to the attention of the House on January 13 in a speech which I delivered at that time, the average farm profits in the United States are but 5 per cent, and therefore if we are to charge 5 per cent on these bonds, then the farmer's entire profit is consumed in interest without paying any part of the prin-

cipal. Of course, this statement does not apply where the farmers pay from 8 to 16 per cent of their money, but it does apply in sections of the country such as the district I represent.

I trust that you will weigh that statement and fully appreciate its significance. To those who pay from 8 to 16 per cent in interest the passage of the bill proposed by the committee would certainly bring relief. As long as the farms of the country earn only 5 per cent, on the average, the payment of 6 per cent for mortgage loans means ultimate disaster. A higher interest rate would only accelerate the coming of ruin, and any rate in excess of 5 per cent would mean industrial death, either from lingering illness at a rate of 6 per cent or a quick demise brought about by an interest rate in excess of 6 per cent.

I do not wish to convey the impression that it is my intention to oppose a measure such as this when I know it will bring relief to such a large portion of our farming population, but I offer these suggestions and criticisms for the purpose of showing in some particulars wherein I believe the farm-loan bill now under consideration might be improved.

Some of the older Members of the House will remember from experiences, and many of us know, from reading the history of the legislation enacted by this body, the timidity and dubiousness with which they approached legislation providing for Rural Mail Delivery Service in the United States, and the many safeguards they used to surround that measure, which only hampered the service they desired to establish. I have observed efforts to-day which show that same feeling existing in the House, and I freely predict that this timidity and conservatism which is manifest in some quarters will vanish as the dew before the midday sun when the rural-credits measure is finally put into full operation. Amendments will be offered to the law from time to time, after its enactment, which will make it nation-wide in its scope and universal in its advantages and proportionate growth, and proportionate benefits will be enjoyed as in the Rural Mail Service.

Now, gentlemen, the fact of the matter is the legislation of this House for years has been replete with measures and laws designed and enacted for the benefit of the banker, the merchant, the manufacturer, and the wage earner of our country, but this is the first instance, outside of certain homestead acts and amendment of the Sherman law, where the farmers have had first consideration, and the provisions contained in those measures were to a large extent local in their application, and in all fairness we might state that this is the first instance where general legislation is to be enacted solely for the benefit of the agricultural classes.

Therefore I for one believe that we should to a certain extent eliminate ultraconservatism in this connection even to the point of being somewhat lenient in the consideration of rural-credits legislation, especially when our leniency is coupled with and supported by the best security on earth.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Georgia [Mr. HUGHES].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

APPLICATION OF AMORTIZATION AND INTEREST PAYMENTS.

SEC. 21. That whenever any Federal land bank, or joint-stock land bank, shall receive any interest, amortization, or other payments upon any first mortgage pledged as collateral security for the issue of farm-loan bonds, it shall forthwith notify the farm-loan registrar of the items so received. Said registrar shall forthwith cause such payment to be duly credited upon the mortgage entitled to such credit. Whenever any such mortgage is paid in full, said registrar shall cause the same to be canceled and delivered to the proper land bank, which shall promptly satisfy and discharge the lien of record and transmit such canceled mortgage to the original maker thereof, or his heirs, administrators, executors, or assigns.

Whenever any farm-loan bonds, or coupons or interest payments of such bonds, are due under their terms, they shall be payable at the land bank by which they were issued, in gold or lawful money, and upon payment shall be duly canceled by said bank. At the discretion of the Federal farm-loan board, payment of any farm-loan bond or coupon or interest payment may, however, be authorized to be made at any Federal land bank, any joint-stock land bank, or any other bank, under rules and regulations to be prescribed by the Federal farm-loan board.

When any land bank shall surrender to the proper farm-loan registrar any farm-loan bonds of any series, canceled or uncanceled, said land bank shall be entitled to withdraw first mortgages and bonds pledged as collateral security for any of said series of farm-loan bonds to an amount equal to the farm-loan bonds so surrendered, and it shall be the duty of said registrar to permit and direct the delivery of such mortgages and bonds to such land bank.

Interest payments on hypothecated first mortgages shall be at the disposal of the land bank pledging the same, and shall be available for the payment of coupons and the interest of farm-loan bonds as they become due.

Whenever any bond matures, or the interest on any registered bond is due, or the coupon on any coupon bond matures, and the same shall be presented for payment as provided in this act, the full face value thereof shall be paid to the holder.

Amortization and other payments on the principal of first mortgages held by a farm-loan registrar as collateral security for the issue of farm-loan bonds shall be applied by the Federal land bank or joint-stock land bank receiving the same, as follows:

In the case of a Federal land bank—

(a) To pay off farm-loan bonds issued by said bank as they mature.

(b) To purchase at or below par farm-loan bonds issued by said bank or by any Federal land bank.

(c) To loan on first mortgages on farm lands within the land-bank district, qualified under this act as collateral security for an issue of farm-loan bonds.

(d) To purchase United States Government bonds.

In the case of a joint-stock land bank—

(a) To pay off farm-loan bonds issued by said bank as they mature.

(b) To purchase at or below par farm-loan bonds.

(c) To loan on first mortgages on farm lands within the State in which it has its principal office.

(d) To purchase United States Government bonds.

The farm-loan bonds, first mortgages, Government bonds, or gold, or lawful money shall be forthwith deposited with the farm-loan registrar as substituted collateral security in place of the sums paid on the principal of indorsed mortgages held by him in trust.

[Mr. SAUNDERS addressed the committee. See Appendix.]

Mr. BURNETT. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Alabama moves to strike out the last two words.

Mr. BURNETT. Mr. Chairman, I rise to speak for a few minutes in regard to the merits of this bill.

Two years ago Congress passed legislation, the Federal reserve act, which originated in this same Committee on Banking and Currency, under the leadership of the gentlemen who have reported this bill, and that act saved the crops of the southern cotton farmers last fall.

Nearly two years ago those of us who were from the South remember the awful conditions that existed among our people when cotton went down to 7 and 6 and 5 cents a pound, and there was no market for it even at that. That condition was charged in my district, and in other districts throughout the South, to the Democratic Party, although every thinking and intelligent man knows that it was the result of war conditions.

Last fall the cotton manufacturers of the United States and of England attempted to beat down the price of the cotton of the South and to get it for a song, but under the authority of the Federal reserve act the President and the Secretary of the Treasury were given a power, which they used at that time, that saved our southern cotton planters without a doubt.

When the cotton manufacturers made the effort to beat down the price of cotton and get it for nothing our President and Secretary of the Treasury said, "No, gentlemen; there will be no distress cotton this year; here is $15,000,000 Government money, and more to follow, if necessary, that will be placed in the national banks of the South with the positive orders that every dollar of it shall be loaned to the southern cotton farmer on his cotton warehouse receipt at a rate of interest not exceeding 6 per cent."

Fifteen million dollars would not have been a drop in the bucket, but the moral effect of it was that the law of supply and demand, which in normal times will control, at once became effective, and those who expected to get 11,000,000 bales of cotton for the price that they got 15,000,000 bales for were disappointed.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. BURNETT. Mr. Chairman, I ask for 10 minutes more.

The CHAIRMAN. The gentleman from Alabama requests that his time be extended 10 minutes. Is there objection?

Mr. GLASS. Reserving the right to object, I would like to develop whether there are any amendments to be offered?

Mr. MADDEN. The gentleman from Iowa [Mr. GOOD] wants to discuss a question right after the gentleman from Alabama concludes, for about 10 minutes, and I hope he may be permitted to do that, and that the gentleman from Alabama's request may be granted.

Mr. GLASS. Has the gentleman from Iowa an amendment to offer?

Mr. MADDEN. No; he wants to speak on the general situation.

Mr. GLASS. Would it be agreeable for the gentleman to talk a little later after we get past this section?

Mr. MADDEN. No; he wants to discuss a question following the gentleman from Alabama.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto be closed in 20 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and amendments thereto close in 20 minutes. Is there objection?

There was no objection.

Mr. BURNETT. Mr. Chairman, as I was about to say, when it was ascertained that the man with two or three bales of

cotton was not to be forced to put it on the market at a sacrifice, those interested in the manufacture of cotton at once began to bid up, and cotton went from 9 to 10, 11, 12, and even 13 cents a pound, and for the first time in the history of this country the man who raised a bale of cotton received $80 or $90 for it and the seed that came out of it.

Mr. HENRY. Will the gentleman yield?

Mr. BURNETT. Yes.

Mr. HENRY. Does not the gentleman think if we had passed a bill in 1914 we would have saved the price of that crop on that year?

Mr. BURNETT. I think so, and I voted for the Henry bill on that idea. The Federal reserve bill accomplished in part what the Henry bill was intended to do. I believe that my friends from the West are too pessimistic when they say that the farmers in this part of the country will get no benefit from the pending bill. The fact that they have low rates of interest already is good, but when you take into consideration the long time that the loans under this bill are to run I believe it will be beneficial to every section of the country where a farmer wants to borrow money.

The fact that he can get money at a low rate of interest for a long time for the purpose of buying or improving his farm will, in my judgment, bring about a new era among the farmers, especially in my part of the country. It is a redemption of the pledge which the Democratic Party made in its platform at Baltimore three years ago for rural credits. When this is consummated, as I hope it may be, although it does not go as far as I would like to have it, it is going to give great relief to the farmers of the South, and, I believe, of the West also. It will place farmers on an economic basis and an equality with the manufacturing interests of the country that can borrow cheap money.

The Federal reserve act that I have referred to took a considerable time to be made effective and for the organization of the great system for which it provided, and hence could not be made available to save the cotton crop of 1914. When it did become effective, it became the salvation of the southern farmer and proved the Democratic Party to be his friend as no other party had ever been. In fact the Republican Party, especially those Members from New England who wanted their constituents to get cheap cotton, opposed every measure looking to the payment of a fair price for our great southern staple. I heard one of the Republican leaders on this floor two years ago denounce the Farmers' Union of the South as a great trust and oppose a bill, the Henry bill, I believe, which looked to their relief. The difference between the Republican and the Democratic Parties is that the former is sectional and lives for the upbuilding of the special interests of the country, while the hand of the Democratic Party is always held out for the relief of the man that toils.

When we gained the House of Representatives four years ago we passed a parcel-post bill that has proven a benediction not only to the farmers but to the working people of the whole country. Although the Republican Party had the Senate and President at that time, does anyone believe the express companies would have permitted them to give us a parcel-post law if the Democratic House had not forced them to do so?

We also passed the Underwood tariff bill, with the income-tax provision, which compelled those whose great fortunes had been built up by an oppressive tariff system to contribute to the expense of maintaining a Government which had thus enriched them. Would this law have ever been passed over the protest of the captains of industry if the Democratic Party had not gained control of the Government? Our party gave the country the Federal Reserve Banking System, the greatest piece of constructive legislation of the twentieth century.

We are now about to enact this rural-credits bill, another masterpiece of statesmanship which never would have seen the light of day under the party of Taft and Roosevelt and CANNON. Many other wise laws could be mentioned that have gone on the statute books within the three brief years of Democratic control. True, some Republicans have joined the procession and have shouted, "See what we have done"; but who is so credulous as to believe that one of these laws would now be on the books if the party of special interests had continued in control?

The platforms of that party had often made paper pledges of relief to those who by the sweat of their face earned their daily bread, but when the people trusted them again and again they were too busy paying their party obligations to those who furnished the campaign boodle to even give a thought to the "folks back home."

They now clamor for a return to power, but can the silent voter ever trust them again? If so, what assurance have we that they will not obey the behest of their money masters, and repeal all these wise laws that a Democratic Congress has placed on the statute books of our country?

What guaranty have we that the usurer will not force them to destroy the Federal Reserve System? How can we know that they will not repeal the parcel-post law, the rural-credits law, and the scores of other good laws that we have passed for the laborer? Their record of 16 years of oppression is an assurance that they would again load the backs of the laborer with burdens grievous to be borne. The American people can not again intrust power to those whose history is one of the application of the whip to the backs of the weak and the oppressed. They are willing to promise anything to those who so long bowed their necks beneath the yoke of wrong and of tyranny. They again howl for the fleshpots of loot and plunder, but their promises have too often been broken. They can not and will not again be trusted. Their hand is that of Esau, though they may try to disguise it with the voice of a Jacob. They have been weighed in the balance and found wanting. By their fruits we know them.

I come fresh from the homes of the farmers, who have prayed long for some measure of relief like that furnished by this rural-credits bill, and know that they do not want to change an administration and a Congress that for three years have kept the country at peace, and the bow of prosperity hanging in our skies, for one which may plunge the Nation into war with all that war means and brings, and may again restore the rule of the tyrant and the scepter of the man on horseback. [Applause.]

The CHAIRMAN. The gentleman from Iowa [Mr. GOOD] asks to proceed for 10 minutes. Is there objection?

There was no objection.

THE UNREDEEMED DEMOCRATIC PLEDGE.

Mr. GOOD. Mr. Chairman, if this measure has the virtue of being on a good subject, it has the vice of a great many Democratic measures of providing a lot of useless positions for deserving Democrats. [Laughter and applause on the Republican side.] I realize how futile it is to remind a Democratic Congress of its promises for economy. During the past few months, if anyone on this side of the House ventured to admonish Democrats to redeem their platform pledges for an economical administration, such person was either ridiculed by the Democratic side of the House or pointed out as a humorist. To-day apparently no one on either side of this Chamber regards the Democratic platform as containing a single pledge redeemed or made with any intention of its being redeemed.

FAILURE GENERALLY RECOGNIZED.

The failure of the Democratic Party to live up to its platform declarations is so universally recognized that it is with some hesitation that I venture to remind you again of your broken promises, your unredeemed pledges, and your disregarded party declarations, for you must remember that many of you hold your seats in this House through your advocacy of your party's platform. But now when your attention is called to your utter failure to redeem these pledges you assume an attitude and expression akin to that of a person arraigned before a court of justice charged with being the recipient of stolen goods.

A COSTLY JOKE.

Having just appropriated $40,000,000 of the people's money as "pork" in the rivers and harbors bill, being on the verge of appropriating forty-five millions more to reclaim and make valuable 16,000,000 acres of worthless overflown lands in the lower Mississippi Valley, largely owned by a few private land speculators, and now considering a bill designed chiefly to create fat jobs for "deserving" Democrats at large public expense, I venture to remind you Democrats that the people of the United States took you seriously when they voted for you for Congress. You seem now to regard it as a joke.

THE PLEDGE ITSELF.

One of the planks of the last Democratic platform is as follows:

> We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a democratic government and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

"USELESS OFFICES" INCREASED, NOT DECREASED.

Mr. Chairman, I desire especially to call attention to that part in which a demand is made for "a reduction in the number of useless offices, the salaries of which drain the substance of the people." In the campaign of 1912, those of you who were elected on that platform, and many others, waxed eloquent in denouncing the Republican administration, because it had made taxes high through wholesale increases in the number of use-

less offices. You promised to abolish these "useless offices, the salaries of which drain the substance of the people." Have you done it? No. Do you intend to do it? No. On the contrary, you have increased the number of "useless offices," and you are still doing it. [Applause on the Republican side.]

WHAT DEMOCRATS CALLED REPUBLICAN EXTRAVAGANCE.

Let us see what the Republican Party did for which you so roundly denounced it and what you have done to correct the evils of which you then complained. In all of the appropriation bills for 1911, the last year the Republican Party was in full control of the executive and legislative branches of the Government, there were 4,050 net increases in the number of specific positions in every branch of the Government, with salaries aggregating $4,958,236.72. In the appropriation bills for that year there were additional lump-sum appropriations for new positions aggregating $4,383,755.98. This was the crime that the Republican Party had committed, which was so vehemently denounced in the Democratic platform. Let us now examine the remedy you have applied.

A DEMOCRATIC EXAMPLE OF REAL EXTRAVAGANCE.

Since March 4, 1913, you have been in complete control of the legislative and executive branches of the Government. You have been given a free hand to correct every abuse of which you complained. It has been within your power, and your power alone, to abolish the useless offices against which you railed in 1912, the salaries of which you said "drain the substance of the people." I find that in the appropriation bills for 1913, 1914, and 1915, instead of a reduction in the specific positions, as promised in your platform, you have increased the number by 17,428, carrying additional appropriations aggregating $20,442,979.16. But this is not all. In the same appropriation bills you made lump-sum appropriations for the salaries of persons other than those specified amounting to $15,830,401.53. In other words, while your platform stated there were too many persons employed in the Government service, and you promised to reduce the number and decrease the appropriations, during the first three years you added more than 30,000 to the number of Government employees, and you are now appropriating for the salaries of these new additional positions $36,273,380.69 more every year than was ever appropriated by the Republican administration which you so boldly denounced. These figures in every case are the net increases, and are arrived at by deducting from the grand total of increases all positions that were abolished.

NEW JOBS FOR DEMOCRATS.

But the end is not yet. Every appropriation bill considered at this session provides for numerous new jobs. Take the legislative, executive, and judicial bill recently enacted. In that bill we appropriated $941,494.44 for new positions. So, too, in practically every bill that Congress has considered numerous new jobs are provided for Democrats. I say they are for Democrats, because in practically all of this new legislation these positions are to be filled outside of the civil service. Once Democrats are appointed to these positions they will then be covered into the civil service by an Executive order, as was the army of income-tax clerks and collectors.

If it was a crime amounting almost to grand larceny for a Republican administration to expend in 1911, $976,742,000 for all purposes, how will Democrats characterize their own extravagant expenditures of $1,116,000,000 in 1915?

PERFORMANCE V. PROMISE.

I offer these observations that we may contrast Democratic performance with Democratic promise. Yes, we added 4,050 new specific positions in 1911. Your platform denounced them as useless, yet you have retained them all and added 17,428 more, making 21,478 specific "useless" positions. Yes, we paid, all told, for salaries for new positions, specific and otherwise, in 1911, $9,431,992.70. You paid the same sum, and $36,273,380.69 more, or $45,615,373.39, in salaries for alleged "useless offices, the salaries of which drain the substance of the people."

Oh, denunciation was so easy then, but to economize is equally difficult now, with so many thousand Democrats demanding jobs. Saving the people's money and relieving them from the heavy burdens of taxation were promises easily exacted and freely made before you got in, but how different now! Now you seem to be working overtime to accomplish two things: First, to create new offices for hungry Democrats; and second, to find new objects on which to lay the heavy hand of taxation to pay the salaries of the offices you so freely create.

WHAT A RECORD!

Elevated to power on a platform of retrenchment in appropriations and economy in Government expenditure, this Democratic Congress will go down in history as the most profligate in its waste, the most extravagant in its expenditure of public funds, the most inefficient in administration, and the most oppressive in the taxes it collects from all our people.

I quote the following from the Washington Bulletin of May 13, which may throw some light on the need of this increased force:

Secretary of State Lansing is fishing down at Bryans Point, Md. Secretary of Commerce Redfield is with Lansing. Secretary of the Navy Daniels is with Redfield.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. GOOD. I ask for one minute more.

Mr. GLASS. I object. I give notice now that I am not going to give consent for any more partisan remarks. Members must confine themselves to the merits of this bill.

Mr. CULLOP. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 121, at the end of line 22, insert:

"*Provided*, That in all legal proceedings instituted under the provisions of this act the courts of the various States shall have concurrent jurisdiction with the Federal courts."

Mr. CULLOP. Mr. Chairman, at the end of four minutes I desire to be notified, so that I can yield to the gentleman from South Carolina [Mr. BYRNES].

Mr. Chairman, I think this amendment ought to be adopted in the interest of an economical administration of this law. I believe it to be a good law, a law that is workable, and that good results will follow from its enactment; but unless some provision of this kind is placed in the bill, whenever legal proceedings are instituted the Federal official having charge of the same will most surely go to the Federal court, and that will become very expensive on the citizen. We all know litigation in the Federal courts is far more expensive to litigants than it is in the State courts. For instance, if a mortgage has to be foreclosed, as doubtless under the operation of this act mortgages will be foreclosed, the litigation should be conducted in the county where the land is situated; but if the suit is brought in the Federal court, it may be 200 miles distant from where the land is situated. That will add costs, which will exhaust much of the equity of redemption, or a large portion of it, and become a burden to the debtor. The suit could just as well be conducted in the State court, where the expenses would not be so large, and of better convenience to the parties, and where the debtor would get the advantages which would result from the suit being conducted in the State court near where the property is situated. It may be claimed that the State courts do have jurisdiction, but unless there is some provision in the bill it will become the practice of the officer having charge of the suits to bring them in the Federal court as a matter of convenience to himself, when, in fact, they ought to be brought where they would be of more convenience to the defendant in the suit, and where the expenses would be less, where they would have a better opportunity to save his farm or to get as much out of the equity of redemption as possible.

Mr. SMITH of Michigan. Mr. Chairman, will the gentleman yield?

Mr. CULLOP. Yes.

Mr. SMITH of Michigan. I would like to inquire whether or not the State courts have not now concurrent jurisdiction to foreclose these mortgages.

Mr. CULLOP. Oh, they may have, but if any person makes application to remove the cause on the ground of this being a Federal law, the cause will be promptly removed from the State court to the Federal court, and if there is something in the bill lodging the jurisdiction in the State court, then we will obviate that and save both time and expense to the parties. It is the policy of the law to have all questions settled in the State courts which can be done properly there, and in this character of litigation we should fix the jurisdiction in the State courts, so that there would be no dispute about this matter, and give the benefit of the saving to the debtor, the person we are attempting to assist by passing this measure. It is, in my judgment, the proper thing to do, and I hope the amendment will be adopted. I believe this a great measure which will bring relief to many who are now paying high rates of interest and toiling to relieve themselves from the burden of debt, and for that reason I want to see the measure so framed that it will be as favorable as possible to those in whose benefit it is being enacted.

I do not share in the sentiment expressed by many that it will be of no assistance to the struggling masses who are trying to secure a home where they can live and accumulate property. To all such it will prove a blessing and enable them to live happier and enjoy the fruits of their labor and the reward of their frugality.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana.

The question was taken; and on a division (demanded by Mr. CULLOP) there were—ayes 32, noes 51.

So the amendment was rejected.

The Clerk read as follows:

RESERVES AND DIVIDENDS OF LAND BANKS.

SEC. 22. That every Federal land bank and every joint-stock land bank, shall semiannually carry to reserve account 25 per cent of its net earnings until said reserve account shall show an aggregate balance equal to 20 per cent of the outstanding capital stock of said land bank. Whenever said reserve shall have been impaired said balance of 20 per cent shall be fully restored before any dividends are paid. After said reserve has reached the sum of 20 per cent of the outstanding capital stock, 5 per cent of the net earnings shall be annually added thereto. For the period of two years from the date when any default occurs in the payment of the interest, amortization installments, or principal on any first mortgage by both mortgagor and indorser, the amount so defaulted shall be carried to a suspense account, and at the end of the two-year period specified, unless collected, shall be debited to reserve account.

Every Federal land bank shall maintain a special reserve fund. Such fund shall be created by deducting from the subscription which is made to the capital of the land bank on account of every amortized mortgage loan a sum equal to 5 per cent of the annual interest income on the face of such loan until the said special reserve fund shall amount to the maximum sum of $150,000.

Each Federal land bank shall supply, as far as practicable from this special reserve fund, all payments of interest and amortization installments on all mortgage loans where defaults are carried to suspense account as provided in this section.

No national farm-loan association shall be declared insolvent by the Federal farm-loan board during the period in which all the installments of interest and amortization on its indorsed mortgage loans are fully paid from this special reserve fund: *Provided*, That payments from such special reserve fund shall not be made on any one loan for a longer period than two years. The special reserve fund provided in this section shall be used for no purpose other than to make such payments as are herein specifically authorized, and when recovery is made by any land bank of any moneys paid from its special reserve fund, the total amount of said moneys so recovered shall be paid into the special reserve fund. If the full amount is not recovered and it is debited to reserve as provided in this section, full reimbursement to the special reserve fund shall be made from the fund so debited.

After deducting the 25 per cent or the 5 per cent hereinbefore directed to be deducted for credit to reserve account, any land bank shall declare a dividend to shareholders of the whole or any part of the balance of its net earnings.

Mr. MONDELL. Mr. Chairman, with much of mental reservation and with many misgivings as to the final outcome, I shall vote for this legislation.

I desire to support legislation intended or proposed to establish a system of farm loans under Federal supervision and assistance, and as this bill attempts to do that I support it. I very greatly fear, however, that the cumbersome plan of organization and administration provided will not work well anywhere, and I have grave doubts whether it will work at all where a system of rural credits is most needed.

I do not make these observations in a spirit of captious criticisms, because I realize the very great difficulty of establishing a Federal system of land banks and rural credits over as wide an area as ours with but little experience to guide us. I even more profoundly realize the difficulties the committee had to face in reconciling radical differences of opinion.

It does seem to me, however, that the committee might have worked out a system much less complicated and cumbersome and one which would not have required so much effort in the way of organization to get under way.

The farmers and ranchmen of the country in which I live and the State which I have the honor to represent on the floor certainly need relief from high interest charges. Not only are interest rates high with us, but frequently it has been difficult to secure farm loans extending over a reasonable length of time at any tolerable rate. In common with all new and growing countries, we have suffered from the lack of capital seeking investment. What little capital has been available has mostly sought short-term investment at high rates.

In this state of affairs almost anything that promises relief is welcome, even though the promise be as indefinite and uncertain as that held out by this bill. I am accepting the legislation not so much for what it contains as for what it promises. I am for it in the hope that as experience proves the faults of its provisions we may secure amendments which will remedy those faults and enable us to work out a practical and useful system of farm credits.

[Mr. DICKINSON addressed the committee. See Appendix.]

Mr. MORGAN of Oklahoma. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that debate on this section and all amendments thereto conclude in five minutes.

The CHAIRMAN. Is there objection?

Mr. SLOAN. Mr. Chairman, I would like to have five minutes.

Mr. GLASS. Make it 10 minutes.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that all debate on this section and all amendments thereto close in 10 minutes. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oklahoma.

The Clerk read as follows:

Amendment by Mr. MORGAN of Oklahoma: Page 122, line 1, strike out the word "twenty-five" and insert the word "fifty," and in line 3 strike out the word "twenty" and insert the word "fifty."

Mr. MORGAN of Oklahoma. Mr. Chairman, the amendment which I have offered applies to section 22 of the bill, which in part is as follows:

SEC. 22. That every Federal land bank and every joint-stock bank shall semiannually carry to reserve account 25 per cent of its net earnings until said reserve account shall show an aggregate balance equal to 20 per cent of the outstanding capital stock of said land bank.

The effect of my amendment would be to require Federal land banks and joint-stock banks to set aside 50 per cent of the net earnings until reserve account should equal 50 per cent of the capital of the bank. The amendment I have offered does not express my view of what should be the reserve of these banks, but I have presented it to indicate that the provisions in this bill relative to the reserve account are, in my judgment, not what they should be. In the first place, these banks under the foregoing provisions will have no reserves whatever unless these banks shall have net earnings or profits. This is, in the first place, no certainty as to when these banks will have any net earnings or profits. In the second place, it is only a matter of conjecture as to what these net earnings or profits will be. In other words, the amount of reserves these banks will have under the foregoing provisions is all a matter of doubt, conjecture, and uncertainty. So far as I am concerned, I believe that all profits and earnings of these land banks should be placed in the reserve until an adequate reserve for each bank has been provided. I do not believe any land bank should be permitted to do business without an ample reserve account from the start, and especially I do not think dividends should be paid at all until an adequate reserve has been accumulated. This applies, I think, where borrowers are stockholders as well as in joint-stock land banks, where nonborrowers are the stockholders. Now, I want to discuss the provisions of the committee bill relating to the accumulation of reserve accounts.

The committee bill contains three provisions relative to reserves. These are:

First. Section 22 requires that 25 per cent of the net earnings of every Federal land bank shall be carried to the reserve account until such account shall show an aggregate balance equal to 20 per cent of the outstanding capital stock of said bank.

Second. The same section requires every Federal land bank to maintain a special reserve fund which shall be created by deducting from the subscription which is made to the capital of the bank on account of amortized mortgage loan a sum equal to 5 per cent of the annual interest income on the face of such loan until the said special reserve fund shall amount to the maximum sum of $150,000.

Third. There is a provision in section 6 of the committee bill which may be regarded as providing for a reserve fund. This provision requires that "at least 20 per cent of the capital stock of any Federal farm-land bank which is paid in by national farm-loan associations shall consist of cash in the vault of said land bank or deposits in member banks of the Federal Reserve System or of investment in negotiable interest-bearing securities approved by the Federal farm-loan board: *Provided*, That not less than 5 per cent of such capital stock shall be invested in bonds of the United States."

As the $750,000 original capital to each Federal land bank is to be automatically retired, we may for the purpose of this argument regard the capital of each Federal land bank as being equal to 5 per cent of the amount of loans and also equal to 5 per cent of the amount of bonds outstanding. Under subdivision 1, above quoted, 25 per cent of the net profits are to be carried to the reserves until they equal 20 per cent of the capital. The capital will be equal to 5 per cent of the loans or bonds and the reserves are to be 20 per cent of the capital. Twenty per cent of 5 per cent is equal to 1 per cent. So under this provision the reserve would be 1 per cent of the loans. This reserve, however, is entirely uncertain and indefinite as to any particular time. There is no way of telling just when there will be any net profit. It is still more difficult to make any safe prediction as to just when 25 per cent of the net profits will equal 20 per

cent of the capital. It must be borne in mind that losses must be paid out of the reserves and that defaults in interest and other annual payments of borrowers must be met from the reserves. With the uncertainty as to when there may be profits and how large the profits may be there is also the uncertainty as to what may be the annual demand upon the reserve fund to meet defaults of borrowers in annual interest payments or other losses which the bank may sustain. But, assuming that within a reasonable time the Federal land banks through this provision will secure the maximum reserve required by this provision, there would be only a reserve of 1 per cent of the outstanding bonds.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. MORGAN of Oklahoma. Yes.

Mr. WINGO. I am sure the gentleman wants to be correct. He has overlooked the provision that after the 20 per cent reserve is attained then they shall take 5 per cent of their earnings each year. There is no limitation at all as to what the reserves shall be under that.

Mr. MORGAN of Oklahoma. It is true that there is a provision that thereafter 5 per cent of the net profits shall be carried to the general reserve; but this amount will be so small that it will not materially add to the amount of the reserve.

Under the second provision, above quoted, there would be a special reserve of $150,000. This would be taken from the capital subscribed to each Federal land bank by the farm-loan associations on account of loans made to members of this association. This is to be "a sum equal to 5 per cent of the annual interest income on the face" of each loan. Assuming that the loan would bear 5 per cent annual interest, the amount set aside on each loan for this special reserve would be 5 per cent of 5 per cent, which would equal one-fourth of 1 per cent of the face of the loan. In case of a $1,000 loan the annual interest charge would be $50. There would be set aside as a special reserve 5 per cent of this $50, or $2.50, which is one-fourth of 1 per cent of the $1,000, the face of the loan. It is a matter of great uncertainty as to how soon $150,000 special reserve would be accumulated under this provision. But even if no part of this special reserve was used to meet defaults and interest payments, the maximum special reserve of $150,000 would not be secured until loans had been made by the Federal land bank to the amount of $60,000,000. This is reached as follows: Five per cent of $60,000,000 is $3,000,000, which is the annual interest at 5 per cent on $60,000,000 in loans. Now, the reserve is to be 5 per cent of the annual interest charge on each amortized loan, and 5 per cent of $3,000,000 would make $150,000. There would, therefore, be $60,000,000 in outstanding loans and likewise in outstanding bonds at the time the special reserve would reach $150,000, assuming, of course, that up to that time no deduction would be made from the $150,000 to meet defaults in interest or losses of the bank.

Now, the third subdivision, above referred to, as found in section 6, requires that 20 per cent of the capital stock of any Federal land bank subscribed by farm-loan associations shall consist of cash in the vaults in said land bank or deposits in member banks of the Federal Reserve System, or of investments in negotiable interest-bearing securities. While this is not called a reserve, it may be regarded as such. The capital of each Federal land bank as coming from the association would be equal to 5 per cent of the face of the loan. Twenty per cent of 5 per cent equals 1 per cent; so that under this provision there would be held as reserve in cash or in negotiable interest-bearing securities an amount equal to 1 per cent of the loans or also 1 per cent of the outstanding bonds.

The general reserve at best would be but 1 per cent of the outstanding bonds. Under the provision requiring 20 per cent of the capital stock subscribed by associations to be kept as reserves, in cash or securities, there would be a reserve equal to 1 per cent of the outstanding bonds. Under the third provision, requiring a special reserve fund of $150,000, assuming that the interest rate would be 5 per cent per annum, the reserve would be equal to one-fourth of 1 per cent of the face of the total loans or of the outstanding bonds. The total reserve provided for in all three of these provisions is therefore only 2¼ per cent of the outstanding bonds. It must be borne in mind also that this calculation is made upon the assumption that in the years through which this reserve is accumulated there will be no losses or defaults in interest payments to reduce the amount of reserves. However, it is an absolute certainty that there will be defaults in interest payments, and that these defaults must be met by charges against the reserve fund. It is absolutely certain that if this bill becomes a law, with the existing reserve provision there never would be a time in the history of any Federal land bank when it would have a reserve equal to 2¼ per cent of its outstanding bonds.

RESERVES OF JOINT-STOCK BANKS.

There is only one provision in the committee bill relating to the reserves of joint-stock land banks. This is in section 22, which requires joint-stock land banks—

Semiannually to carry to reserve account 25 per cent of its net earnings until said reserve account shall show an aggregate balance equal to 20 per cent of the outstanding capital stock of said land bank.

Thereafter 5 per cent of the net earnings shall be added to the reserve account. It is wholly a matter of conjecture as to when any joint-stock bank would have any net profits, and it is further a matter of conjecture as to when 25 per cent of the net profits of any joint-stock land bank would amount to 20 per cent of the capital. It should be further borne in mind that under this reserve provision both the Federal land banks and the joint-stock land banks will have varying reserves. That is to say, no two banks will have the same reserve at any one time. One bank may have the maximum reserve required by law and another bank may be absolutely without any reserve. Thus the plan presented in the committee bill for establishing reserves is very unsatisfactory.

Assuming, however, that a joint-stock bank would sooner or later have a reserve equal to 20 per cent of its capital stock, a joint-stock bank with a minimum capital stock of $250,000 would have a reserve of $50,000. Assuming that the bank at the same time issued the maximum amount of bonds allowed, or had issued bonds equal to fifteen times its capital stock, it would have outstanding in bonds $3,750,000. With this amount of bonds and with a reserve of $50,000, the total reserve would be only 1⅓ per cent of the total amount of bonds issued. But necessarily it must be a matter of conjecture as to when any joint-stock bank will have even the reserve as provided in the bill.

I therefore assert that under the provisions of the committee bill neither the Federal land banks nor the joint-stock land banks are required to maintain a reserve adequate to meet possible losses or sufficient to give confidence to investors. In other words, the reserves required of these banks, which in the case of the Federal land banks could not be to exceed 2¼ per cent of the outstanding bonds, and in the case of the joint-stock land banks would not exceed 1⅓ of the amount of outstanding bonds, are insufficient to give these institutions that safety and security necessary, so that the farmers should have the credit to which they are entitled.

Mr. MOSS of Indiana. The gentleman understands that the bond issue for joint-stock banks is limited to 1 to 15?

Mr. MORGAN of Oklahoma. I understand that, but that is not the question. The object and purpose of the reserve is to meet default. Even though the bonds are limited to fifteen times the capital, this does not make an ample reserve unnecessary. Losses and defaults are inevitable. They can not be met out of the capital, without its impairment. Even if the bond issue were limited to ten times the capital, still a reserve would be necessary.

RESERVES REQUIRED OF EUROPEAN INSTITUTIONS.

The reserves required of Federal land banks and joint-stock banks under the provisions of the committee bill are not so large in amount as are required by European land-credits institutions. It will be helpful to refer to the reserves of some important European land-credits institutions.

The capital of the Crédit Foncier of France was originally designated as a "guaranty fund," and is still largely invested to make it such. In addition it is required to set aside from 5 to 20 per cent of its net annual earnings as an obligatory reserve until the reserve amounts to a sum equal to one-half the capital stock of the bank. The Prussian Central Land Credit Joint-Stock Co., one of the greatest mortgage-credit companies in existence, with a capital stock of $10,656,000, in 1911 had a reserve fund equal to 39.2 per cent of its capital stock. The Prussian Provincial-Aid Banks are required to place the net profits into the reserve account until it equals 5 per cent of the outstanding bonds. The capital stock of the Bavarian Mortgage and Exchange Bank of Germany, a joint-stock profit-sharing company, in 1911 amounted to $14,580,000, and its reserves amounted to $13,952,637. In other words, the reserves were almost equal to the capital stock, or 96.6 per cent thereof. The reserves of the Bavarian Union Bank at the same date amounted to 40 per cent of its capital. The capital of the Bavarian Agricultural Bank in 1911 was $1,025,970 and its reserves were $272,145, or over 26 per cent of its capital. The capital of the 46 Noko Ginko Banks of Japan in 1912 amounted to $17,166,060, their outstanding loans were $47,560,000, and their reserves were $4,551,076. Their total reserves were over 26 per cent of their aggregate capital and over 9.8 per cent of the total outstanding loans. The savings banks in Italy are

required, if they have capital stock, to set aside one-fourth of the net earnings as a reserve fund; and if they have no capital stock the reserves must accumulate until they, with the guaranty fund, equal 10 per cent of the debentures in circulation.

The 9 land-improvement annuity banks and the 11 provincial-aid banks of Germany are required to put all profits in the reserve fund until it equals 5 per cent of the outstanding debentures.

The reserves of the National Land-Credit Institute for Small Landowners of Hungary at the end of 1912 amounted to $3,756,585, with loans about $54,390,000. The reserves were over 6.1 per cent of outstanding loans.

The minister of agriculture of Austria, in a statement referring to the reserve funds required of the Provincial Mortgage Institute of Lower Austria (S. Doc. 214, 63d Cong., p. 190), says:

> The institution is required, both as regards mortgages and communal loans, to create a reserve of 5 per cent on the value of every debenture or communal bond issued to cover losses which may occur in its transactions.

In a statement issued by the Royal Hungarian Department of Agriculture, Senate Document 214, Sixty-third Congress, page 131, referring to the reserves required of mortgage-credit institutions of Austria, it is said:

> For the securing of the mortgage bonds, a special reserve fund (to be managed separately) must be created, which fund must represent at least 5 per cent of the value of the mortgage bonds issued and must in any case amount to at least 400,000 crowns ($80,000).

The Hungarian Land Credit Institution has some unusual provisions, constituting the reserve, or guaranty fund to secure the payment of its debentures. In addition to the capital and the mortgages, this institution has a "mortgage-bond insurance fund," equal to 5 per cent of the outstanding bonds, a reserve fund, and a "mutual solidarity fund" equal to 1 per cent of the face of each loan. A statement relative thereto, made by Count Hoyos, a director of the institution, as shown in Senate Document 214, Sixty-third Congress, page 156, is as follows:

> The mortgage bonds are secured (1) by the mortgaged property itself; (2) by the capital of the institution; (3) by the mortgage-bond insurance fund—5 per cent of the bonds outstanding; (4) by the reserve fund; (5) by the mutual solidarity fund of the members of the institution. For this latter purpose every one who receives a loan has 1 per cent deducted from the loan, which is deposited in the mutual solidarity fund. In case of losses this money must be called in first to replace them. After 63 years—that is to say, at the end of the loan—it is returned to the borrower.

Baron von Gutstadl, a director of the Landschaft of the Province of Saxony, Germany, referring to the amount of reserve fund of the association (S. Doc. 214, 63d Cong., p. 364), says:

> The Landschaft has no desire to earn money; it has no use for earnings except to pay running expenses. No dividends are paid, for there are no shares and no dividend profits. However, a surplus is accumulated and placed to the credit of the Landschaft until the fund reaches 5 per cent of the outstanding obligations of the association.

Mr. SMITH of Michigan. Will the gentleman yield?

Mr. MORGAN of Oklahoma. I will.

Mr. SMITH of Michigan. If the capital of the bank is in mortgages and they can immediately change those mortgages into bonds and sell the bonds, why is that not mobile?

Mr. MORGAN of Oklahoma. There is the "if" in the way. In the time of stress, in the time of panic, in the time of danger a bank might not be able to cash its mortgages or its bonds. I believe the reserve should be largely invested in Government bonds or deposited in banks on interest, with ample security from the banks.

Mr. RAGSDALE. Is it not provided, as a matter of fact, though, that Government deposits may be security for these loans and obviate that trouble——

Mr. MORGAN of Oklahoma. If a bank could always borrow of the Government, that might tide it over danger. But there is no certainty that the Government will do this. There is a striking contrast between the amount of reserves required in European land-credit institutions and the amount of reserve that will be accumulated by the land banks under the provisions of the committee bill. The reserves of a land bank primarily are accumulated for protection of bondholders, but borrowers indirectly have almost as much interest in the reserve fund as the bondholders. The reserve fund gives bondholders and investors confidence in the security issued by the land-credit institutions. Whatever gives investors confidence in the bonds issued by our land-credit institutions, gives borrowers better credit. Whatever gives the borrowers better credit necessarily enlarges the amount of credit at their command and reduces the rate of interest. It is economy, therefore, for the farmers, who are the borrowers, to contribute freely and liberally toward the accumulation of an ample reserve fund, for through this reserve fund they have more credit and cheaper credit. A land-credit institution does not have need for any great amount of capital on which to conduct its business. The reason of this is that the capital may be turned over and over for an indefinite number of times, providing that the reserve fund increases at a proper ratio with the amount of bonds issued. For this reason the reserve fund should not be based upon a certain percentage of the capital of a land-credit bank, but should invariably be based upon a certain percentage of the outstanding bonds. I do not, of course, contend that the capital of a land-credit institution is not a source of strength to a land-credit institution and in one sense may be regarded as a reserve fund, but the capital of the bank never should be impaired.

The capital of a land bank is not, therefore, the proper fund from which to pay losses sustained through defaults in the payment of the principal or interest of a loan. On the other hand, the real purpose of a reserve fund is to meet losses.

In the land-credit bill which I introduced in this Congress, H. R. 10310, and which I offered as a substitute for the committee bill, a reserve must be accumulated equal to 10 per cent of the oustanding bonds of each bank. This is in great contrast with the reserve provisions of the committee bill, which, as I have shown, require the Federal land banks to accumulate a reserve of but 2½ per cent of their oustanding bonds and which requires joint-stock land banks to accumulate a reserve of only 1½ per cent of their outstanding bonds. Under my bill each Federal land bank has an operating capital of $1,000,000. One-half of this is contributed by the Federal Government as an endowment or gift to each of these banks. The other half may be contributed by private parties, but, if not so contributed, shall be contributed by the Federal Government. Thus each bank has $1,000,000 of capital to turn over and over in taking mortgages and in issuing and selling bonds. This is all the bank would need for that purpose. Every borrower is required to invest 5 per cent on the face of his loan in the reserve capital of the bank. Automatically, therefore, reserve capital of the bank, under this provision, would amount to 5 per cent of the outstanding bonds. When the borrower pays his loan the 5 per cent which he has invested in the reserve capital is credited upon the face of his loan. The borrower will receive dividends upon the amount which he has invested in the reserve capital of the bank. This will be an offset to the amount of interest which he was paying to the bank on this amount of his loan, which, in fact, he had never received in cash. So that, as a matter of fact, the farmer suffers no financial loss by reason of investing 5 per cent of his loan in the reserve capital of the bank. In addition to this I provide for what I call guaranty capital.

The Government subscribes $500,000 to the guaranty capital of each Federal land bank. In addition to this, from the annual interest payment of each borrower one-fourth of 1 per cent annually is set aside as a part of the guaranty capital of the bank. This is to accumulate until the operating capital, reserve capital, and the guaranty capital of each Federal land bank shall be an amount equal to 10 per cent of the outstanding bonds. The reserve capital and guaranty capital are, of course, kept invested in Government bonds or farm-mortgage bonds, and are thus made constantly productive. The reserve and guaranty funds are made trust funds for the use and benefit of the bondholders of the Federal land banks. No other creditor or creditors can secure any right or title thereto. In this respect the provisions of my bill—H. R. 10310—in my judgment, are far superior to the provisions in the committee bill, because under the committee bill the bondholders have no special lien upon the reserves of the Federal land banks or of the joint-stock land banks.

For myself I have but one interest in view. I want our land banks to be safe, sound, and secure. They will be the agents and representatives of the farmers. The mortgages of the farmers must go through banking corporations we are creating. Then mortgages will reappear in the form of bonds. These bonds will bear the name of the bank issuing them. The name and reputation of the bank will follow the bonds. I hope above all things Congress will not let the farmers' securities be vitiated by the character of the bank issuing them. I trust we shall not permit these banking corporations to issue farm-mortgage bonds except under conditions which make them an absolutely safe investment. Under this law we are about to enact many new corporations will be organized. I hope there may never come a time when a single one of these corporations shall fail. Millions and millions of farm-mortgage bonds will be issued. I hope that every bond issued by these banks will be paid promptly when due. I hope the institutions we are creating, like the landschaften, will stand the test of centuries. If they do, they will confer countless blessings upon farmers and investors and contribute bountifully to the prosperity of the whole country.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SLOAN. Mr. Chairman, I have been here throughout the discussion of this bill and have been interested in the debate. I have taken but little part in it.

About the talismanic name of "rural credits" there have been centered the interest and contentions of a great many people in many farming sections of the country. The demand for the legislation has been emphasized in those communities where undevelopment, partial crop failures, and especially unwholesome local legislation caused interest burdens on farmers to be unusually heavy. The demand for rural credits, which to those interested means "low rates of interest extended on long payments," is in this bill met by a system whose primary regard and consideration seem to be safeguarding the investment features and transacting the business in a new banking system not calculated to interfere materially with banking facilities now in existence.

There are two phases of the debate I desire to discuss. I had hoped to obtain more time for that purpose. The first one is an overstatement generally of the causes and reasons for the enactment of this bill. I am in favor of rural-credits legislation and shall vote for this bill. But in order to obtain this legislation it is not fair to the industries of the country, to its farmers, or to the thrifty States of the Union to let go unchallenged the exaggerated statements that have appeared in this debate.

To illustrate, I use the statements made by the gentleman from Texas [Mr. EAGLE] as a fair type. Not that they are more objectionable than those uttered by numerous other gentlemen, but because at the time they were made I challenged their accuracy and the speaker courteously referred me to his authority. Quoting from the gentleman's speech on May 12, to be found in the RECORD, page 7873, we find the following:

> The $5,000,000,000 for which the farm lands of America are mortgaged at the present time bear an average of between 8 and 9 per cent. I know from personal experience in my great State of Texas, where nearly 5,000,000 people dwell, perhaps 65 per cent of whom are engaged in agriculture, that the burden of agents' commissions, of the interest rate expressed on the face of the mortgage, of attorneys' fees, of abstract charges, of renewals which are enforced by the short loans of three years, of the 10 per cent attorneys' fees for foreclosure and the starting again of the same loan wipe out the annual increment of the average Texas farmer.

Later on the gentleman in his speech said:

> I tell you that except in great States like Iowa, Indiana, Ohio, Illinois, and Pennsylvania, which have had a century already to advance to their present condition of farm development and farm ownership and to free themselves from debt——
>
> Mr. MCFADDEN. Will the gentleman yield?
>
> Mr. EAGLE. I wish to complete this statement. Except in such States as those I have mentioned, the average total amount paid on farm loans by way of interest, bonuses, lawyers' fees, and agents' commissions, and for renewal amounts to the annual burden of at least 18 or 20 per cent just to carry the loans along, without any amortization or payment of the principal whatsoever.

I was directed by the gentleman from Texas to investigate and read the hearings held before the Hollis committee. This I had done long before, but I verified my then impression. I had challenged the accuracy of the statement of a member of the committee, the standing committee having charge of this bill, earlier in the debate on a similar but not such an extreme statement. I find the committee has relied upon the testimony of one C. W. Thompson, a representative of the Department of Agriculture. The committee comes to the conclusion that the average rate of interest on farm mortgages throughout the United States is 7½ per cent, considerably less than the statement of the gentleman from Texas and other gentlemen.

Mr. FESS. Will the gentleman yield?

Mr. SLOAN. For a question.

Mr. FESS. Yesterday the Speaker said that money could not be gotten at a certain rate. I asked my clerk to cut from the newspapers that came to my desk for a single day all the advertisements for money. There are 42 advertisements from banks and loan associations, containing no rate above 6 per cent.

Mr. SLOAN. I am familiar with the rates in my own State. I am convinced the rates given by the witness Thompson are a little too high. Those given by the witness as of December 3, 1913, are high for Nebraska, although interest rates at that time had risen on farm loans—that is, compared with what they had been 18 or 20 months before.

Now, I do not challenge the correctness of the statement made as to any rate in Texas. But Texas has been the imperial agricultural State of the South for now 70 years and was an independent nation for 10 years, and if the statesmanship and the financial ability of that imperial dominion have been unequal to the task of keeping up with the newer States of the Union, such as my own, not yet 50 years old, where the interest rates on farm mortgages average less than 7 per cent, it is a reflection upon the statesmanship and financial ability of Texas.

Now, then, the witness, Thompson, upon whom the committee relied, gives a table of rates for a number of States. In his testimony he says, as found on page 9 of the rural-credits hearings:

> It gives one State's rate the same weight as it gives another, even though the mortgages in that State may be many times over the amount of the mortgages in the other State. We have the return for 30 of the States to-day.

The witness, by averaging the rates of the States, concludes the average rate for the Nation to be 7 1/15, or nearly one-half per cent less than the average fixed by the standing committee in its report submitted with this bill, as will be found on page 11 of said report. On page 74 of the Hollis hearings there is submitted a table for 41 States where 18 leading insurance companies do business to a total extent of $414,000,000, taking into account the actual number of dollars loaned in each State and the rate actually paid. The average amount of interest paid annually for every dollar was 6.1 per cent, or nearly 1 per cent less than the estimate of the department expert, nearly 1½ per cent less than the adopted estimate of the standing committee; nearly 2½ per cent less than the estimate of the gentleman from Texas [Mr. EAGLE], where he states the average rate to be from 8 to 9 per cent. Of course, if we were to adopt his maximum average of 18 to 20 per cent the difference would be astounding.

It might be interesting to know the expanding spiral beginning with the basic rate of fact 6.1, second 7 1/15 given by the expert, where a few mortgages and a high rate in Arkansas were measured up against and given the same weight in reaching an average as Iowa, with thirteen times as great an amount and a rate less than two-thirds as great. And that becomes when stated by the conservative committee 7.5 per cent to be expanded by the gentleman from Texas, a member of that committee, to an average of 8½ per cent for the Union, to be further widened for his own and some of the younger States to from 18 to 20 per cent, leaves just one further step to be taken by the orator on the hustings, who, in harmony with the general expansion, would certainly have a right to make it a 100 per cent per annum.

From a comparison of the short-rate farm loans, as stated by the witness Thompson, which statement was made in December, 1913, and rates for similar loans early in 1912, there appears to have been a rather substantial increase. For instance, the increase on such loans for Maine was 44/100 per cent; Massachusetts, 95/100 per cent; Indiana, 64/100 per cent; Illinois, 55/100 per cent; Minnesota, 45/100 per cent; Missouri, 122/100 per cent; Nebraska, 71/100 per cent; Kansas, 76/100 per cent; Arkansas, 74/100 per cent; Oklahoma, 1 30/100 per cent; Texas, 57/100 per cent; Colorado, 2 18/100 per cent; and California, 1 87/100 per cent. There being shown an increase in every State, except New York, Pennsylvania, Iowa, Mississippi, and Louisiana.

From a limited handling of Texas securities some five or six years ago I should have been led to believe that the rates fixed by the gentleman from Texas were rather high, but I have had no recent opportunity for personal knowledge from which to speak and it probably is true that as a result of conditions during the last three years, and the legislation affecting adversely the industries of Texas, interest rates have undoubtedly risen. But answering the statement that the interest rates and accompanying charges "wipe out the annual increment" of the average Texas farmer, I desire to say that however that may apply now it did not apply to 1912. In the interest of political and economic history and the good name of Texas I call attention to the fact that in 1890 the average per capita wealth of Texas was $942; in 1912 it was $1,679, an increase of 78 per cent. That the decline of conditions in Texas during the last few years is due to other causes appears from a recent statement attributed to ex-Gov. Colquitt of that State, wherein he says:

> By putting raw materials on the free list and keeping the protective tariff on manufactured goods it has condemned American farmers to peonage.

In the category of States, according to the classification of the gentleman from Texas, that have not been in existence for a hundred years and in which these dreadful interest conditions are charged to prevail is included the State of Nebraska. Its per capita wealth in 1890 was $1,205, in 1912 it was $3,110, or an increase of 158 per cent, just double the rate of increase of our Texas neighbors. We join with our Texas neighbors in regret that the American people saw fit to somewhat change this onward march of rural wealth for these two States.

The farmers of the country do not highly appreciate the lachrymose statement made in their behalf and the allegations of poverty which do not generally exist. The farmers of this country know that the best opportunities of the young people of the

land are on the farm and rewards for industry on the farms are better, speaking by and large, than in any other industry in the country.

I submit seven leading agricultural States not having any dominating city within their borders, showing the highest per capita wealth in their border, as follows:

| | |
|---|---|
| Iowa | $3,539 |
| North Dakota | 3,374 |
| Nebraska | 3,110 |
| Oregon | 2,661 |
| Kansas | 2,652 |
| Minnesota | 2,582 |
| Washington | 2,511 |

I now submit seven of the typical industrial States:

| | |
|---|---|
| New Jersey | $2,140 |
| Connecticut | 1,969 |
| Pennsylvania | 1,939 |
| Massachusetts | 1,805 |
| Rhode Island | 1,709 |
| Maryland | 1,651 |
| Delaware | 1,493 |

In practically all of the agricultural States the increase of wealth per capita has been much greater than it has been in the industrial States.

The average per capita wealth of these seven typical agricultural States is $1,103, or 60 per cent more than the average per capita wealth in the seven industrial States. So the relief asked for here is not on a basis of poverty, but as a matter of right and good business.

The bill as drafted is of value largely in this, that it furnishes a basis for future rural-credits legislation. It commits the country to that class of financial activity, and can as time goes on and circumstances and conditions arise, by Congress, be amended to become workable and beneficial.

The following criticism by the Omaha Bee, while severe, can not be proven undeserved:

> The measure just driven through the Senate by the Wilson administration, under pretense of providing a land-loan bill for the benefit of the farmers, will not relieve the pressure on the agricultural industry by making its financial operations any the more facile. In effect, the bill will provide a safe and attractive investment for money by authorizing the issuance of debenture bonds, secured by first mortgage on improved farm lands. These bonds will be more attractive than any now known, for they will carry a higher rate of interest than the Government pays, will be readily convertible, and almost totally guaranteed by the Government. Devices and provisions for the safety of the investor are superperfect.
>
> But the farmer will not get his money any cheaper. * * * He takes his credits to the land bank and secures a loan on them. He must go with clear land, under use and productive, with an unencumbered title, and then will be allowed but 50 per cent of its appraised valuation on a long-time mortgage. Nothing in the bill will operate to aid the little fellow, the farmer struggling to clear his title, to improve his farm, or to finance his operations until he can market his produce at a profit.
>
> No measure proposed by the present administration in its program falls farther short of its purpose than does this makeshift. Its worst effect will be to discourage the farmers of the country in their budding efforts toward financing their own affairs. Instead of a law that would permit the establishment of cooperative banks that would aid the farmer, the Hollis bill simply shifts the farm-mortgage business from private agencies to banks that will still operate for private profit, but with the advantage of Government guaranty.

At the outset I stated that a great deal more was expected of this bill than probably might result from it. Seventeen different gentlemen assured the House that the farmers were to have as good treatment as have the commercial interests. The present Federal Reserve Banking System is pointed to as ideal.

I think I can speak in all fairness on this subject, because, after having voted against the Glass-Owen bill in the House and it was returned from the Senate, apparently greatly improved, I voted for it, expecting some little good to come from it. The bill, however, never seemed to me to be well adapted for its work. But if the bill we are now enacting in the interest of the farmer shall be of no more use to the farmers than the reserve system is to the commercial and industrial interests of the country, then our work will practically be in vain.

The main purpose of that legislation was to facilitate banking transactions and to provide currency to the banks upon their indorsement and delivery of commercial paper.

Now, if that is the measure—and that is the main proposition upon which the legislation was based—it has been up to this time practically a failure. Because of the $525,000,000 of resources, mostly liquid resources taken from the business of the country and segregated in what we call our reserve banking system, only $20,300,000 is now (May 5) invested in that way, less than 4 per cent——

Mr. DOOLITTLE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Nebraska yield to the gentleman from Kansas?

Mr. SLOAN. For just a question; yes, sir.

Mr. DOOLITTLE. I did not clearly understand the gentleman, but I understood him to say that the Federal reserve act had not proven a success.

Mr. SLOAN. I say so, and I challenge any gentleman to refute the statement, because of the $525,000,000 of resources in that system only $20,300,000 is engaged in the primary function for which it was organized. More than that, of the $525,000,000 now involved in that machinery, only $161,000,000 is earning a cent. Of the 12 banks only 3 or 4 are making expenses, and only 2 or 3 of them are paying small dividends, while the rest of them, from the last figures obtained, are not even paying expenses.

Mr. TAYLOR of Colorado. Mr. Chairman, will the gentleman yield there?

Mr. SLOAN. Yes.

Mr. TAYLOR of Colorado. Will the gentleman vote to repeal that law?

Mr. SLOAN. If the gentleman had the genius to present something that would be an improvement, he would not have much difficulty in convincing me that it ought to be repealed and improved.

Mr. TAYLOR of Colorado. That does not answer the question. Would you vote to repeal it now?

Mr. SLOAN. The gentleman has submitted his question as he saw fit. I claim the right to be the architect of my own answer, as the gentleman has been of his question. [Laughter.]

Mr. TAYLOR of Colorado. Then you do not answer at all.

Mr. SLOAN. I have given my answer; but I shall answer the gentleman from Kansas [Mr. DOOLITTLE] further.

Mr. HAMILTON of Michigan. Mr. Chairman, these are very interesting figures. Will the gentleman kindly give us the authority upon which he makes that statement?

Mr. SLOAN. The regular report from the system, which I obtained from the Congressional Library. The figures are taken from their regular reports. I have them here.

Much to the regret of the public, especially the business and financial part, the Glass-Owen reserve banking system has not thus far proven a success. So the statement of a Member on this floor that the rural-credits bill before us will do for the farmer what the reserve banking system has done for the business world is in reality more of a threat than a promise.

First. Within itself it has thus far not succeeded. Covering a period of months selected by the authorities of the system itself, the following is the statement of the earnings and expenses of the several regional banks:

| | Earned. | Expended. |
|---|---|---|
| | *Per cent.* | *Per cent.* |
| Boston | 1.9 | 3.2 |
| New York | 4.3 | 3.2 |
| Philadelphia | 2.2 | 2.7 |
| Cleveland | 1.9 | 3.1 |
| Richmond | 11.6 | 4.1 |
| Atlanta | 11.6 | 5.5 |
| Chicago | 4.8 | 4.2 |
| St. Louis | 3.0 | 8.4 |
| Minneapolis | 3.4 | 5.3 |
| Kansas City | 2.2 | 6.5 |
| Dallas | 8.8 | 6.4 |
| San Francisco | 3.5 | 4.7 |

It will be noted that in seven the expenses greatly exceeded the earnings. That in only two were the earnings sufficient to warrant the declaration of a dividend. These are in Richmond and Atlanta.

Second. Investments in primary channels designed by the bill itself have only in a limited way been made.

(a) In the primary function of the system "rediscounting through member banks" less than 4 per cent of the resources of the system is now (May 5, 1916) engaged. Of the $525,000,000 mostly of liquid wealth taken from the channels of finance and commerce and placed in cold storage in those banks, only $20,300,000 is invested in the primary purpose for which the system was created. I speak of this as the primary purpose of the system, because in the act itself it is given that place in section 13, where there is an enumeration of the active business functions of these regional banks. Further, the report which was filed by the Banking and Currency Committee of the House in support of the Glass bill section 13 was discussed and rank given it, as I have stated. On page 48 of that report will be found the following discussion:

> In section 14 is set forth the fundamental business purpose of the bill in providing for rediscount operations. The Federal reserve banks are at the outset authorized to receive current deposits from their stockholders or from the Government or from other Federal reserve banks,

in so far as the latter may need to keep funds with them for exchange purposes.

The fundamental requirement throughout all of the discount section of the proposed bill is that antecedent to the performance of a service by a Federal reserve bank for a member bank which applies therefor the member bank shall indorse or guarantee the obligations which it offers for rediscount. Subject to this requirement the proposed bill, first of all, provides that notes and bills having a maturity of not over 90 days and drawn for agricultural, industrial, or commercial purposes or the proceeds of which have been used for such purposes shall be admitted to rediscount.

It will be noted that the foregoing discussion refers to section 14, but in the rearrangement of sections section 14 of the Glass bill became section 13 of the completed act.

(b) Of the secondary or permissive investments authorized in section 14 of the act (15 of the Glass bill) there is 26 per cent of the total resources now engaged. In other words, the secondary or permissive investments are six and one-half times as great as the fundamental investment for which the system was organized. A discussion of these secondary investments might be interesting and is found on page 52 of that report, as follows:

It will have been observed that the transactions authorized in section 14 (14 of the bill, 13 of the act) were entirely of a nature originating with member banks and involving a rediscount operation. It is clearly necessary to extend the permitted transactions of the Federal reserve banks beyond this very narrow scope for two reasons:

1. The desirability of enabling Federal reserve banks to make their rate of discount effective in the general market at those times and under those conditions when rediscounts were slack and when, therefore, there might have been accumulation of funds in the reserve banks without any motive on the part of member banks to apply for rediscounts or perhaps with a strong motive on their part not to do so.

2. The desirability of opening an outlet through which the funds of Federal reserve banks might be profitably used at times when it was sought to facilitate transactions in foreign exchange or to regulate gold movements.

This leaves out of $525,000,000 resources only $161,078,000 as earning assets.

(c) Of these secondary or permissive investments there are: United States bonds, $50,137,000; United States Treasury notes, $3,840,000; and municipal warrants, $39,154,000. This leaves unengaged and unearning 70 per cent of the total resources, or $364,616,000.

Of the $20,300,000 of members' bills over $15,000,000 was taken from member banks by the Richmond, Atlanta, Dallas, and Kansas City reserve banks (the last named does little business in the northern half of the tenth district). Less than $5,000,000 taken from member banks by the Boston, New York, Philadelphia, Cleveland, Chicago, St. Louis, Minneapolis, and San Francisco banks. Of the bills bought in open market, being purely investment and not to facilitate banking movement, only $2,500,000 were taken by the said southern group, while $45,000,000 were invested by the northern group. Of the investment in Government paper the southern group took only $2,000,000, while the other group took $52,000,000. Of the municipal warrants, the southern group took $1,000,000, while the northern group took $38,000,000.

These facts demonstrate clearly that the reserve bank up to the present is not performing its function as designed by its supporters, except in a very limited area, and in that limited area to a very limited degree, as the total amount of the members' notes would not exceed the bills payable in an ordinarily strong bank in one of the good-sized cities of the United States.

Third. Of the total investments, out of the total $525,000,000 resources only one-half of 1 per cent or $2,600,000 is agricultural or cattle paper.

Fourth. So far as benefiting the farmer is concerned, and there are a great many provisions in the Glass-Owen law proposing to benefit him, the working of a system is manifested in the increase of the rates of interest on short-time farm paper, as I have heretofore shown. This is further evidenced by the incessant complaints in this debate of the high rate of interest being paid by farmers, especially on short-time loans.

Fifth. A large, general purpose of the act so far as the public is concerned was to enable business men and institutions to realize on their credits and prevent failures. The law has been in effect something less than three years and has been in operation somewhat less than two years. Its effect in prospect and in operation is evidenced by the failure record of the country for the last three years as compared with the failure record of former years which were regarded as record breaking. They are as follows:

*Number of failures in the United States.*

| | |
|---|---|
| 1873 | 5,183 |
| 1893 | 15,242 |
| 1896 | 15,088 |
| 1907 | 11,725 |
| 1908 | 15,690 |
| 1913 | 14,553 |
| 1914 | 16,759 |
| 1915 | 19,032 |

The last showing more than 20 per cent—more than 3,000—in excess of any year in the history of the Republic before the reserve bank act went into effect.

I had no desire to discuss the reserve banking system until I listened to the debate for several days and heard so many ardent advocates of the rural-credits bill say in substance that we propose now to do for the farmers what had been done for the business and financial concerns of the country. I thought it but proper to examine the subject carefully to find out whether it was proposed to do something for the farmers or something to the farmers. The farmers have a right to receive wholesome legislation on matters involving their credits. They are receiving this legislation as a matter of right, not as a matter of gift, and we should advise them as near as possible of the value of that which they are to receive. I desire to be frank with the House and country that if I thought the legislation which is being considered now will prove no more of a success and benefit to the farmers than the reserve system has for the business interests of the country, then I would not vote for it.

It was said of old, "or what man is there of you whom if his son asked bread would he give him a stone?" Modernly, what father, being asked for bread by one of his sons, who is a tiller of the soil, would hand him a cube of concrete and say, "This is just as masticable, quite as palatable, fully as digestible, and equally as nutritious as the cobblestone I have handed your brother, the money changer and the barterer of goods?"

In voting for this legislation I hope that it may be the basis for future legislation out of which the credits of the farmer may be conserved and mobilized in the interest of that great basic industry upon which the Nation so much depends.

The CHAIRMAN. The time of the gentleman has expired. All time has expired. The question is on the amendment offered by the gentleman from Oklahoma.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

EXEMPTION FROM TAXATION.

SEC. 23. That every Federal land bank and every national farm-loan association, including the capital stock and reserve or surplus therein and the income derived therefrom, shall be exempted from Federal, State, and local taxation, except taxes upon real estate held, purchased, or taken by said bank or association under the provisions of section 11 and section 13 of this act. First mortgages executed to Federal land banks, or to joint-stock land banks, under the provisions of this act, shall be deemed and held to be instrumentalities of the Government of the United States, and as such they and the income derived therefrom shall be exempt from Federal, State, and local taxation.

Farm-loan bonds issued under the provisions of this act and the income derived therefrom shall be exempt from Federal, State, and local taxation.

Mr. WINGO. Mr. Chairman, I desire to offer a committee amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend section 23 by inserting after line 16, page 124, the following: "Nothing herein shall prevent all the shares in any joint-stock bank from being included in the valuation of the personal property of the owner or holder of such shares in assessing taxes imposed by authority of the State within which the land is located, but such assessment and taxation shall be in manner and subject to the conditions and limitations contained in section 5219 of the Revised Statutes with reference to the shares of national banking associations. Nothing herein shall be construed to excuse the real property of joint-stock banks from either State, community, or municipal taxes, to the same extent, according to its value, as other real property is taxed."

Mr. WINGO. This committee amendment is intended for this purpose. The language of section 23 as reported apparently does not exempt the stock of the joint-stock banks from taxation—that is, this stock is not named in the exemption provision, and on its face it would look like that would be sufficient to make the stock taxable. But in order to be sure of it this amendment is offered, and is in the language of section 5219 of the Revised Statutes, which covers taxation of stock of national banks, and the intention of this amendment is to put the stock of these joint-stock banks on the same basis with stocks of national banks under the present existing law, which is done under section 5219, referred to in the amendment. By the adoption of my amendment the stock of joint-stock banks and their real estate will be made subject to taxation beyond question.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Arkansas [Mr. WINGO].

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

INVESTMENT IN FARM-LOAN BONDS.

SEC. 24. That farm-loan bonds issued under the provisions of this act by Federal land banks or joint-stock land banks shall be a lawful investment for all fiduciary and trust funds, and may be accepted as security for all public deposits.

Any member bank of the Federal Reserve System may buy or sell farm-land bonds issued under the authority of this act.

Mr. WINGO. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Arkansas offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend section 24, page 124, by inserting as a new paragraph at the end thereof the following:

"Any Federal reserve bank may buy and sell farm-loan bonds issued under this act to the same extent and subject to the same limitations placed upon the purchase and sale by said banks of State, county, district, and municipal bonds under subsection (b) of section 14 of the Federal reserve act approved December 23, 1913."

Mr. WINGO. Mr. Chairman, just briefly, the object of this amendment is to authorize the Federal reserve banks, under the "open-market" operations of the Federal reserve act, to buy and sell these farm-loan bonds to the same extent and with the same limitation as they can buy the State, county, municipal, and district bonds under that act. That is the sole object of my amendment.

Mr. MANN. In connection with the amendment offered by the gentleman from Arkansas, I would like to make an inquiry about a paragraph in the section making these farm-loan bonds a lawful investment for all fiduciary and trust funds. I take it we can not make a lawful investment for State institution trust funds. We can not provide what the State court shall take for a lawful investment or what the State shall provide shall be a lawful investment for savings banks. We can not control State corporations or State courts.

Mr. WINGO. Will the gentleman permit a suggestion? That is true, of course, but there are frequently a good many fiduciary and trust funds that are in the hands of Federal agencies, in Federal courts.

Mr. MANN. That is all right.

Mr. WINGO. Now, does the gentleman think it necessary to say funds that are in the custody of Federal agents or Federal courts? Does not the law within itself fix the limitations?

Mr. MANN. I think it does fix it, but still where you state that it shall be a lawful investment for all fiduciary and trust funds the language of the bill would indicate that we are endeavoring to intrench upon the prerogatives of the State, and so we put in some provision making a limitation. I simply call it to the attention of the committee. I do not ask for an amendment here. Make it plain that we are not trying to control what the States have the power to control.

Mr. GLASS. I assure the gentleman that that will be done.

Mr. PHELAN. May I make a suggestion? I would like to see that thing done, but I am afraid we can not do it in conference unless some amendment is offered, because the Senate provision is the same as ours.

Mr. MANN. I make the suggestion to the gentleman as to the conference. We propose to strike out all after the enacting clause and insert a substitute, and while the same language may be in the Senate bill and in the House bill, technically there is a disagreement as to the whole subject matter. On matters that have been tested out the conferees might not feel authorized to make changes, but technically they have the power to rewrite the bill from A to Z.

Mr. PHELAN. That is satisfactory to me.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Arkansas [Mr. WINGO].

The amendment was agreed to.

Mr. MORGAN of Oklahoma. Mr. Chairman, I have an amendment which I wish to offer.

Mr. LEVER. Mr. Chairman, I desire to offer an amendment as a new section. If the gentleman from Oklahoma wishes to offer a substitute, I will wait.

The CHAIRMAN. The gentleman from Oklahoma [Mr. MORGAN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MORGAN of Oklahoma: Page 124, line 25, after the word "act," strike out period and insert semicolon and also the following:

"Any member bank of said system may accept time drafts against a deposit of such bonds as security; acceptances of a member bank thus made, on the direct obligations of such bank maturing within 60 days, when accompanied by such farm-loan bonds as collateral security not less in face value than the amount of such direct obligation, shall be eligible for discount by the Federal reserve bank of its district.

"Section 9 of the act of June 25, 1910, entitled 'An act to establish postal savings depositaries for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes' (vol. 36, U. S. Stat. L., p. 814), shall be, and the same is hereby, amended by adding a new paragraph at the close of said section, to read as follows: 'Federal farm-loan bonds authorized by the Federal farm-loan board and issued by any Federal land bank may be purchased by the trustees, in lieu of United States bonds or other securities, for the purpose of investing postal savings deposits under the provisions of this section. Whenever funds shall be withdrawn from postal savings depositaries for investment, the trustees are hereby authorized to purchase Federal farm-loan bonds in the open market or from any Federal land bank authorized to issue the same: *Provided*, That in no case shall such farm-loan bonds be purchased at more than par nor shall more than 30 per cent of the postal savings deposits be invested at any one time in farm-loan bonds as herein provided.'"

Mr. MORGAN of Oklahoma. The amendment which I have offered adds to the provisions of section 24 of this bill. Section 24 as it now stands provides that farm-loan bonds issued by the Federal land banks or joint stock land banks shall be a lawful investment for all fiduciary and trust funds and may be accepted as a security for all public deposits.

It further provides that any member bank of the Federal Reserve System may borrow and sell farm-loan bonds issued under the authority of this act. The amendment which I offer corresponds to the provisions of the bill which has been passed by the Senate, S. 2986, and is now pending before the House. As the section now stands in the committee bill, member banks of the Federal Reserve System may buy and sell farm-loan bonds. This, I believe, is a wise provision, but it does not go far enough. Under the amendment which I have offered any member bank of the Federal Reserve System may accept time drafts against deposits of farm-loan bonds as security. And "acceptances of a member bank thus made, on the direct obligations of such bank maturing within 60 days, when accompanied by such farm-loan bonds as collateral security not less in face value than the amount of such direct obligation, shall be eligible for discount by the Federal reserve bank of its district." In my judgment this is a very wise provision. The Federal reserve banks are the great storehouses of credit for this country. Under the existing law the farmers of the country have little access to the Federal reserve banks. The benefits which agriculture receives from these banks is remote and indirect. Nothing will do so much to extend and enlarge the credit of the farmers as provisions which will make the securities of the farmers eligible for discount by the Federal reserve banks of the country. Now, the farm-loan bonds issued by the Federal land bank will be as secure and safe as any security on the money markets.

They will be liquid securities upon which any bank may realize at any time. It is perfectly safe, therefore, for Federal land banks to discount time drafts maturing within 60 days secured by an equal amount of farm-loan bonds. More than this, it would seem to be rank discrimination against the farmers to refuse to recognize their securities as a basis for discount privileges by the Federal reserve bank. Ever since rural credits became a subject for discussion in Congress one point in controversy has been the question of "Government aid." Whatever valid objections there may be to using the funds or the credit of the Government directly in providing credit facilities for agriculture, there can be no good reason given why the farmers should not be given access to the Federal reserve banks in the way that is proposed by the amendment which I have offered.

The second paragraph of my amendment authorizes the trustees of the postal savings depositaries to invest 30 per cent of the postal savings deposits in farm-loan bonds. Under the present law these trustees are authorized to invest these deposits in United States bonds and other securities. There is no reason why farm-loan bonds should not be placed upon an absolute equality with any or all other securities except United States bonds. During the last three years a number of bills have been introduced proposing to loan postal savings deposits directly to the farmer. This is an attractive proposition and many arguments can be made in favor of it, but a great majority of the Members of Congress seem to be opposed to the Government making loans direct to any class of our citizens. But there can be no valid objection, it seems to me, to investing a reasonable proportion of these deposits in farm-loan bonds, because the funds thus invested would be as safe and secure as funds invested in other classes of securities under existing law.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oklahoma [Mr. MORGAN].

The question was taken, and the amendment was rejected.

Mr. LEVER. Mr. Chairman, I offer an amendment as a new section.

The CHAIRMAN. The gentleman from South Carolina [Mr. LEVER] offers an amendment as a new section. The Clerk will report it.

The Clerk read as follows:

Amendment offered by Mr. LEVER: On page 124 insert as a new section the following:

"That section 9 of the act of June 25, 1910, entitled 'An act to establish postal savings depositaries for depositing savings at interest, with the security of the Government for repayment thereof, and for other purposes' (vol. 36, U. S. Stat. L., p. 814), shall be, and the same is hereby, amended by adding a new paragraph at the close of said section, to read as follows: 'Federal farm-loan bonds authorized by the Federal farm-loan board and issued by any Federal land bank may be purchased by the trustees, in lieu of United States bonds or other securities, for the purpose of investing postal savings deposits under the provisions of this section. Whenever funds shall be withdrawn from postal savings depositaries for investment, the trustees are hereby authorized to purchase Federal farm-loan bonds in the open market or from any Federal land bank authorized to issue the same: *Provided*,

That in no case shall such farm-loan bonds be purchased at more than par nor shall more than 50 per cent of the postal savings deposits be invested at any one time in farm-loan bonds as herein provided.'"

Mr. GLASS. To that, Mr. Chairman, I reserve a point of order.

Mr. MANN. I make the point of order, although I do not think it is subject to a point of order.

Mr. LEVER. I do not care to argue the point of order. I do not know what the gentleman's point of order is.

Mr. GLASS. The point of order that I would suggest is that it is the same amendment substantially that was offered this morning and voted down.

The CHAIRMAN. The Chair overrules the point of order.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in five minutes.

The CHAIRMAN. The gentleman from Virginia asks that all debate on the section and amendments thereto close in five minutes. Is there objection?

Mr. HAUGEN. Reserving the right to object, I suggest that we hear from the gentleman from South Carolina first.

Mr. GLASS. Mr. Chairman, I move that all debate close in five minutes.

Mr. MANN. I make the point of order that that motion is not in order until debate is begun.

The CHAIRMAN. The point of order is sustained.

Mr. LEVER. Mr. Chairman, the amendment which I have just offered proposes to give authority to the trustees of the postal-savings funds to invest not exceeding 50 per cent of such deposits in farm-loan bonds. The authority given by this amendment is entirely discretionary and permits the trustees of the postal-savings funds to invest in these farm-loan bonds if they so desire, but does not direct them to do so. We have in the postal-savings funds in this country something like $80,000,000. These funds belong to various and sundry individuals. They are deposited in our banks under certain conditions, and draw a rate of interest of 2½ per cent.

Now it is entirely possible that the trustees of the postal-savings funds would desire authority, if they do not already have it under the recently amended postal-savings law, to invest a reasonable amount of deposits in first-class 4 or 5 per cent farm-loan bonds. It might be in the interest of depositors of these funds to make that kind of investment.

The only reasonable and unselfish objection that can be urged against this proposition, and this was urged before the joint committee on rural credits, is that the postal-savings funds constitute a demand-deposit fund, and there might come a time when depositors would demand their money and this money would be tied up in long-time farm-loan bonds and thus embarrass the whole fund.

I have attempted to obviate that difficulty by making the amount that may be invested, in the discretion of the trustees of the fund, in such bonds not to exceed 50 per cent of the total. It is entirely possible for some man with perfervid imagination to fancy that the time will come when this Capitol will grow legs and walk through the eye of a cambric needle. Nobody imagines that such a time will ever come, and it is likewise within the range of imagination of some individual that some day, under some circumstances, all the postal-savings deposits will be demanded at one time. I do not believe that any sane man will think that such a time will ever come. But to be entirely conservative I have given full latitude in this amendment in which to meet the demands that may reasonably come at any one time. It gives to the trustees of the fund under present conditions a fund of $40,000,000 to meet the demands of their depositors as they come from time to time and would permit them to invest the remaining $40,000,000, if they thought it wise, in farm-loan bonds.

In section 24 it is provided that the farm-loan bonds shall be a lawful investment for all fiduciary and trust funds. The postal-savings funds are nothing but trust funds in the hands of the United States, and it is entirely possible under that language that they might be invested in these bonds, but I desire to make it absolutely sure that there is no doubt about it. If there is doubt, I desire to ask the members of the committee in charge of the bill why it is not just as feasible to permit this class of trust funds to be invested in these high-class securities as it is to permit fiduciary and trust funds of all other descriptions to be invested in them? That is the whole amendment. I take the position that to make this authorization will add very materially to the strength of these bonds in the eye of the investing public, because every time the Government puts its seal of approval upon these bonds, every time the Government by any provision in the bill says that they are good, it is certain to have a salutary, psychological effect on those who furnish the capital, through investments in these bonds, to finance the system we are providing in this bill.

Mr. GLASS. Mr. Chairman, I ask unanimous consent that all debate on this section and amendments thereto close in 5 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. HAUGEN. Mr. Chairman, I simply rise to point out the inconsistency of the amendment offered by the gentleman from South Carolina as compared with the Federal reserve act. Under it national banks are permitted to loan 25 per cent of time deposits; not a dollar of call money may be loaned on long-time real estate security. Now, it is proposed to take 50 per cent of call deposits in postal savings banks—the money deposited by poor people—and convert it into these bonds, bonds based on mortgages in amount equal to 60 per cent of the land value and 20 per cent of the permanent improvement, which makes it about 70 per cent of the land value. As stated by the gentleman from Georgia, not a banker to-day could be found in his State who would loan $5,000 on 1,000 acres, or $25,000 worth of property, which is 20 per cent only of the value of the land. Now, it is proposed that Uncle Sam's bank shall loan to the extent of 60 per cent of its value, or $15,000, on that same 1,000 acres, and the bank in turn issue its bonds for $15,000, drawing 5 per cent, and to pledge that $15,000 mortgage taken, drawing 6 per cent and running 36 years, as security for $15,000 hard-earned cash deposited on call in postal savings banks, generally by poor people likely to need the money any day. Mr. Chairman, no argument is necessary. I simply arose to point out the inconsistency and absurdity of the proposition.

Mr. RAGSDALE. Mr. Chairman, the differences pointed out by the gentleman from Iowa [Mr. HAUGEN] do not apply to this amendment. In the first place, when they put their money with the Government, the Government itself guarantees the payment of it, and there can be no possibility of loss falling upon those who leave their money in the postal savings banks, because the entire credit of the Government is behind it.

Mr. HAUGEN. Mr. Chairman, will the gentleman yield?

Mr. RAGSDALE. Mr. Chairman, I have not the time.

Mr. HAUGEN. The gentleman should state the fact. He has no right to question my statement. I know what my statement is.

The CHAIRMAN. The gentleman declines to yield.

Mr. RAGSDALE. Mr. Chairman, in the next place, it is a perfectly safe proposition, as the gentleman from South Carolina [Mr. LEVER] has just stated, because of this fact. The Government itself, at any period of time, can utilize these bonds by way of security in the postal savings banks of this country. It can make deposits in the savings banks, and the trustees of the postal savings bank, at any period of time, in an arrangement between them and the Federal reserve banks, could thereby take care of the credit of the country by securing deposits in national banks with these bonds they hold, and there would be absolutely no danger of the credit of the system being impaired to any degree. If these bonds are as safe as we believe them to be, if this money is there looking for investment, as we know it to be, there can be absolutely no objection, for any reason, why these postal-savings funds should not be invested in these bonds, and I hope the amendment will be agreed to. This right is already given in the postal laws, and should be clearly given in this law, for the power would create a market immediately for about $70,000,000 of these bonds and make the assurance of sufficient competition to immediately create a demand and insure the chances of this bill relieving the condition it was intended, by providing for long-time loans at lower interest rates to the farmers of the country.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken; and on a division (demanded by Mr. LEVER) there were—ayes 54, noes 88.

So the amendment was rejected.

The Clerk read as follows:

EXAMINATIONS.

SEC. 25. That the Federal farm-loan board shall appoint as many examiners as in its judgment may be required to make careful examinations of the banks and associations permitted to do business under this act.

Said examiners shall be subject to the same requirements, responsibilities, and penalties as are applicable to national-bank examiners under the national-bank act, the Federal reserve act, and other provisions of law. Whenever directed by the Federal farm-loan board, said examiners shall examine the condition of any national farm-loan association and report the same to the farm-loan commissioner, and shall examine and report the condition of every Federal land bank and joint-stock land bank at least twice each year.

Said examiners shall receive salaries to be fixed by the Federal farm-loan board, which shall be paid by the Secretary of the Treasury out of any money in the Treasury not otherwise appropriated.

Mr. MANN. Mr. Chairman, I move to amend by striking out, in lines 17, 18, and 19, the words "which shall be paid by the Secretary of the Treasury out of any money in the Treasury not otherwise appropriated."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 125, line 17, after the word "board," strike out the remainder of the paragraph.

Mr. MANN. Mr. Chairman, we have already provided on page 76 that the salaries of these examiners shall be paid by the United States, and we amended that provision so as not to make a permanent appropriation. This amendment is in conformity with the amendment already agreed to.

Mr. GLASS. Mr. Chairman, I think what the gentleman says is correct. Those words are superfluous.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

[Mr. RUBEY addressed the committee. See Appendix.]

The Clerk read as follows:

STATE LEGISLATION.

SEC. 27. That it shall be the duty of the farm-loan commissioner to make examination of the laws of every State of the United States and to inform the Federal farm-loan board as rapidly as may be whether, in his judgment, the laws of each State relating to the conveying and recording of land titles, and the foreclosure of mortgages or other instruments securing loans, as well as providing homestead and other exemptions and granting the power to waive such exemptions as respects first mortgages, are such as to assure the holder thereof adequate safeguards against loss in the event of default on loans secured by any such mortgages.

Pending the making of such examination in the case of any State, the Federal farm-loan board may declare first mortgages on farm lands situated within such State ineligible as the basis for an issue of farm-loan bonds; and if said examination shall show that the laws of any such State afford insufficient protection to the holder of first mortgages of the kinds provided in this act, the said Federal farm-loan board may declare said first mortgages on land situated in such State ineligible during the continuance of the laws in question. In making his examination of the laws of the several States and forming his conclusions thereon said farm-loan commissioner may call upon the office of the Attorney General of the United States for any needed legal advice or assistance, or may employ special counsel in any State where he considers such action necessary.

At the request of the executive of any State the Federal farm-loan board shall prepare a statement setting forth in what respects the requirements of said board can not be complied with under the existing laws of such State.

Mr. SHALLENBERGER. Mr. Chairman, I move to strike out the last word. I rise to say that the people of Nebraska are intensely interested in this rural-credits legislation. I have followed with a great deal of interest the work of the committee upon the bill. It has two basic propositions that appeal to agricultural borrowers, that of properly organizing and combining the credit of the farmers to enable them to secure the lowest possible rate of interest and providing long-time payment or amortization of the principal of the loan. I believe the bill is workable and is bound to be of great benefit to the agricultural interests of Nebraska.

The point has been made several times in debate on the bill that the farmers are prosperous and are among the best depositors that the commercial banks now have. The gentlemen have stated that fewer farmers fail than do those engaged in almost any other line of business. This is indeed true, and yet notwithstanding the above facts interest rates charged in agricultural communities are, as a general rule, the highest in the country. The amount of the individual's deposit, together with his known ability to pay his obligations, should always determine the extent of credit and the rate of interest to the borrower. The rule is universally applied to manufacturing and commercial interests. A proper mobilization of agricultural credit and organization of intelligent farmers such as is contemplated by the provisions of this bill will lead to more equitable application of the principle to those engaged in producing the products that feed the Nation. The bill carries out a pledge made to the country by the party in power upon its advent into control in governmental affairs and completes the cycle of legislation needed to give the Nation a well-rounded and complete program of organic financial law. Honest and industrious men will be able to secure upon very reasonable terms and for a long period the money needed to enable them to acquire homes. I would have been very glad to have seen adopted the provision providing for investment of postal-savings funds in the farm-loan bonds to be issued under this act, as proposed in the amendment offered by the gentleman from South Carolina [Mr. LEVER]. I voted for it when offered in committee, and although it failed that provision can be supplied at a later date. The amount of money in the postal-savings fund will rapidly increase because of the larger amount now allowed to be deposited in postal savings banks under the Post Office bill just passed. The farm-loan bonds will afford a safe investment for these funds, which are now idle in the commercial banks of the country in the shape of surplus reserves. However, Mr. Chairman, the bill before the House is so sound and broad in its provisions, so grounded upon the safest principles of proven banking experience, that I am very glad indeed to be able to compliment the committee upon the splendid service they have rendered to the country in framing and securing the safe passage of the bill, and I am very glad indeed to support it with my vote.

Mr. SLOAN rose.

Mr. GLASS. Mr. Chairman, I move to close debate on this section and all amendments thereto.

The motion was agreed to.

Mr. NORTON. May I inquire of the gentleman in charge of the bill if he intends to vote on the bill before adjournment this evening?

Mr. GLASS. Yes.

The Clerk read as follows:

PENALTIES.

SEC. 28. That any applicant for a loan under this act who shall knowingly make any false statement in his application for such loan, and any member of a loan committee or any appraiser provided for in this act who shall willfully overvalue any land offered as security for loans under this act, shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding one year or both. Any examiner appointed under this act who shall accept a loan or gratuity from any land bank or national farm-loan association examined by him, or from any person connected with any such bank or association in any capacity, shall be punished by a fine of not exceeding $5,000, or by imprisonment not exceeding one year, or both, and may be fined a further sum equal to the money so loaned or gratuity given, and shall forever thereafter be disqualified from holding office as an examiner under the provisions of this act. No examiner while holding such office shall perform for compensation any other service for any bank or banking or loan association or for any person connected therewith in any capacity.

Any person who shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting any bond, coupon, or paper in imitation of, or purporting to be in imitation of, the bonds or coupons issued by any land bank or national farm-loan association, now or hereafter authorized and acting under the laws of the United States; or any person who shall pass, utter, or publish, or attempt to pass, utter, or publish, any false, forged, or counterfeited bond, coupon, or paper purporting to be issued by any such bank or association, knowing the same to be falsely made, forged, or counterfeited; or whoever shall falsely alter, or cause or procure to be falsely altered, or shall willingly aid or assist in falsely altering any such bond, coupon, or paper, or shall pass, utter, or publish as true any falsely altered or spurious bond, coupon, or paper issued, or purporting to have been issued, by any such bank or association, knowing the same to be falsely altered or spurious, shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding five years, or both.

Other than the usual salary or director's fee paid to any officer, director, or employee of a national farm-loan association, a Federal land bank, or a joint-stock land bank, and other than a reasonable fee paid by such association or bank to any officer, director, attorney, or employee for services rendered, no officer, director, attorney, or employee of an association or bank organized under this act shall be a beneficiary of or receive, directly or indirectly, any fee, commission, gift, or other consideration for or in connection with any transaction or business of such association or bank. No land bank or national farm-loan association organized under this act shall charge or receive any fee, commission, bonus, gift, or other consideration not herein specifically authorized. No examiner, public or private, shall disclose the names of borrowers to other than the proper officers of a national farm-loan association or land bank without first having obtained express permission in writing from the farm-loan commissioner or from the board of directors of such association or bank, except when ordered to do so by a court of competent jurisdiction or by direction of the Congress of the United States, or of either House thereof, or any committee of Congress of either House duly authorized. Any person violating any provision of this paragraph shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding one year, or both.

Any person connected in any capacity with any national farm-loan association, Federal land bank, or joint-stock land bank, who embezzles, abstracts, or willfully misapplies any moneys, funds, or credits, or who without authority from the directors draws any order, assigns any note, bond, draft, mortgage, judgment, or decree, or who makes any false entry in any book, report, or statement of such association or land bank with intent in either case to defraud such institution or any other company, body politic or corporate, or any individual person, or to deceive any officer of a national farm-loan association or land bank or any agent appointed to examine into the affairs of any such association or bank, and every person who with like intent aids or abets any officer, clerk, or agent in any violation of this section shall be punished by a fine of not exceeding $5,000 or by imprisonment not exceeding five years, or both.

Mr. WALKER. Mr. Chairman, we are engaged to-day upon an undertaking to advance the interests of agriculture. The pending bill is designed to redeem the promise made to the Nation's farmers by all three political parties in the national platforms. It is intended to give the tillers of the soil throughout this broad land the opportunity to become home owners; to see their sons and their grandchildren spring up around them in serene, contented, progressive farming communities.

This legislation, if it results as we hope it may, will bless our land for centuries. The best we can do with the lights before us is to try the new experiment to which we are committed by every consideration of public policy and of our plighted word, correcting any defects in the law as they are shown to exist, and give to the Nation's farmers the fullest measure of coopera-

tion and Federal aid which a wise, sound, economic policy will sanction.

Agriculture is the basic industry of the world. In a sense, Mr. Speaker, it is the only absolutely essential industry. Whatever advances agriculture strengthens the Nation for war as well as for peace and promotes the interests of all mankind. We could not long exist without the fruits of the earth. The farmer is therefore the mainstay of civilization. It is our duty and should be our delight so to legislate as to insure to the tillers of the soil the maximum of comfort, prosperity, and contentment in their labors. Taxation measures should be framed to bear upon them most lightly. Government aid to increase the fertility of the soil, to diversify the crops, and increase the rewards of farm labor should go out to them continuously.

Develop agriculture, make it a profitable industry, and you have gone far to insure the preservation of the Nation, should our national life ever be threatened. A contented, patriotic, home-loving people will arise in their might to meet the Nation's need. Germany organized agriculture as perfectly as any other industry, and to-day she is feeding her people at home and her armies in the field, though hedged in by a ring of steel.

When I read statistics on the increase of farm tenancy and the decrease in rural population in the United States, I am alarmed as to the future of our country if this evil is not corrected. Yet I realize that people will not remain on the farm, if farm life is not made more profitable, more inviting, more productive of the comforts and social opportunities which towns and cities afford. I want to see the boys and girls return to the country, taking with them from the laboratory and the classroom of our best colleges the secrets of scientific agriculture and home economics to enrich and brighten their lives.

The people of the South, through an unwise economic policy, have too long depended upon a single crop. When that crop fails; when its price in the markets of the world drops below the cost of production, as it has in recent years, the cotton farmers are forced to do without even some of the essential things of life. When the purchasing power of a bale of cotton is cut from $30 to $5, hunger invades many homes. Even under normal conditions many farmers have a hard time in making buckle and tongue meet.

What is the remedy? Let the Government, as a matter of self-preservation, aid the tenant farmer to acquire a home, the farm owner to improve his farm and buy new and improved machinery for more scientific and profitable cultivation; continue the farm demonstration work; find profitable markets for diversified crops, and a vigorous, stalwart people will build up the waste places, increase national prosperity, and be ready to answer the Government's call in time of need.

A continuance of the evil of farm tenancy, of large landed estates in a few hands, with no ability on the part of the small farmer ever to acquire his own home, will accelerate the movement away from the farm, and the country as a whole will suffer. Our farmers will lose hope and courage and ambition. We will become a nation of boarders, with no local pride, no zeal for improvement, no spirit of patriotism. It is an amazing and an alarming situation that we face to-day and which this bill aims to remedy.

I direct the especial attention of this House to the farm-tenancy evil, because to my mind it is one of the vitally important elements in this situation. The man who now owns a successful, well-stocked, well-equipped farm, operated according to scientific principles, can now get credit anywhere in this country. It is the man who is struggling for a bare existence that I want to help get a start, and I see in this measure the possibility of extending that relief.

Most of the big ante bellum estates of the South have been broken up into small farms, but the tenantry system is still conspicuous in my section. Since 1880 the number of farms in the entire country operated by tenants have increased faster than the number operated by owners. During the 30 years from 1880 to 1910 the number of tenant farms increased 1,330,075, equal to 130 per cent, while the number of farms operated by owners increased 1,022,520, or 34 per cent.

This does not mean a return to the former system of large estates under one owner, but it does mean a decrease in ownership by men who live on and operate the farm. The names of owners of nearly 2,000,000 tenant farms were ascertained at the last Federal census, and developed the fact that more than a million owners of rented farms owned only one such farm, and 142,886 owners held two rented farms. In the South many tenants are negroes; but there are by far more white tenants than I would like to see, and it is the worthy white tenant of character I am anxious to help. Even the negro should be encouraged, for until conditions readjust we are dependent upon the negro for our labor to a great extent. The white tenant farmer will feel an excess of pride and patriotism when he becomes the owner of his own place, where he can raise his family under his own vine and fig tree, for "where a man's treasure is there is his heart also."

One-half of the total number of farms in the South in 1910, or 49.6 per cent, were operated by tenants. The size of these farms was small, constituting only 28 per cent of the total farm land. In the four States of Georgia, Alabama, Mississippi, and South Carolina more than three-fifths of the farm operators were tenants.

In my own State there were in 1910, 190,980 tenant farms, valued at $268,924,191, while the total value of all farm property in the State was $580,546,381.

I do not hope to see in any short time these valuable farms now operated by tenants taken over and operated by farm-home owners, but I believe the bill we are now considering will encourage that desirable movement.

The State of Georgia ranks fifth in the value of its farm products, being exceeded only by Illinois, Iowa, Texas, and Ohio. She ranks Missouri, Kansas, New York, and Indiana. Thus it will be admitted that Georgia is not a backward State in the development of agriculture. The evil of farm tenancy is no greater there than in other States of the South, but I am especially interested in Georgia, and I want to see a rural-credits bill passed that will help us to wipe out this evil. In 1880 only one farm in every four, or 25 per cent, were tenant farms in this country. In 1890 the tenants numbered 30 per cent, and in 1900 they had increased to 35 per cent. At the time of the last census (1910) 37 per cent of the Nation's farmers were tenants. The thoughtful man must recognize the menace in that situation. It does not make for permanent residence. Enable good white people to buy farm homes and cultivate them and we have settled many of our most perplexing social problems. Overcrowding in the slums of our great cities means deterioration of man's mental and physical as well as moral nature. The free, open country pays the best premiums in health and vitality. It is to our interest to enable the farmer to keep his children around him and raise them in the pure, undefiled air of the country, away from the temptations and contaminations of city life, its pleasures, its demoralizing influences, its tendencies to idleness and dissipation. It will do much to build a better citizenship and a stronger Republic.

If we can enable formers to secure money at low interest rates for the purpose of acquiring a farmhouse and stocking it, we have encouraged not only the country boy to stay at home but the city man as well to move to the farm. Loans at a rate of not over 5 or 6 per cent on the principal, which not only covers the annual interest payments but satisfies the principal of the debt as well, should arouse the ambition of many persons who now see no hope of becoming home owners, to aspire to the dignity and honor and prestige that attaches to such ownership. It is admittedly a very important part of the National Government's work to encourage the building up of the open country, and promote the interests of agriculture.

Heretofore the farmer, with the only security which the world absolutely needs and can not possibly do without, has had to pay the highest interest rates for short-time loans. Credit under such circumstances, instead of being a blessing has been a curse; and it has pressed down the borrower; put him in debt to the money lenders; forced many farmers to pledge next year's crop to pay for last year's supplies; and generally worked in an unsatisfactory and demoralizing way.

The official figures gathered by the Bureau of the Census in 1910 show that we had a larger number of persons engaged in agriculture in the United States than any country in the world, except Russia, having 10,582,039 persons so engaged, while Russia had 14,000,000. There were 6,361,502 farms in the United States, comprising 1,903,289,600 acres. Of the total farm area, 478,451,750 were in improved lands and 400,346,575 in unimproved lands. The valuation placed upon this farm property was $40,991,449,090, of which the land represented a value of $28,475,674,169; the farm buildings, $6,325,451,528; implements and machinery, $1,265,149,783; and domestic animals, poultry, and so forth, $4,925,173,610. The average value per acre of farm land was $32.40 for the entire country.

In value of annual production agriculture takes the lead in the Nation's industries. Last year our farm crops were valued at over $10,000,000,000, while the entire value of our manufactured products was $20,000,000,000, for which $12,000,000,000 of raw material was used, leaving only $8,000,000,000 for the value added by manufacture.

A rural-credits measure is a desirable adjunct of the Federal Reserve System, which we have provided under a Democratic Congress and under the administration of President Wilson to

relieve the country from the dangers and burdens which had resulted from an outworn currency system. That act has been, to my mind, the outstanding accomplishment of this administration, and takes our finances out of the control of the money sharks and Wall Street.

The measure we are now considering is intended to mobilize the credit of the Nation's farmers to permit them to obtain money on long time for farm needs at low rates of interest. The average rate paid to-day is 7½ per cent. That means many farmers are paying much higher rates, often 10 or 12 per cent, to which can be added commissions and attorneys' fees.

Under the Federal reserve act we authorized national banks to make loans on farm mortgages for not exceeding five years, but the banks have shown an unwillingness to tie up their funds for so long a term. They fear being embarrassed at a time when it is imperative that they should be able quickly to convert their assets into cash to meet the demands of depositors. The farmers were helped under that act to the extent that agricultural paper having not longer than six months to run might be available for rediscount and encouraging its acceptance by the banks. This provision has been of great value and helped the farmer's personal credit.

The pending bill will not satisfy all interests. The Federal reserve act itself while on its passage was the target for unmeasured abuse. This measure has also been criticized. Those who expect direct loans from the Federal Treasury through the local postmaster will not be satisfied. On the other hand, those now engaged in the business of making loans on farm property will resent the Government going into the land-mortgage business. Bankers who now profit from loans at high rates of interest to farmers will not be enthusiastic over this legislation, which is aimed to help the farmer.

Despite all these opposing ideas and conflicting opinions we are now engaged in an effort to redeem our platform pledges and give to the Nation's farmers, under proper safeguards, the fullest measure of relief we can afford, through an organization chartered by the Government and supervised by national agencies.

I am strongly in favor of such a purpose. While no man can tell with certainty how the plan we adopt will work out, we can only base our action upon the vast fund of information gathered on the subject by our official commissions which studied the subject in its operation in every country of Europe, and by the joint committee of Congress which conducted exhaustive hearings and inquiries. Acting on the report of this committee and all the data we have been able to get, and inspired with a burning desire to do something of benefit for the farmers of the whole country, and particularly for the farmers of the South, we must frame and pass the best law we can. Rural-credits legislation will be of proportionately greater benefit to the South than to any other great section of this country. The men we hope to benefit have not enjoyed any excessive amount of Government favors. I do not want them to be disappointed now. I want to give them something helpful. While this bill may not be all that the farmers of the country expect in such legislation, yet it is a decided step in the right direction and can be improved from time to time.

While the tenant farmer and the small farmer who now lack credit facilities challenge our special attention, the successful farmer constantly needs new capital to expand, buy more stock, new machinery, install waterworks, erect barns and farm buildings. This credit he can obtain under this bill at low rates of interest not now obtainable, although I would like to see the interest rate made still lower.

It is urged against this bill that a borrower is required to become a stockholder in the local farm-loan association to the extent of 5 per cent of his loan. Taken in connection with this, it must be recalled that the annual rate of interest, which is lower than he can now get, will entirely satisfy both principal and interest, and in a series of years wipe out the debt. He is not in danger of foreclosure, or subjected to excessive charges for renewals every three or five years.

The system to be established must be economically sound or it will be unworkable; it must be as sound as the Federal Reserve Bank System; yet we must build from the bottom. In the former case we had a strong group of national banks in every State for a foundation. We required them to take stock in the Federal Reserve Bank System or forfeit their charters. If the land-bank system is not sound, the bonds will have no standing in the market and there will be no capital to make loans. I do not believe the farmers of my section would ask so foolish a thing as that the Federal Treasury should give every farmer money on an appraisal to be made by postmasters in every town of the United States. He simply asks the same credit facilities that are enjoyed by men engaged in other lines of industry.

We propose here to bring together the credit resources of farmers in every part of the country in local associations, to be consolidated in 12 Federal farm-loan banks. The same plan is provided for securing capital to loan that railroads and manufacturers now resort to. The small savings of the clerk and school-teacher, trust funds, life-insurance funds, endowment funds, may all be safely invested in these long-term bonds if the Government provides for making them absolutely safe.

Unless the bonds to be issued are of a character to attract these investors, our whole system will break down. The first requisite is security. This implies the application of sound business principles to the multitude of details involved in examining the titles to property offered by borrowers, looking after legal and financial incidents, effective examination and supervision of the various banks and associations. With these details looked after by trained Government employees, the bonds should be safer than savings-bank deposits and yield a higher return.

It is provided that the Government shall make up in the beginning any deficiency in the stock subscriptions to the 12 Federal land banks, each of which is to have a capital of not less than $500,000, and will also deposit $500,000 in each bank.

Each member will be interested in the success of the local farm-loan association, since he has at stake double his original stock subscription of 5 per cent in a limited-liability corporation, or may be liable for all the debts of the association if the charter so provides. He will be an active participant in the affairs of the association to see that only good loans are made.

It is provided that no loan shall exceed 50 per cent of the appraised value of the land mortgaged, and shall not be for an amount exceeding $10,000. The borrower must cultivate the land he mortgages, and must use the money for productive purposes, purchasing new land or equipment, or paying off existing indebtedness.

Farmers in many parts of the country are now paying exorbitant rates of interest and not reducing the principal of the loan thereby. Under this plan it is expected that an interest rate of 5½ or 6 per cent will satisfy both principal and interest. This provision means as much to the farmer as a low interest rate. It has been estimated that the total farm-mortgage indebtedness of this Nation is $4,000,000,000. If that is correct, the annual interest rate of 7½ per cent, which is for the use of the money, and serves no purpose in extinguishing the debt, taxes the farmers $300,000,000.

It is estimated that if this enormous indebtedness could be refunded under the provisions of this bill, the total debt would be extinguished at a 5 per cent annual interest rate, under the amortization plan, in 22 years and 6 months.

No man can truly know the needs of the farmer unless he has lived on a farm. With many other Members of Congress, I speak from actual experience, for it was my good fortune to have been reared on a farm, and to that work I devoted much of my earlier life. It is but natural that I should be in thorough accord and hearty sympathy with any and all legislation that will tend to aid the toiling masses, who by the "sweat of their brow" are enriching the country, and to whom all the world must look for food and clothing. It is the farmers who produce the wealth of the world, and yet they receive but little more than a scant living. The product of their honest toil is taken in charge by the manufacturer, who, under a protective system, fostered and built up by Republican administrations, makes enormous profits out of the manufactured article. This evil, we hope, has been corrected through the amendments we have enacted to the tariff laws, and it is to be hoped that through the laws which we have already enacted, and are now enacting, the farmer will come into his own and realize larger returns for his labor, both in prosperity and general happiness.

This is not class legislation, as some of our city friends have charged, but it is legislation for the benefit of the whole country, and I hope it will pass without a dissenting voice, that the farmers may receive as soon as possible the benefits coming to them as a result of this legislation. [Applause.]

Mr. OLDFIELD. Mr. Chairman, the people of my district are vitally interested in rural-credits legislation. I shall gladly support this bill. While this is a splendid bill, yet it is not perfect. However, it is a long stride in the right direction and will be of great help to the American farmer. After the law is put in operation we can and will correct any defects that may become apparent. It has been charged by some on this floor that this legislation is for the benefit of a class of our citizens, to wit, the farmers. Mr. Chairman, this is true, and it will be of incalculable benefit to the farmers; yet this legislation does not injure any other class of our citizens, but, on the contrary, will help all our citizens, for when our farmers are prosperous our country is prosperous.

Mr. Chairman, I want to congratulate the Banking and Currency Committee of this House on presenting this bill, and also want to congratulate our party for carrying out another pledge made in the Baltimore platform. On the question of rural-credits legislation our platform says:

Of equal importance with the question of currency reform is the question of rural credits or agricultural finance. Therefore we recommend that an investigation of agricultural-credit societies in foreign countries be made, so that it may be ascertained whether a system of rural credits may be devised suitable to conditions in the United States; and we also favor legislation permitting national banks to loan a reasonable proportion of their funds on real estate security.

We recognize the value of vocational education and urge Federal appropriations for such training and extension teaching in agriculture in cooperation with the several States.

The latter part of this plank in our platform was complied with when we placed on the statute books the Federal reserve act and the Smith-Lever Act.

The committee has kept faith with the people, and we will pass this bill and it will become a law within the next few days, substantially as it passes this House.

Under this bill there will be 12 regional banks, with a capital of $750,000 each, or $9,000,000 in all, and the Government, if necessary, will subscribe for the entire issue of stock. Also the farm-loan bonds are exempt from Federal, State, and local taxation, which will be an attractive feature of these bonds and a great help to the farmers of the country.

After this system is started, and after it shall become well established, it will not need the funds of the National Treasury, because there can be no better security than improved farm land in this country. However, the system should have enough Federal aid to firmly establish it. Farm-loan bonds in Germany sell just as readily and for just as good a price as do Imperial German bonds, and I predict that within a few years farm-loan bonds under this system will be just as attractive as United States Government bonds. Think what this will mean to the American farmer. The United States Government can borrow all the money she wants at rates of from 2 to 3 per cent, while the farmers of this country have been paying and are now paying all the way from 7 to 10 and even 12 per cent.

No business can succeed and pay from 8 to 12 per cent for the money invested necessary to run the business. The bankers, merchants, and manufacturers could not succeed if they had to pay such a rate of interest. The bankers, merchants, and manufacturers do not have to pay such exorbitant rates of interest. They are able to get what money they need at all the way from 3 to 6 per cent. The farmer is just as much a business man as those other classes of our citizens, and he is coming into his own.

The people of my district and State are more vitally interested in this legislation than any now pending in Congress. It is indeed important to them. Farmers of the South and Southwest need cheap money to develop our great country, and they will be able to get it under this bill if it works as we hope and believe it will.

What the farmers of my part of the country need is money on long time at low rates of interest, in order to pay for and improve their farms. I believe this bill will give them that relief.

Under this bill a farmer can borrow 60 per cent of the value of his land and 20 per cent of the appraised value of his permanent insured improvements at a rate of not more than 6 per cent and for a length of time not less than 5 years nor more than 36 years. I am satisfied that after the system has been in operation for a few years our farmers can get money for a good deal less than 6 per cent.

Mr. Chairman, what we need in this country is more home owners and fewer tenants, and I believe this bill will reduce the number of tenant farmers and increase the number of farm owners.

Hence I repeat that I take great pleasure in supporting this bill.

Mr. Chairman, the Shackleford good-roads bill has passed the House and the Bankhead good-roads bill has passed the Senate. We from the South are hoping that the conference committee will work out a splendid good-roads bill. Give the South a good rural-credits law and a good good-roads law, and we will prosper as never before.

Mr. Chairman, since the present administration came into power we have been busy carrying out our platform pledges. Under the leadership of Woodrow Wilson, we have sought to lighten the burdens of the toiling masses, and this legislation in behalf of the farmers, whose interests have been neglected so long by the Congress of the United States, will make our country blossom as the rose. [Applause.]

Mr. MANN. Mr. Chairman, I move to amend, on page 130, line 24, by striking out the word "five" and inserting the word "fifteen."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 130, line 24, strike out the word "five" and insert the word "fifteen."

Mr. GLASS. Mr. Chairman, I accept the amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Illinois.

The amendment was agreed to.

Mr. GLASS. Mr. Chairman, I move that all debate on this section and all amendments thereto be now closed.

The motion was agreed to.

The Clerk read as follows:

LIMITATION OF COURT DECISIONS.

SEC. 30. That if any clause, sentence, paragraph, or part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this act, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

Mr. SIMS. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Tennessee desire to be recognized?

Mr. SIMS. Not until the last section is read.

The CHAIRMAN. Section 31 has not been read.

The Clerk read as follows:

REPEALING CLAUSE.

SEC. 31. That all acts or parts of acts inconsistent with this act are hereby repealed, and this act shall take effect upon its passage. The right to amend, alter, or repeal this act is hereby expressly reserved.

Mr. SIMS. Mr. Chairman, I move to amend section 31, line 8, by striking out all of that line after the word "repealed" and the four words beginning with line 9. The words to be stricken out are "and this act shall take effect upon its passage."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 133, line 8, after the word "repealed," strike out the words "and this act shall take effect upon its passage."

The question was taken, and the amendment was rejected.

Mr. GLASS. Mr. Chairman, I move that the committee do now rise.

Mr. MANN. I understand the gentleman wants to recommend an amendment to the title.

Mr. SHOUSE. Mr. Chairman, I was informed the amendment to the title could not come until after the passage of the bill.

Mr. MANN. It can be amended in the committee.

Mr. SHOUSE. Mr. Chairman, I move, in line 5 of the title, that the words "Government depositories and" be inserted before the word "financial."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend the title in line 5, after the word "create," by inserting the words "Government depositories and."

The question was taken, and the amendment was agreed to.

Mr. GLASS. Mr. Chairman, I move that the committee do now rise and report the bill with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARNER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill S. 2986, and had directed him to report it back with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass, and also that the title be amended.

Mr. GLASS. Mr. Speaker, I move the previous question on the bill and amendment to final passage.

The previous question was ordered.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. This is an amendment to a Senate bill. Is it in order to ask for a reading of the engrossed copy of the amendment before we vote upon it?

The SPEAKER. The Chair never heard of any such thing as that being done, although he does not pass on it. If the gentleman desires to be heard, the Chair will hear him.

Mr. MANN. Well, it ought to be in order as to this bill, anyhow. There have been a good many amendments adopted. The Committee of the Whole House on the state of the Union has recommended a substitute bill entirely. A good many amendments were adopted in the Committee of the Whole House on the state of the Union. They may be correct at the Clerk's desk, and probably are; still errors frequently occur. The same reason that applies in having a bill actually engrossed and reading the engrossed copy would apply in reading the engrossed copy of this bill, or, in other words, to have it engrossed before it

is finally acted upon. I care nothing about having the bill actually engrossed, as far as that is concerned, but I think we ought, if possible, to avoid any chances of errors in the engrossment.

The SPEAKER. The Chair thinks it would be setting a bad precedent without taking the time to investigate. It might be that on investigation the Chair would be of different opinion.

The question is on agreeing to the amendment.

The question was taken, and the Speaker announced the ayes seemed to have it.

Mr. NORTON. Mr. Speaker, I ask for the yeas and nays. I make the point of order there is no quorum present.

The SPEAKER. The gentleman from North Dakota makes the point of order there is no quorum present. The Chair will count.

Mr. NORTON. Mr. Speaker, I withdraw the point.

The SPEAKER. The gentleman withdraws the point of order.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read the third time, and was read the third time.

Mr. MADDEN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MADDEN. Does this bill provide for the investment of postal savings bank deposits? I do not believe it does, so I should think the title would not be correct.

The SPEAKER. We are going to amend the title in a minute, although the Chair does not know in what respect——

Mr. MADDEN. I do not believe the amendment suggested——

The SPEAKER. That is not for the Chair to pass on, anyhow. The question is on the passage of the bill.

Mr. GLASS. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Virginia demands the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 295, nays 10, answered "present" 3, not voting 125, as follows:

YEAS—295.

So the bill was passed.

The Clerk announced the following pairs:

For the vote:

Mr. NEELY (for rural-credits bill) with Mr. ROWLAND (against).

Mr. HUDDLESTON (in favor) with Mr. WATSON of Pennsylvania (against).

Mr. FLYNN (in favor) with Mr. MAGEE (against).

Mr. MCKELLAR (in favor) with Mr. GREENE of Vermont (against).

Mr. FAIRCHILD (in favor) with Mr. MOORE of Pennsylvania (against).

Mr. PETERS (in favor) with Mr. SIEGEL (against).

Mr. HAYES (in favor) with Mr. ROWE (against).

Mr. TREADWAY (in favor) with Mr. CRAGO (against).

Mr. MCCULLOCH (in favor) with Mr. HEATON (against).

Mr. SEARS (in favor) with Mr. PARKER of New Jersey (against).

Mr. WILSON of Florida (in favor) with Mr. GREENE of Massachusetts (against).

Mr. WARD (in favor) with Mr. CHIPERFIELD (against).

Mr. JOHNSON of South Dakota (in favor) with Mr. GRAHAM (against).

Mr. LINTHICUM with Mr. BENNET.

Mr. JONES (in favor) with Mr. SWIFT (against).

Mr. LESHER with Mr. HUTCHINSON.

Until Wednesday:

Mr. BAILEY with Mr. GARLAND.

Mr. TALBOTT with Mr. BUTLER.

Until May 15:

Mr. MORRISON with Mr. HUMPHREY of Washington.

Until May 22:

Mr. TILLMAN with Mr. MILLER of Pennsylvania.

From May 8 until further notice:

Mr. CLARK of Florida with Mr. FULLER.

Until further notice:

Mr. SCULLY with Mr. HUSTED.

Mr. RAINEY with Mr. HILL.

Mr. SPARKMAN with Mr. BARCHFELD.

Mr. WATKINS with Mr. HAMILTON of New York.

Mr. FITZGERALD with Mr. WINSLOW.

Mr. CAREW with Mr. DARROW.

Mr. HART with Mr. GRIEST.

Mr. DOREMUS with Mr. COLEMAN.

Mr. STEELE of Pennsylvania with Mr. ROBERTS of Massachusetts.

Mr. OLNEY with Mr. MCLAUGHLIN.
Mr. MAHER with Mr. HOPWOOD.
Mr. CASEY with Mr. EDMONDS.
Mr. HAY with Mr. GOULD.
Mr. GRIFFIN with Mr. FOCHT.
Mr. OGLESBY with Mr. HINDS.
Mr. HULBERT with Mr. MILLER of Minnesota.
Mr. SMALL with Mr. KAHN.
Mr. EAGAN with Mr. CARTER of Massachusetts.
Mr. HAMILL with Mr. EMERSON.
Mr. DRISCOLL with Mr. COPLEY.
Mr. SMITH of New York with Mr. HOLLINGSWORTH.
Mr. DALE of New York with Mr. HASKELL.
Mr. DOOLING with Mr. MOTT.
Mr. RIORDAN with Mr. SANFORD.
Mr. LOFT with Mr. STINESS.
Mr. PATTEN with Mr. TILSON.
Mr. DEWALT with Mr. TINKHAM.
Mr. CONRY with Mr. MILLER of Delaware.
Mr. LIEBEL with Mr. PARKER of New York.
Mr. STEELE of Pennsylvania with Mr. ROBERTS of Massachusetts.

Mr. MORRISON. Mr. Speaker, I have a general pair with the gentleman from Washington [Mr. HUMPHREY], and on that account I answered "Present." Mr. HUMPHREY has been called away on account of illness, but he has just informed me if present that he would vote "yea." I therefore desire to have my name called.

The name of Mr. MORRISON was called, and he voted "Yea."

Mr. MILLER of Pennsylvania. Mr. Speaker, I am paired with the gentleman from Arkansas [Mr. TILLMAN]. He informed me that if he were present he would vote "yea." He is not present, and therefore I wish to vote "yea."

The name of Mr. MILLER of Pennsylvania was called, and he voted "Yea."

The result of the vote was announced as above recorded.

On motion of Mr. GLASS, a motion to reconsider the vote by which the bill was passed was laid on the table.

The title to the bill was amended to read as follows: "An act to provide capital for agricultural development, to create standard forms of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to create Government depositories and financial agents for the United States, and for other purposes."

CONTESTED ELECTION—BROWN V. HICKS.

The SPEAKER. The Chair lays before the House the following letter from the Clerk of the House of Representatives, which the Clerk will report.

The Clerk read as follows:

HOUSE OF REPRESENTATIVES,
CLERK'S OFFICE,
*Washington, D. C., May 8, 1916.*

SIR: I have the honor to lay before the House of Representatives the contest for a seat in the House of Representatives for the Sixty-fourth Congress of the United States for the first district, State of New York, Lathrop Brown *v.* Frederick C. Hicks, notice of which has been filed in the office of the Clerk of the House, and also transmit herewith original testimony, papers, and documents relating thereto.

The Clerk has opened and printed the testimony in the above case. In compliance with the act approved March 2, 1897, entitled "An act relating to contested-election cases," such portions of the testimony in the above case as the parties in interest agreed upon or as seemed proper to the Clerk, after giving the requisite notices, have been printed and indexed, together with the notices of contest, and the answer thereto, and such portions of the testimony as were not printed with the original papers have been sealed up and are ready to be laid before the Committee on Elections.

Two copies of the printed testimony in the aforesaid case have been mailed the contestant and the same number to the contestee. The law in reference to the briefs of both the contestant and the contestee has been complied with as far as possible upon receipt by the Clerk of said briefs.

So far as the briefs have been furnished to the Clerk, they are ready to be laid before the Committee on Elections upon the order of the House, together with a tabulated statement, which has been prepared by the Clerk, showing the number of pages of testimony and the present status of said contested-election case, and all the papers in connection therewith.

Yours, respectfully, SOUTH TRIMBLE,
*Clerk of the House.*

Hon. CHAMP CLARK, *Speaker.*

The SPEAKER. The case is referred to the Committee on Elections No. 3.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 10385. An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs, for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917.

LEAVE OF ABSENCE.

Mr. TILLMAN, by unanimous consent, was granted leave of absence for one week, on account of important business.

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 10 minutes p. m.) the House adjourned until to-morrow, Tuesday, May 16, 1916, at 11 o'clock a. m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination for a canal from Silver Springs to Ocala, Fla. (H. Doc. No. 1130); to the Committee on Rivers and Harbors, and ordered to be printed.

2. A letter from the Secretary of War, transmitting with a letter from the Chief of Engineers, reports on reexamination of James River, Va. (H. Doc. No. 1131); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

3. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of Commerce, submitting an additional estimate of appropriation for extraordinary repairs and alterations to the Coast and Geodetic Survey vessels *Bache, Hydrographer*, and *Isis*, to be immediately available and remain available until expended (H. Doc. No. 1132); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Secretary of Commerce, submitting an additional estimate of appropriation, under the head of "General expenses, Coast and Geodetic Survey" (H. Doc. No. 1133); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. MILLER of Delaware, from the Committee on Claims, to which was referred the bill (H. R. 6518) for the relief of Charles Akerlund, reported the same with amendment, accompanied by a report (No. 693), which said bill and report were referred to the Private Calendar.

Mr. HAYDEN, from the Committee on Indian Affairs, to which was referred the bill (H. R. 13072) for the relief of William E. Johnson, reported the same without amendment, accompanied by a report (No. 694), which said bill and report were referred to the Private Calendar.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. CARY: A bill (H. R. 15680) to regulate the business of loaning money on security of any kind by persons, firms, and corporations other than national banks, trust companies, savings banks, building and loan associations, licensed pawnbrokers, and real estate brokers in the District of Columbia; to the Committee on the District of Columbia.

By Mr. KAHN: A bill (H. R. 15681) to amend an act entitled "An act to parole United States prisoners, and for other purposes," approved June 10, 1910, as amended by an act approved January 23, 1913; to the Committee on the Judiciary.

By Mr. HARRISON: A bill (H. R. 15682) granting the consent of Congress to Jackson County, Miss., to construct a bridge across West Pascagoula River at or near Pascagoula, Miss.; to the Committee on Interstate and Foreign Commerce.

By Mr. HAYDEN: A bill (H. R. 15683) for the purchase of a site for a public building at Kingman, Mohave County, Ariz.; to the Committee on Public Buildings and Grounds.

By Mr. WILSON of Louisiana: A bill (H. R. 15684) making appropriation for the enlargement and improvement of the post-office building at Monroe, La.; to the Committee on Public Buildings and Grounds.

By Mr. SHACKLEFORD: Resolution (H. Res. 237) providing for the consideration of H. R. 7617; to the Committee on Rules.

## PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. ASHBROOK: A bill (H. R. 15685) granting an increase of pension to Mary A. Nichols; to the Committee on Invalid Pensions.

By Mr. BRITTEN: A bill (H. R. 15686) granting a pension to Mrs. James Purcell; to the Committee on Invalid Pensions.

By Mr. CANNON: A bill (H. R. 15687) granting an increase of pension to Thomas Hingson; to the Committee on Invalid Pensions.

By Mr. CHURCH: A bill (H. R. 15688) granting an increase of pension to Elijah J. Freeman; to the Committee on Invalid Pensions.

By Mr. DOWELL: A bill (H. R. 15689) granting an increase of pension to Robert R. C. Grantham; to the Committee on Invalid Pensions.

By Mr. DYER: A bill (H. R. 15690) granting a pension to Xaver Zachringer, alias John Ruh; to the Committee on Invalid Pensions.

By Mr. EAGAN: A bill (H. R. 15691) granting an increase of pension to Mary E. Austin; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15692) granting an increase of pension to Sarah A. Hull; to the Committee on Invalid Pensions.

By Mr. GOOD: A bill (H. R. 15693) granting an increase of pension to Thomas Larkin; to the Committee on Invalid Pensions.

By Mr. HUSTED: A bill (H. R. 15694) granting an increase of pension to Mary Ann Dorfner; to the Committee on Invalid Pensions.

By Mr. KEARNS: A bill (H. R. 15695) granting an increase of pension to Robert W. Glasgow; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15696) for the relief of John P. Purdon; to the Committee on Military Affairs.

By Mr. LEE: A bill (H. R. 15697) granting a pension to Mariah Lowesa Cobb; to the Committee on Invalid Pensions.

By Mr. LINTHICUM: A bill (H. R. 15698) granting a pension to Walter Sewell; to the Committee on Pensions.

By Mr. MATTHEWS: A bill (H. R. 15699) granting a pension to Sarah A. Christy; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 15700) granting an increase of pension to Mary V. Reed; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15701) for the relief of Dr. Charles Lee Baker; to the Committee on Military Affairs.

By Mr. PADGETT: A bill (H. R. 15702) granting an increase of pension to David Gilbert; to the Committee on Invalid Pensions.

By Mr. PRICE: A bill (H. R. 15703) for the relief of Charles Chaille-Long; to the Committee on Claims.

By Mr. SIEGEL: A bill (H. R. 15704) granting a pension to Ida Cohen; to the Committee on Pensions.

By Mr. SMITH of Minnesota: A bill (H. R. 15705) granting a pension to Elizabeth S. Bourne; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15706) granting an increase of pension to Anna M. Harley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15707) granting an increase of pension to William G. Johnson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15708) for the relief of Sim Milttlie; to the Committee on Claims.

By Mr. SUMNERS: A bill (H. R. 15709) for the relief of the estate of Henry Merseburger, deceased; to the Committee on Claims.

By Mr. WINGO: A bill (H. R. 15710) granting a pension to Della V. Kelcy; to the Committee on Invalid Pensions.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of City Hospital Alumni Society, opposing the Works resolution; to the Committee on the Judiciary.

By Mr. ASHBROOK: Evidence to accompany House bill 13490, for the relief of Henry Stover; to the Committee on Invalid Pensions.

By Mr. BRUCKNER: Memorial of U. A. Plumbers' Local No. 498, of New York City, in re labor conditions in the Canal Zone; to the Committee on Labor.

Also, memorial of Republican county committee of New York, favoring House bill 6915; to the Committee on the Post Office and Post Roads.

By Mr. BRUMBAUGH: Petition of sundry citizens of Columbus, Ohio, relative to House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

By Mr. CALDWELL: Petition of sundry citizens of Elmhurst, Long Island, N. Y., against United States in war with Germany; to the Committee on Foreign Affairs.

By Mr. CANNON: Petition of sundry citizens of Vermilion Grove, Ill., against increase in the Army; to the Committee on Military Affairs.

Also (by request), petition of sundry citizens of Kankakee, Ill., against the Taylor system in Government shops; to the Committee on Labor.

Also, petition of Young People's Society of Christian Endeavor of Presbyterian Church of Rossville, Ill., favoring national prohibition; to the Committee on the Judiciary.

Also, petition of citizens of Onarga, Ill., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. CAREW: Petition of the Merchants' Association of New York, in opposition to a Government hydroelectric plant for the production of nitrates and fertilizers; to the Committee on Military Affairs.

By Mr. DALE of New York: Petitions of sundry citizens and organizations in the United States, favoring the reporting out of the Susan B. Anthony amendment from the Judiciary Committee; to the Committee on the Judiciary.

By Mr. DANFORTH: Petition of E. D. McKay and 55 others, of Lincoln Park and Rochester, N. Y., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. DOOLING: Petition of Southern Hardware Jobbers' Associations, in re flood control; to the Committee on Flood Control.

By Mr. DYER: Petition of Southern Hardware Jobbers' Association, favoring legislation for flood control; to the Committee on Rivers and Harbors.

Also, petition of Medical Society of City Hospital Alumni, St. Louis, Mo., relative to officers and employees of the Public Health Service of the Government; to the Committee on Interstate and Foreign Commerce.

By Mr. EAGAN: Petition of Southern Hardware Jobbers' Association, favoring legislation for flood control; to the Committee on Rivers and Harbors.

By Mr. FARR: Petitions of 200 residents of Carbondale, residents of Olyphant (Blakely), residents of Scranton, 100 people of Carbondale, and citizens of Scranton, all in the State of Pennsylvania, favoring the passage of the Webb-Smith national prohibition resolution; to the Committee on the Judiciary.

By Mr. FULLER: Petition of St. Paul's Lutheran Church, of Streator, Ill., against the United States in war with Germany; to the Committee on Foreign Affairs.

Also, petition of legislative committee of Hardscrabble Lodge, No. 650, International Association of Machinists, of Streator, Ill., against the Taylor system in Government shops; to the Committee on Labor.

Also, petition of board of education of the city of Chicago, Ill., favoring passage of the Smith-Hughes vocational education bill; to the Committee on Education.

By Mr. GALLIVAN: Petition of Southern Hardware Jobbers' Association, favoring legislation for the prevention of floods; to the Committee on Rivers and Harbors.

Also, memorial of Northeast Washington Citizens' Association, against location of the municipal hospital on reservation No. 13; to the Committee on the District of Columbia.

By Mr. HADLEY: Petition of sundry citizens of Port Angeles, Wash., against United States in war with Germany; to the Committee on Foreign Affairs.

By Mr. HUMPHREY of Washington: Petition of citizens of Seattle, Wash., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petition of citizens of Port Blakeley, Colby, and Southworth, Wash., against the Sunday observance bill for the District of Columbia; to the Committee on the District of Columbia.

By Mr. IGOE: Petition of St. Francois County (Mo.) Farm Bureau, urging the passage of the proposed bill in Document 494, report of the joint committee on rural credits; to the Committee on Banking and Currency.

Also, petition by Senator Michael Kinney, of St. Louis, Mo., filed by him on behalf of the Missouri Association for the Relief and Control of Tuberculosis, against the passage of the bill introduced by Senator WORKS making it unlawful for any officer or employee of the Government Public Health Service to become a member or officer of, or in any way connected with, any medical or private health association or organization of any kind; to the Committee on the Judiciary.

Also, petition by J. E. W. Wallin, board of education, city of St. Louis, Mo., favoring the passage of a bill introduced by Senator Robinson for the establishment of a bureau for the study of the criminal, pauper, and defective classes; to the Committee on the Judiciary.

Also, petition of the Business Men's League of St. Louis, Mo., favoring the passage of a law providing for a permanent nonpartisan tariff commission; to the Committee on Ways and Means.

Also, petition by Edward Mallinckrodt, of St. Louis, Mo., protesting against the enactment of Senate joint resolution 120 introduced by Senator WORKS; to the Committee on the Judiciary.

Also, petition of the Engineers' Club of St. Louis, Mo., on behalf of the Associated Engineering Societies of that city comprising 800 members, favoring the passage of Senate bill 4874, which provides for an appropriation of $15,000 for each State for establishing and operating engineering experiment stations in connection with the land-grant colleges of the United States; to the Committee on Agriculture.

By Mr. JAMES: Petition of sundry citizens of Marquette, Mich., against the Taylor system in Government shops; to the Committee on Labor.

By Mr. JOHNSON of Washington: Petition of 23 citizens of Tacoma, Wash., favoring House bill 8665, against the Taylor system; to the Committee on Labor.

Also, petition of 21 citizens of Clarke County, Wash., against Sunday observance bill for the District of Columbia; to the Committee on the District of Columbia.

Also, petition of 56 citizens of Clarke County, Wash., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. McCRACKEN: Memorial of Challis Commercial Club, favoring bill to establish the Sawtooth national park; to the Committee on the Public Lands.

By Mr. McGILLICUDDY: Petitions of Sunday School and Christian Endeavor Society of the Baptist Church, Livermore, Me., and of certain citizens of said town, favoring national prohibition; to the Committee on Alcoholic Liquor Traffic.

By Mr. MAGEE: Petition of sundry citizens of Cortland, N. Y., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. OVERMYER: Petitions of 148 business men of the thirteenth Ohio district, favoring tax on mail-order houses; to the Committee on Ways and Means.

By Mr. RANDALL: Memorial of Chamber of Commerce of Los Angeles, Cal., favoring House bill 13767, for creation of a tariff commission; to the Committee on Ways and Means.

Also, petition of Charlotte Peake and 12 citizens of Monrovia and 155 citizens of Long Beach, Cal., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. SMITH of Michigan: Additional papers to accompany House bill 14897, for relief of Eliza Spears; to the Committee on Invalid Pensions.

By Mr. SMITH of Minnesota: Petition of L. J. Rutherford, secretary of the official board, Trinity Methodist Episcopal Church, Minneapolis, Minn., for Federal censorship of interstate motion pictures, prohibition of liquor shipments to Africa, etc.; to the Committee on the Judiciary.

By Mr. SNELL: Petition of A. Martin, Allie Mistaffa, E. T. Martin, Horton Rutherford, E. J. Brown, William M. Barr, J. R. Smith, G. M. Brown, John R. Brown, Robert Jalone, L. P. Wiggins, L. F. Rutherford, Jay Martin, C. C. Chambers, Will White, S. Smith, Rev. C. E. Hill, and Jery Putnam and others, of Lisbon, N. Y., protesting against the passage of the Fitzgerald and Siegel postal bills; to the Committee on the Post Office and Post Roads.

By Mr. STEPHENS of California: Petitions of C. C. Dickinson and 14 others and Roy P. Byron and 24 others, all of Los Angeles, Cal., favoring House bill 9162; to the Committee on Interstate and Foreign Commerce.

Also, petition of W. G. Paschall and 37 others, all of Los Angeles, Cal., favoring fixed-price bill; to the Committee on Interstate and Foreign Commerce.

Also, petition of Charles C. Watkins and 8 others, of Los Angeles, Cal., favoring Warren bill; to the Committee on Military Affairs.

Also, petition of Church of the People and Alice P. Ward and 17 others, all of Los Angeles, Cal, protesting against Chamberlain bill; to the Committee on Military Affairs.

Also, petition of Rosecrans Camp, Sons of Veterans, Los Angeles, Cal., favoring issuing arms to Sons of Veterans; to the Committee on Military Affairs.

Also, petitions of 44 citizens of Ontario, Cal., and 33 citizens of Chino, Cal., favoring free speech; to the Committee on the Post Office and Post Roads.

Also, resolutions of Los Angeles Chamber of Commerce, favoring a permanent tariff commission; to the Committee on Ways and Means.

Also, communication from San Joaquin Light & Power Co., Fresno, Cal., protesting stamp tax on checks; to the Committee on Ways and Means.

Also, petition of Mrs. Myrtle Hoffmeister and 30 others, protesting against war with Germany; to the Committee on Foreign Affairs.

Also, petition of Phil Lindner, John Herr, and St. Anthony's Benevolent Society, all of Los Angeles, Cal., favoring embargo on munitions of war; to the Committee on Foreign Affairs.

By Mr. STINESS: Papers to accompany House bill 15428, for relief of Angie O. Allen; to the Committee on Invalid Pensions.

Also, papers to accompany House bill 15381, granting an increase of pension to Mary A. Dixon; to the Committee on Invalid Pensions.

Also, petition of 20 citizens of Rhode Island to discontinue and prevent the Taylor system and similar systems in Government workshops; to the Committee on Labor.

Also, petition of Elisha H. Rodes Camp, No. 11, Division of Rhode Island, Sons of Veterans, of Providence, R. I., approving the provisions of the Chamberlain military bill; to the Committee on Military Affairs.

Also, petition of Gilbert Johnson, jr., and Benjamin A. Armstrong, of Providence, R. I., favoring House bill 8828; to the Committee on Appropriations.

Also, petition of Rhode Island Branch of the Woman's Auxiliary to the Board of Missions, protesting against the passage of House bill 108; to the Committee on Indian Affairs.

Also, memorial of Bristol (R. I.) Improvement Association, urging the establishment of a naval base in Narragansett Bay, R. I.; to the Committee on Naval Affairs.

Also, petition of E. Elizabeth Trowbridge, of Peace Dale, R. I., favoring the bill for national aid to vocational education; to the Committee on Education.

By Mr. TAYLOR of Arkansas: Petition of W. H. Nichol and others, of McGehee, Ark., favoring Tavenner antistop-watch bill; to the Committee on Labor.

By Mr. TIMBERLAKE: Petition of citizens of Wray, Colo., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

Also, petitions of sundry citizens of the second congressional district of Colorado, against drawing this country into the European war; to the Committee on Foreign Affairs.

Also, memorial of citizens of Wellington, Colo., favoring London peace resolution; to the Committee on Foreign Affairs.

## SENATE.

### TUESDAY, *May 16, 1916.*

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the following prayer:

Almighty God, we bless Thee that Thou hast broken the silence of the centuries and spoken unto us with infallible word. And Thou hast not only spoken once, but Thou dost continue to speak through the years with the ever-coming kingdom and the ever-unfolding revelation of the divine will. It is not left to us to assume a policy with reference to Thy laws. Thy kingdom ruleth over all. Thy law is inevitable, is eternal, is changeless. Enlighten us through Thy truth. Send us out into the solemn responsibilities of life under Thy guidance and inspiration. May we know God's will, and may we have it in our hearts to do Thy will. We ask for Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. SMITH of Michigan and by unanimous consent, the further reading was dispensed with and the Journal was approved.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 759. An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof; and

H. R. 10385. An act making appropriations for the current and contingent expenses of the Bureau of Indian Affairs for fulfilling treaty stipulations with various Indian tribes, and for other purposes, for the fiscal year ending June 30, 1917.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT. The Chair lays before the Senate a telegram addressed to the President of the Senate which will be printed in the RECORD.

The telegram is as follows:

NEW YORK, N. Y., *May 16, 1916.*

PRESIDENT OF THE SENATE,
*Washington, D. C.:*

At a mass meeting held under the auspices of the International Brotherhood Welfare Association I am instructed to demand of Senate, House, and President an economic and peace commission to work for economic preparedness, not militarism, and for international solidarity and peace with Mexico and the world. Kindly place this before Senate.

G. H. STORK, *Chairman.*

Mr. SMITH of Michigan. Mr. President, the river and harbor bill now under consideration in the Senate has an item regarding the improvement of the Illinois River, which, in the opinion of many people in the State of Michigan and adjoining States, is seriously inimical to the navigation on the Lakes and the harbors thereof. I have a communication from Mr. Austin Farrell, the manager of the Cleveland-Cliffs Iron Co., of Marquette; a communication from the mayor of the city of Gladstone; and other memorials bearing upon this question, which, in my opinion, are of great interest to the people of the Lake States and should be thoroughly understood by the Senate. These memorials are not long, and I ask that they may be read for the information of the Senate.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read.

The Secretary read as follows:

MARQUETTE, MICH., *May 12, 1916.*

Hon. WILLIAM ALDEN SMITH,
*Senate Chamber, Washington, D. C.*

DEAR SIR: I am taking the liberty of inclosing herewith copy of brief which I have submitted to the Chief of Engineers relative to the furtner lowering of the levels of Lake Michigan.

I expect to appear before this gentleman at a hearing on May 15 and elaborate on same. From it you will gather how serious the proposed diversion of additional water through the drainage canal, if allowed, will affect our and kindred industries in the Northern Peninsula.

I respectfully urge that you use every effort to prevent any additional water being allowed to pass through the Chicago Drainage Canal.

Yours, truly,

AUSTIN FARRELL, *Manager.*

—

MAY 12, 1916.

CHIEF OF ENGINEERS,
*War Department, Washington, D. C.*

SIR: The undersigned is the general manager of the blast furnaces and chemical departments of the Cleveland-Cliffs Iron Co., said company having a large blast furnace and chemical plants located on the shores of Little Bay De Noquet, about 3 miles north of the city of Gladstone.

At the request of Mr. G. R. Huntington, general manager, I am representing the interests of the Minneapolis, St. Paul & Sault Ste. Marie Railway, who have large coal, merchandise, docks, and grain elevator in the city of Gladstone. I have also been requested to represent the interests of the Northwestern Cooperage & Lumber Co., who have large saw, veneer, and planing mills and hardwood-floor factories, also located in the city of Gladstone.

Attached hereto please note letters giving me authority to act for the companies mentioned, and also setting forth briefly their position relative to the still further lowering of the water in Lake Michigan through the possibility of additional water being allowed to pass through the drainage canal at Chicago into the Illinois River.

Each and all of us emphatically protest against any additional water being given to said canal and respectfully urge that the amount be cut down to not to exceed 250,000 cubic feet per minute during a day of 24 hours.

In defense of the stand taken by the Cleveland-Cliffs Iron Co., through me as their representative, beg to state that we operate, as already mentioned, a large blast furnace and chemical plants, producing about 40,000 tons of pig iron, 6,927,947 pounds of acetate of lime, 331,173 gallons of alcohol, and 298,840 gallons of tar flotation oils yearly.

While it is true that not all of this product goes out by water, yet the outgoing and incoming freight for the plant will amount to about 20,000 to 25,000 tons per year. To handle this material we have at great expense constructed a dock at our plant. When this dock was constructed there was ample water for large boats to get to and from it without trouble. During the past five or six years, according to our observations, the lake level has lowered about 2 feet. This large recession of water can not be entirely due to fluctuation or changes in climatic conditions. On the other hand, we claim that it is largely the result of the vast amount of water being passed through the drainage canal. Between December 15, 1914, and December 28, 1915, our measurements show that the levels were 8½ inches lower in 1915 than in 1914.

This lowering of the lake levels has seriously interfered with our boat shipments, and we are now compelled to use boats of smaller capacity and lighter draft which at the present time are very hard to obtain. We estimate that the lowering of 8 inches referred to during the past year has cut down the carrying capacity of the boats at our dock between 10 and 15 per cent.

I am informed that if the drainage-canal authorities are allowed the amount of water they ask for that the lake levels will be lowered an additional 8 or 10 inches. You can readily see the effect this will have on our operations. The bottom of the lake from the face of our dock toward deep water has been dredged until we are practically upon a ledge of limestone rock, and if we are compelled to build our dock still farther into the lake the expense will be so large as to be practically prohibitive.

If you will refer to the data furnished by the Minneapolis, St. Paul & Sault Ste. Marie Railway, under the head of Exhibit A, you will note the size and capacity of their docks, freight sheds, elevators, etc. You will also note how the lowering of the water has seriously affected their piling and the expense they had been put to to take care of same, and the further additional expense they will be put to through dredging and the danger said dredging will entail should they be compelled to undertake it.

Under the head of Exhibit B, I am submitting a statement from the Northwestern Cooperage & Lumber Co., setting forth in detail just how seriously they have been and will be affected by the further lowering of the present lake levels.

I would also like to call your attention to the fact that on Little Bay De Noquet there are other large industries engaged in the manufacture of pig iron, lumber, and the handling of iron ore. While it is possible that these interests will have their own representatives, it may not be amiss for me to state that they comprise the large ore docks of the Chicago & North Western Railway and the Chicago, Milwaukee & St. Paul Railway, at Escanaba; the I. Stephenson Lumber Co., the Stephenson Charcoal Iron Co., the Delta Chemical Co., and the Michigan Tanning & Extract Co., at Wells; the Stack Lumber Co., at Masonville, just north of Gladstone; and the Madden & Scheible Lumber Co. and other manufacturers at Rapid River. All of these industries, representing a vast amount of capital, will be seriously affected by the further lowering of the lake levels; but I speak particularly for the companies which I am representing.

As previously stated, we protest against any further lowering of lake levels and urgently request that you use every effort to prevent additional water being taken through the drainage canal.

Since writing the above I have a letter from the mayor of the city of Gladstone requesting me to represent them at this hearing, and refer you to "Exhibit C" attached hereto.

I therefore wish to protest as the representative of the city of Gladstone against any additional amount of water being allowed to pass through the so-called Chicago Drainage Canal.

Respectfully submitting this statement, we beg to remain,

THE CLEVELAND-CLIFFS IRON CO.,
By ——— ———, *Manager.*

By ——— ———, *Representative.*

—

MINNEAPOLIS, ST. PAUL & SAULT STE. MARIE RAILWAY CO.,
OFFICE OF GENERAL AGENT,
*Gladstone, Mich., May 10, 1916.*

PROPERTY.

| | | |
|---|---|---|
| Minneapolis, St. Paul & Sault Ste. Marie Railway Co., Gladstone, Mich.: | | |
| Investment | | $1,000,000 |
| Length of freight sheds | feet | 1,500 |
| Capacity of freight sheds | tons flour | 9,000 |
| Length open dock | feet | 200 |
| Length of coal dock | do | 800 |
| Capacity of coal dock | tons | 200,000 |
| Capacity of elevator | bushels | 500,000 |
| Handles over docks and through elevator past 15 years: | | |
| Flour and merchandise | tons | 2,703,623 |
| Coal | do | 2,992,731 |
| Grain to boats through elevator | bushels | 38,842,512 |
| Miscellaneous, cement, salt, etc | tons | 100,000 |

Our business demands that we have sufficient depth of water along our dock to permit the largest boats on the Lakes getting in with full loads. In the beginning we had to dredge to this depth and have at various times in past few years had to do further dredging to maintain it. The last time we dredged we cut to 23 feet, and at this writing we have a scant 20 feet, a portion of this filling in is natural, but at least a foot and one-half of it is caused by lowering of the water in the lake.

Any further decrease in the depth must be met by an equal amount of dredging along our entire dock front (2,500 feet) and a cut made not less than 100 feet wide.

The lowering of the lake level means also that boats set that much lower than the dock and it is more difficult to get in and out of them, this and the fact that it also make an uphill haul will increase the cost per ton of handling.

If the lake level is further lowered and we are obliged to dredge deeper than ever to get sufficient water, it means the taking away of just that much more earth from the bottom of the lake around the outer row of piling and a general weakening of the whole structure.

Our piling under docks which were cut level with the water are now a foot and one-half above the lake level, a further lowering of the water will make them project that much more. Soon as they get out of the water they commence to rot and have to be replaced with blocking, the blocking can not be as strong as the piling and the foundation is thus made weaker, and puts us to the expense of purchasing timbers and the labor of putting them in. This damage has already been done to a certain extent and will be increased by further lowering of the water. This one item alone will amount to thousands of dollars.

To summarize, we have already suffered by the lowering of the water which has already taken place, to the extent of having to place caps on several thousand piling and by having the water lowered all along our dock and stand to pay out thousands more if the water is further

lowered, as we will have to do more dredging, put additional caps on piling, and pay more per ton for handling freight.

EXHIBIT B.

THE NORTHWESTERN COOPERAGE & LUMBER CO.,
*Gladstone, Mich., May 9, 1916.*

Mr. AUSTIN FARRELL,
*Manager Cleveland-Cliffs Iron Co.,*
*Marquette, Mich.*

DEAR SIR: Regarding the rehearing of the Illinois waterway matter at Washington on the 15th, which involves the lowering of the waters of Lake Michigan through its drainage into the sanitary drainage canal at Chicago. This is a very serious matter to us, on account of the large tonnage each year that we are obliged to get in to and from our plants here.

We have been operating here some 15 or 20 years, and these plants were originally located and built on the strength of the water facilities for shipping in and out by vessel, and we should say, roughly, each year there is a tonnage in to and from our plants of 15,000 to 20,000 tons that must be handled in order for us to operate, and this would be true of the 10 to 15 years to come.

According to our records of the stages of water around our plants, it has lowered permanently all the way from 2 to 2½ feet in the last five or six years, which has caused a very great inconvenience and a large expenditure of money by this company in dredging, not only around our plants and docks but other places in connection with our mill operations, which had to be dredged in order to have water enough to carry on our operations, and this lowering, as far as we have been able to ascertain from those supposed to be posted on the subject, has been caused in no small degree already by the amount taken out through the canal at Chicago, and if this is to be further lowered, it will be almost impossible at a good many of the upper lake ports, and especially in the upper Bay de Boc, to do any commercial business by boats; and it would seem this is not only a matter of interest to us as manufacturers, but that the interests of the destination territories served by these boats should be considered rather than the fact of supplying the Chicago Canal with water.

We assume that we are not far wrong in saying that any further lowering of the water would mean at least 1 to 2 feet, and if that is done the lightest-draft boats could not get into our plants and docks, which would mean a vast amount of dredging at such a large expense as would be prohibitory and which we could not stand. In addition to dredging that would have to be done along our trams and docks, we would also have to dredge practically the entire area of our large pond, which area of water is absolutely necessary in running our plants of a mile long, and, as the bottom is quite soft, we doubt if the docks and trams would stand up under any load without falling away, and might necessitate, in addition to dredging, the rebuilding of these docks and the use of much longer piling than was used when they were built in order to get the required strength and also get the top of the dock the proper distance from the water for convenient loading of boats with material off the dock.

In addition to this there is from one-half to three-quarters of a mile of approach to our dock from the bay that now has barely enough depth of water for boats to get through to the docks, and this distance would certainly also have to be dredged in addition to the other dredging in order to allow boats to get to our plants and docks if the water is lowered any further, all of which would mean many thousands of dollars' expense; and we hope upon consideration no further impairment of condition will be allowed than now exist.

Yours, truly,

THE NORTHWESTERN COOPERAGE & LUMBER CO.,
By STAPLES.

—

EXHIBIT C.

GLADSTONE, MICH., *May 11, 1916.*

Mr. AUSTIN FARRELL,
*Marquette, Mich.*

DEAR SIR: At a meeting of the city council held Monday, May 1, the mayor was authorized to select some one to represent the city of Gladstone at the meeting to be held in Washington on May 15. The object of said meeting is to reconsider the matter of lowering the lake levels by permitting more water to pass through the Chicago Drainage Canal.

This matter is of vital importance to the city of Gladstone, as its commercial life depends upon the lake shipping facilities. Without the industries that depend upon the local harbor our city would dwindle to a hamlet. By destroying our harbors they would also destroy our industries and leave us without employment for the workmen of our city and vicinity and devastate a city of 5,000 population.

Besides the property of our industries which would be destroyed, it would make it impossible, without dredging, for boats to land at the dock owned by the city. It would no doubt be necessary to extend our city dock several hundred feet farther into the lake, and this our city is not in a position to do.

Inasmuch as the lake levels have already been lowered so much, a further lowering would put things in a critical condition and disaster to our city would quickly follow.

In view of the above I appoint you as representative of the city of Gladstone at the above-mentioned meeting and trust that you will protest most vigorously against such action.

Trusting that the proper officials will recognize our claims and that the outcome will prove satisfactory to us, we remain,

Very truly, yours,

CITY OF GLADSTONE, MICH.,
JAMES T. JONES, *Mayor.*

Mr. SUTHERLAND. Mr. President, at a mass meeting of citizens of Salt Lake City, held in the Salt Lake Theater on the 11th day of the present month, the resolutions I send to the desk were passed. I ask that the resolutions may be read.

The VICE PRESIDENT. Without objection, the Secretary will read.

The Secretary read the resolutions, as follows:

Whereas the present interstate discrimination against the political rights of women can be ended only by the passage through Congress of the Federal suffrage amendment; and

Whereas the women of Utah do not receive the protection of the United States Constitution as regards their voting rights: Be it

*Resolved*, That we, citizens of Salt Lake City, assembled in mass meeting at the Salt Lake Theater, May 11, 1916, protest against the unfair action of the Judiciary Committee of the House of Representatives in blocking the passage of the Susan B. Anthony Federal suffrage amendment by refusing to consider it upon its merits, and demand that it be given an immediate and favorable report; be it further

*Resolved*, That if the suffrage amendment be not passed at the present session of Congress, we shall feel bound to the extent of our political power to hold the Democratic Party to full responsibility; be it finally

*Resolved*, That a copy of these resolutions be forwarded to the administration leaders, to the chairman and members of the House Judiciary Committee, and to the Utah congressional delegation, with the request that they be read into the CONGRESSIONAL RECORD by Senator SUTHERLAND and Congressman MAYS.

Mrs. W. N. WILLIAMS, *Chairman.*

Unanimously passed May 11, 1916.

Mr. BORAH. Does not the resolution come under the inhibition of one of our rules with reference to reflecting upon the conduct and action of another body?

Mr. SUTHERLAND. There is no rule that prevents citizens from reflecting upon the action of another body.

The VICE PRESIDENT. The Chair would inquire Where is the rule?

Mr. BORAH. If the Chair does not know the rule, I would not undertake to point it out, but I assumed when the Senator from Utah fathered the resolution he was really the author.

The VICE PRESIDENT. There is no rule. There is a statement in Jefferson's Manual to the effect that it is improper conduct on the part of either body to refer in censorious, flippant, or other terms with reference to the conduct of the other body, but there is no rule of the Senate which prevents the introduction of a resolution of this kind.

Mr. BORAH. Very well, then——

The VICE PRESIDENT. The Chair sees no objection to the resolution and no objection to the party assuming the responsibility.

Mr. SUTHERLAND. There is no rule, as I understand it, which prevents a citizen from telling the truth about either House of Congress.

Mr. SMITH of Michigan. We did not quite hear the resolution in this part of the Chamber. Can we have it read again?

Mr. BORAH. I can see some things in the resolution which compensate for the other things.

Mr. CHAMBERLAIN. I desire to present a similar resolution from my constituents in Portland, Oreg., and ask to have it inserted in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Resolution unanimously passed at a mass meeting in the Portland Library, Portland, Oreg., April 30, 1916.

Whereas our Representatives in Congress have been denied the opportunity of voting upon the Federal suffrage amendment: Be it

*Resolved*, That we demand that the Judiciary Committee of the House of Representatives take a vote on the Susan B. Anthony Federal suffrage amendment on its own merits and give it an immediate favorable report; be it further

*Resolved*, That we call upon our Senators CHAMBERLAIN and LANE to work for this measure, so that the administration, which we hold responsible for its passage, will put its party strength behind the amendment, that it may be passed during this session of Congress; be it finally

*Resolved*, That a copy of this resolution be sent to each of the administration leaders, the chairman and members of the House Judiciary Committee, and to the Oregon congressional delegation, with the request that it be read into the CONGRESSIONAL RECORD by Senator CHAMBERLAIN in the Senate and Congressman MCARTHUR in the House.

EMMA WOLD, *Chairman.*

Mr. KENYON presented a memorial of sundry citizens of Gravity, Iowa, remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Ministerial Association of Dubuque, Iowa, praying for the enactment of legislation to grant pensions to civil-service employees, which was referred to the Committee on Civil Service and Retrenchment.

He also presented a memorial of sundry citizens of Jewell, Iowa, remonstrating against certain provisions of the so-called migratory-bird law, which was referred to the Committee on Forest Reservations and the Protection of Game.

He also presented a memorial of sundry citizens of Russell, Iowa, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Iowa, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented petitions of sundry citizens of Iowa, praying for the restoration of peace in Europe, which were referred to the Committee on Foreign Relations.

Mr. HARDING. I present a very brief petition, and I should like to have the contents thereof printed in the RECORD.

There being no objection, the petition was ordered to be printed in the RECORD, as follows:

MILAN, OHIO, *May 9, 1916.*

Hon. W. G. HARDING,
*United States Senate, Washington, D. C.*

MY DEAR SIR: The Erie County Sunday School Association, representing a membership of 7,000, in convention assembled, herewith petition their United States Senators to give all possible aid to temperance legislation now under committee consideration, to the end that such legislation may be reported on favorably and passed by this session of Congress.

The submission of a constitutional amendment to the State legislatures, the bill to prohibit the sale of intoxicating liquor in the District of Columbia, the bill to prohibit the export of liquor to our island possessions and to Africa, prohibition of the liquor traffic in Alaska—these measures should receive the support of our representatives, and we pray that this petition be recorded in the CONGRESSIONAL RECORD.

THE ERIE COUNTY SUNDAY SCHOOL ASSOCIATION,
W. S. LIPPUS, *President.*
W. H. OSWALT, *Secretary.*

Mr. PHELAN presented petitions of sundry citizens of California, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented memorials of sundry citizens of Lodi, Lackeford, Sacramento, and San Francisco, all in the State of California, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

He also presented a petition of the Chamber of Commerce of Los Angeles, Cal., praying for Federal aid in the construction of good roads, which was ordered to lie on the table.

He also presented a petition of the Chamber of Commerce of El Centro, Cal., praying for the enactment of legislation to establish a land office in the Imperial Valley, Cal., which was referred to the Committee on Public Lands.

Mr. SHERMAN presented petitions of sundry citizens of Quincy and Oquawka, in the State of Illinois, praying for the adoption of certain amendments to the migratory-bird law, which were referred to the Committee on Forest Reservations and the Protection of Game.

He also presented memorials of sundry citizens of Chicago, Ill., remonstrating against the enactment of legislation to limit the freedom of the press, which were referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the American Society of Patriots, of Chicago, Ill., praying for an increase in armaments, which was ordered to lie on the table.

He also presented a petition of the City Council of Cairo, Ill., praying for the enactment of legislation providing for the construction of the Lockport and Utica waterway, which was ordered to lie on the table.

Mr. LANE presented petitions of sundry citizens of Oregon, praying for national prohibition, which were referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Roseburg, Oreg., praying for the enactment of legislation to grant pensions to widows and orphans of veterans of the Spanish-American War, which was ordered to lie on the table.

Mr. GRONNA. I present sundry petitions from citizens of my State and from various church organizations in my State, asking for national constitutional prohibition. They are from Williston, Fargo, Oberon, Bowesmont, and Pembina. I ask that one of the petitions may be printed in the RECORD and that all of them may be referred to the Committee on the Judiciary.

There being no objection, the petitions were referred to the Committee on the Judiciary and one was ordered to be printed in the RECORD, as follows:

Resolution suggested for adoption by churches, young people's societies, clubs, and other organizations, and by public meetings generally. Woman's Christian Temperance Union speakers are urgently requested to secure from all meetings which they address the adoption of this resolution.

*Resolved*, That we are in hearty favor of national constitutional prohibition and will do all within our power to secure the adoption of an amendment to the Constitution forever prohibiting the sale, manufacture for sale, transportation for sale, importation for sale, and exportation for sale of intoxicating liquors for beverage purposes in the United States, in accordance with the joint resolution introduced in the United States Senate by Senators MORRIS SHEPPARD and JACOB H. GALLINGER, and in the House by Representatives EDWIN Y. WEBB and ADDISON SMITH.

Adopted by Fargo Woman's Christian Temperance Union, representing 250 people, February 28, 1916.

Mrs. D. FISHER.

County, Cass; city, Fargo; State, North Dakota.

Mr. KERN presented a memorial of the Central Labor Union of Indianapolis, Ind., remonstrating against the execution of the leaders of the so-called Irish rebellion, which was referred to the Committee on Foreign Relations.

Mr. JONES presented a memorial of sundry citizens of Snohomish, Wash., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. WORKS presented a memorial of sundry citizens of Long Beach, Cal., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. WADSWORTH presented memorials of sundry citizens of Jamestown, N. Y., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

## REPORTS OF COMMITTEES.

Mr. SWANSON, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 5724) authorizing the construction of a public building in the city of Durango, Colo., reported it with amendment and submitted a report (No. 444) thereon.

Mr. SWANSON (for Mr. TILLMAN), from the Committee on Naval Affairs, to which was referred the bill (H. R. 12835) to authorize and empower officers and enlisted men of the Navy and Marine Corps to serve under the Government of the Republic of Haiti, and for other purposes, reported it without amendment and submitted a report (No. 445) thereon.

Mr. SMITH of Michigan, from the Committee on Naval Affairs, to which was referred the bill (S. 5675) for the relief of John Henry Gibbons, captain on the retired list of the United States Navy, reported it without amendment and submitted a report (No. 446) thereon.

Mr. MARTINE of New Jersey, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 5398) to increase the limit of cost of post-office site and building at Millville, N. J., reported it without amendment.

Mr. SMITH of Georgia. I desire to report, from the Committee on Rules, a substitute resolution for Senate resolution 131 and Senate resolution 149, and I submit a report (No. 447) thereon. I do not care to have the two resolutions read for which this substitute resolution is reported, but I ask that the substitute may be read. It is very short.

The VICE PRESIDENT. The substitute will be read.

The Secretary read the proposed substitute (S. Res. 195), as follows:

[Reported favorably by the Committee on Rules, as substitute for S. Res. 131 and S. Res. 149.]

*Resolved*, That the standing rules of the Senate be, and they hereby are, amended as follows:

At the close of Rule XXII, add:

"*Provided, however*, That if 16 Senators present to the Senate at any time a signed motion to bring to a close the debate upon any pending measure, the Presiding Officer shall at once state the motion to the Senate and at the close of the morning hour on the following calendar day lay the motion before the Senate and direct that the Secretary call the roll, and, upon the ascertainment that a quorum is present, the Chair shall, without debate, submit to the Senate by a yea-and-nay vote the question:

"'Is it the sense of the Senate that the debate shall be brought to a close?'

"And if that question shall be decided in the affirmative by a two-thirds vote of those voting, then said measure shall be in order to the exclusion of all other business except a motion to recess or adjourn.

"Thereafter no Senator shall be entitled to speak more than one hour on the bill, the amendments thereto, and motions affecting the same, and it shall be the duty of the Chair to keep the time of each Senator who speaks. No dilatory motions shall be in order, and all points of order and appeals from the decision of the Chair shall be decided without debate."

Mr. SMITH of Georgia. I think the report should go to the calendar, as do other reports from committees, in order that Senators who are not on the Committee on Rules may have an opportunity to examine it.

The VICE PRESIDENT. The report will be placed on the calendar.

## BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SHAFROTH:

A bill (S. 6013) to confirm the entry of John Dowd; to the Committee on Public Lands.

By Mr. LANE:

A bill (S. 6014) authorizing the Secretary of the Interior to withdraw from the Treasury a certain sum of the permanent fund of the Chippewas of Minnesota, now on deposit therein, to their credit; to the Committee on Indian Affairs.

By Mr. CLAPP:

A bill (S. 6015) for the tuition, board, books, paper, and traveling expenses to and from their respective homes of six Chippewa boys to either academies or colleges for the school year ending June, 1916; and

A bill (S. 6016) for the relief of the Pillager Bands of Chippewa Indians of Minnesota, and for other purposes; to the Committee on Indian Affairs.

By Mr. DILLINGHAM:
A bill (S. 6017) granting an increase of pension to Angus C. Burns; to the Committee on Pensions.
By Mr. JONES:
A bill (S. 6018) granting an increase of pension to Insley Cook (with accompanying papers); to the Committee on Pensions.
By Mr. SHERMAN:
A bill (S. 6019) granting a pension to Mary A. Gillogly; and
A bill (S. 6020) granting an increase of pension to Julius C. Wright; to the Committee on Pensions.
By Mr. KERN:
A bill (S. 6021) granting a pension to Eli T. Jefferson Jordan (with accompanying papers); and
A bill (S. 6022) granting a pension to William H. Ingle (with accompanying papers); to the Committee on Pensions.
By Mr. POMERENE (by request):
A bill (S. 6025) to grant the right of appeal to employees in the Federal classified civil service; to the Committee on Civil Service and Retrenchment.
By Mr. CHILTON:
A bill (S. 6026) granting an honorable discharge to William C. Copeland (with accompanying papers); to the Committee on Military Affairs.
A bill (S. 6027) granting a pension to Wade H. Spencer (with accompanying papers);
A bill (S. 6028) granting a pension to Violetta Dillon (with accompanying papers);
A bill (S. 6029) granting an increase of pension to Samuel White (with accompanying papers);
A bill (S. 6030) granting an increase of pension to Edgar C. Martin (with accompanying papers);
A bill (S. 6031) granting an increase of pension to Alice E. Ward (with accompanying papers);
A bill (S. 6032) granting an increase of pension to William I. Gore (with accompanying papers);
A bill (S. 6033) granting a pension to William S. Wilmoth (with accompanying papers);
A bill (S. 6034) granting an increase of pension to John M. Jones (with accompanying papers);
A bill (S. 6035) granting a pension to Nancy E. Stone (with accompanying papers);
A bill (S. 6036) granting an increase of pension to Millard Terry (with accompanying papers);
A bill (S. 6037) granting an increase of pension to Simon C. Staton, jr. (with accompanying papers);
A bill (S. 6038) granting a pension to Charles L. Hunter (with accompanying papers); and
A bill (S. 6039) granting a pension to Rosabella Pierce (with accompanying papers); to the Committee on Pensions.
By Mr. OVERMAN:
A bill (S. 6040) providing for the adjudication of certain claims by the Court of Claims; to the Committee on Claims.
By Mr. VARDAMAN:
A bill (S. 6041) granting the consent of Congress to Jackson County, Miss., to construct a bridge across West Pascagoula River, at or near Pascagoula, Miss.; to the Committee on Commerce.

MONUMENT TO COL. ALEXANDER WILLIAM DONIPHAN.

Mr. STONE. I introduce a bill which I ask may lie on the table for the present.
The VICE PRESIDENT. The bill which has been introduced by the Senator from Missouri will be read by title.
The bill (S. 6023) for the erection of a monument to the memory of Col. Alexander William Doniphan was read twice by its title.
Mr. STONE. Before the bill is referred, I desire to submit to the Senate some very brief remarks, as the Senator from New Mexico [Mr. CATRON] also desires to do. I therefore ask that the bill may lie on the table for the present because of the pressure of important matters in the Senate at this morning's session.
The VICE PRESIDENT. That action will be taken.

MINERAL RESOURCES.

Mr. SIMMONS. I introduce a bill which I ask may be appropriately referred.
The bill (S. 6024) to authorize the Secretary of Agriculture to permit the prospecting, development, and utilization of the mineral resources of certain national forests was read twice by its title.
The VICE PRESIDENT. To what committee does the Senator from North Carolina desire to have the bill which he has just introduced referred?
Mr. SIMMONS. I desire that it shall be referred to the Committee on Agriculture and Forestry.
Mr. SMOOT. Mr. President, I should like to have the title of the bill again read.
The VICE PRESIDENT. The title will again be stated.
The Secretary again read the bill by title.
Mr. SMOOT. I think the bill should be referred to the Committee on Mines and Mining.
Mr. SIMMONS. Mr. President, I think the bill might with propriety be referred to either one of the two committees. It authorizes certain work to be done by the Secretary of Agriculture, and I should therefore prefer to have the bill referred to the Committee on Agriculture and Forestry.
Mr. SMOOT. The Committee on Public Lands has always until lately had jurisdiction of the mining laws of the United States. It seems to me that the bill should be referred——
Mr. SIMMONS. This is a mere prospecting proposition, authorizing the prospecting, development, and utilization of the mineral resources in certain national forests. I do not, however, desire to have any controversy about the matter, and if it is insisted that the bill shall be referred to a committee other than the Committee on Agriculture and Forestry I shall not object.
Mr. SMOOT. I think it ought to go to the Committee on Mines and Mining.
Mr. SIMMONS. The bill really applies to only one forest reserve.
The VICE PRESIDENT. Unless a motion is made to refer the bill otherwise, the Chair will send it to whatever committee the Senator from North Carolina suggests.
Mr. SIMMONS. I shall not make any controversy with the Senator from Utah [Mr. SMOOT] about the reference of the bill. The Senator from Georgia [Mr. SMITH] tells me that the Committee on Agriculture and Forestry have the subject matter of the park and the reservation to which this bill is intended to apply before it for consideration.
Mr. SMITH of Georgia. I would be glad to hear the proposition of the bill again stated.
Mr. SMOOT. It is a proposition to change the mining laws of the United States in regard to forest reserves.
Mr. SIMMONS. I repeat, I shall make no controversy about the bill being referred to the Committee on Mines and Mining.
Mr. SMITH of Georgia. We have the Appalachian Reservation now under consideration in the Committee on Agriculture and Forestry, and that was the only reason I desired the bill referred to that committee.
The VICE PRESIDENT. The bill will be referred to the Committee on Mines and Mining.

PRIVILEGES OF THE FLOOR.

Mr. ASHURST. Mr. President, the Senator from Kansas [Mr. CURTIS] on May 8 introduced a resolution which went to the Committee on Rules. I do not believe that that committee has made any report. I should like to have a copy of the resolution printed in the RECORD, and in the same line have printed in the RECORD also a statement which I have caused to be prepared showing to whom and for what purposes and under what circumstances the privileges of the floor of the Senate have been extended to various citizens of the United States in private life from the foundation of the Government.
I wish to state that I am very much in favor of the resolution of the Senator from Kansas, and I hope the Committee on Rules may report it out to-day, so that it may be adopted by the Senate.
Mr. MYERS. Mr. President, I wish to rejoin to what the Senator from Arizona says, that I am very earnestly in favor of the resolution, and I hope that it will be reported out between now and 1 o'clock, that the Senate may have an opportunity to act on it by 1 o'clock.
There being no objection, the matter indicated by Mr. ASHURST was ordered to be printed in the RECORD, as follows:

Whereas there is now before the Senate of the United States a resolution, No. 1, favorably reported from the Senate Committee on Woman Suffrage, proposing to amend the Constitution of the United States by removing the qualification of sex as a bar to the exercise of the right of franchise; and
Whereas a large number of women voters have delegated to certain envoys the duty of conveying to this Congress an expression of the desire of said women voters that this Congress shall submit to the States for ratification the pending constitutional amendment generally known as the Susan B. Anthony amendment; and
Whereas the question of woman suffrage is one of the foremost issues before the people of the United States: Therefore be it

*Resolved*, That on the calendar day of May 16, 1916, this body shall stand adjourned at 5 o'clock and 15 minutes postmeridian, and immediately thereafter the envoys from the said women's convention shall be permitted to enter the Senate Chamber and present upon the floor the message which they are to bring from the western women voters.

[From: Furber, George P. Precedents relating to the privileges of the Senate. Mis. Doc. 68, 52d Cong., 2d sess.]

CONTESTANTS FOR SEATS.

WILLIAM BLOUNT AND WILLIAM COCKE.

[2 J. of S., 269, May 23, 1796.]

A letter, signed William Blount and William Cocke, was read, stating that they have been duly and legally elected Senators to represent the State of Tennessee in the Senate.

On motion,

"That Mr. Blount and Mr. Cocke, who claim to be Senators of the United States, be received as spectators, and that chairs be provided for that purpose until the final decision of the Senate shall be given on the bill proposing to admit the Southwestern Territory into the Union."

A motion was made to refer the consideration thereof to a committee, and it passed in the negative.

On motion to agree to the original motion, it passed in the affirmative—yeas 12, nays 11, as follows: [The names are omitted.]

DAVID L. YULEE.

[1st sess. 32d Cong., J. of S., 649, Aug. 27, 1852.]

*Resolved*, That the Hon. D. L. Yulee, who contests the seat of the Hon. L. R. Mallory, have leave to be heard in person at the bar of the Senate for two hours

[Mr. Yulee addressed the Senate on the same day.]

[Congressional Globe, 1st sess. 32d Cong., 2390, and Appendix, 1174.]

HENRY S. LANE AND WILLIAM M. M'CARTY.

[2d sess. 35th Cong., J. of S., 178, Jan. 24, 1859.]

Mr. Seward submitted the following motion for consideration:

"*Resolved*, That the Hon. Henry S. Lane and the Hon. William M. McCarty, who claim to have been elected Senators from Indiana, be entitled to the privileges of admission on the floor of the Senate until their claims shall have been decided."

[Ib., 188, Jan. 26, 1859.]

On motion by Mr. Seward, the Senate proceeded to consider the resolution, submitted by him the 24th instant, to admit the Hon. Henry S. Lane and the Hon. W. M. McCarty, claiming to have been elected Senators by the Legislature of Indiana, on the floor of the Senate; and

After debate,

On motion by Mr. Iverson, that the resolution lie on the table, it was determined in the affirmative—yeas 31, nays 22. [The names are omitted.]

So it was

*Ordered*, That the resolution lie on the table.

[Ib., 254, Feb. 3, 1859.]

Mr. Seward submitted the following resolution for consideration:

"*Resolved*, That Henry S. Lane and William M. McCarty have leave to occupy seats on the floor of the Senate pending the discussion of the report of the Committee on the Judiciary on the memorial of the Legislature of Indiana declaring them her duly elected Senators, and that they have leave to speak to the merits of their right to seats and the report of the committee."

[Ib., 315, Feb. 14, 1859.]

On motion by Mr. Collamer, the Senate proceeded to consider the report of the Committee on the Judiciary on the memorial of the State of Indiana in relation to the Senators from Indiana, with the reported resolution, that the Committee on the Judiciary be discharged from the further consideration of the memorial of the Legislature of Indiana.

An amendment having been proposed by Mr. Seward, to amend the resolution to discharge the Committee on the Judiciary by striking out all after "*Resolved*," and inserting "That Henry S. Lane and William M. McCarty have leave to occupy seats on the floor of the Senate pending the discussion of the report of the Committee on the Judiciary on the memorial of the Legislature of Indiana declaring them her duly elected Senators, and that they have leave to speak to the merits of their rights to seats, and on the report of the committee."

[On motion by Mr. Pugh, Mr. Seward's motion was amended by striking out all after the word "that," and inserting a declaration that the former decision of the Senate declaring Messrs. Fitch and Bright the duly elected Senators was final and conclusive.]

[Congressional Globe, 1014, 1019. Debate in Appendix (Congressional Globe, 128–148, Appendix).]

FREDERIC P. STANTON.

[2d sess. 37th Cong., J. of S., 106, Jan. 13, 1862.]

On motion by Mr. Collamer, that Frederic P. Stanton, who contests the seat of the Hon. James H. Lane, have leave to be heard in person at the bar of the Senate,

It was determined in the affirmative, {Yeas—32 / Nays—4}

So it was

*Ordered*, That Frederic P. Stanton, who contests the seat of Hon. James H. Lane, have leave to be heard in person at the bar of the Senate.

On motion by Mr. Fessenden, that the Senate reconsider the vote agreeing to the motion of Mr. Collamer,

It was determined in the negative.

[Congressional Globe, 2d sess. 37th Cong., 291.]

SENATORS ELECT FROM ARKANSAS.

[1st sess. 39th Cong., J. of S., 186, Feb. 26, 1866.]

A motion was made by Mr. Lane of Kansas to admit the Senators elect from the State of Arkansas to seats on the floor of the Senate.

On motion by Mr. Wade that the motion of Mr. Lane of Kansas lie on the table, it was determined in the affirmative—yeas 27, nays 18. [The names are omitted.]

So it was

*Ordered*, That the motion lie on the table.

[The debate is found in Congressional Globe, 1st sess. 39th Cong., 1025–1027.]

CLAIMANTS FROM COLORADO.

[1st sess. 39th Cong., J. of S., 143, Feb. 8, 1866.]

On motion by Mr. Lane of Kansas,

*Ordered*, That the Senators elect from the State of Colorado be admitted to the floor of the Senate.

[Congressional Globe, 1st sess. 39th Cong., 734. There was no discussion.]

WILLIAM H. CLAGETT.

[1st sess. 52d Cong., J. of S., 122, Feb. 24, 1892.]

Mr. Stewart submitted the following resolution for consideration, which was ordered to be printed:

*Resolved*, That William H. Clagett, the contestant for the seat in the United States Senate now occupied by Hon. Fred. T. Dubois, have leave to occupy a seat on the floor of the Senate pending the discussion of the report of the Committee on Privileges and Elections, and that he have leave to speak to the merits of his right to have the seat, and on the report of the committee.

[Ib., 125. Feb. 25, 1892.]

The President pro tempore laid before the Senate the resolution yesterday submitted by Mr. Stewart, granting William H. Clagett, contestant for a seat in the Senate from the State of Idaho, leave to speak on his right to the seat; and having been amended, on motion of Mr. Mitchell, by inserting after the word "speak" the words "not exceeding two hours."

On the question to agree to the resolution as amended as follows:

*Resolved*, That William H. Clagett, the contestant for the seat in the Senate now occupied by Hon. Fred. T. Dubois, have leave to occupy a seat on the floor of the Senate pending the discussion of the report of the Committee on Privileges and Elections, and that he have leave to speak, not exceeding two hours, to the merits of his rights to the seat, and on the report of the committee.

It was determined in the affirmative—yeas 48, nays 1. [The names are omitted.]

So the resolution was agreed to.

[For the debate on this resolution, see CONGRESSIONAL RECORD, 1st sess. 52d Cong., 1430–1432.]

PETITIONERS.

[2 J. of S., 481, Apr. 27, 1798.]

On motion by Mr. Marshall,

*Resolved*, That no motion shall be deemed in order to admit any person or persons whatever within the doors of the Senate Chamber to present any petition, memorial, or address, or to hear any such read.

[There was no discussion.]

[2d sess. 45th Cong., J. of S., 76, Jan. 10, 1878.]

Mr. Sargent submitted the following resolution for consideration:

Whereas thousands of the women of the United States have petitioned Congress for an amendment to the Constitution allowing women the right of suffrage; and

Whereas many of the representative women of the country favoring such amendment are present in the city and have requested to be heard before the Senate in the advocacy of said amendment:

*Resolved*, That at a session of the Senate to be held on ——— said representative women, or such of them as may be designated for that purpose, may be heard before the Senate, but for two hours only.

The Senate proceeded, by unanimous consent, to consider the said resolution; and

On the question, Will the Senate agree thereto?

It was determined in the negative, {Yeas—13 / Nays—31}

On motion by Mr. Sargent,

The yeas and nays being desired by one-fifth of the Senators present.

So the resolution was not agreed to.

[CONGRESSIONAL RECORD, 2d sess. 45th Cong., 255–267.]

[2d sess. 45th Cong., J. of S., 83, Jan. 14, 1878.]

Mr. Edmunds submitted the following resolution; it was referred to the Committee on Rules and ordered to be printed:

*Resolved*, That the following be one of the standing rules of the Senate:

No motion shall be deemed in order to admit any person whatsoever within the doors of the Senate Chamber to present any petition, memorial, or address, or to hear any such read, or to address the Senate, except as parties or counsel in cases of contempt or impeachment.

DISTINGUISHED VISITORS AND OTHERS.

GEN. LAFAYETTE.

[2d sess. 18th Cong., J. of S., 7, Dec. 7, 1824.]

A message from the House of Representatives, by Mr. Clarke, their clerk:

Mr. PRESIDENT: The House of Representatives have passed a resolution for the appointment of chaplains; and a resolution for a joint committee to consider and report what respectful mode it may be proper for Congress to adopt to receive Gen. Lafayette, and have appointed a committee on their part; in which resolutions they request the concurrence of the Senate, and he withdrew.

On motion by Mr. Barbour,

The Senate proceeded to consider the last-named resolution; and

*Resolved*, That the Senate concur therein.

[2d sess. 18th Cong., J. of S., 28, Dec. 8, 1824.]

The committee on the part of the Senate recommend that the President of the Senate invite Gen. Lafayette to take a seat, such as he shall designate, in the Senate Chamber; that the committee deliver the invitation to the general, and introduce him into the Senate, and that the Members receive the general standing.

The said report was read and considered.

Whereupon,

*Resolved unanimously*, That the Senate do agree therein.

[Ib., 29, Dec. 9, 1824.]

At 1 o'clock Gen. Lafayette was conducted into the Chamber of the Senate by the committee appointed for the purpose;

Whereupon,

Mr. Barbour, as the chairman of the said committee, introduced the general to the Senate, when the Senators arose from their seats and remained standing until the general was seated on the right of the chair of the President, to which he was invited by the President.

On motion by Mr. Barbour,

That the Senate do now adjourn, in order that the Members may present their respects to Gen. Lafayette individually, it was unanimously determined in the affirmative;

Whereupon,

The President adjourned the Senate to Monday next.

LIEUT. WILKES.

[2d sess. 27th Cong., J. of S., 447, July 5, 1842.]

Mr. Tappan submitted the following resolution:

*Resolved*, That the forty-seventh rule of the Senate be amended by adding to the persons who may be admitted on the floor of the Senate, Lieut. Wilkes and the officers who served with him during the exploring expedition.

The Senate proceeded to consider the resolution by unanimous consent, and

On the question to agree thereto,

It was determined in the negative.

[Congressional Globe, 2d sess. 27th Cong., 718.]

EX-PRESIDENT OF TEXAS.

[2d sess. 28th Cong., J. of S., 178, Feb. 17, 1842.]

By unanimous consent it was

*Resolved*, That the ex-President of the Republic of Texas be admitted on the floor of the Senate.

REV. THEOBALD MATTHEW.

[1st sess. 31st Cong., J. of S., 9, Dec. 19, 1849.]

Mr. Walker submitted the following resolution for consideration:

*Resolved*, To admit Rev. Theobald Matthew within the bar of the Senate during his sojourn in Washington.

It was agreed to.

[Congressional Globe, 1st sess. 31st Cong., 51–59.]

[The resolution was objected to by Senators Calhoun, Dawson, and Foote as establishing a bad precedent. Mr. Clay argued in its favor: "I understand that according to the usage of the Senate, any Member may introduce into the lobby any distinguished person whom he thinks proper to introduce. I had understood that to be the rule; perhaps I am mistaken; but be that as it may, I think, sir, that that resolution is an homage to humanity, to philanthropy, to virtue; that it is a merited tribute to a man who has achieved a great social revolution—a revolution in which there has been no bloodshed, no desolation inflicted, no tears of widows and orphans extracted, and one of the greatest which has been achieved by any of the benefactors of mankind. Sir, it is a compliment due from the Senate, small as it may be. * * *]

LOUIS KOSSUTH.

[1st sess. 32d Cong., J. of S., 88, Dec. 29, 1852.]

The committee reported that in relation to Louis Kossuth the same proceeding be taken as in the case of Gen. Lafayette, to wit: "That the chairman of the committee introduce him with these words: 'We present Louis Kossuth to the Senate of the United States,' upon which the Senators are recommended to rise and the President will invite him to be seated."

And the report was agreed to.

[Congressional Globe, 1st sess. 32d Cong., 157.]

[Ib., 95, Jan. 5, 1852.]

At 1 o'clock Louis Kossuth was conducted into the Chamber of the Senate by the committee appointed for that purpose; and

Mr. Shields, as chairman of the committee, introduced him to the Senate.

The Senate having risen, the President pro tempore addressed him as follows:

"Louis Kossuth, I welcome you to the Senate of the United States. The committee will conduct you to the seat which I have caused to be prepared for you."

The Senators having resumed their seats,

On motion by Mr. Mangum,

That the Senate adjourn in order that the Members may present their respects to Louis Kossuth individually.

It was determined in the affirmative; and

The Senate adjourned

[Congressional Globe, 1st sess. 32d Cong., 199.]

OFFICERS AND SOLDIERS OF THE WAR OF 1812.

[2d sess. 33d Cong., J. of S., 99, Jan. 9, 1855.]

*Resolved*, That the officers and soldiers of the War of 1812, now holding a convention in this city, be invited to occupy seats upon the floor of the Senate, without the bar, during the sitting of the convention.

*Resolved*, That the Secretary of the Senate communicate a copy of this resolution to the president of the convention for the information of the members.

Considered by unanimous consent and agreed to.

[Congressional Globe, 2d sess. 33d Cong., 208.]

EX-PRESIDENT OF BOLIVIA.

[1st sess. 36th Cong., J. of S., 127, Feb. 6, 1860.]

On motion by Mr. Davis, and by unanimous consent,

*Ordered*, That the ex-President of the Republic of Bolivia be admitted on the floor of the Senate.

[Congressional Globe, 1st sess. 36th Cong., 669.]

VICE-ADMIRAL FARRAGUT.

[2d sess. 38th Cong., J. of S., 67, Jan. 13, 1865.]

Mr. Grimes announced the presence in the Senate Chamber of Vice Admiral Farragut, of the United States Navy, distinguished for his many services, and the first officer in the naval service upon whom the title has been conferred; and moved that the Senate take a recess of 10 minutes to enable the Members of the Senate to exchange courtesies with him, and

The Senate, by unanimous consent, took a recess of 10 minutes.

LEGISLATURE OF OHIO.

[2d sess. 41st Cong., J. of S., 523, Apr. 20, 1870.]

On motion by Mr. Davis,

*Ordered*, That the privilege of the floor of the Senate Chamber for this day be extended to the officers and members of the Legislature of the State of Ohio, now on a visit to the National Capital.

[Congressional Globe, 2d sess. 41st Cong., 2830.]

KING OF THE HAWAIIAN ISLANDS.

[2d sess. 43d Cong., J. of S., 42, Dec. 14, 1874.]

Mr. Cameron submitted the following resolution, which was considered by unanimous consent and agreed to:

"*Resolved by the Senate (the House of Representatives concurring)*, That a joint committee of two from the Senate and three from the House of Representatives be appointed by the Presiding Officers of the respective Houses to take measures for the proper notice of the presence at the Capital of His Majesty, Kalakaua, King of the Hawaiian Islands;

And

The Vice President appointed Mr. Cameron and Mr. McCreery members of the committee on the part of the Senate.

[CONGRESSIONAL RECORD, 2d sess. 43d Cong., 6–8.]

[Ib., 43.]

A message from the House of Representatives, by Mr. McPherson, its Clerk.

* * * * * * *

The House of Representatives has concurred in the resolution of the Senate to appoint a joint committee to take measures for the proper notice of the presence at the Capital of His Majesty, Kalakaua, King of the Hawaiian Islands, and has appointed Mr. Orth, Mr. E. Rockwood Hoar, and Mr. Cox members of the committee on its part.

[CONGRESSIONAL RECORD, ib., 69.]

[Ib., 54, Dec. 17, 1874.]

Mr. Cameron, from the joint committee appointed to consider what notice should be taken of the presence at the Capital of the King of the Hawaiian Islands, reported that they had called upon His Majesty and invited him to visit the Capitol to-morrow; that he would be present; and that they had made arrangements for his reception by the Senate and House, in the Hall of the House of Representatives, at quarter past 12 o'clock on that day.

[Ib., 55, Dec. 18, 1874.]

On motion by Mr. Cameron,

The Senate took a recess until 1 o'clock p. m.

[CONGRESSIONAL RECORD, ib., 117.]

GEORGE BANCROFT.

[3d sess. 45th Cong., J. of S., 95, Jan. 8, 1879.]

Mr. Thurman submitted the following resolution, which was considered, by unanimous consent, and agreed to:

*Resolved*, That the Committee on Rules are hereby instructed to inquire whether the rules shall not be so amended as to admit to the privileges of the floor the ex-cabinet minister whose appointment was earliest in the date of those now living.

[CONGRESSIONAL RECORD, 3d sess. 45th Cong., 370. There was no discussion.]

[Ib., 123, Jan. 16, 1879.]

Mr. Blaine, from the Committee on Rules, to whom was referred the resolution submitted by Mr. Thurman, January 8, 1879, to amend the rules so as to admit to the privileges of the floor the ex-cabinet minister whose appointment was earliest in date of those now living, reported the following resolution, which was considered, by unanimous consent, and agreed to:

*Resolved*, That the Hon. George Bancroft be admitted to the privileges of the floor of the Senate.

[CONGRESSIONAL RECORD, 3d sess. 45th Cong., 482. There was no discussion.]

WINFIELD S. HANCOCK.

[3d sess. 46th Cong., J. of S., 412, Mar. 5, 1881.]

Mr. Hoar submitted the following resolution, which was considered, by unanimous consent, and agreed to:

*Resolved*, That Winfield Scott Hancock be entitled to the privileges of the floor of the Senate during his stay in Washington.

EMINENT CITIZENS.

[1st sess. 48th Cong., J. of S., 297, Feb. 12, 1884.]

[A resolution was referred to the Committee on Rules.]

That the President of the Senate shall have authority to admit to the floor of the Senate, on request of Senators, eminent citizens from the several States and Territories when it can be done without inconvenience to the Senate in the transaction of business. (No discussion.)

[Mar. 25, 1884, the committee were discharged from further consideration of the resolution (Ib., 462).]

[Indefinitely postponed. CONGRESSIONAL RECORD, 1st sess. 48th Cong., 2236.]

MOUNT VERNON.

Mr. PHELAN. I submit a resolution, which I ask to have read and referred to the appropriate committee.

The resolution (S. Res. 194) was read, as follows:

Whereas although privately controlled the home of George Washington, "the Father of his Country," at Mount Vernon, is the most precious and revered of national monuments and has been preserved and maintained by the Mount Vernon Ladies' Association of the Union, which is entitled to the highest public commendation for its patriotic purpose and labors, and is a sacred shrine and a source of patriotic inspiration, and should be accessible to the largest number of our people, now barred by existing regulations: Therefore be it

*Resolved*, That the board of regents of the Mount Vernon Ladies' Association of the Union be respectfully requested to consider the propriety of opening the home of Washington to visitors on Sundays.

The VICE PRESIDENT. To what committee shall the resolution go?

Mr. PHELAN. I suggest the Committee on the Library. I know of no more appropriate committee.

The VICE PRESIDENT. The resolution will be referred to the Committee on the Library.

PROCEEDINGS OF EXECUTIVE SESSION.

Mr. LA FOLLETTE. I submit the following resolution, which I ask to have read.

The resolution (S. Res. 193) was read, as follows:

*Resolved*, That it is the judgment of the Senate that all sessions for the consideration of executive business shall hereafter be open to the public, except when treaties are considered, or when the Senate, by a vote of two-thirds of the Members present and voting therefor, shall order otherwise. And the proceedings of executive sessions open to the public shall be recorded as are the proceedings of legislative sessions.

The Committee on Rules is directed to prepare such amendments to existing rules and to prepare such additional rules as may be necessary to give effect to this resolution and present the same to the Senate for action thereon.

Mr. LA FOLLETTE. Mr. President, I request that the resolution lie on the table for the present, and at such time as the business of the Senate will make it possible I shall address myself to it.

The VICE PRESIDENT. The resolution will lie on the table, subject to the call of the Senator from Wisconsin.

REGULATION OF IMMIGRATION.

Mr. SMITH of South Carolina. I ask unanimous consent for a reprint of the immigration bill, which has been reported and is now on the calendar, so as to include certain subsequent amendments which have been agreed upon by the Committee on Immigration. The committee desire that the amendments which have been agreed upon since the bill was reported may be now printed for the convenience of the Senate.

The VICE PRESIDENT. May the Chair suggest to the Senator from South Carolina that the proper procedure would seem to be to withdraw the reported bill, to insert the amendments, and to then rereport the bill?

Mr. SMITH of South Carolina. I understand that that can not be done. Therefore I will withdraw the request and have the amendments printed for the convenience of Senators as separate amendments.

ADDRESS OF HON. R. L. METCALFE.

Mr. HITCHCOCK. Mr. President, I ask unanimous consent to have printed in the RECORD a short article by Hon. R. L. Metcalfe, former governor of the Panama Canal Zone, entitled "The kingdom, the power, and the glory," being a statement in favor of active effort on the part of the United States to procure peace.

The VICE PRESIDENT. It will be so ordered in the absence of objection. The Chair hears none.

The article referred to is as follows:

"THE KINGDOM, THE POWER, AND THE GLORY."

[R. L. Metcalfe in Omaha Nebraskan.]

Suppose the President of the United States were to throw away all thought of "propriety" and "international custom" and official "dignity" and issue an appeal to all the warring nations of Europe, an appeal made in humanity's name, to bring this terrible war to an end?

Suppose this appeal were made not in the privacy of diplomatic circles but made within the hearing of all the world? Wouldn't it be great?

If written as only Woodrow Wilson could write it, wouldn't it go ringing 'round the wide, wide world? Wouldn't it go ringing through the chambers of human hearts in every land beneath the sun? Wouldn't it be sweet music in the ears of the good God Himself?

Suppose, then, that every Englishman and every German and Austrian and Frenchman, and every plain ordinary American, within the borders of our own land should give the prayer he has given to partisan cause to the support of our President's appeal for universal peace? Wouldn't it be great?

Suppose all the energy and ingenuity that have been put forth by partisans in our own land in helping European favorites through money and speech and writings and conspiracies should be exerted in support of our President's appeal made in humanity's name? Wouldn't it be great?

Suppose that our prayers, our hopes, our faith, our tears, should touch the hearts of the rank and file in England, in Germany, and in other of the warring countries until they, too, took up the cry for peace? Wouldn't it be great?

Suppose all the world, outside of the kings and their marching armies, should follow the leadership of an American President brave enough to do the simplest of things in the hope of accomplishing the biggest of results? Wouldn't it be great?

Of course it would be a simple thing to do. But let us not forget that "simple things" were responsible for this war. And let us remember that all the big things of life have been accomplished through simple things.

The biggest conquests that have ever been won in civilization came as the result of original efforts so simple that they were sneered at in their pioneer days.

The biggest books that have ever been written were rejected at one time by those who could not recognize the bigness of simplicity.

The biggest fortunes that have ever been amassed have been due to the recognition of the value of simple things by one man who could see treasures at his very feet while his neighbor was seeking wealth in the clouds.

The biggest thoughts that have ever been held in the minds of men are the thoughts that deal with the so-called "simple" things of life.

The biggest forces in the American battle against human slavery were put forth by one man who was dragged through the streets of Boston with a rope around his neck, and by another who was hunted and slain and persecuted even as the poor creatures whom he sought to serve were hunted and slain. But Garrison fulfilled his promise "I will be heard," and the soul of John Brown goes marching on through the ages.

The biggest Person that ever trod the earth was crucified for the simple truth He taught, and to-day all civilization gives answer to His judge's question, "What is truth?" by pointing to the things He taught, and for the teaching of which He died, and "writing upon the eternal dome, glittering with stars," the words, "This is the truth!" So it has been written in the simplest of verse and the sublimest of truth:

I know a world that is rent and torn,
Of hearts that faint and tire;
But I know of a Name, a Name, a Name,
That can set that world on fire.

Wouldn't it be worth the effort for the President of our great country to break all restraint and make this trial? What if all the world seems on fire! What if millions are in arms bent on war! What if the cars of kings are stopped to human cries and their hearts untouched by human suffering! "One on God's side is a majority," and no one may surely say what would be the result of a simple, heartfelt, God-directed appeal coming from the White House of America. No one may surely predict a failure to a call made upon all civilization to go marching to "the still, sad music of humanity."

Is it not worth the effort? Even if it did not bring immediate results, it would not be lost. It might bring peace. Wouldn't it be great?

Even this editorial, printed as it is in a weekly newspaper, can not be lost. It is conceived in truth and written in the deepest solemnity. Humble in origin, inconspicuous, so far as concerns the great world—it is all that. But it speaks what is in the hearts of countless millions of men and women and children. More than that, it must speak what is in the very heart of God Himself. And so I send it on its way, knowing it can not be lost, feeling that for its very truth it will touch the hearts of those who read, and giving it—in the deepest reverence—the blessing of the world-wide prayer: "Our Father which art in heaven, hallowed be Thy name. Thy kingdom come, Thy will be done on earth as it is in heaven. Give us this day our daily bread, and forgive us our debts as we forgive our debtors. Lead us not into temptation, but deliver us from evil. For Thine is the kingdom, the power, and the glory forever. Amen."

WOMAN SUFFRAGE.

Mr. GALLINGER. Mr. President, I have been requested to announce that the Members of the Senate are cordially invited to be present in the Rotunda of the Capitol to-day at 5 o'clock to meet the envoys from the suffrage States elected by the woman voters' conference in Salt Lake City on May 12, who will present resolutions from the woman voters to Congress at the hour I have named.

AMENDMENT OF THE RULES.

Mr. LA FOLLETTE. I desire to give notice of a proposed amendment to paragraph 2 of Rule XXXVI of the standing rules of the Senate by adding at the end of that paragraph the following:

Consideration of and action upon nominations which must be confirmed by the Senate shall be in open executive session unless the Senate by a vote of two-thirds of the Members present and voting therefor shall order otherwise.

The purpose of the suggested amendment is to have the proceedings of the Senate while acting upon nominations open to the public and recorded as are the proceedings of legislative sessions.

NATIONAL DEFENSE (S. DOC. NO. 442).

Mr. CHAMBERLAIN. I desire to submit the report of the conferees of the Senate and the House upon the Army reorganization bill. I wish to state in this connection that some time to-day I shall endeavor to have the report taken up for consideration.

The conference report submitted by Mr. CHAMBERLAIN was ordered to be printed in the RECORD, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 12766) to increase the efficiency of the Military Establishment of the United States, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment to the title of the bill, and agree to the same.

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment

as follows: In lieu of the matter proposed by the amendment of the Senate insert the following:

"That the Army of the United States shall consist of the Regular Army, the Volunteer Army, the Officers' Reserve Corps, the Enlisted Reserve Corps, the National Guard while in the service of the United States, and such other land forces as are now or may hereafter be authorized by law.

"SEC. 2. Composition of the Regular Army: The Regular Army of the United States, including the existing organizations, shall consist of 64 regiments of Infantry, 25 regiments of Cavalry, 21 regiments of Field Artillery, a Coast Artillery Corps, the brigade, division, army corps, and army headquarters, with their detachments and troops, a General Staff Corps, an Adjutant General's Department, an Inspector General's Department, a Judge Advocate General's Department, a Quartermaster Corps, a Medical Department, a Corps of Engineers, an Ordnance Department, a Signal Corps, the officers of the Bureau of Insular Affairs, the Militia Bureau, the detached officers, the detached noncommissioned officers, the chaplains, the Regular Army Reserve, all organized as hereinafter provided, and the following as now authorized by law: The officers and enlisted men on the retired list; the additional officers; the professors, the Corps of Cadets, the general Army service detachment, and detachments of Cavalry, Field Artillery, and Engineers, and the band of the United States Military Academy; the post noncommissioned staff officers; the recruiting parties, the recruit depot detachments, and unassigned recruits; the service school detachments; the disciplinary guards; the disciplinary organizations; the Indian Scouts; and such other officers and enlisted men as are now or may be hereafter provided for: *Provided*, That hereafter the enlisted personnel of all organizations of the Regular Army shall at all times be maintained at a strength not below the minimum strength fixed by law: *Provided further*, That the total enlisted force of the line of the Regular Army, excluding the Philippine Scouts and the enlisted men of the Quartermaster Corps, of the Medical Department, and of the Signal Corps, and the unassigned recruits, shall not at any one time, except in the event of actual or threatened war or similar emergency in which the public safety demands it, exceed 175,000 men: *Provided further*, That the unassigned recruits at depots or elsewhere shall at no time, except in time of war, exceed by more than 7 per cent the total authorized enlisted strength.

"SEC. 3. Composition of brigades, divisions, etc.: The mobile troops of the Regular Army of the United States shall be organized, as far as practicable, into brigades and divisions. The President is authorized, in time of actual or threatened hostilities, or when in his opinion the interests of the public service demand it, to organize the brigades and divisions into such army corps or armies as may be necessary. The typical Infantry brigade shall consist of a headquarters and three regiments of Infantry. The typical Cavalry brigade shall consist of a headquarters and three regiments of Cavalry. The typical Field Artillery brigade shall consist of a headquarters and three regiments of Field Artillery. The typical Infantry division shall consist of a headquarters, three Infantry brigades, one regiment of Cavalry, one Field Artillery brigade, one regiment of Engineers, one field signal battalion, one aero squadron, one ammunition train, one supply train, one engineer train, and one sanitary train. The typical Cavalry division shall consist of a headquarters, three Cavalry brigades, one regiment of Field Artillery (horse), one battalion of mounted Engineers, one field signal battalion (mounted), one aero squadron, one ammunition train, one supply train, one engineer train, and one sanitary train. The typical army corps shall consist of a headquarters, two or more Infantry divisions, one or more Cavalry brigades or a Cavalry division, one Field Artillery brigade, one telegraph battalion, and one field signal battalion, and such ammunition, supply, engineer, and sanitary trains as the President may deem necessary. A brigade, a division, an army corps, and an army headquarters shall consist of such officers, enlisted men, and civilians as the President may prescribe. Each supply train, ammunition train, sanitary train, and engineer train shall consist of such officers and enlisted men and shall be organized as the President may prescribe, the line officers necessary therewith to be detailed under the provisions of sections 26 and 27, act of Congress approved February 2, 1901. Nothing herein contained, however, shall prevent the President from increasing or decreasing the number of organizations prescribed for the typical brigades, divisions, and army corps, or from prescribing new and different organizations and personnel as the efficiency of the service may require.

"SEC. 4. General officers of the line: Officers commissioned to and holding in the Army the office of a general officer shall hereafter be known as general officers of the line; officers commissioned to and holding in the Army an office other than that of a general officer, but to which the rank of a general officer is attached, shall be known as general officers of the staff. The number of general officers of the line now authorized by law is hereby increased by 4 major generals and 10 brigadier generals: *Provided*, That hereafter in time of peace major generals of the line shall be appointed from officers of the grade of brigadier general of the line, and brigadier generals of the line shall be appointed from officers of the grade of colonel of the line of the Regular Army.

"SEC. 5. The General Staff Corps: The General Staff Corps shall consist of one Chief of Staff, detailed in time of peace from major generals of the line; two assistants to the Chief of Staff, who shall be general officers of the line, one of whom, not above the grade of brigadier general, shall be the president of the Army War College; 10 colonels; 10 lieutenant colonels; 15 majors; and 17 captains, to be detailed from corresponding grades in the Army, as in this section hereinafter provided. All officers detailed in the General Staff Corps shall be detailed therein for periods of four years, unless sooner relieved. While serving in the General Staff Corps officers may be temporarily assigned to duty with any branch of the Army. Upon being relieved from duty in the General Staff Corps officers shall return to the branch of the Army in which they hold permanent commissions, and no officer shall be eligible to a further detail in the General Staff Corps until he shall have served two years with the branch of the Army in which commissioned, except in time of actual or threatened hostilities. Section 27 of the act of Congress approved February 2, 1901, shall apply to each position vacated by officers below the grade of general officer detailed in the General Staff Corps.

"Not more than one-half of all of the officers detailed in said corps shall at any time be stationed, or assigned to or employed upon any duty, in or near the District of Columbia. All officers detailed in said corps shall be exclusively employed in the study of military problems, the preparation of plans for the national defense and the utilization of the military forces in time of war, in investigating and reporting upon the efficiency and state of preparedness of such forces for service in peace or war, or on appropriate general staff duties in connection with troops, including the National Guard, or as military attachés in foreign countries, or on other duties, not of an administrative nature, on which they can be lawfully and properly employed: *Provided*, That no officer shall be detailed as a member of the General Staff Corps, other than the Chief of Staff and the general officers herein provided for as assistants to the Chief of Staff, except upon the recommendation of a board of five officers not below the rank of colonel, who shall be selected by the President or the Secretary of War, and neither the Chief of Staff nor more than two other members of the General Staff Corps, nor any officer not a member of said corps, who shall have been stationed or employed on any duty in or near the District of Columbia within one year prior to the date of convening of any such board, shall be detailed as a member thereof. No recommendation made by any such board shall, for more than one year after the making of such recommendation or at any time after the convening of another such board, unless again recommended by the new board, be valid as a basis for the detail of any officer as a member of the General Staff Corps; and no alteration whatever shall be made in any report or recommendation of any such board, either with or without the consent of members thereof, after the board shall have submitted such report or recommendation and shall have adjourned sine die: *Provided further*, That the War College shall remain fully subject to the supervising, coordinating, and informing powers conferred by law upon members of the General Staff Corps, and officers for duty as instructors or students in or as attachés of said college may be selected and detailed freely from among members of said corps, but any officer so selected and detailed other than one director shall thereupon cease to be a member of said corps and shall not be eligible for redetail therein so long as he shall remain on said duty; and no officer on the active list of the Army shall, for more than 30 days in any calendar year, be attached to or assigned to duty in the War College in any capacity other than that of president, director, instructor, or student, or, unless a member of the General Staff Corps, be attached to or employed in the office of the Chief of Staff: *Provided further*, That the organizations heretofore existing in or in connection with the office of the Chief of Staff under the designations of the mobile army division and the Coast Artillery division be, and they are hereby, abolished and shall not be reestablished. The business heretofore transacted in said divisions, except such as comes clearly within the general powers specified in and conferred upon members of the General Staff Corps by the organic act of Congress approved February 14, 1903, is hereby transferred as follows, to wit, to the office of

the Chief of Coast Artillery, all business apportioned to that office by law or Army regulations at the time of the creation of the Coast Artillery division of the office of the Chief of Staff; to the office of The Adjutant General or other bureau or bureaus concerned, all other business; and, subject to the exercise of the supervising, coordinating, and informing powers conferred upon members of the General Staff Corps by the act of Congress last hereinbefore cited, the business transferred by this provision to certain bureaus or offices shall hereafter be transacted exclusively by or under the direction of the respective heads thereof; and the Chief of Coast Artillery shall be an additional member of the General Staff Corps and shall also be adviser to and informant of the Chief of Staff in respect to the business under his charge: *Provided further*, That hereafter members of the General Staff Corps shall be confined strictly to the discharge of the duties of the general nature of those specified for them in this section and in the organic act of Congress last hereinbefore cited, and they shall not be permitted to assume or engage in work of an administrative nature that pertains to established bureaus or offices of the War Department, or that, being assumed or engaged in by members of the General Staff Corps, would involve impairment of the responsibility or initiative of such bureaus or offices, or would cause injurious or unnecessary duplication of or delay in the work thereof: *Provided further*, That all pay and allowances shall be forfeited by any superior for any period during which, by his order or his permission, or by reason of his neglect, any subordinate shall violate any of the foregoing provisions of this section: *Provided further*, That if any officer detailed in the General Staff Corps, or as an officer of any staff corps or department of the Army, shall be promoted to the next higher grade while so serving he may be permitted to serve out the period of his detail, and the number of officers in the organization in which he shall be serving and in the grade to which he shall have been promoted shall be increased by one for such time as he shall be an additional number in said organization and grade; but the whole number of officers detailed to said organization shall at no time exceed the aggregate of the numbers allowed to the several grades thereof by law other than this proviso.

"SEC. 6. The Adjutant General's Department: The Adjutant General's Department shall consist of The Adjutant General with the rank of brigadier general; 7 adjutants general with the rank of colonel; 13 adjutants general with the rank of lieutenant colonel; and 30 adjutants general with the rank of major.

"SEC. 7. The Inspector General's Department: The Inspector General's Department shall consist of 1 Inspector General with the rank of brigadier general; 4 inspectors general with the rank of colonel; 8 inspectors general with the rank of lieutenant colonel; and 16 inspectors general with the rank of major.

"SEC. 8. The Judge Advocate General's Department: The Judge Advocate General's Department shall consist of 1 Judge Advocate General with the rank of brigadier general; 4 judge advocates with the rank of colonel; 7 judge advocates with the rank of lieutenant colonel; and 20 judge advocates with the rank of major: *Provided*, That acting judge advocates may be detailed under the provisions of existing law for separate brigades and for separate general court-martial jurisdictions, and when not immediately required for service with a geographical department, tactical division, separate brigade, or other separate general court-martial jurisdiction, acting judge advocates may be assigned to such other legal duty as the exigencies of the service may require: *Provided further*, That of the vacancies created in the Judge Advocate General's Department by this act, one such vacancy, not below the grade of major, shall be filled by the appointment of a person from civil life, not less than 45 nor more than 50 years of age, who shall have been for 10 years a judge of the Supreme Court of the Philippine Islands, shall have served for 2 years as a captain in the Regular or Volunteer Army, and shall be proficient in the Spanish language and laws: *Provided further*, That so much of the act of Congress approved August 24, 1912, as relates to the detachment or detail of officers for duty in the Judge Advocate General's Department shall hereafter be held to apply only to the acting judge advocates authorized by law; and hereafter no officer shall be or remain detached from any command or assigned to any duty or station with intent to enable or aid him to pursue the study of law: *And provided further*, That no officer of the Judge Advocate General's Department below the rank of colonel shall be promoted therein until he shall have successfully passed a written examination before a board consisting of not less than two officers of the Judge Advocate General's Department, to be designated by the Secretary of War, such examination to be prescribed by the Secretary of War and to be held at such time anterior to the accruing of the right to promotion as may be for the best interests of the service: *Provided*, That should any officer in the grade of major of the Judge Advocate General's Department fail in his physical examination and be found incapacitated for service by reason of physical disability contracted in the line of duty, he shall be retired with the rank to which his seniority entitled him to be promoted; but if he should be found disqualified for promotion for any other reason, a second examination shall not be allowed, but the Secretary of War shall appoint a board of review to consist of two officers of the Judge Advocate General's Department superior in rank to the officer examined, none of whom shall have served as a member of the board which examined him. If the unfavorable finding of the examining board is concurred in by the board of review, the officer reported disqualified for promotion shall be honorably discharged from the service with one year's pay. If the action of the examining board is disapproved by the board of review, the officer shall be considered qualified and shall be promoted: *Provided further*, That any lieutenant colonel of the Judge Advocate General's Department who, at his first examination for promotion to the grade of colonel, has been found disqualified for such promotion for any reason other than physical disability incurred in the line of duty shall be suspended from promotion and his right thereto shall pass successively to such officers next below him in rank as are or may become eligible to promotion under existing law during the period of his suspension; and any such officer suspended from promotion shall be reexamined as soon as practicable after the expiration of one year from the date of the completion of the examination that resulted in his suspension; and if on such reexamination he is found qualified for promotion, he shall again become eligible thereto; but if he is found disqualified by reason of physical disability incurred in line of duty in either examination, he shall be retired, with the rank to which his seniority entitled him to be promoted; and if he is not found disqualified by reason of such physical disability, but is found disqualified for promotion for any other reason in the second examination, he shall be retired without promotion.

"SEC. 9. The Quartermaster Corps: The Quartermaster Corps shall consist of 1 Quartermaster General with the rank of major general; 2 assistants to the Quartermaster General with the rank of brigadier general; 21 colonels; 24 lieutenant colonels; 68 majors; 180 captains; and the pay clerks now in active service, who shall hereafter have the rank, pay, and allowances of a second lieutenant, and the President is hereby authorized to appoint and commission them, by and with the advice and consent of the Senate, second lieutenants in the Quartermaster Corps, United States Army. The total enlisted strength of the Quartermaster Corps and the number in each grade shall be limited and fixed from time to time by the President in accordance with the needs of the Army, and shall consist of quartermaster sergeants, senior grade; quartermaster sergeants; sergeants, first class; sergeants; corporals; cooks; privates, first class; and privates. The number in the various grades shall not exceed the following percentages of the total authorized enlisted strength of the Quartermaster Corps, namely: Quartermaster sergeants, senior grade, five-tenths of 1 per cent; quartermaster sergeants, 6 per cent; sergeants, first class, 2.5 per cent; sergeants, 25 per cent; corporals, 10 per cent; privates, first class, 45 per cent; privates, 9 per cent; cooks, 2 per cent: *Provided*, That the master electricians now authorized by law for the Quartermaster Corps shall hereafter be known as quartermaster sergeants, senior grade, and shall be included in the number of quartermaster sergeants, senior grade, herein authorized: *And provided further*, That all work pertaining to construction and repair that has heretofore been done by or under the direction of officers of the Quartermaster Corps shall, except as otherwise now provided by laws or regulations, hereafter be done by or under the direction of officers of said corps.

"SEC. 10. The Medical Department: The Medical Department shall consist of one Surgeon General, with the rank of major general during the active service of the present incumbent of that office, and thereafter with the rank of brigadier general, who shall be chief of said department, a Medical Corps, a Medical Reserve Corps within the limit of time fixed by this act, a Dental Corps, a Veterinary Corps, an enlisted force, the Nurse Corps, and contract surgeons as now authorized by law, the commissioned officers of which shall be citizens of the United States.

"The Medical Corps shall consist of commissioned officers below the grade of brigadier general, proportionally distributed among the several grades as in the Medical Corps now established by law. The total number of such officers shall approximately be equal to, but not exceed, except as hereinafter provided, 7 for every 1,000 of the total enlisted strength of the Regular Army authorized from time to time by law: *Provided*,

That if by reason of a reduction by law in the authorized enlisted strength of the Army aforesaid the total number of officers in the Medical Corps commissioned previously to such reduction shall for the time being exceed the equivalent of 7 to 1,000 of such reduced enlisted strength no original appointment to commissioned rank in said corps shall be made until the total number of commissioned officers thereof shall have been reduced below the equivalent of 7 to the 1,000 of the said reduced enlisted strength, nor thereafter so as to make the total number of commissioned officers thereof in excess of the equivalent of 7 to the 1,000 of said reduced enlisted strength; and no promotion shall be made above the grade of captain in said corps until the number of officers in the grade above that of captain to which the promotion is due shall have been reduced below the proportional number authorized for such grade on the basis of the reduced enlisted strength, nor thereafter so as to make the number of officers in such grade in excess of the proportional number authorized on the basis of said reduced enlisted strength: *Provided further*, That when in time of war the Regular Army shall have been increased by virtue of the provisions of this or any other act, the medical officers appointed to meet such increase shall be honorably discharged from the service of the United States when the reduction of the enlisted strength of the Army shall take place: *Provided further*, That persons hereafter commissioned in the Medical Corps shall be citizens of the United States between the ages of 22 and 30 years and shall be promoted to the grade of captain upon the completion of five years' service in the Medical Corps and upon passing the examinations prescribed by the President for promotion to the grade of captain in the Medical Corps: *Provided further*, That relative rank among captains in the Medical Corps, who have or shall have attained that rank by operation of law after a period of service fixed thereby, shall be determined by counting all the service rendered by them as officers in said corps and as assistant surgeons in the Regular Army, subject, however, to loss of files by reason of sentence of court-martial or by reason of failure to pass examination for promotion: *Provided further*, That hereafter the President shall be authorized to detail not to exceed five officers of the Medical Department of the Army for duty with the military relief division of the American National Red Cross.

"The enlisted force of the Medical Department shall consist of the following personnel, who shall not be included in the effective strength of the Army nor counted as a part of the enlisted force provided by law: Master hospital sergeants, hospital sergeants, sergeants (first class), sergeants, corporals, cooks, horseshoers, saddlers, farriers, mechanics, privates (first class), and privates: *Provided*, That master hospital sergeants shall be appointed by the Secretary of War, but no person shall be appointed master hospital sergeant until he shall have passed a satisfactory examination under such regulations as the Secretary of War may prescribe before a board of one or more medical officers as to his qualifications for the position, including knowledge of pharmacy, and demonstrated his fitness therefor by service of not less than 12 months as hospital sergeant or sergeant, first class, Medical Department, or as sergeant, first class, in the Hospital Corps now established by law; and no person shall be designated for such examination except by written authority of the Surgeon General: *Provided further*, That original enlistments for the Medical Department shall be made in the grade of private, and reenlistments and promotions of enlisted men therein, except as hereinbefore prescribed, and transfer thereto from the enlisted force of the line or other staff departments and corps of the Army shall be governed by such regulations as the Secretary of War may prescribe: *Provided further*, That the enlisted men of the Hospital Corps who are in active service at the time of the approval of this act are hereby transferred to the corresponding grades of the Medical Department established by this act: *Provided further*, That the total number of enlisted men in the Medical Department shall be approximately equal to, but not exceed, except as hereinafter provided, the equivalent of 5 per cent of the total enlisted strength of the Army authorized from time to time by law: *Provided further*, That in time of actual or threatened hostilities, the Secretary of War is hereby authorized to enlist or cause to be enlisted in the Medical Department such additional number of men as the service may require: *Provided further*, That the number of enlisted men in each of the several grades designated below shall not exceed, except as hereinafter provided, the following percentages of the total authorized enlisted strength of the Medical Department, to wit: Master hospital sergeants, one-half of 1 per cent; hospital sergeants, one-half of 1 per cent; sergeants, first class, 7 per cent; sergeants, 11 per cent; corporals, 5 per cent; and cooks, 6 per cent: *Provided further*, That the number of horseshoers, saddlers, farriers, and mechanics in the Medical Department shall not exceed one each to each authorized ambulance company or like organization: *Provided further*, That in said department the number of privates, first class, shall not exceed 25 per cent of the number of privates: *Provided further*, That if by reason of a reduction by operation of law in the authorized enlisted strength of the Army aforesaid the number of noncommissioned officers of any grade in the Medical Department whose warrants were issued previously to such reduction shall for the time being exceed the percentage hereinabove specified for such grade, no promotion to such grade shall be made until the percentage of noncommissioned officers therein shall have been reduced below that authorized for such grade on the basis of the said reduced enlisted strength, nor thereafter so as to make the percentage of noncommissioned officers therein in excess of the percentage authorized on the basis of the said reduced enlisted strength; but noncommissioned officers may be reenlisted in the grades held by them previously to such reduction regardless of the percentages aforesaid; and when under this provision the number of noncommissioned officers of any grade exceeds the percentage specified, any noncommissioned officer thereof, not under charges, may be discharged on his own application: *Provided further*, That privates, first class, of the Medical Department shall be eligible for ratings for additional pay as follows: As dispensary assistant, $2 a month; as nurse, $3 a month; as surgical assistant, $5 a month: *Provided further*, That no enlisted man shall receive more than one rating for additional pay under the provisions of this section, nor shall any enlisted man receive any additional pay under such rating unless he shall have actually performed the duties for which he shall be rated.

"The President is hereby authorized to appoint and commission, by and with the advice and consent of the Senate, dental surgeons, who are citizens of the United States between the ages of 21 and 27 years, at the rate of one for each 1,000 enlisted men of the line of the Army. Dental surgeons shall have the rank, pay, and allowances of first lieutenants until they have completed 8 years' service. Dental surgeons of more than 8 but less than 24 years' service shall, subject to such examination as the President may prescribe, have the rank, pay, and allowances of captains. Dental surgeons of more than 24 years' service shall, subject to such examination as the President may prescribe, have the rank, pay, and allowances of major: *Provided*, That the total number of dental surgeons with rank, pay, and allowances of major shall not at any time exceed 15: *And provided further*, That all laws relating to the examination of officers of the Medical Corps for promotion shall be applicable to dental surgeons.

"Authority is hereby given to the Secretary of War to grant permission, by revocable license, to the American National Red Cross to erect and maintain on any military reservations within the jurisdiction of the United States buildings suitable for the storage of supplies, or to occupy for that purpose buildings erected by the United States, under such regulations as the Secretary of War may prescribe, such supplies to be available for the aid of the civilian population in case of serious national disaster.

"SEC. 11. Corps of Engineers: The Corps of Engineers shall consist of 1 Chief of Engineers, with the rank of brigadier general; 23 colonels; 30 lieutenant colonels; 72 majors; 152 captains; 148 first lieutenants; 79 second lieutenants; and the enlisted men hereinafter enumerated. The Engineer troops of the Corps of Engineers shall consist of one band, seven regiments, and two mounted battalions.

"Each regiment of Engineers shall consist of 1 colonel; 1 lieutenant colonel; 2 majors; 11 captains; 12 first lieutenants; 6 second lieutenants; 2 master engineers, senior grade; 1 regimental sergeant major; 2 regimental supply sergeants; 2 color sergeants; 1 sergeant bugler; 1 cook; 1 wagoner for each authorized wagon of the field and combat train, and 2 battalions.

"Each battalion of a regiment of Engineers shall consist of 1 major, 1 captain, 1 battalion sergeant major; 3 master engineers, junior grade; and 3 companies. Each Engineer company (regimental) shall consist of 1 captain; 2 first lieutenants; 1 second lieutenant; 1 first sergeant; 3 sergeants, first class; 1 mess sergeant; 1 supply sergeant; 1 stable sergeant; 6 sergeants; 12 corporals; 1 horseshoer; 2 buglers; 1 saddler; 2 cooks; 19 privates, first class; and 59 privates: *Provided*, That the President may, in his discretion, increase a regiment of Engineers by 2 master engineers, senior grade, and 2 sergeants; each battalion of a regiment of Engineers by 3 master engineers, junior grade; and each Engineer company (regimental) by 2 sergeants, 6 corporals, 1 cook, 12 privates, first class, and 34 privates.

"The Engineer band shall consist of 1 band leader; 1 assistant band leader; 1 first sergeant; 2 band sergeants; 4 band cor-

porals; 2 musicians, first class; 4 musicians, second class; 13 musicians, third class; and 2 cooks.

"Each battalion of mounted Engineers shall consist of 1 major; 5 captains; 7 first lieutenants; 3 second lieutenants; 1 master engineer, senior grade; 1 battalion sergeant major; 1 battalion supply sergeant; 3 master engineers, junior grade; 1 corporal; 1 wagoner for each authorized wagon of the field and combat train; and three mounted companies. Each mounted Engineer company shall consist of 1 captain; 2 first lieutenants; 1 second lieutenant; 1 first sergeant; 2 sergeants, first class; 1 mess sergeant; 1 supply sergeant; 1 stable sergeant; 4 sergeants; 8 corporals; 2 horseshoers; 1 saddler; 2 cooks; 2 buglers; 12 privates, first class; and 37 privates: *Provided*, That the President may, in his discretion, increase the battalions of mounted Engineers by 1 master engineer, senior grade; 2 sergeants; and 3 master engineers, junior grade; and a mounted Engineer company by 2 sergeants; 3 corporals; 8 privates, first class; and 24 privates: *Provided further*, That appropriate officers to command the regiments, battalions, and companies herein authorized and for duty with and as staff officers of such organizations shall be detailed from the Corps of Engineers, and shall not be in excess of the numbers in each grade enumerated in this section. The enlisted force of the Corps of Engineers and the officers serving therewith shall constitute a part of the line of the Army.

"SEC. 12. The Ordnance Department: The Ordnance Department shall consist of 1 Chief of Ordnance, with the rank of brigadier general; 10 colonels; 15 lieutenant colonels; 32 majors, 42 captains; 42 first lieutenants; the ordnance sergeants, as now authorized by law, and such other enlisted men of grades now authorized by law as the President may direct: *Provided*, That ordnance sergeants shall be selected by the Secretary of War from the sergeants of the line or Ordnance Department who shall have served faithfully for eight years, including four years in the grade of noncommissioned officer: *Provided further*, That vacancies which may occur in the commissioned personnel of the Ordnance Department shall be subject to the provisions of sections 26 and 27 of the act approved February 2, 1901, the acts approved June 25, 1906, and February 24, 1915, and acts amendatory thereof relating to the Ordnance Department: *Provided further*, That hereafter the Secretary of War is authorized to detail not to exceed 30 lieutenants from the Army at large for duty as student officers in the establishments of the Ordnance Department for a period of two years; and the completion of the prescribed course of instruction shall constitute the examination for detail in the Ordnance Department.

"SEC. 13. The Signal Corps: The Signal Corps shall consist of 1 Chief Signal Officer, with the rank of brigadier general; 3 colonels; 8 lieutenant colonels; 10 majors; 30 captains; 75 first lieutenants; and the aviation section, which shall consist of 1 colonel; 1 lieutenant colonel; 8 majors; 24 captains; and 114 first lieutenants, who shall be selected from among officers of the Army at large of corresponding grades or from among officers of the grade below, exclusive of those serving by detail in staff corps or departments, who are qualified as military aviators, and shall be detailed to serve as aviation officers for periods of four years unless sooner relieved; and the provisions of section 27 of the act of Congress approved February 2, 1901, are hereby extended to apply to said aviation officers and to vacancies created in any arm, corps, or department of the Army by the detail of said officers therefrom; but nothing in said act or in any other law now in force shall be held to prevent the detail or redetail at any time, to fill a vacancy among the aviation officers authorized by this act, of any officer who, during prior service as an aviation officer of the aviation section, shall have become proficient in military aviation.

"Aviation officers may, when qualified therefor, be rated as junior military aviators or as military aviators, but no person shall be so rated until there shall have been issued to him a certificate to the effect that he is qualified for the rating, and no certificate shall be issued to any person until an aviation examining board, which shall be composed of three officers of experience in the Aviation Service and two medical officers, shall have examined him, under general regulations to be prescribed by the Secretary of War and published to the Army by the War Department, and shall have reported him to be qualified for the rating. No person shall receive the rating of military aviator until he shall have served creditably for three years as an aviation officer with the rating of a junior military aviator.

"Each aviation officer authorized by this act shall, while on duty that requires him to participate regularly and frequently in aerial flights, receive an increase of 25 per cent in the pay of his grade and length of service under his commission. Each duly qualified junior military aviator shall, while so serving, have the rank, pay, and allowances of one grade higher than that held by him under his commission if his rank under said commission be not higher than that of captain, and while on duty requiring him to participate regularly and frequently in aerial flights he shall receive in addition an increase of 50 per cent in the pay of his grade and length of service under his commission. Each military aviator shall, while so serving, have the rank, pay, and allowances of one grade higher than that held by him under his commission if his rank under said commission be not higher than that of captain, and while on duty requiring him to participate regularly and frequently in aerial flights he shall receive in addition an increase of 75 per cent of the pay of his grade and length of service under his commission: *Provided*, That the provisions of the act of March 2, 1913, allowing increase of pay and allowances to officers detailed by the Secretary of War on aviation duty, are hereby repealed: *Provided further*, That hereafter married officers of the line of the Army shall be eligible equally with unmarried officers, and subject to the same conditions, for detail to aviation duty; and the Secretary of War shall have authority to cause as many enlisted men of the aviation section to be instructed in the art of flying as he may deem necessary: *Provided further*, That hereafter the age of officers shall not be a bar to their first detail in the aviation section of the Signal Corps, and neither their age nor their rank shall be a bar to their subsequent details in said section: *Provided further*, That when it shall be impracticable to obtain from the Army officers suitable for the aviation section of the Signal Corps in the number allowed by law the difference between that number and the number of suitable officers actually available for duty in said section may be made up by appointments in the grade of aviator, Signal Corps, and that grade is hereby created. The personnel for said grade shall be obtained from especially qualified civilians who shall be appointed and commissioned in said grade: *Provided further*, That whenever any aviator shall have become unsatisfactory he shall be discharged from the Army as such aviator. The base pay of an aviator, Signal Corps, shall be $150 per month, and he shall have the allowances of a master signal electrician and the same percentage of increase in pay for length of service as is allowed to a master signal electrician.

"The total enlisted strength of the Signal Corps shall be limited and fixed from time to time by the President in accordance with the needs of the Army, and shall consist of master signal electricians; sergeants, first class; sergeants; corporals; cooks; horseshoers; privates, first class; and privates; the number in each grade being fixed from time to time by the President. The numbers in the various grades shall not exceed the following percentages of the total authorized enlisted strength of the Signal Corps, namely: Master signal electricians, 2 per cent; sergeants, first class, 7 per cent; sergeants, 10 per cent; corporals, 20 per cent. The number of privates, first class, shall not exceed 25 per cent of the number of privates. Authority is hereby given the President to organize, in his discretion, such part of the commissioned and enlisted personnel of the Signal Corps into such number of companies, battalions, and aero squadrons as the necessities of the service may demand.

"SEC. 14. Bureau of Insular Affairs of the War Department: Nothing in this act shall be construed to repeal existing laws relating to the organization of the Bureau of Insular Affairs of the War Department.

"SEC. 15. Chaplains: The President is authorized to appoint, by and with the advice and consent of the Senate, chaplains in the Army at the rate of not to exceed, including chaplains now in service, one for each regiment of Cavalry, Infantry, Field Artillery, and Engineers, and one for each 1,200 officers and men of the Coast Artillery Corps, with rank, pay, and allowances as now authorized by law: *Provided*, That in the appointment of chaplains in the Regular Army, preference and priority shall be given to applicant veterans, if otherwise duly qualified and who shall not have passed the age of 41 years at the time of application, who have rendered honorable war service in the Army of the United States or who have been honorably discharged from such Army.

"SEC. 16. Veterinarians: The President is hereby authorized, by and with the advice and consent of the Senate, to appoint veterinarians and assistant veterinarians in the Army, not to exceed, including veterinarians now in service, 2 such officers for each regiment of Cavalry, 1 for every three batteries of Field Artillery, 1 for each mounted battalion of Engineers, 17 as inspectors of horses and mules and as veterinarians in the Quartermaster Corps, and 7 as inspectors of meats for the Quartermaster Corps; and said veterinarians and assistant veterinarians shall be citizens of the United States and shall constitute the Veterinary Corps and shall be a part of the Medical Department of the Army.

"Hereafter a candidate for appointment as assistant veterinarian must be a citizen of the United States, between the ages of 21 and 27 years, a graduate of a recognized veterinary college or university, and shall not be appointed until he shall have passed a satisfactory examination as to character, physical condition, general education, and professional qualifications.

"An assistant veterinarian appointed under this act shall, for the first 5 years of service as such, have the rank, pay, and allowances of second lieutenant; that after 5 years of service he shall have the rank, pay, and allowances of first lieutenant; that after 15 years of service he shall be promoted to be a veterinarian with the rank, pay, and allowances of captain, and that after 20 years' service he shall have the rank, pay, and allowances of a major: *Provided*, That any assistant veterinarian, in order to be promoted as hereinbefore provided, must first pass a satisfactory examination, under such rules as the President may prescribe, as to professional qualifications and adaptability for the military service; and if such assistant veterinarian shall be found deficient at such examination he shall be discharged from the Army with one year's pay.

"The veterinarians of Cavalry and Field Artillery now in the Army, together with such veterinarians of the Quartermaster Corps as are now employed in said corps, who at the date of the approval of this act shall have had less than five years' governmental service, may be appointed in the Veterinary Corps as assistant veterinarians with the rank, pay, and allowances of second lieutenant; those who shall have had over five years of such service may be appointed in said corps as assistant veterinarians with the rank, pay, and allowances of first lieutenant; and those who shall have had over 15 years of such service may be appointed in said corps as veterinarians with the rank, pay, and allowances of captain: *Provided*, That no such appointment of any veterinarian shall be made unless he shall first pass satisfactorily a practical professional and physical examination as to his fitness for the military service: *Provided further*, That veterinarians now in the Army or in the employ of the Quartermaster Corps who shall fail to pass the prescribed physical examination because of disability incident to the service and sufficient to prevent them from the performance of duty valuable to the Government shall be placed upon the retired list of the Army with 75 per cent of the pay to which they would have been entitled if appointed in the Veterinary Corps as hereinbefore prescribed.

"The Secretary of War, upon recommendation of the Surgeon General of the Army, may appoint in the Veterinary Corps, for such time as their services may be required, such number of reserve veterinarians as may be necessary to attend public animals pertaining to the Quartermaster Corps. Reserve veterinarians so employed shall have the pay and allowances of second lieutenant during such employment and no longer: *Provided*, That such reserve veterinarians shall be graduates of a recognized veterinary college or university and shall pass a satisfactory examination as to character, physical condition, general education, and professional qualifications in like manner as hereinbefore required of assistant veterinarians; such reserve veterinarians shall constitute a list of eligibles for appointment as assistant veterinarians, subject to all the conditions hereinbefore prescribed for the appointment of assistant veterinarians.

"Within a limit of time to be fixed by the Secretary of War, candidates for appointment as assistant veterinarians who shall have passed satisfactorily the examinations prescribed for that grade by this act shall be appointed, in the order of merit in which they shall have passed such examination, to vacancies as they occur, such appointments to be for a probationary period of two years, after which time, if the services of the probationers shall have been satisfactory, they shall be permanently appointed with rank to date from the dates of rank of their probationary appointments. Probationary veterinarians whose services are found unsatisfactory shall be discharged at any time during the probationary period, or at the end thereof, and shall have no further claims against the Government on account of their probationary service.

"The Secretary of War shall from time to time appoint boards of examiners to conduct the veterinary examinations hereinbefore prescribed, each of said boards to consist of three medical officers and two veterinarians.

"SEC. 17. Composition of Infantry units: Each regiment of Infantry shall consist of 1 colonel, 1 lieutenant colonel, 3 majors, 15 captains, 16 first lieutenants, 15 second lieutenants, 1 headquarters company, 1 machine-gun company, 1 supply company, and 12 Infantry companies organized into 3 battalions of 4 companies each.

"Each battalion shall consist of 1 major, 1 first lieutenant, mounted (battalion adjutant), and 4 companies. Each Infantry company in battalion shall consist of 1 captain, 1 first lieutenant, 1 second lieutenant, 1 first sergeant, 1 mess sergeant, 1 supply sergeant, 6 sergeants, 11 corporals, 2 cooks, 2 buglers, 1 mechanic, 19 privates (first class), and 56 privates.

"Each Infantry headquarters company shall consist of 1 captain, mounted (regimental adjutant); 1 regimental sergeant major, mounted; 3 battalion sergeants major, mounted; 1 first sergeant (drum major); 2 color sergeants; 1 mess sergeant; 1 supply sergeant; 1 stable sergeant; 1 sergeant; 2 cooks; 1 horseshoer; 1 band leader; 1 assistant band leader; 1 sergeant bugler; 2 band sergeants; 4 band corporals; 2 musicians, first class; 4 musicians, second class; 13 musicians, third class; 4 privates, first class, mounted; and 12 privates, mounted.

"Each Infantry machine-gun company shall consist of 1 captain, mounted; 1 first lieutenant, mounted; 2 second lieutenants, mounted; 1 first sergeant, mounted; 1 mess sergeant; 1 supply sergeant, mounted; 1 stable sergeant, mounted; 1 horseshoer; 5 sergeants; 6 corporals; 2 cooks, 2 buglers; 1 mechanic; 8 privates, first class; and 24 privates.

"Each Infantry supply company shall consist of 1 captain, mounted; 1 second lieutenant, mounted; 3 regimental supply sergeants, mounted; 1 first sergeant, mounted; 1 mess sergeant; 1 stable sergeant; 1 corporal, mounted; 1 cook; 1 saddler; 1 horseshoer; and 1 wagoner for each authorized wagon of the field and combat train: *Provided*, That the President may in his discretion increase a company of Infantry by 2 sergeants, 6 corporals, 1 cook, 1 mechanic, 9 privates (first class), and 31 privates; an Infantry machine-gun company by 2 sergeants, 2 corporals, 1 mechanic, 4 privates (first class), and 12 privates.

"The commissioned officers required for the Infantry headquarters, supply, and machine-gun companies and for the companies organized into battalions shall be assigned from those hereinbefore authorized.

"SEC. 18. Composition of Cavalry units: Each regiment of Cavalry shall consist of 1 colonel, 1 lieutenant colonel, 3 majors, 15 captains, 16 first lieutenants, 16 second lieutenants, 1 headquarters troop, 1 machine-gun troop, 1 supply troop, and 12 troops organized into three squadrons of 4 troops each.

"Each squadron shall consist of 1 major, 1 first lieutenant (squadron adjutant), and 4 troops. Each troop in squadron shall consist of 1 captain, 1 first lieutenant, 1 second lieutenant, 1 first sergeant, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 5 sergeants, 8 corporals, 2 cooks, 2 horseshoers, 1 saddler, 2 buglers, 10 privates (first class), and 36 privates.

"Each headquarters troop shall consist of 1 captain (regimental adjutant), 1 regimental sergeant major, 3 squadron sergeants major, 1 first sergeant (drum major), 2 color sergeants, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 1 sergeant, 2 cooks, 1 horseshoer, 1 saddler, 2 privates (first class), and 9 privates, 1 band leader, 1 assistant band leader, 1 sergeant bugler, 2 band sergeants, 4 band corporals, 2 musicians (first class), 4 musicians (second class), and 13 musicians (third class).

"Each machine-gun troop shall consist of 1 captain, 1 first lieutenant, 2 second lieutenants, 1 first sergeant, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 2 horseshoers, 5 sergeants, 6 corporals, 2 cooks, 1 mechanic, 1 saddler, 2 buglers, 12 privates (first class), and 35 privates.

"Each supply troop shall consist of 1 captain (regimental supply officer), 2 second lieutenants, 3 regimental supply sergeants, 1 first sergeant, 1 mess sergeant, 1 stable sergeant, 1 corporal, 1 cook, 1 horseshoer, 1 saddler, and 1 wagoner for each authorized wagon of the field and combat train: *Provided*, That the President may, in his discretion, increase each troop of Cavalry by 10 privates (first class) and 25 privates; the headquarters troop by 2 sergeants, 5 corporals, 1 horseshoer, 5 privates (first class), and 18 privates; each machine-gun troop by 3 sergeants, 2 corporals, 1 mechanic, 1 private (first class), and 14 privates; each supply troop by 1 corporal, 1 cook, 1 saddler, and 1 horseshoer.

"The commissioned officers required for the Cavalry headquarters, supply, and machine-gun troops, and for the troops organized into squadrons, shall be assigned from those hereinbefore authorized.

"SEC. 19. Composition of Field Artillery units: The Field Artillery, including mountain artillery, light artillery, horse artillery, heavy artillery (field and siege types), shall consist of 126 guns or howitzer batteries organized into 21 regiments.

"In time of actual or threatened hostilities the President is authorized to organize such number of ammunition batteries and battalions, depot batteries and battalions, and such artillery parks with such numbers and grades of personnel and such organizations as he may deem necessary. The officers necessary for such organization shall be supplied from the officers' reserve corps provided by this act and by temporary appointment as authorized by section 8 of the act of Congress approved April

25, 1914. The enlisted men necessary for such organizations shall be supplied from the Regular Army Reserve provided by this act or from the Regular Army.

"Each regiment of Field Artillery shall consist of 1 colonel, 1 lieutenant colonel, 1 captain, 1 headquarters company, 1 supply company, and such number of gun and howitzer battalions as the President may direct. Nothing shall prevent the assembling, in the same regiment, of gun and howitzer battalions of different calibers and classes.

"Each gun or howitzer battery shall consist of 1 captain, 2 first lieutenants, 2 second lieutenants, 1 first sergeant, 1 supply sergeant, 1 stable sergeant, 1 mess sergeant, 6 sergeants, 13 corporals, 1 chief mechanic, 1 saddler, 2 horseshoers, 1 mechanic, 2 buglers, 3 cooks, 22 privates (first class), and 71 privates. When no enlisted men of the Quartermaster Corps are attached for such positions there shall be added to each battery of mountain artillery 1 packmaster (sergeant, first class), 1 assistant packmaster (sergeant), and 1 cargador (corporal).

"Each headquarters company of a regiment of two battalions shall consist of 1 captain, 1 first lieutenant, 1 regimental sergeant major, 2 battalion sergeants major, 1 first sergeant, 2 color sergeants, 1 mess sergeant, 1 supply sergeant, 1 stable sergeant, 2 sergeants, 9 corporals, 1 horseshoer, 1 saddler, 1 mechanic, 3 buglers, 2 cooks, 5 privates (first class), 15 privates, 1 band leader, 1 assistant band leader, 1 sergeant bugler, 2 band sergeants, 4 band corporals, 2 musicians (first class), 4 musicians (second class), and 13 musicians (third class). That when a regiment consists of three battalions there shall be added to the headquarters company 1 battalion sergeant major, 1 sergeant, 3 corporals, 1 bugler, 1 private (first class), and 5 privates. When no enlisted men of the Quartermaster Corps is attached for such positions, there shall be added to each mountain artillery headquarters company 1 packmaster (sergeant, first class), 1 assistant packmaster (sergeant), and 1 cargador (corporal).

"Each supply company of a regiment of two battalions shall consist of 1 captain, 1 first lieutenant, 2 regimental supply sergeants, 1 first sergeant, 1 mess sergeant, 1 corporal, 1 cook, 1 horseshoer, 1 saddler, 2 privates, and 1 wagoner for each authorized wagon of the field train. When a regiment consists of three battalions there shall be added to the supply company 1 second lieutenant, 1 regimental supply sergeant, 1 private, and 1 wagoner for each additional authorized wagon of the field train.

"Each gun or howitzer battalion shall consist of 1 major, 1 captain, and batteries as follows: Mountain artillery battalions and light artillery gun or howitzer battalions serving with the field artillery of Infantry divisions shall contain three batteries; horse artillery battalions and heavy field artillery gun or howitzer battalions shall contain two batteries: *Provided*, That the President may, in his discretion, increase the headquarters company of a regiment of two battalions by 2 sergeants, 5 corporals, 1 horseshoer, 1 mechanic, 1 private (first class), and 6 privates; the headquarters company of a regiment of three battalions by 1 sergeant, 7 corporals, 1 horseshoer, 1 mechanic, 2 cooks, 2 privates (first class), and 7 privates; the supply company of a regiment of two battalions by 1 corporal, 1 cook, 1 horseshoer, and 1 saddler; the supply company for a regiment of three battalions by 1 corporal, 1 cook, 1 horseshoer, and 1 saddler; a gun or howitzer battery by 3 sergeants, 7 corporals, 1 horseshoer, 2 mechanics, 1 bugler, 13 privates (first class), and 37 privates.

"SEC. 20. Coast Artillery Corps: The Coast Artillery Corps shall consist of one Chief of Coast Artillery, with the rank of brigadier general; 24 colonels; 24 lieutenant colonels; 72 majors; 360 captains; 360 first lieutenants; 360 second lieutenants; 31 sergeants major, senior grade; 64 sergeants major, junior grade; 41 master electricians; 72 engineers; 99 electrician sergeants, first class; 275 assistant engineers; 99 electrician sergeants, second class; 106 firemen; 93 radio sergeants; 62 master gunners; 263 first sergeants; 263 supply sergeants; 263 mess sergeants; 2,104 sergeants; 3,156 corporals; 526 cooks; 526 mechanics; 526 buglers; 5,225 privates, first class; 15,675 privates; and 18 bands, organized as hereinbefore provided for the Engineer band. The rated men of the Coast Artillery Corps shall consist of casemate electricians; observers, first class; plotters; chief planters; coxswains; chief loaders; observers, second class; gun commanders and gun pointers. The total number of rated men shall not exceed 1,784. Coxswains shall receive $9 per month in addition to the pay of their grade.

"SEC. 21. Porto Rico Regiment of Infantry: The Porto Rico Regiment of Infantry of the United States Army shall hereafter have the same organization, and the same grades and numbers of commissioned officers and enlisted men, as are by this act or shall hereafter be prescribed by law for other regiments of Infantry of the Army. All vacancies created by this act or occurring hereafter in commissioned offices of said regiment above the grade of second lieutenant and below the grade of colonel shall, except as hereinafter provided to the contrary, be filled by promotion according to seniority in the several grades and within the regiment, subject to the examination prescribed by section 3 of the act of Congress approved October 1, 1890, and said section is hereby extended so as to apply in the cases of all officers below the grade of lieutenant colonel, who shall hereafter be examined for promotion in the Porto Rico Regiment of Infantry, except that the President may prescribe such a system of examination for the promotion of officers of said regiment as he may deem advisable.

"The colonel of said regiment shall be detailed by the President from among officers of Infantry of the Army not below the grade of lieutenant colonel for a period of four years, unless sooner relieved. Vacancies created by this act in the grades of lieutenant colonel and major in said regiment shall be filled by appointments from the senior captains in regimental rank of the Porto Rico regiment mentioned in the act of March 4, 1915; and captains and lieutenants of said regiment shall also be eligible for such detached service, transfer, or assignment to duty with other organizations as may be approved by the Secretary of War; but vacancies created by such detachment of officers shall not be filled by promotions or appointments.

"All men hereafter enlisting in said regiment shall be natives of Porto Rico. All enlistments in the regiment shall hereafter be the same as is provided herein for the Regular Army, and the regiment, or any part thereof, may be ordered for service outside the island of Porto Rico. The pay and allowances of members of said regiment shall be the same as provided by law for officers and enlisted men of like grades in the Regular Army.

"Vacancies created by this act or occurring hereafter in the grade of second lieutenant in said regiment shall be filled during any calendar year by the appointment by the President, by and with the advice and consent of the Senate, of any native of Porto Rico graduated from the United States Military Academy, and, after such appointment shall have been made or provided for, by like appointment of native citizens of Porto Rico between 21 and 27 years of age.

"*Provided*, That officers of the Porto Rico Regiment of Infantry, United States Army, who held commissions in the Porto Rico Provisional Regiment of Infantry on June 30, 1908, shall now and hereafter take rank in their grades in the same relative order held by them in said Porto Rico Provisional Regiment of Infantry on June 30, 1908, subject to any loss in rank due to failure to pass examinations for promotion or to sentence of court-martial.

"SEC. 22. All existing laws pertaining to or affecting the United States Military Academy and civilian or military personnel on duty thereat in any capacity whatever, the officers and enlisted men on the retired list, the detached and additional officers under the act of Congress approved March 3, 1911, recruiting parties, recruit depots and unassigned recruits, service-school detachments, United States disciplinary barracks guards, disciplinary organizations, the Philippine Scouts, and Indian scouts shall continue and remain in force except as herein specifically provided otherwise.

"SEC. 23. Original appointments to be provisional: Hereafter all appointments of persons other than graduates of the United States Military Academy to the grade of second lieutenant in the Regular Army shall be provisional for a period of two years, at the close of which period such appointments shall be made permanent if the appointees shall have demonstrated, under such regulations as the President may prescribe, their suitability and moral, professional, and physical fitness for such permanent appointment; but should any appointee fail so to demonstrate his suitability and fitness, his appointment shall terminate; and should any officer become eligible for promotion to a vacancy in a higher grade and qualify therefor before the expiration of two years from the date of his original appointment, he shall receive a provisional appointment in such higher grade, which appointment shall be made permanent when he shall have qualified for permanent appointment upon the expiration of two years from the date of his original appointment, or shall terminate if he shall fail so to qualify.

"SEC. 24. Increase to be made in five increments: Except as otherwise specifically provided by this act, the increases in the commissioned and enlisted personnel of the Regular Army provided by this act shall be made in five annual increments, each of which shall be, in each grade of each arm, corps, and department, as nearly as practicable, one-fifth of the total increase authorized for each arm, corps, and department. Officers promoted to vacancies created or caused by the addition of the first increment shall be promoted to rank from July 1, 1916,

and those promoted to vacancies created or caused by the second increment shall be promoted to rank from July 1, 1917; those promoted to vacancies created or caused by the addition of the third increment shall be promoted to rank from July 1, 1918; those promoted to vacancies created or caused by the addition of the fourth increment shall be promoted to rank from July 1, 1919; and those promoted to vacancies created or caused by the addition of the fifth increment shall be promoted to rank from July 1, 1920: *Provided*, That in the event of actual or threatened war or similar emergency in which the public safety demands it, the President is authorized to immediately organize the entire increase authorized by this act, or so much thereof as he may deem necessary; and when, in the judgment of the President, war becomes imminent, all of said organizations that shall then be below the maximum enlisted strength authorized by law shall be raised forthwith to that strength, and shall be maintained as nearly as possible thereat so long as war, or the imminence of war, shall continue.

"Vacancies in the grade of second lieutenant, created or caused by the increases due to this act, in any fiscal year shall be filled by appointment in the following order: (1) Of cadets graduated from the United States Military Academy during the preceding fiscal year for whom vacancies did not become available during the fiscal year in which they were graduated; (2) under the provisions of existing law, of enlisted men, including officers of the Philippine Scouts, whose fitness for promotion shall have been determined by competitive examination; (3) of members of the Officers' Reserve Corps between the ages of 21 and 27 years; (4) of commissioned officers of the National Guard between the ages of 21 and 27 years; (5) of such honor graduates, between the ages of 21 and 27 years, of distinguished colleges as are now or may hereafter be entitled to preference by general orders of the War Department; and (6) of candidates from civil life between the ages of 21 and 27 years; and the President is authorized to make the necessary rules and regulations to carry these provisions into effect: *Provided*, That any such original vacancies not so filled, and remaining at the time of graduation of any class at the United States Military Academy, may be filled by the appointment of members of that class; and all vacancies in the grade of second lieutenant not created or caused by the increases due to this act shall be filled as provided in the act making appropriation for the support of the Army, approved March 3, 1911: *Provided further*, That enlisted men of the Regular Army who have completed one year's service with an organization may become candidates for vacancies in the grade of second lieutenant created or caused by the increases due to the operation of this act: *Provided further*, That appointments to the grade of second lieutenant in the Corps of Engineers, including those created by this act, shall continue to be made as now provided by law, but that officers of the Army or Navy of the United States may become candidates for said appointments under the provisions of section 5 of the act of Congress approved February 27, 1911, without previously vacating their commissions as officers and that the Secretary of War may, in his discretion, allow persons to become candidates without previously establishing eligibility for appointment as junior engineer under the Engineer Bureau of the War Department: *Provided further*, That officers appointed to original vacancies in the grade of second lieutenant created or caused by this act shall take lineal and relative rank according to dates of appointment, and the lineal and relative rank of second lieutenants appointed on the same date shall be determined under such regulations as the Secretary of War may prescribe: *Provided further*, That the President may recommission persons who have heretofore held commissions in the Regular Army and have left the service honorably, after ascertaining that they are qualified for service physically, morally, and as to age and military fitness; such recommissioned officers shall take rank at the foot of the respective grades which they held at the time of their separation from the Army: *Provided further*, That the provisions of existing law requiring examinations to determine fitness for promotion of officers of the Army are hereby extended to include promotions to all grades below that of brigadier general: *Provided further*, That examinations of officers in the grades of major and lieutenant colonel shall be confined to problems involving the higher functions of staff duties and command: *Provided further*, That in time of war retired officers of the Army may be employed on active duty, in the discretion of the President, and when so employed they shall receive the full pay and allowances of their grade: *And provided further*, That hereafter any retired officer, who has been or shall be detailed on active duty, shall receive the rank, pay, and allowances of the grade, not above that of major, that he would have attained in due course of promotion if he had remained on the active list for a period beyond the date of his retirement equal to the total amount of time during which he has been detailed on active duty since his retirement.

"SEC. 25. The detached officers: On July 1, 1916, the line of the Army shall be increased by 822 extra officers of the Cavalry, Field Artillery, Coast Artillery Corps, and Infantry arms of the service, of grades from first lieutenant to colonel, inclusive, lawfully available for detachment from their proper arms for duty with the National Guard, or other duty, the usual period of which exceeds one year. Said extra officers, together with the 200 detached officers provided for by the act of Congress approved March 3, 1911, shall, on and after July 1, 1916, constitute the detached officers' list, and all positions vacated by officers assigned to said list, and the officers so assigned, shall be subject to the provisions of section 27 of the act of Congress approved February 2, 1901, with reference to details to the staff corps. The total number of officers hereby authorized for each grade on said list entire shall be in proportion to the total number of officers of the corresponding grade now authorized by law other than this act for all of the said four arms combined, exclusive of second lieutenants and of the 200 extra officers authorized by the act of Congress approved March 3, 1911, and exclusive also of the additional officers authorized by the act to restore lineal rank lost through the system of regimental promotion formerly in force; and the total number of officers hereby authorized for each grade in each of said arms on said list shall be in the proportion borne by the number of officers now authorized by law other than this act for such grade and arm to the total number of officers now authorized by law other than this act for the corresponding grade in all of the said four arms combined, exclusive of the extra and additional officers last hereinbefore specified and excluded: *Provided*, That all vacancies created or caused by the foregoing provisions of this section in grades above that of second lieutenant shall be filled by promotion according to law existing on and before the date of approval of this act, and subject to the examinations prescribed by existing law. As soon as practicable after such promotions shall have been made, there shall be detached from each arm and assigned to the detached officers' list a number of officers of each grade equal to the number of officers of said grade by which said arm shall have been increased by the foregoing provisions of this section; and thereafter any vacancy created or caused in any of the said arms of the service by the assignment of an officer of any grade to said detached officers' list shall be filled, subject to such examination as is now or may hereafter be prescribed by law, by the promotion of the officer who shall be the senior in length of commissioned service of those eligible to promotion in the next lower grade in the arm in which such vacancy shall occur: *Provided further*, That no officer of any of said arms of the service shall be permitted to remain on said detached officers' list for more than 45 days unless he shall have been actually present for duty for at least two years out of the last preceding six years with an organization composed of one or more statutory units, or the equivalent thereof, of the arm to which he shall belong. Any vacancy created in said list by the removal of any officer therefrom because he shall not have been present for duty as before prescribed in this proviso shall be filled by the transfer to said list of an officer having the same grade and belonging to the same arm as the officer whose removal from said list shall have created said vacancy; but, except as before prescribed in this proviso, all officers who shall have been assigned to said list shall remain thereon for not less than four years from the respective dates of their assignment thereto, unless in the meantime they shall have been separated entirely from the Army, or shall have been promoted or appointed to higher offices, or shall have been retired from active service: *Provided further*, That after the apportionment of officers to said detached officers' list shall have been made as authorized by this act, whenever any vacancy shall have been caused in said list by the separation of an officer of any grade therefrom, such vacancy shall, except as prescribed in the last preceding proviso, be filled by the detail and assignment to said list of an officer of the corresponding grade in that arm in which there shall be found the officer of the next lower grade who at that time shall be the senior in length of commissioned service of all the officers of the said lower grade in all of the four arms hereinbefore specified; if two or more officers of different arms shall be found to have equal seniority in length of commissioned service in said lower grade, the question of seniority shall be decided by their relative standing on the list of the commissioned officers of the Army: *Provided further*, That, with a view further to equalize inequalities in past promotions of officers of the line of the Army, on July 1, 1916, the Cavalry shall be increased by 17

colonels, and the Infantry by 4 colonels, all of whom shall be additional officers in that grade, and shall not bar nor retard the promotion to which any officer would be entitled if the appointment of the said additional officers had never been authorized; and after July 1, 1919, no vacancies occurring among the said additional officers shall be filled and the offices so vacated shall cease and determine: *And provided further*, That for the purpose of lessening as much as possible inequalities of promotion due to the increase in the number of officers of the line of the Army under the provisions of this act, any vacancies created or caused by this act in commissioned grades below that of lieutenant colonel in any arm of said line may, in the discretion of the President and under such regulations as he may prescribe in furtherance of the purpose stated in this proviso, be filled by the promotion or transfer without promotion of officers of other branches of the line of the Army; but no such promotion or transfer shall be made in the case of any officer unless it shall have been recommended by an examining board composed of five officers, senior in rank to such officer, and of the arm to which the promotion or transfer of such officer shall have been proposed, who, after having made a personal examination of such officer and of his official record, shall have reported him qualified for service in said arm in the grade to which his promotion or transfer shall have been proposed.

"SEC. 26. Retirement of officers of Philippine Scouts: Captains and lieutenants of Philippine Scouts who are citizens of the United States shall hereafter be entitled to retirement under the laws governing the retirement of enlisted men of the Regular Army, except that they shall be retired in the grade held by them at the date of retirement, shall be entitled to retirement for disability under the same conditions as officers of the Regular Army, and that they shall receive, as retired pay, the amounts allowed by law as retired pay and allowances of master signal electricians of the United States Army, and no more: *Provided*, That double time for service beyond the continental limits of the United States shall not be counted for the purposes of this section so as to reduce the actual period of service below 20 years: *Provided further*, That former officers of the Philippine Scouts who, because of disability occasioned by wounds received in action, have resigned or been discharged from the service, or who have heretofore served as such for a period of more than five years and have been retired as enlisted men, shall be placed upon the retired list as officers of Philippine Scouts and thereafter receive the retired pay and allowances provided by this section for other officers of Philippine Scouts: *And provided further*, That any former officer of Philippine Scouts who vacated his office in the Philippine Scouts by discharge or resignation on account of disability contracted in the line of duty and who was subsequently retired as an enlisted man, except any former officer of Philippine Scouts who has been retired as an enlisted man by special act of Congress, shall be transferred to the retired list created by this section and shall thereafter receive the retired pay and allowances authorized by this section, and no more. Officers of Philippine Scouts retired under the provisions of this section shall not form part of the limited retired list now authorized by law.

"SEC. 27. Enlistments in the Regular Army: On and after the 1st day of November, 1916, all enlistments in the Regular Army shall be for a term of seven years, the first three years to be in the active service with the organizations of which those enlisted form a part and, except as otherwise provided herein, the last four years in the Regular Army Reserve hereinafter provided for: *Provided*, That at the expiration of three years' continuous service with such organizations, either under a first or any subsequent enlistment, any soldier may be reenlisted for another period of seven years, as above provided for, in which event he shall receive his final discharge from his prior enlistment: *Provided further*, That after the expiration of one year's honorable service any enlisted man serving within the continental limits of the United States whose company, troop, battery, or detachment commander shall report him as proficient and sufficiently trained may, in the discretion of the Secretary of War, be furloughed to the Regular Army Reserve under such regulations as the Secretary of War may prescribe, but no man furloughed to the reserve shall be eligible to reenlist in the service until the expiration of his term of seven years: *Provided further*, That in all enlistments hereafter accomplished under the provisions of this act three years shall be counted as an enlistment period in computing continuous-service pay: *Provided further*, That any noncommissioned officer discharged with an excellent character shall be permitted, at the expiration of three years in the active service, to reenlist in the organization from which discharged with the rank and grade held by him at the time of his discharge if he reenlists within 20 days after the date of such discharge: *Provided further*, That no person under the age of 18 years shall be enlisted or mustered into the military service of the United States without the written consent of his parents or guardians, provided that such minor has such parents or guardians entitled to his custody and control: *And provided further*, That the President is authorized in his discretion to utilize the services of postmasters of the second, third, and fourth classes in procuring the enlistment of recruits for the Army, and for each recruit accepted for enlistment in the Army the postmaster procuring his enlistment shall receive the sum of $5.

"In addition to military training, soldiers while in the active service shall hereafter be given the opportunity to study and receive instruction upon educational lines of such character as to increase their military efficiency and enable them to return to civil life better equipped for industrial, commercial, and general business occupations. Civilian teachers may be employed to aid the Army officers in giving such instruction, and part of this instruction may consist of vocational education either in agriculture or the mechanic arts. The Secretary of War, with the approval of the President, shall prescribe rules and regulations for conducting the instruction herein provided for, and the Secretary of War shall have the power at all times to suspend, increase, or decrease the amount of such instruction offered as may in his judgment be consistent with the requirements of military instruction and service of the soldiers.

"SEC. 28. Pay of certain enlisted men: Hereafter the monthly pay of enlisted men of certain grades of the Army created in this act shall be as follows, namely: Quartermaster sergeant, senior grade, Quartermaster Corps; master hospital sergeant, Medical Department; master engineers, senior grade, Corps of Engineers; and band leader, Infantry, Cavalry, Artillery, and Corps of Engineers, $75; hospital sergeant, Medical Department; and master engineer, junior grade, Corps of Engineers, $65; sergeant, first class, Medical Department, $50; sergeant, first class, Corps of Engineers; regimental supply sergeant, Infantry, Cavalry, Field Artillery, and Corps of Engineers; battalion supply sergeant, Corps of Engineers; and assistant engineer, Coast Artillery Corps, $45; assistant band leader, Infantry, Cavalry, Artillery, and Corps of Engineers; and sergeant bugler, Infantry, Cavalry, Artillery, and Corps of Engineers, $40; musician, first class, Infantry, Cavalry, Artillery, and Corps of Engineers; supply sergeant, mess sergeant, and stable sergeant, Corps of Engineers; sergeant Medical Department, $36; supply sergeant, Infantry, Cavalry, and Artillery; mess sergeant, Infantry, Cavalry, and Artillery; cook, Medical Department; horseshoer, Infantry, Cavalry, Artillery, Corps of Engineers, Signal Corps, and Medical Department; stable sergeant, Infantry and Cavalry; radio sergeant, Coast Artillery Corps; and musicians, second class, Infantry, Cavalry, Artillery, and Corps of Engineers, $30; musician, third class, Infantry, Cavalry, Artillery, and Corps of Engineers; corporal, Medical Department, $24; saddler, Infantry, Cavalry, Field Artillery, Corps of Engineers, and Medical Department; mechanic, Infantry, Cavalry, and Field Artillery, and Medical Department; farrier, Medical Department; and wagoner, Infantry, Field Artillery, and Corps of Engineers, $21; private, first class, Infantry, Cavalry, Artillery, and Medical Department, $18; private, Medical Department, and bugler, $15. Nothing herein contained shall operate to reduce the pay or allowances now authorized by law for any grade of enlisted men of the Army.

"SEC. 29. Final discharge of enlisted men: No enlisted man in the Regular Army shall receive his final discharge until the termination of his seven-year term of enlistment except upon reenlistment as provided for in this act or as provided by law for discharge prior to expiration of term of enlistment, but when an enlisted man is furloughed to the Regular Army Reserve his account shall be closed and he shall be paid in full to the date such furlough becomes effective, including allowances provided by law for discharged soldiers: *Provided*, That when by reason of death or disability of a member of the family of an enlisted man occurring after his enlistment members of his family become dependent upon him for support, he may, in the discretion of the Secretary of War, be discharged from the service of the United States or be furloughed to the Regular Army Reserve, upon due proof being made of such condition: *Provided further*, That when an enlisted man is discharged by purchase while in active service he shall be furloughed to the Regular Army Reserve, unless, in the discretion of the Secretary of War, he is given a final discharge from the Army.

"SEC. 30. Composition of the Regular Army Reserve: The Regular Army Reserve shall consist of, first, all enlisted men now in the Army Reserve or who shall hereafter become members of the Army Reserve under the provisions of existing law; second, all enlisted men furloughed to or enlisted in the Regular Army Reserve under the provisions of this act; and, third, any person holding an honorable discharge from the Regular Army

with character reported at least good who is physically qualified for the duties of a soldier and not over 45 years of age who enlists in the Regular Army Reserve for a period of four years.

"SEC. 31. The President is authorized to assign members of the Regular Army Reserve as reserves to particular organizations of the Regular Army, or to organize the Regular Army Reserve, or any part thereof, into units or detachments of any arm, corps, or department in such manner as he may prescribe, and to assign to such units and detachments officers of the Regular Army or of the Officers' Reserve Corps herein provided for; and he may summon the Regular Army Reserve, or any part thereof, for field training for a period not exceeding 15 days in each year, the reservists to receive travel expenses and pay at the rate of their respective grades in the Regular Army during such periods of training; and in the event of actual or threatened hostilities he may mobilize the Regular Army Reserve in such manner as he may determine, and thereafter retain it, or any part thereof, in active service for such period as he may determine the conditions demand: *Provided*, That all enlistments in the Regular Army, including those in the Regular Army Reserve, which are in force on the date of the outbreak of war shall continue in force for one year, unless sooner terminated by order of the Secretary of War, but nothing herein shall be construed to shorten the time of enlistment prescribed: *Provided further*, That, subject to such regulations as the President may prescribe for their proper identification and location and physical condition, the members of the Regular Army Reserve shall be paid semiannually at the rate of $24 a year while in the reserve.

"SEC. 32. Regular Army Reserve in time of war: When mobilized by order of the President, the members of the Regular Army Reserve shall, so long as they may remain in active service, receive the pay and allowances of enlisted men of the Regular Army of like grades: *Provided*, That any enlisted man who shall have reenlisted in the Regular Army Reserve shall receive during such active service the additional pay now provided by law for enlisted men in his arm of the service in the second enlistment period: *Provided further*, That upon reporting for duty, and being found physically fit for service, members of the Regular Army Reserve shall receive a sum equal to $3 per month for each month during which they shall have belonged to the reserve, as well as the actual necessary cost of transportation and subsistence from their homes to the places at which they may be ordered to report for duty under such summons: *And provided further*, That service in the Regular Army Reserve shall confer no right to retirement or retired pay, and members of the Regular Army Reserve shall become entitled to pension only through disability incurred while on active duty in the service of the United States.

"SEC. 33. Use of other departments of the Government: The President may, subject to such rules and regulations as in his judgment may be necessary, utilize the services of members and employees of all departments of the Government of the United States, without expense to the individual reservist, for keeping in touch with, paying, and mobilizing the Regular Army Reserve, the Enlisted Reserve Corps, and other reserve organizations.

"SEC. 34. Reenlistment in time of war: For the purpose of utilizing as an auxiliary to the Regular Army Reserve the services of men who have had experience and training in the Regular Army or in the United States Volunteers outside of the continental limits of the United States, in time of actual or threatened hostilities, and after the President shall, by proclamation, have called upon honorably discharged soldiers of the Regular Army to present themselves for reenlistment therein within a specified period, subject to such conditions as may be prescribed, any person who shall have been discharged honorably from said Army, with character reported as at least good, and who, having been found physically qualified for the duties of a soldier, if not over 50 years of age, shall reenlist in the line of said Army, or in the Signal, Quartermaster, or Medical Department thereof, within the period that shall be specified in said proclamation, shall receive on so reenlisting a bounty which shall be computed at the rate of $8 for each month for the first year of the period that shall have elapsed since his last discharge from the Regular Army and the date of his reenlistment therein under the terms of said proclamation; at the rate of $6 per month for the second year of such period; at the rate of $4 per month for the third year of such period; and at the rate of $2 per month for any subsequent year of such period; but no bounty in excess of $300 shall be paid to any person under the terms of this section.

"SEC. 35. Enlisted men prohibited from civil employment: Hereafter no enlisted man in the active service of the United States in the Army, Navy, and Marine Corps, respectively, whether a noncommissioned officer, musician, or private, shall be detailed, ordered, or permitted to leave his post to engage in any pursuit, business, or performance in civil life, for emolument, hire, or otherwise, when the same shall interfere with the customary employment and regular engagement of local civilians in the respective arts, trades, or professions.

"SEC. 36. Sergeants for duty with the National Guard: For the purpose of assisting in the instruction of the personnel and care of property in the hands of the National Guard the Secretary of War is authorized to detail from the Infantry, Cavalry, Field Artillery, Corps of Engineers, Coast Artillery Corps, Medical Department, and Signal Corps of the Regular Army not to exceed 1,000 sergeants for duty with corresponding organizations of the National Guard and not to exceed 100 sergeants for duty with the disciplinary organizations at the United States Disciplinary Barracks, who shall be additional to the sergeants authorized by this act for the corps, companies, troops, batteries, and detachments from which they may be detailed.

"SEC. 37. The officers' reserve corps: For the purpose of securing a reserve of officers available for service as temporary officers in the Regular Army, as provided for in this act and in section 8 of the act approved April 25, 1914, as officers of the Quartermaster Corps and other staff corps and departments, as officers for recruit rendezvous and depots, and as officers of volunteers, there shall be organized, under such rules and regulations as the President may prescribe not inconsistent with the provisions of this act, an officers' reserve corps of the Regular Army. Said corps shall consist of sections corresponding to the various arms, staff corps, and departments of the Regular Army. Except as otherwise herein provided, a member of the officers' reserve corps shall not be subject to call for service in time of peace, and whenever called upon for service shall not, without his consent, be so called in a lower grade than that held by him in said reserve corps.

"The President alone shall be authorized to appoint and commission as reserve officers in the various sections of the officers' reserve corps, in all grades up to and including that of major, such citizens as, upon examination prescribed by the President, shall be found physically, mentally, and morally qualified to hold such commissions: *Provided*, That the proportion of officers in any section of the officers' reserve corps shall not exceed the proportion for the same grade in the corresponding arm, corps, or department of the Regular Army, except that the number commissioned in the lowest authorized grade in any section of the officers' reserve corps shall not be limited.

"All persons now carried as duly qualified and registered pursuant to section 23 of the act of Congress approved January 21, 1903, shall, for a period of three years after the passage of this act, be eligible for appointment in the officers' reserve corps in the section corresponding to the arm, corps, or department for which they have been found qualified, without further examination, except a physical examination, and subject to the limitations as to age and rank herein prescribed: *Provided*, That any person carried as qualified and registered in the grade of colonel or lieutenant colonel pursuant to the provisions of said act on the date when this act becomes effective may be commissioned and recommissioned in the officers' reserve corps with the rank for which he has been found qualified and registered, but when such person thereafter shall become separated from the officers' reserve corps for any reason the vacancy so caused shall not be filled, and such office shall cease and determine.

"No person shall, except as hereinafter provided, be appointed or reappointed a second lieutenant in the Officers' Reserve Corps after he shall have reached the age of 32 years, a first lieutenant after he shall have reached the age of 36 years, a captain after he shall have reached the age of 40 years, or a major after he shall have reached the age of 45 years. When an officer of the Reserve Corps shall reach the age limit fixed for appointment or reappointment in the grade in which commissioned he shall be honorably discharged from the service of the United States, and be entitled to retain his official title and, on occasions of ceremony, to wear the uniform of the highest grade he shall have held in the Officers' Reserve Corps: *Provided*, That nothing in the foregoing provisions as to the ages of officers shall apply to the appointment or reappointment of officers of the Quartermaster, Engineer, Ordnance, Signal, Judge Advocate, and Medical sections of said Reserve Corps.

"One year after the passage of this act the Medical Reserve Corps, as now constituted by law, shall cease to exist. Members thereof may be commissioned in the Officers' Reserve Corps, subject to the provisions of this act, or may be honorably discharged from the service. The Secretary of War may, in time of peace, order first lieutenants of the medical section of the Officers' Reserve Corps, with their consent, to active duty in

the service of the United States in such numbers as the public interests may require and the funds appropriated may permit, and may relieve them from such duty when their services are no longer necessary. While on such duty they shall receive the pay and allowances, including pay for periods of sickness and leaves of absence, of officers of corresponding rank and length of active service in the Regular Army.

"The commissions of all officers of the Officers' Reserve Corps shall be in force for a period of five years unless sooner terminated in the discretion of the President. Such officers may be recommissioned, either in the same or higher grades, for successive periods of five years, subject to such examinations and qualifications as the President may prescribe and to the age limits prescribed herein: *Provided*, That officers of the Officers' Reserve Corps shall have rank therein in the various sections of said Reserve Corps according to grades and to length of service in their grades.

"SEC. 38. The Officers' Reserve Corps in war: In time of actual or threatened hostilities the President may order officers of the Officers' Reserve Corps, subject to such subsequent physical examinations as he may prescribe, to temporary duty with the Regular Army in grades thereof which can not, for the time being, be filled by promotion, or as officers in volunteer or other organizations that may be authorized by law, or as officers at recruit rendezvous and depots, or on such other duty as the President may prescribe. While such reserve officers are on such service they shall, by virtue of their commissions as reserve officers, exercise command appropriate to their grade and rank in the organizations to which they may be assigned, and shall be entitled to the pay and allowances of the corresponding grades in the Regular Army, with increase of pay for length of active service, as allowed by law for officers of the Regular Army, from the date upon which they shall be required by the terms of their orders to obey the same: *Provided*, That officers so ordered to active service shall take temporary rank among themselves, and in their grades in the organizations to which assigned, according to the dates of orders placing them on active service; and they may be promoted, in accordance with such rank, to vacancies in volunteer organizations or to temporary vacancies in the Regular Army thereafter occurring in the organizations in which they shall be serving: *Provided further*, That officers of the Officers' Reserve Corps shall not be entitled to retirement or retired pay, and shall be entitled to pension only for disability incurred in the line of duty and while in active service.

"Any officer who, while holding a commission in the Officers' Reserve Corps, shall be ordered to active service by the Secretary of War shall, from the time he shall be required by the terms of his order to obey the same, be subject to the laws and regulations for the government of the Army of the United States, in so far as they are applicable to officers whose permanent retention in the military service is not contemplated.

"SEC. 39. Instruction of officers of the Officers' Reserve Corps: To the extent provided for from time to time by appropriations for this specific purpose, the Secretary of War is authorized to order reserve officers to duty with troops or at field exercises, or for instruction, for periods not to exceed 15 days in any one calendar year, and while so serving such officers shall receive the pay and allowances of their respective grades in the Regular Army: *Provided*, That, with the consent of the reserve officers concerned, and within the limit of funds available for the purpose, such periods of duty may be extended for reserve officers as the Secretary of War may direct: *Provided further*, That in time of actual or threatened hostilities, after all available officers of any section of the Officers' Reserve Corps corresponding to any arm, corps, or department of the Regular Army shall have been ordered into active service, officers of Volunteers may be appointed in such arm, corps, or department as may be authorized by law: *Provided further*, That nothing herein shall operate to prevent the appointment of any officer of the Regular Army as an officer of Volunteers before all the officers of the Officers' Reserve Corps or any section thereof shall have been ordered into active service: *And provided further*, That in determining the relative rank and the right to retirement of an officer of the Regular Army, active duty performed by him while serving in the Officers' Reserve Corps shall not be reckoned.

"SEC. 40. The Reserve Officers' Training Corps: The President is hereby authorized to establish and maintain in civil educational institutions a Reserve Officers' Training Corps, which shall consist of a senior division organized at universities and colleges requiring four years of collegiate study for a degree, including State universities and those State institutions that are required to provide instruction in military tactics under the provisions of the act of Congress of July 2, 1862, donating lands for the establishment of colleges where the leading object shall be practical instruction in agriculture and the mechanic arts, including military tactics, and a junior division organized at all other public or private educational institutions, except that units of the senior division may be organized at those essentially military schools which do not confer an academic degree but which, as a result of the annual inspection of such institutions by the War Department, are specially designated by the Secretary of War as qualified for units of the senior division, and each division shall consist of units of the several arms or corps in such number and of such strength as the President may prescribe.

"SEC. 41. The President may, upon the application of any State institution described in section 40 of this act, establish and maintain at such institution one or more units of the Reserve Officers' Training Corps: *Provided*, That no such unit shall be established or maintained at any such institution until an officer of the Army shall have been detailed as professor of military science and tactics, nor until such institution shall maintain under military instruction at least 100 physically fit male students.

"SEC. 42. The President may, upon the application of any established educational institution in the United States other than a State institution described in section 40 of this act, the authorities of which agree to establish and maintain a two-years' elective or compulsory course of military training as a minimum for its physically fit male students, which course when entered upon by any student shall, as regards such student, be a prerequisite for graduation, establish and maintain at such institution one or more units of the Reserve Officers' Training Corps: *Provided*, That no such unit shall be established or maintained at any such institution until an officer of the Army shall have been detailed as professor of military science and tactics, nor until such institution shall maintain under military instruction at least 100 physically fit male students.

"SEC. 43. The Secretary of War is hereby authorized to prescribe standard courses of theoretical and practical military training for units of the Reserve Officers' Training Corps, and no unit of the senior division shall be organized or maintained at any educational institution the authorities of which fail or neglect to adopt into their curriculum the prescribed courses of military training for the senior division or to devote at least an average of three hours per week per academic year to such military training; and no unit of the junior division shall be organized or maintained at any educational institution the authorities of which fail or neglect to adopt into their curriculum the prescribed courses of military training for the junior division, or to devote at least an average of three hours per week per academic year to such military training.

"SEC. 44. Eligibility to membership in the Reserve Officers' Training Corps shall be limited to students of institutions in which units of such corps may be established who are citizens of the United States, who are not less than 14 years of age, and whose bodily condition indicates that they are physically fit to perform military duty, or will be so upon arrival at military age.

"SEC. 45. The President is hereby authorized to detail such numbers of officers of the Army, either active or retired, not above the grade of colonel, as may be necessary, for duty as professors and assistant professors of military science and tactics at institutions where one or more units of the Reserve Officers' Training Corps are maintained; but the total number of active officers so detailed at educational institutions shall not exceed 300, and no active officer shall be so detailed who has not had five years' commissioned service in the Army. In time of peace retired officers shall not be detailed under the provisions of this section without their consent. Retired officers below the grade of lieutenant colonel so detailed shall receive the full pay and allowances of their grade, and retired officers above the grade of major so detailed shall receive the same pay and allowances as a retired major would receive under a like detail. No detail of officers on the active list of the Regular Army under the provisions of this section shall extend for more than four years.

"SEC. 46. The President is hereby authorized to detail for duty at institutions where one or more units of the Reserve Officers' Training Corps are maintained such number of enlisted men, either active or retired or of the Regular Army reserve, as he may deem necessary, but the number of active noncommissioned officers so detailed shall not exceed 500, and all active noncommissioned officers so detailed shall be additional in their respective grades to those otherwise authorized for the Army. Retired enlisted men or members of the Regular Army reserve

shall not be detailed under the provisions of this section without their consent. While so detailed they shall receive active pay and allowances.

"SEC. 47. The Secretary of War, under such regulations as he may prescribe, is hereby authorized to issue to institutions at which one or more units of the Reserve Officers' Training Corps are maintained such public animals, arms, uniforms, equipment, and means of transportation as he may deem necessary, and to forage at the expense of the United States public animals so issued. He shall require from each institution to which property of the United States is issued a bond in the value of the property issued for the care and safe-keeping thereof, and for its return when required.

"SEC. 48. The Secretary of War is hereby authorized to maintain camps for the further practical instruction of the members of the Reserve Officers' Training Corps, no such camps to be maintained for a period longer than six weeks in any one year, except in time of actual or threatened hostilities; to transport members of such corps to and from such camps at the expense of the United States so far as appropriations will permit; to subsist them at the expense of the United States while traveling to and from such camps and while remaining therein so far as appropriations will permit; to use the Regular Army, such other military forces as Congress from time to time authorizes, and such Government property as he may deem necessary for the military training of the members of such corps while in attendance at such camps; to prescribe regulations for the government of such corps; and to authorize, in his discretion, the formation of company units thereof into battalion and regimental units.

"SEC. 49. The President alone, under such regulations as he may prescribe, is hereby authorized to appoint in the Officers' Reserve Corps any graduate of the senior division of the Reserve Officers' Training Corps who shall have satisfactorily completed the further training provided for in section 50 of this act, or any graduate of the junior division who shall have satisfactorily completed the courses of military training prescribed for the senior division and the further training provided for in sectior 50 of this act, and shall have participated in such practical instruction subsequent to graduation as the Secretary of War shall prescribe, who shall have arrived at the age of 21 years and who shall agree, under oath in writing, to serve the United States in the capacity of a reserve officer of the Army during a period of at least 10 years from the date of his appointment as such reserve officer, unless sooner discharged by proper authority; but the total number of reserve officers so appointed shall not exceed 50,000: *Provided*, That any graduate qualified under the provisions of this section undergoing a postgraduate course at any institution shall not be eligible for appointment as a reserve officer while undergoing such postgraduate course, but his ultimate eligibility upon completion of such postgraduate course for such appointment shall not be affected because of his having undergone such postgraduate course.

"SEC. 50. When any member of the senior division of the Reserve Officers' Training Corps has completed two academic years of service in that division, and has been selected for further training by the president of the institution and by its professor of military science and tactics, and has agreed in writing to continue in the Reserve Officers' Training Corps for the remainder of his course in the institution, devoting five hours per week to the military training prescribed by the Secretary of War, and has agreed in writing to pursue the courses in camp training prescribed by the Secretary of War, he may be furnished, at the expense of the United States, with commutation of subsistence at such rate, not exceeding the cost of the garrison ration prescribed for the Army, as may be fixed by the Secretary of War, during the remainder of his service in the Reserve Officers' Training Corps.

"SEC. 51. Any physically fit male citizen of the United States, between the ages of 21 and 27 years, who shall have graduated prior to the date of this act from any educational institution at which an officer of the Army was detailed as professor of military science and tactics, and who, while a student at such institution, completed courses of military training under the direction of such professor of military science and tactics substantially equivalent to those prescribed pursuant to this act for the senior division, shall, after satisfactorily completing such additional practical military training as the Secretary of War shall prescribe, be eligible for appointment to the Officers' Reserve Corps and as a temporary additional second lieutenant in accordance with the terms of this act.

"SEC. 52. The President alone is hereby authorized to appoint and commission as a temporary second lieutenant of the Regular Army in time of peace for purposes of instruction, for a period not exceeding six months, with the allowances now provided by law for that grade, but with pay at the rate of $100 per month, any reserve officer appointed pursuant to sections 49 and 51 of this act and to attach him to a unit of the Regular Army for duty and training during the period covered by his appointment as such temporary second lieutenant, and upon the expiration of such service with the Regular Army such officer shall revert to his status as a reserve officer.

"SEC. 53. No reserve officer or temporary second lieutenant appointed pursuant to this act shall be entitled to retirement or to retired pay and shall be eligible for pension only for disability incurred in line of duty in active service or while serving with the Regular Army pursuant to the provisions of this act: *Provided*, That in time of war the President may order reserve officers appointed under the provisions of this act to active duty with any of the military forces of the United States in any grades not below that of second lieutenant, and while on such active duty they shall be subject to the Rules and Articles of War: *And provided further*, That The Adjutant General of the Army shall, under the direction and supervision of the Secretary of War, obtain, compile, and keep continually up to date all obtainable information as to the names, ages, addresses, occupations, and qualifications for appointment as commissioned officers of the Army, in time of war or other emergency, of men of suitable ages who, by reason of having received military training in civilian educational institutions or elsewhere, may be regarded as qualified and available for appointment as such commissioned officers.

"SEC. 54. Training camps: The Secretary of War is hereby authorized to maintain, upon military reservations or elsewhere, camps for the military instruction and training of such citizens as may be selected for such instruction and training, upon their application and under such terms of enlistment and regulations as may be prescribed by the Secretary of War; to use, for the purpose of maintaining said camps and imparting military instruction and training thereat, such arms, ammunition, accouterments, equipment, tentage, field equipage, and transportation belonging to the United States as he may deem necessary; to furnish, at the expense of the United States, uniforms, subsistence, transportation by the most usual and direct route within such limits as to territory as the Secretary of War may prescribe, and medical supplies to persons receiving instruction at said camps during the period of their attendance thereat, to authorize such expenditures, from proper Army appropriations, as he may deem necessary for water, fuel, light, temporary structures, not including quarters for officers nor barracks for men, screening, and damages resulting from field exercises, and other expenses incidental to the maintenance of said camps, and the theoretical winter instruction in connection therewith; and to sell to persons receiving instruction at said camps, for cash and at cost price plus 10 per cent, quartermaster and ordnance property, the amount of such property sold to any one person to be limited to that which is required for his proper equipment. All moneys arising from such sales shall remain available throughout the fiscal year following that in which the sales are made, for the purpose of that appropriation from which the property sold was authorized to be supplied at the time of the sale. The Secretary of War is authorized further to prescribe the courses of theoretical and practical instruction to be pursued by persons attending the camps authorized by this section; to fix the period during which such camps shall be maintained; to prescribe rules and regulations for the government thereof; and to employ thereat officers and enlisted men of the Regular Army in such numbers and upon such duties as he may designate.

"SEC. 55. The Enlisted Reserve Corps: For the purpose of securing an additional reserve of enlisted men for military service with the Engineer, Signal, and Quartermaster Corps and the Ordnance and Medical Departments of the Regular Army, an Enlisted Reserve Corps, to consist of such number of enlisted men of such grade or grades as may be designated by the President from time to time, is hereby authorized, such authorization to be effective on and after the 1st day of July, 1916.

"There may be enlisted in the grade or grades hereinbefore specified, for a period of four years, under such rules as may be prescribed by the President, citizens of the United States, or persons who have declared their intentions to become citizens of the United States, subject to such physical, educational, and practical examination as may be prescribed in said rules. For men enlisting in said grade or grades certificates of enlistment in the Enlisted Reserve Corps shall be issued by The Adjutant General of the Army, but no such man shall be enlisted in said corps unless he shall be found physically, mentally, and morally qualified to hold such certificate and unless he shall be between the ages of 18 and 45 years. The certificates so given shall confer upon the holders when called into active service or for purposes of instruction and training, and during the period of such

active service, instruction, or training, all the authority, rights, and privileges of like grades of the Regular Army. Enlisted men of the Enlisted Reserve Corps shall take precedence in said corps according to the dates of their certificates of enlistment therein and when called into active service or when called out for purposes of instruction or training shall take precedence next below all other enlisted men of like grades in the Regular Army. And the Secretary of War is hereby authorized to issue to members of the Enlisted Reserve Corps and to persons who have participated in at least one encampment for the military instruction of citizens, conducted under the auspices of the War Department, distinctive rosettes or knots designed for wear with civilian clothing, and whenever a rosette or knot issued under the provisions of this section shall have been lost, destroyed, or rendered unfit for use without fault or neglect upon the part of the person to whom it is issued, the Secretary of War shall cause a new rosette or knot to be issued to such person without charge therefor. Any person who is not an enlisted man of the Enlisted Reserve Corps and shall not have participated in at least one encampment for the military instruction of citizens, conducted under the auspices of the War Department, and who shall wear such rosette or knot shall be guilty of misdemeanor punishable by a fine of not exceeding $300, or imprisonment not exceeding six months, or both.

"The President is authorized to assign members of the Enlisted Reserve Corps as reserves to particular organizations of the Regular Army, or to organize the Enlisted Reserve Corps, or any part thereof, into units or detachments of any arm, corps, or department in such manner as he may prescribe, and to assign to such units and detachments officers of the Regular Army or of the Officers' Reserve Corps, herein provided for.

"To the extent provided from time to time by appropriations the Secretary of War may order enlisted men of the Enlisted Reserve Corps to active service for purposes of instruction or training for periods not to exceed 15 days in any one calendar year: *Provided*, That, with the consent of such enlisted men and within the limits of funds available for such purposes, such periods of active service may be extended for such number of enlisted men as may be deemed necessary.

"Enlisted men of the Enlisted Reserve Corps shall receive the pay and allowances of their respective grades, but only when ordered into active service, including the time required for actual travel from their homes to the places to which ordered and return to their homes: *Provided*, That said enlisted men shall not be entitled to retirement or retirement pay, nor shall they be entitled to pensions except for physical disability incurred in line of duty while in active service or while traveling under orders of competent authority to or from designated places of duty.

"The uniform to be worn by enlisted men of the Enlisted Reserve Corps, except corps insignia, shall be the same as prescribed for enlisted men of the Regular Army Reserve, and that in lieu of any money allowance for clothing there shall be issued to each enlisted man of the Enlisted Reserve Corps in time of peace such articles of clothing and equipment as the President may direct: *Provided*, That any clothing or other equipment issued to any enlisted man of the said corps shall remain the property of the United States, and in case of loss or destruction of any article the article so lost or destroyed shall be replaced by issue to the enlisted man and the value thereof deducted from any pay due or to become due him, unless it shall be made to appear that such loss or destruction was not due to neglect or other fault on his part: *Provided further*, That any clothing or other equipment issued to enlisted men of the Enlisted Reserve Corps which shall have become unserviceable through ordinary wear and tear in the service of the United States shall be received back by the United States and serviceable like articles issued in lieu thereof: *Provided further*, That when enlisted men of the Enlisted Reserve Corps shall be discharged or otherwise separated from the service, all arms, equipage, clothing, and other property issued to them shall be accounted for under such regulations as may be prescribed by the Secretary of War.

"Any enlisted man of the Enlisted Reserve Corps ordered to active service or for purposes of instruction or training shall, from the time he is required by the terms of the order to obey the same, be subject to the laws and regulations for the government of the Army of the United States.

"The Secretary of War is hereby authorized to discharge any enlisted member of the Enlisted Reserve Corps when his services shall be no longer required or when he shall have by misconduct unfitted himself for further service in the said corps: *Provided*, That any enlisted man of said corps who shall be ordered upon active duty as herein provided and who shall willfully fail to comply with the terms of the order so given him shall, in addition to any other penalty to which he may be subject, forfeit his certificate of enlistment.

"In time of actual or threatened hostilities the President may order the Enlisted Reserve Corps, in such numbers and at such times as may be considered necessary, to active service with the Regular Army, and while on such service members of said corps shall exercise command appropriate to their several grades and rank in the organizations to which they shall be assigned and shall be entitled to the pay and allowances of the corresponding grades in the Regular Army, with increase of pay for length of service as now allowed by law for the Regular Army: *Provided*, That upon a call by the President for a volunteer force the members of the Enlisted Reserve Corps may be mustered into the service of the United States as volunteers for duty with the Army in the grades held by them in the said corps, and shall be entitled to the pay and allowances of the corresponding grades in the Regular Army, with increase of pay for length of service, as now provided by law for the Regular Army: *And provided further*, That enlisted men of the Enlisted Reserve Corps shall not acquire by virtue of issuance of certificates of enlistment to them a vested right to be mustered into the volunteer service of the United States.

"SEC. 56. Military equipment and instructors at other schools and colleges: Such arms, tentage, and equipment as the Secretary of War shall deem necessary for proper military training shall be supplied by the Government to schools and colleges, other than those provided for in section 47 of this act, having a course of military training prescribed by the Secretary of War and having not less than 100 physically fit male students above the age of 14 years, under such rules and regulations as he may prescribe; and the Secretary of War is hereby authorized to detail such commissioned and noncommissioned officers of the Army to said schools and colleges, other than those provided for in sections 45 and 46 of this act, detailing not less than one such officer or noncommissioned officer to each 500 students under military instruction.

"SEC. 57. Composition of the militia: The militia of the United States shall consist of all able-bodied male citizens of the United States and all other able-bodied males who have or shall have declared their intention to become citizens of the United States, who shall be more than 18 years of age and, except as hereinafter provided, not more than 45 years of age, and said militia shall be divided into three classes, the National Guard, the Naval Militia, and the Unorganized Militia.

"SEC. 58. Composition of the National Guard: The National Guard shall consist of the regularly enlisted militia between the ages of 18 and 45 years organized, armed, and equipped as hereinafter provided, and of commissioned officers between the ages of 21 and 64 years.

"SEC. 59. Exemptions from militia duty: The Vice President of the United States; the officers, judicial and executive, of the Government of the United States and of the several States and Territories; persons in the military or naval service of the United States; customhouse clerks; persons employed by the United States in the transmission of the mail; artificers and workmen employed in the armories, arsenals, and navy yards of the United States; pilots; mariners actually employed in the sea service of any citizen or merchant within the United States shall be exempt from militia duty without regard to age, and all persons who because of religious belief shall claim exemption from military service, if the conscientious holding of such belief by such persons shall be established under such regulations as the President shall prescribe, shall be exempted from militia service in a combatant capacity; but no person so exempted shall be exempt from militia service in any capacity that the President shall declare to be noncombatant.

"SEC. 60. Organization of National Guard units: Except as otherwise specifically provided herein, the organization of the National Guard, including the composition of all units thereof, shall be the same as that which is or may hereafter be prescribed for the Regular Army, subject in time of peace to such general exceptions as may be authorized by the Secretary of War. And the President may prescribe the particular unit or units, as to branch or arm of service, to be maintained in each State, Territory, or the District of Columbia in order to secure a force which, when combined, shall form complete higher tactical units.

"SEC. 61. Maintenance of other troops by the States: No State shall maintain troops in time of peace other than as authorized in accordance with the organization prescribed under this act: *Provided*, That nothing contained in this act shall be construed as limiting the rights of the States and Territories in the use of the National Guard within their respective borders in time of peace: *Provided further*, That nothing contained in this act shall prevent the organization and maintenance of State police or constabulary.

"SEC. 62. Number of the National Guard: The number of enlisted men of the National Guard to be organized under this act within one year from its passage shall be for each State in the proportion of 200 such men for each Senator and Representative in Congress from such State, and a number to be determined by the President for each Territory and the District of Columbia, and shall be increased each year thereafter in the proportion of not less than 50 per cent until a total peace strength of not less than 800 enlisted men for each Senator and Representative in Congress shall have been reached: *Provided*, That in States which have but one Representative in Congress such increase shall be at the discretion of the President: *Provided further*, That this shall not be construed to prevent any State, Territory, or the District of Columbia from organizing the full number of troops required under this section in less time than is specified in this section, or from maintaining existing organizations if they shall conform to such rules and regulations regarding organization, strength, and armament as the President may prescribe: *And provided further*, That nothing in this act shall be construed to prevent any State with but one Representative in Congress from organizing one or more regiments of troops, with such auxiliary troops as the President may prescribe; such organizations and members of such organizations to receive all the benefits accruing under this act under the conditions set forth herein: *Provided further*, That the word Territory as used in this act and in all laws relating to the land militia and National Guard shall include and apply to Hawaii, Alaska, Porto Rico, and the Canal Zone, and the militia of the Canal Zone shall be organized under such rules and regulations, not in conflict with the provisions of this act, as the President may prescribe.

"SEC. 63. Any corps of Artillery, Cavalry, or Infantry existing in any of the States on the passage of the act of May 8, 1792, which by the laws, customs, or usages of said States has been in continuous existence since the passage of said act, under its provisions and under the provisions of section 232 and sections 1625 to 1660, both inclusive, of title 16 of the Revised Statutes of 1873, and the act of January 21, 1903, relating to the militia, shall be allowed to retain its ancient privileges, subject, nevertheless, to all duties required by law of militia: *Provided*, That said organizations may be a part of the National Guard and entitled to all the privileges of this act, and shall conform in all respects to the organization, discipline, and training of the National Guard in time of war: *Provided further*, That for purposes of training and when on active duty in the service of the United States they may be assigned to higher units, as the President may direct, and shall be subject to the orders of officers under whom they shall be serving.

"SEC. 64. Assignment of National Guard to brigades and divisions: For the purpose of maintaining appropriate organization and to assist in instruction and training, the President may assign the National Guard of the several States and Territories and the District of Columbia to divisions, brigades, and other tactical units, and may detail officers, either from the National Guard or the Regular Army, to command such units: *Provided*, That where complete units are organized within a State, Territory, or the District of Columbia the commanding officers thereof shall not be displaced under the provisions of this section.

"SEC. 65. Chiefs of staff of National Guard divisions: The President may detail one officer of the Regular Army as chief of staff and one officer of the Regular Army or the National Guard as assistant to the chief of staff of any division of the National Guard in the service of the United States as a National Guard organization: *Provided*, That in order to insure the prompt mobilization of the National Guard in time of war or other emergency, the President may, in time of peace, detail an officer of the Regular Army to perform the duties of chief of staff for each fully organized tactical division of the National Guard.

"SEC. 66. Adjutants general of States, etc.: The adjutants general of the States, Territories, and the District of Columbia and the officers of the National Guard shall make such returns and reports to the Secretary of War, or to such officers as he may designate, at such times and in such form as the Secretary of War may from time to time prescribe: *Provided*, That the adjutants general of the Territories and of the District of Columbia shall be appointed by the President with such rank and qualifications as he may prescribe, and each adjutant general for a Territory shall be a citizen of the Territory for which he is appointed.

"SEC. 67. Appropriation, apportionment, and disbursement of funds for the National Guard: A sum of money shall hereafter be appropriated annually, to be paid out of any money in the Treasury not otherwise appropriated, for the support of the National Guard, including the expense of providing arms, ordnance stores, quartermaster stores, and camp equipage, and all other military supplies for issue to the National Guard, and such other expenses pertaining to said guard as are now or may hereafter be authorized by law.

"The appropriation provided for in this section shall be apportioned among the several States and Territories under just and equitable procedure to be prescribed by the Secretary of War and in direct ratio to the number of enlisted men in active service in the National Guard existing in such States and Territories at the date of apportionment of said appropriation, and to the District of Columbia, under such regulations as the President may prescribe: *Provided*, That the sum so apportioned among the several States, Territories, and the District of Columbia shall be available under such rules as may be prescribed by the Secretary of War for the actual and necessary expenses incurred by officers and enlisted men of the Regular Army when traveling on duty in connection with the National Guard; for the transportation of supplies furnished to the National Guard for the permanent equipment thereof; for office rent and necessary office expenses of officers of the Regular Army on duty with the National Guard; for the expenses of the Militia Bureau, including clerical services, now authorized for the Division of Militia Affairs; for expenses of enlisted men of the Regular Army on duty with the National Guard, including quarters, fuel, light, medicines, and medical attendance; and such expenses shall constitute a charge against the whole sum annually appropriated for the support of the National Guard, and shall be paid therefrom and not from the allotment duly apportioned to any particular State, Territory, or the District of Columbia; for the promotion of rifle practice, including the acquisition, construction, maintenance, and equipment of shooting galleries and suitable target ranges; for the hiring of horses and draft animals for the use of mounted troops, batteries, and wagons; for forage for the same; and for such other incidental expenses in connection with lawfully authorized encampments, maneuvers, and field instruction as the Secretary of War may deem necessary, and for such other expenses pertaining to the National Guard as are now or may hereafter be authorized by law.

"The governor of each State and Territory and the commanding general of the National Guard of the District of Columbia shall appoint, designate, or detail, subject to the approval of the Secretary of War, an officer of the National Guard of the State, Territory, or District of Columbia who shall be regarded as property and disbursing officer for the United States. He shall receipt and account for all funds and property belonging to the United States in possession of the National Guard of his State, Territory, or District, and shall make such returns and reports concerning the same as may be required by the Secretary of War. The Secretary of War is authorized, on the requisition of the governor of a State or Territory or the commanding general of the National Guard of the District of Columbia, to pay to the property and disbursing officer thereof so much of its allotment out of the annual appropriation for the support of the National Guard as shall, in the judgment of the Secretary of War, be necessary for the purposes enumerated therein. He shall render, through the War Department, such accounts of Federal funds intrusted to him for disbursement as may be required by the Treasury Department. Before entering upon the performance of his duties as property and disbursing officer he shall be required to give good and sufficient bond to the United States, the amount thereof to be determined by the Secretary of War, for the faithful performance of his duties and for the safekeeping and proper disposition of the Federal property and funds intrusted to his care. He shall, after having qualified as property and disbursing officer, receive pay for his services at a rate to be fixed by the Secretary of War, and such compensation shall be a charge against the whole sum annually appropriated for the support of the National Guard: *Provided*, That when traveling in the performance of his official duties under orders issued by the proper authorities he shall be reimbursed for his actual necessary traveling expenses, the sum to be made a charge against the allotment of the State, Territory, or District of Columbia: *Provided further*, That the Secretary of War shall cause an inspection of the accounts and records of the property and disbursing officer to be made by an inspector general of the Army at least once each year: *And provided further*, That the Secretary of War is empowered to make all rules and regulations necesssary to carry into effect the provisions of this section.

"SEC. 68. Location of units: The States and Territories shall have the right to determine and fix the location of the units and headquarters of the National Guard within their respective borders: *Provided*, That no organization of the National Guard,

members of which shall be entitled to and shall have received compensation under the provisions of this act, shall be disbanded without the consent of the President, nor, without such consent, shall the commissioned or enlisted strength of any such organization be reduced below the minimum that shall be prescribed therefor by the President.

"SEC. 69. Enlistments in the National Guard: Hereafter the period of enlistment in the National Guard shall be for six years, the first three years of which shall be in an active organization and the remaining three years in the National Guard reserve, hereinafter provided for, and the qualifications for enlistment shall be the same as those prescribed for admission to the Regular Army: *Provided*, That in the National Guard the privilege of continuing in active service during the whole of an enlistment period and of reenlisting in said service shall not be denied by reason of anything contained in this act.

"SEC. 70. Federal enlistment contract: Enlisted men in the National Guard of the several States, Territories, and the District of Columbia now serving under enlistment contracts which contain an obligation to defend the Constitution of the United States and to obey the orders of the President of the United States shall be recognized as members of the National Guard under the provisions of this act for the unexpired portion of their present enlistment contracts. When any such enlistment contract does not contain such obligation, the enlisted man shall not be recognized as a member of the National Guard until he shall have signed an enlistment contract and taken and subscribed to the following oath of enlistment, upon signing which credit shall be given for the period already served under the old enlistment contract: 'I do hereby acknowledge to have voluntarily enlisted this — day of ———, 19—, as a soldier in the National Guard of the United States and of the State of ———, for the period of three years in service and three years in the reserve, under the conditions prescribed by law, unless sooner discharged by proper authority. And I do solemnly swear that I will bear true faith and allegiance to the United States of America and to the State of ———, and that I will serve them honestly and faithfully against all their enemies whomsoever, and that I will obey the orders of the President of the United States and of the governor of the State of ———, and of the officers appointed over me according to law and the Rules and Articles of War.'

"SEC. 71. Hereafter all men enlisting for service in the National Guard shall sign an enlistment contract and take and subscribe to the oath prescribed in the preceding section of this act.

"SEC. 72. Discharge of enlisted men from the National Guard: An enlisted man discharged from service in the National Guard shall receive a discharge in writing in such form and with such classification as is or shall be prescribed for the Regular Army, and in time of peace discharges may be given prior to the expiration of terms of enlistment under such regulations as the President may prescribe.

"SEC. 73. Federal oath for National Guard officers: Commissioned officers of the National Guard of the several States, Territories, and the District of Columbia now serving under commissions regularly issued shall continue in office, as officers of the National Guard, without the issuance of new commissions: *Provided*, That said officers have taken, or shall take and subscribe to the following oath of office: 'I, ———, do solemnly swear that I will support and defend the Constitution of the United States and the constitution of the State of ———, against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I will obey the orders of the President of the United States and of the governor of the State of ———; that I make this obligation freely, without any mental reservation or purpose of evasion, and that I will well and faithfully discharge the duties of the office of ——— in the National Guard of the United States and of the State of ——— upon which I am about to enter, so help me God.'

"SEC. 74. Qualifications for National Guard officers: Persons hereafter commissioned as officers of the National Guard shall not be recognized as such under any of the provisions of this act unless they shall have been selected from the following classes and shall have taken and subscribed to the oath of office prescribed in the preceding section of this act: Officers or enlisted men of the National Guard; officers on the reserve or unassigned list of the National Guard; officers, active or retired, and former officers of the United States Army, Navy, and Marine Corps; graduates of the United States Military and Naval Academies and graduates of schools, colleges, and universities where military science is taught under the supervision of an officer of the Regular Army, and, for the technical branches and staff corps or departments, such other civilians as may be specially qualified for duty therein.

"SEC. 75. The provisions of this act shall not apply to any person hereafter appointed an officer of the National Guard unless he first shall have successfully passed such tests as to his physical, moral, and professional fitness as the President shall prescribe. The examination to determine such qualifications for commission shall be conducted by a board of three commissioned officers appointed by the Secretary of War from the Regular Army or the National Guard, or both.

"SEC. 76. Filling of vacancies when drafted into Federal service: All vacancies occurring in any grade of commissioned officers in any organization in the military service of the United States and composed of persons drafted from the National Guard under the provisions of this act shall be filled by the President, as far as practicable, by the appointment of persons similarly taken from said guard, and in the manner prescribed by law for filling similar vacancies occurring in the volunteer forces.

"SEC. 77. Elimination and disposition of officers: At any time the moral character, capacity, and general fitness for the service of any National Guard officer may be determined by an efficiency board of three commissioned officers, senior in rank to the officer whose fitness for service shall be under investigation, and if the findings of such board be unfavorable to such officer and be approved by the official authorized to appoint such an officer, he shall be discharged. Commissions of officers of the National Guard may be vacated upon resignation, absence without leave for three months, upon the recommendation of an efficiency board, or pursuant to sentence of a court-martial. Officers of said guard rendered surplus by the disbandment of their organizations shall be placed in the National Guard Reserve. Officers may, upon their own application, be placed in the said reserve.

"SEC. 78. The National Guard Reserve: Subject to such rules and regulations as the President may prescribe, a National Guard Reserve shall be organized in each State, Territory, and the District of Columbia, and shall consist of such organizations, officers, and enlisted men as the President may prescribe, or members thereof may be assigned as reserves to an active organization of the National Guard: *Provided*, That members of said reserve, when engaged in field or coast-defense training with the active National Guard, shall receive the same Federal pay and allowances as enlisted men of like grade on the active list of said guard when likewise engaged: *Provided further*, That, except as otherwise specifically provided in this act, no commissioned or enlisted reservist shall receive any pay or allowances out of any appropriation made by Congress for National Guard purposes.

"SEC. 79. Reserve battalions for recruit training: When members of the National Guard and the enlisted reserve thereof of any State, Territory, or the District of Columbia shall have been brought into the service of the United States in time of war, there shall be immediately organized, either from such enlisted reserve or from the unorganized militia, in such State, Territory, or District, one reserve battalion for each regiment of Infantry or Cavalry, or each 9 batteries of Field Artillery, or each 12 companies of Coast Artillery, brought into the service of the United States, and such reserve battalion shall constitute the fourth battalion of any such regiment or 12 companies of Coast Artillery. Reserve battalions shall consist of four companies of such strength as may be prescribed by the President of the United States. When the members of three or more regiments of the National Guard of any State, Territory, or District shall have been brought into the service of the United States, the reserve battalions of such regiments may be organized into provisional regiments and higher units. If for any reason there shall not be enough voluntary enlistments to keep the reserve battalions at the prescribed strength, a sufficient number of the unorganized militia shall be drafted into the service of the United States to maintain each of such battalions at the proper strength. As vacancies occur from death or other causes in any organization in the service of the United States and composed of men taken from the National Guard, men shall be transferred from the reserve battalions to the organizations in the field so that such organizations may be maintained at war strength. Officers for the reserve battalions provided for herein shall be drafted from the National Guard Reserve or Coast Artillery companies of the National Guard or the Officers' Reserve Corps, such officers to be taken, if practicable, from the States, respectively, in which the battalions shall be organized. Officers and noncommissioned officers returned to their home stations because of their inability to perform active field service may be assigned to reserve battalions for duty, and all soldiers invalided home shall be assigned to and carried on the rolls of reserve battalions until returned to duty or until discharged.

"SEC. 80. Leaves of absence for certain Government employees: All officers and employees of the United States and of the District of Columbia who shall be members of the National Guard shall be entitled to leave of absence from their respective duties, without loss of pay, time, or efficiency rating, on all days during which they shall be engaged in field or coast-defense training ordered or authorized under the provisions of this act.

"SEC. 81. Militia Bureau of the War Department: The National Militia Board created by section 11 of the act of May 27, 1908, amending section 20 of the act of January 21, 1903, shall, from the date of the approval of this act, be abolished. The Militia Division now existing in the War Department shall hereafter be known as the Militia Bureau of said department, shall, like other bureaus of said department, be under the immediate supervision of the Secretary of War, and shall not form a part of any other bureau, office, or other organization, but the Chief of the Militia Bureau shall be ex officio a member of the General Staff Corps: *Provided*, That the President may, in his discretion, assign to duty in the Militia Bureau as assistants to the chief thereof not to exceed one colonel and one lieutenant colonel of the National Guard, for terms of four years, and any such officer while so assigned shall, subject to such regulations as the President may prescribe, receive out of the whole fund appropriated for the support of the militia the pay and allowances of a Regular Army officer having the same rank and length of service as said National Guard officer, whose prior service in the Organized Militia shall be counted in ascertaining his rights under this proviso.

"SEC. 82. Armament, equipment, and uniform of the National Guard: The National Guard of the United States shall, as far as practicable, be uniformed, armed, and equipped with the same type of uniforms, arms, and equipments as are or shall be provided for the Regular Army.

"SEC. 83. The Secretary of War is hereby authorized to procure, under such regulations as the President may prescribe, by purchase or manufacture, within the limits of available appropriations made by Congress, and to issue from time to time to the National Guard, upon requisition of the governors of the several States and Territories or the commanding general of the National Guard of the District of Columbia, such number of United States service arms, with all accessories, field-artillery matériel, engineer, coast artillery, signal, and sanitary matériel, accouterments, field uniforms, clothing, equipage, publications, and military stores of all kinds, including public animals, as are necessary to arm, uniform, and equip for field service the National Guard in the several States, Territories, and the District of Columbia: *Provided*, That as a condition precedent to the issue of any property as provided for by this act, the State, Territory, or the District of Columbia desiring such issue shall make adequate provision, to the satisfaction of the Secretary of War, for the protection and care of such property: *Provided further*, That, whenever it shall be shown to the satisfaction of the Secretary of War that the National Guard of any State, Territory, or the District of Columbia is properly organized, armed, and equipped for field service, funds allotted to that State, Territory, or District for the support of its National Guard may be used for the purchase, from the War Department, of any article issued by any of the supply departments of the Army.

"SEC. 84. Under such regulations as the President may prescribe, whenever a new type of equipment, small arm, or field gun shall have been issued to the National Guard of the several States, Territories, and the District of Columbia, such equipment, small arms, and field guns, including all accessories, shall be furnished without charging the cost or value thereof or any expense connected therewith against the appropriations provided for the support of the National Guard.

"SEC. 85. Each State, Territory, and the District of Columbia shall, on the receipt of new property issued to replace obsolete or condemned prior issues, turn in to the War Department or otherwise dispose of, in accordance with the directions of the Secretary of War, all property so replaced or condemned, and shall not receive any money credit therefor.

"SEC. 86. Any State, Territory, or the District of Columbia may, with the approval of the Secretary of War, purchase for cash from the War Department for the use of the National Guard, including the officers thereof, any stores, supplies, material of war, and military publications furnished to the Army, in addition to those issued under the provisions of this act, at the price at which they shall be listed to the Army, with cost of transportation added. The funds received from such sale shall be credited to the appropriation to which they shall belong, shall not be covered into the Treasury, and shall be available until expended to replace therewith the supplies sold to the States in the manner herein authorized: *Provided*, That stores, supplies, and matériel of war so purchased by a State, Territory, or the District of Columbia may, in time of actual or threatened war, be requisitioned by the United States for use in the military service thereof, and when so requisitioned by the United States and delivered credit for the ultimate return of such property in kind shall be allowed to such State, Territory, or the District of Columbia.

"SEC. 87. Disposition and replacement of damaged property, etc.: All military property issued to the National Guard as herein provided shall remain the property of the United States. Whenever any such property issued to the National Guard in any State or Territory or the District of Columbia shall have been lost, damaged, or destroyed, or become unserviceable or unsuitable by use in service or from any other cause, it shall be examined by a disinterested surveying officer of the Regular Army or the National Guard, detailed by the Secretary of War, and the report of such surveying officer shall be forwarded to the Secretary of War, or to such officer as he shall designate to receive such reports; and if it shall appear to the Secretary of War from the record of survey that the property was lost, damaged, or destroyed through unavoidable causes, he is hereby authorized to relieve the State or Territory or the District of Columbia from further accountability therefor. If it shall appear that the loss, damage, or destruction of property was due to carelessness or neglect, or that its loss, damage, or destruction could have been avoided by the exercise of reasonable care, the money value of such property shall be charged to the accountable State, Territory, or District of Columbia, to be paid from State, Territory, or District funds, or any funds other than Federal. If the articles so surveyed are found to be unserviceable or unsuitable, the Secretary of War shall direct what disposition, by sale or otherwise, shall be made of them; and if sold, the proceeds of such sale, as well as stoppages against officers and enlisted men, and the net proceeds of collections made from any person or from any State, Territory, or District to reimburse the Government for the loss, damage, or destruction of any property, shall be deposited in the Treasury of the United States as a credit to said State, Territory, or the District of Columbia, accountable for said property, and as a part of and in addition to that portion of its allotment set aside for the purchase of similar supplies, stores, or material of war: *Provided further*, That if any State, Territory, or the District of Columbia shall neglect or refuse to pay, or to cause to be paid, the money equivalent of any loss, damage, or destruction of property charged against such State, Territory, or the District of Columbia by the Secretary of War after survey by a disinterested officer appointed as hereinbefore provided, the Secretary of War is hereby authorized to debar such State, Territory, or the District of Columbia from further participation in any and all appropriations for the National Guard until such payment shall have been made.

"SEC. 88. The net proceeds of the sale of condemned stores issued to the National Guard and not charged to State allotments shall be covered into the Treasury of the United States, as shall also stoppages against officers and enlisted men, and the net proceeds of collections made from any person to reimburse the Government for the loss, damage, or destruction of said property not charged against the State allotment issued for the use of the National Guard.

"SEC. 89. Horses for Cavalry and Field Artillery of National Guard: Funds allotted by the Secretary of War for the support of the National Guard shall be available for the purchase, under such regulations as the Secretary of War may prescribe, of horses conforming to the Regular Army standards for the use of Field Artillery and Cavalry of the National Guard, said horses to remain the property of the United States and to be used solely for military purposes.

"Horses so purchased may be issued not to exceed 32 to any one battery or troop, under such regulations as the Secretary of War may prescribe; and the Secretary of War is further authorized to issue, in lieu of purchase, for the use of such organizations, condemned Army horses which are no longer fit for service, but which may be suitable for the purposes of instruction, such horses to be sold as now provided by law when said purposes shall have been served.

"SEC. 90. Funds allotted by the Secretary of War for the support of the National Guard shall be available for the purchase and issue of forage, bedding, shoeing, and veterinary services, and supplies for the Government horses issued to any battery or troop, and for the compensation of competent help for the care of the material, animals, and equipment thereof, under such regulations as the Secretary of War may prescribe: *Provided*, That the men to be compensated, not to exceed five

for each battery or troop, shall be duly enlisted therein and shall be detailed by the battery or troop commander, under such regulations as the Secretary of War may prescribe, and shall be paid by the United States disbursing officer in each State, Territory, and the District of Columbia.

"SEC. 91. Discipline to conform to that of Regular Army: The discipline (which includes training) of the National Guard shall conform to the system which is now or may hereafter be prescribed for the Regular Army, and the training shall be carried out by the several States, Territories, and the District of Columbia so as to conform to the provisions of this act.

"SEC. 92. Training of the National Guard: Each company, troop, battery, and detachment in the National Guard shall assemble for drill and instruction, including indoor target practice, not less than 48 times each year, and shall, in addition thereto, participate in encampments, maneuvers, or other exercises, including outdoor target practice, at least 15 days in training each year, including target practice, unless such company, troop, battery, or detachment shall have been excused from participation in any part thereof by the Secretary of War: *Provided*, That credit for an assembly for drill or for indoor target practice shall not be given unless the number of officers and enlisted men present for duty at such assembly shall equal or exceed a minimum to be prescribed by the President, nor unless the period of actual military duty and instruction participated in by each officer and enlisted man at each such assembly at which he shall be credited as having been present shall be of at least one and one-half hours' duration and the character of training such as may be prescribed by the Secretary of War.

"SEC. 93. Inspections of the National Guard: The Secretary of War shall cause an inspection to be made at least once each year by inspectors general, and if necessary by other officers, of the Regular Army, detailed by him for that purpose, to determine whether the amount and condition of the property in the hands of the National Guard is satisfactory; whether the National Guard is organized as hereinbefore prescribed; whether the officers and enlisted men possess the physical and other qualifications prescribed; whether the organization and the officers and enlisted men thereof are sufficiently armed, uniformed, equipped, and being trained and instructed for active duty in the field or coast defense, and whether the records are being kept in accordance with the requirements of this act. The reports of such inspections shall serve as the basis for deciding as to the issue to and retention by the National Guard of the military property provided for by this act, and for determining what organizations and individuals shall be considered as constituting parts of the National Guard within the meaning of this act.

"SEC. 94. Encampments and maneuvers: Under such regulations as the President may prescribe the Secretary of War is authorized to provide for the participation of the whole or any part of the National Guard in encampments, maneuvers, or other exercises, including outdoor target practice, for field or coast-defense instruction, either independently or in conjunction with any part of the Regular Army; and there may be set aside from the funds appropriated for that purpose and allotted to any State, Territory, or the District of Columbia such portion of said funds as may be necessary for the payment, subsistence, transportation, and other proper expenses of such portion of the National Guard of such State, Territory, or the District of Columbia as shall participate in such encampments, maneuvers, or other exercises, including outdoor target practice, for field and coast-defense instruction; and the officers and enlisted men of such National Guard while so engaged shall be entitled to the same pay, subsistence, and transportation as officers and enlisted men of corresponding grades of the Regular Army are or hereafter may be entitled by law.

"SEC. 95. When any part of the National Guard participates in encampments, maneuvers, or other exercises, including outdoor target practice, for field or coast-defense instruction at a United States military post, or reservation, or elsewhere, if in conjunction with troops of the United States, the command of such military post or reservation and of the officers and troops of the United States on duty there or elsewhere shall remain with the commander of the United States troops without regard to the rank of the commanding or other officer of the National Guard temporarily engaged in the encampments, maneuvers, or other exercises.

"SEC. 96. Use of Regular Army personnel: The Secretary of War may detail one or more officers and enlisted men of the Regular Army to attend any encampment, maneuver, or other exercise for field or coast-defense instruction of the National Guard, who shall give such instruction and information to the officers and men assembled for such encampment, maneuver, or other exercise as may be directed by the Secretary of War or requested by the governor or by the commanding officer of the National Guard there on duty.

"SEC. 97. Under such regulations as the President may prescribe the Secretary of War may provide camps for the instruction of officers and enlisted men of the National Guard. Such camps shall be conducted by officers of the Regular Army detailed by the Secretary of War for that purpose, and may be located either within or without the State, Territory, or District of Columbia to which the members of the National Guard designated to attend said camps shall belong. Officers and enlisted men attending such camps shall be entitled to pay and transportation, and enlisted men to subsistence in addition, at the same rates as for encampments or maneuvers for field or coast-defense instruction.

"SEC. 98. When any portion of the National Guard shall participate in encampments, maneuvers, or other exercises, including outdoor target practice, for field or coast-defense instruction, under the provisions of this act, it may, after being duly mustered, be paid at any time after such muster for the period from the date of leaving the home rendezvous to date of return thereto as determined in advance, both dates inclusive; and such payment, if otherwise correct, shall pass to the credit of the disbursing officer making the same.

"SEC. 99. National Guard officers and men at service schools, etc.: Under such regulations as the President may prescribe, the Secretary of War may, upon the recommendation of the governor of any State or Territory or the commanding general of the National Guard of the District of Columbia, authorize a limited number of selected officers or enlisted men of the National Guard to attend and pursue a regular course of study at any military service school of the United States, except the United States Military Academy; or to be attached to an organization of the same arm, corps, or department to which such officer or enlisted man shall belong, for routine practical instruction at or near an Army post during a period of field training or other outdoor exercises; and such officer or enlisted man shall receive, out of any National Guard allotment of funds available for the purpose, the same travel allowances and quarters, or commutation of quarters, and the same pay, allowances, and subsistence to which an officer or enlisted man of the Regular Army would be entitled for attending such school, college, or practical course of instruction under orders from proper military authority, while in actual attendance at such school, college, or practical course of instruction: *Provided*, That in no case shall the pay and allowances authorized by this section exceed those of a captain.

"SEC. 100. Detail of officers of Regular Army to duty with the National Guard: The Secretary of War shall detail officers of the active list of the Army to duty with the National Guard in each State, Territory, or District of Columbia, and officers so detailed may accept commissions in the National Guard, with the permission of the President and terminable in his discretion, without vacating their commissions in the Regular Army or being prejudiced in their relative or lineal standing therein. The Secretary of War may, upon like application, detail one or more enlisted men of the Regular Army with each State, Territory, or District of Columbia for duty in connection with the National Guard. But nothing in this section shall be so construed as to prevent the detail of retired officers as now provided by law.

"SEC. 101. National Guard, when subject to laws governing Regular Army: The National Guard when called as such into the service of the United States shall, from the time they are required by the terms of the call to respond thereto, be subject to the laws and regulations governing the Regular Army, so far as such laws and regulations are applicable to officers and enlisted men whose permanent retention in the military service, either on the active list or on the retired list, is not contemplated by existing law.

"SEC. 102. System of courts-martial for National Guard: Except in organizations in the service of the United States, court-martial in the National Guard shall be of three kinds, namely, general courts-martial, special courts-martial, and summary courts-martial. They shall be constituted like, and have cognizance of the same subjects, and possess like powers, except as to punishments, as similar courts provided for by the laws and regulations governing the Army of the United States, and the proceedings of courts-martial of the National Guard shall follow the forms and modes of procedure prescribed for said similar courts.

"SEC. 103. General courts-martial of the National Guard not in the service of the United States may be convened by orders of the President, or of the governors of the respective States and Territories, or by the commanding general of the National Guard of the District of Columbia, and such courts shall have

the power to impose fines not exceeding $200; to sentence to forfeiture of pay and allowances; to a reprimand; to dismissal or dishonorable discharge from the service; to reduction of noncommissioned officers to the ranks; or any two or more of such punishments may be combined in the sentences imposed by such courts.

"SEC. 104. In the National Guard not in the service of the United States the commanding officer of each garrison, fort, post, camp, or other place, brigade, regiment, detached battalion, or other detached command, may appoint special courts-martial for his command; but such special courts-martial may in any case be appointed by superior authority when by the latter deemed desirable. Special courts-martial shall have power to try any person subject to military law, except a commissioned officer, for any crime or offense made punishable by the military laws of the United States, and such special courts-martial shall have the same powers of punishment as do general courts-martial, except that fines imposed by such courts shall not exceed $100.

"SEC. 105. In the National Guard not in the service of the United States the commanding officer of each garrison, fort, post, or other place, regiment or corps, detached battalion, company, or other detachment of the National Guard may appoint for such place or command a summary court to consist of one officer, who shall have power to administer oaths and to try the enlisted men of such place or command for breaches of discipline and violations of laws governing such organizations; and said court, when satisfied of the guilt of such soldier, may impose fines not exceeding $25 for any single offense; may sentence noncommissioned officers to reduction to the ranks; may sentence to forfeiture of pay and allowances. The proceedings of such court shall be informal, and the minutes thereof shall be the same as prescribed for summary courts of the Army of the United States.

"SEC. 106. All courts-martial of the National Guard, not in the service of the United States, including summary courts, shall have power to sentence to confinement in lieu of fines authorized to be imposed: *Provided*, That such sentences of confinement shall not exceed one day for each dollar of fine authorized.

"SEC. 107. No sentence of dismissal from the service or dishonorable discharge, imposed by a National Guard court-martial, not in the service of the United States, shall be executed until approved by the governor of the State or Territory concerned, or by the commanding general of the National Guard of the District of Columbia.

"SEC. 108. In the National Guard, not in the service of the United States, presidents of courts-martial and summary court officers shall have power to issue warrants to arrest accused persons and to bring them before the court for trial whenever such persons shall have disobeyed an order in writing from the convening authority to appear before such court, a copy of the charge or charges having been delivered to the accused with such order, and to issue subpœnas and subpœnas duces tecum and to enforce by attachment attendance of witnesses and the production of books and papers, and to sentence for a refusal to be sworn or to answer as provided in actions before civil courts.

"All processes and sentences of said courts shall be executed by such civil officers as may be prescribed by the laws of the several States and Territories, and in any State where no provision shall have been made for such action, and in the Territories and the District of Columbia, such processes and sentences shall be executed by a United States marshal or his duly appointed deputy, and it shall be the duty of any United States marshal to execute all such processes and sentences and make return thereof to the officer issuing or imposing the same.

"SEC. 109. Pay for National Guard officers: Certain commissiond officers on the active list belonging to organizations of the National Guard of each State, Territory, and the District of Columbia participating in the apportionment of the annual appropriation for the support of the National Guard shall receive compensation for their services, except during the periods of service for which they may become lawfully entitled to the same pay as officers of corresponding grades of the Regular Army, as follows, not to include longevity pay: A captain $500 per year and the same pay shall be paid to every officer of higher rank than that of captain, a first lieutenant $240 per year, and a second lieutenant $200 per year. Regulations to be prescribed by the Secretary of War shall determine the amount and character of service that must be rendered by officers to entitle them to the whole or specific parts of the maximum pay hereinbefore authorized: *Provided*, That all staff officers, aids-de-camp, and chaplains shall receive not to exceed one-half of the pay of a captain, except that regimental adjutants, and majors and captains in command of machine-gun companies, ambulance companies, field-hospital companies, or sanitary troops shall receive the pay hereinbefore authorized for a captain.

"SEC. 110. Pay for National Guard enlisted men: Each enlisted man on the active list belonging to an organization of the National Guard of a State, Territory, or the District of Columbia, participating in the apportionment of the annual appropriation for the support of the National Guard, shall receive compensation for his services, except during periods of service for which he may become lawfully entitled to the same pay as an enlisted man of corresponding grade in the Regular Army, at a rate equal to 25 per cent of the initial pay now provided by law for enlisted men of corresponding grades of the Regular Army: *Provided*, That such enlisted man shall receive the compensation herein provided if he shall have attended not less than 48 regular drills during any one year, and a proportionate amount for attendance upon a lesser number of such drills, not less than 24; and no such enlisted man shall receive any part of said compensation except as authorized by this proviso and the three provisos next following: *Provided further*, That the compensation provided herein shall be computed for semiannual periods, beginning the 1st day of January and the 1st day of July of each year, in proportion to the number of drills attended; and no compensation shall be paid to any enlisted man for the first semiannual period of any year unless he shall have attended during said period at least 24 drills, but any lesser number of drills attended during said period shall be reckoned with the drills attended during the second semiannual period in computing the compensation, if any, due him for that year: *Provided further*, That when any man enters into an enlistment other than an immediate reenlistment he shall be entitled to proportional compensation for that year if during the remainder of the year he shall attend a number of drills whose ratio to 24 is not less than the ratio of the part of the year so served to the whole year; and when any man's enlistment shall expire the compensation, if any, to which he may be entitled shall be determined in like manner: *Provided further*, That periods of any actual military duty equivalent to the drills herein prescribed (except those periods of service for which members of the National Guard may become lawfully entitled to the same pay as officers and enlisted men of the corresponding grades in the Regular Army) may be accepted as service in lieu of such drills when so provided by the Secretary of War.

"All amounts appropriated for the purpose of this and the last preceding section shall be disbursed and accounted for by the officers and agents of the Quartermaster Corps of the Army, and all disbursements under the foregoing provisions of this section shall be made as soon as practicable after the 31st day of December and the 30th day of June of each year upon pay rolls prepared and authenticated in the manner to be prescribed by the Secretary of War: *Provided*, That stoppages may be made against the compensation payable to any officer or enlisted man hereunder to cover the cost of public property lost or destroyed by and chargeable to such officer or enlisted man.

"Except as otherwise specifically provided herein, no money appropriated under the provisions of this or the last preceding section shall be paid to any person not on the active list, nor to any person over 64 years of age, nor to any person who shall fail to qualify as to fitness for military service under such regulations as the Secretary of War shall prescribe, nor to any State, Territory, or District, or officer or enlisted man in the National Guard thereof, unless and until such State, Territory, or District provides by law that staff officers, including officers of the Pay, Inspection, Subsistence, and Medical Departments hereafter appointed shall have had previous military experience and shall hold their positions until they shall have reached the age of 64 years, unless retired prior to that time by reason of resignation, disability, or for cause to be determined by a court-martial legally convened for that purpose, and that vacancies among said officers shall be filled by appointment from the officers of the militia of such State, Territory, or District: *Provided further*, That the preceding proviso shall not apply to any State, Territory, or District until 60 days next after the adjournment of the next session of its legislature held after the approval of this act.

"SEC. 111. National Guard when drafted into Federal service: When Congress shall have authorized the use of the armed land forces of the United States, for any purpose requiring the use of troops in excess of those of the Regular Army, the President may, under such regulations, including such physical examination, as he may prescribe, draft into the military service of the United States, to serve therein for the period of the war unless sooner discharged, any or all members of the National Guard and of the National Guard Reserve. All persons so drafted shall, from the date of their draft, stand discharged from the militia, and shall from said date be subject to such

laws and regulations for the government of the Army of the United States as may be applicable to members of the Volunteer Army, and shall be embodied in organizations corresponding as far as practicable to those of the Regular Army or shall be otherwise assigned as the President may direct. The commissioned officers of said organizations shall be appointed from among the members thereof, officers with rank not above that of colonel to be appointed by the President alone, and all other officers to be appointed by the President by and with the advice and consent of the Senate. Officers and enlisted men in the service of the United States under the terms of this section shall have the same pay and allowances as officers and enlisted men of the Regular Army of the same grades and the same prior service.

"SEC. 112. Rights to pensions: When any officer or enlisted man of the National Guard drafted into the service of the United States in time of war is disabled by reason of wounds or disability received or incurred while in the active service of the United States in time of war, he shall be entitled to all the benefits of the pension laws existing at the time of his service, and in case such officer or enlisted man dies in the active service of the United States in time of war or in returning to his place of residence after being mustered out of such service, or at any other time in consequence of wounds or disabilities received in such active service, his widow and children, if any, shall be entitled to all the benefits of such pension laws.

"SEC. 113. Encouragement of rifle practice: The Secretary of War shall annually submit to Congress recommendations and estimates for the establishment and maintenance of indoor and outdoor rifle ranges, under such a comprehensive plan as will ultimately result in providing adequate facilities for rifle practice in all sections of the country. And that all ranges so established and all ranges which may have already been constructed, in whole or in part, with funds provided by Congress shall be open for use by those in any branch of the military or naval service of the United States and by all able-bodied males capable of bearing arms, under reasonable regulations to be prescribed by the controlling authorities and approved by the Secretary of War. That the President may detail capable officers and noncommissioned officers of the Regular Army and National Guard to duty at such ranges as instructors for the purpose of training the citizenry in the use of the military arm. Where rifle ranges shall have been so established and instructors assigned to duty thereat, the Secretary of War shall be authorized to provide for the issue of a reasonable number of standard military rifles and such quantities of ammunition as may be available for use in conducting such rifle practice.

"SEC. 114. Temporary vacancies in Regular Army due to details to the National Guard: In time of war the temporary vacancies created in any grade not above that of colonel among the commissioned personnel of any arm, staff corps, or department of the Regular Army, through appointments of officers thereof to higher rank in organizations composed of members taken from the National Guard, shall be filled by temporary promotions according to seniority in rank from officers holding commissions in the next lower grade in said arm, staff corps, or department, and all vacancies created in any grade by such temporary promotions shall be in like manner filled from, and thus create temporary vacancies in, the next lower grade, and the vacancies that shall remain thereafter in said arm, staff corps, or department and that can not be filled by temporary promotions, as prescribed in this section, may be filled by the temporary appointment of officers of such number and grade or grades as shall maintain said arm, corps, or department at the full commissioned strength authorized by law: *Provided*, That in the staff corps and departments subject to the provisions of sections 26 and 27 of the act of February 2, 1901, and acts amendatory thereof, temporary vacancies that can not be filled by temporary promotions as hereinbefore prescribed shall be filled by temporary details in the manner prescribed in said sections 26 and 27, and acts amendatory thereof, and the resulting temporary vacancies in the branches of the Army from which the details shall be so made shall be filled as hereinbefore in this section prescribed: *Provided further*, That officers temporarily promoted or appointed under the terms of this section shall be promoted or appointed by the President, by and with the advice and consent of the Senate, for terms that shall not extend beyond the war or the passing of the emergency for which additional forces were brought into the military service of the United States, and at the termination of the war or the passing of the emergency said officers shall be discharged from the positions held by them under their temporary commissions or appointments, and officers detailed as herein authorized shall be relieved from their temporary details: *And provided further*, That officers temporarily promoted under the provisions of this section shall not vacate their permanent commissions nor be prejudiced in their relative or lineal standing in the Regular Army.

"SEC. 115. Physical examination: Every officer and enlisted man of the National Guard who shall be called into the service of the United States as such shall be examined as to his physical fitness under such regulations as the President may prescribe without further commission or enlistment: *Provided*, That immediately preceding the muster out of an officer or enlisted man called into the active service of the United States he shall be physically examined under rules prescribed by the President of the United States, and the record thereof shall be filed and kept in the War Department.

"SEC. 116. Noncompliance with Federal act: Whenever any State shall, within a limit of time to be fixed by the President, have failed or refused to comply with or enforce any requirement of this act, or any regulation promulgated thereunder and in aid thereof by the President or the Secretary of War, the National Guard of such State shall be debarred, wholly or in part, as the President may direct, from receiving from the United States any pecuniary or other aid, benefit, or privilege authorized or provided by this act or any other law.

"SEC. 117. Applicable to land forces only: The provisions of this act in respect to the militia shall be applicable only to militia organized as a land force and not to the Naval Militia, which shall consist of such part of the militia as may be prescribed by the President for each State, Territory, or District: *Provided*, That each State, Territory, or District maintaining a Naval Militia as herein prescribed may be credited to the extent of the number thereof in the quota that would otherwise be required by section 62 of this act.

"SEC. 118. Necessary rules and regulations: The President shall make all necessary rules and regulations and issue such orders as may be necessary for the thorough organization, discipline, and government of the militia provided for in this act.

"SEC. 119. Annual estimates required: The Secretary of War shall cause to be estimated annually the amount necessary for carrying out the provisions of so much of this act as relates to the militia, and no money shall be expended under said provisions except as shall from time to time be appropriated for carrying them out.

"SEC. 120. Purchase or procurement of military supplies in time of actual or imminent war: The President, in time of war or when war is imminent, is empowered, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement, to place an order with any individual, firm, association, company, corporation, or organized manufacturing industry for such product or material as may be required, and which is of the nature and kind usually produced or capable of being produced by such individual, firm, company, association, corporation, or organized manufacturing industry.

"Compliance with all such orders for products or material shall be obligatory on any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof and shall take precedence over all other orders and contracts theretofore placed with such individual, firm, company, association, corporation, or organized manufacturing industry, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any plant equipped for the manufacture of arms or ammunition, or parts of ammunition, or any necessary supplies or equipment for the Army, and any individual, firm, association, company, corporation, or organized manufacturing industry or the responsible head or heads thereof owning or operating any manufacturing plant, which, in the opinion of the Secretary of War shall be capable of being readily transformed into a plant for the manufacture of arms or ammunition, or parts thereof, or other necessary supplies or equipment, who shall refuse to give to the United States such preference in the matter of the execution of orders, or who shall refuse to manufacture the kind, quantity, or quality of arms or ammunition, or the parts thereof, or any necessary supplies or equipment, as ordered by the Secretary of War, or who shall refuse to furnish such arms, ammunitions, or parts of ammunition, or other supplies or equipment, at a reasonable price as determined by the Secretary of War, then, and in either such case, the President, through the head of any department of the Government, in addition to the present authorized methods of purchase or procurement herein provided for, is hereby authorized to take immediate possession of any such plant or plants, and through the Ordnance Department of the United States Army, to manufacture therein in time of war, or when war shall be imminent, such product or material as may be required, and any individual, firm, company,

association, or corporation, or organized manufacturing industry or the responsible head or heads thereof failing to comply with the provisions of this section shall be deemed guilty of a felony, and upon conviction shall be punished by imprisonment for not more than three years and by a fine not exceeding $50,000.

"The compensation to be paid to any individual, firm, company, association, corporation, or organized manufacturing industry for its products or material, or as rental for use of any manufacturing plant while used by the United States, shall be fair and just.

"The Secretary of War shall also make, or cause to be made, a complete list of all privately owned plants in the United States equipped to manufacture arms or ammunition, or the component parts thereof. He shall obtain full and complete information regarding the kind of arms or ammunition, or the component parts thereof, manufactured or that can be manufactured by each such plant, the equipment in each plant, and the maximum capacity thereof. He shall also prepare, or cause to be prepared, a list of privately owned manufacturing plants in the United States capable of being readily transformed into ammunition factories, where the capacity of the plant is sufficient to warrant transforming such plant or plants into ammunition factories in time of war or when war shall be imminent; and as to all such plants the Secretary of War shall obtain full and complete information as to the equipment of each such plant, and he shall prepare comprehensive plans for transforming each such plant into an ammunition factory, or a factory in which to manufacture such parts of ammunition as in the opinion of the Secretary of War such plant is best adapted.

"The President is hereby authorized, in his discretion, to appoint a board on mobilization of industries essential for military preparedness, nonpartisan in character, and to take all necessary steps to provide for such clerical assistance as he may deem necessary to organize and coordinate the work hereinbefore described.

"SEC. 121. Investigation as to Government manufacture of arms, etc.: The Secretary of War is hereby authorized to appoint a board of five citizens, two of whom shall be civilians and three of whom shall be officers of the Army, to investigate and report to him the feasibility, desirability, and practicability of the Government manufacturing arms, munitions, and equipment, showing in said report the comparative prices of the arms, munitions, and equipment manufactured in Government plants and those manufactured in private plants, the amount of money necessary to build and operate Government plants for the manufacture of arms, munitions, and equipment; showing also what the Government plants and arsenals are now doing in the way of manufacturing arms, munitions, and equipment, and what saving has accrued to the Government by reason of its having manufactured a large part of its own arms, munitions, and equipment for the last four years. And the Secretary of War is hereby directed to transmit said report to Congress on or before January 1, 1917.

"SEC. 122. Investigation concerning medals of honor: A board to consist of five general officers on the retired list of the Army shall be convened by the Secretary of War, within 60 days after the approval of this act, for the purpose of investigating and reporting upon past awards or issues of the so-called congressional medal of honor by or through the War Department; this with a view to ascertain what medals of honor, if any, have been awarded or issued for any cause other than distinguished conduct by an officer or enlisted man in action involving actual conflict with an enemy by such officer or enlisted man or by troops with which he was serving at the time of such action. And in any case in which said board shall find and report that said medal was issued for any cause other than that hereinbefore specified the name of the recipient of the medal so issued shall be stricken permanently from the official medal of honor list. It shall be a misdemeanor for him to wear or publicly display said medal, and, if he shall still be in the Army, he shall be required to return said medal to the War Department for cancellation. Said board shall have full and free access to and use of all records pertaining to the award or issue of medals of honor by or through the War Department. The actual and necessary expenses of said board and its members shall be paid out of any appropriations available for contingent expenses of the Army of the War Department.

"SEC. 123. Procurement of gauges, dies, jigs, etc., necessay for manufacture of arms, etc.: The Secretary of War be, and he is hereby, authorized to prepare or cause to be prepared, to purchase or otherwise procure, such gauges, dies, jigs, tools, fixtures, and other special aids and appliances, including specifications and detailed drawings, as may be necessary for the immediate manufacture, by the Government and by private manufacturers, of arms, ammunition, and special equipment necessary to arm and equip the land forces likely to be required by the United States in time of war: *Provided*, That in the expenditure of any sums appropriated to carry out the purposes of this section the existing laws prescribing competition in the procurement of supplies by purchase shall not govern, whenever in the opinion of the Secretary of War such action will be for the best interest of the public service.

"SEC. 124. Nitrate supply: The President of the United States is hereby authorized and empowered to make, or cause to be made, such investigation as in his judgment is necessary to determine the best, cheapest, and most available means for the production of nitrates and other products for munitions of war and useful in the manufacture of fertilizers and other useful products by water power or any other power as in his judgment is the best and cheapest to use; and is also hereby authorized and empowered to designate for the exclusive use of the United States, if in his judgment such means is best and cheapest, such site or sites, upon any navigable or nonnavigable river or rivers or upon the public lands, as in his opinion will be necessary for carrying out the purposes of this act; and is further authorized to construct, maintain, and operate, at or on any site or sites so designated, dams, locks, improvements to navigation, power houses, and other plants and equipment or other means than water power as in his judgment is the best and cheapest, necessary, or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers and other useful products.

"The President is authorized to lease, purchase, or acquire, by condemnation, gift, grant, or devise, such lands and rights of way as may be necessary for the construction and operation of such plants, and to take from any lands of the United States, or to purchase or acquire by condemnation materials, minerals, and processes, patented or otherwise, necessary for the construction and operation of such plants and for the manufacture of such products.

"The products of such plants shall be used by the President for military and naval purposes to the extent that he may deem necessary, and any surplus which he shall determine is not required shall be sold and disposed of by him under such regulations as he may prescribe.

"The President is hereby authorized and empowered to employ such officers, agents, or agencies as may in his discretion be necessary to enable him to carry out the purposes herein specified, and to authorize and require such officers, agents, or agencies to perform any and all of the duties imposed upon him by the provisions hereof.

"The sum of $20,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, to enable the President of the United States to carry out the purposes herein provided for.

"The plant or plants provided for under this act shall be constructed and operated solely by the Government and not in conjunction with any other industry or enterprise carried on by private capital.

"In order to raise the money appropriated by this act and necessary to carry its provisions into effect, the Secretary of the Treasury, upon the request of the President of the United States, may issue and sell, or use for such purpose or construction hereinabove authorized, any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $20,000,000: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable, and fix, instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years.

"SEC. 125. Protection of the uniform: It shall be unlawful for any person not an officer or enlisted man of the United States Army, Navy, or Marine Corps, to wear the duly prescribed uniform of the United States Army, Navy, or Marine Corps, or any distinctive part of such uniform, or a uniform any part of which is similar to a distinctive part of the duly prescribed uniform of the United States Army, Navy, or Marine Corps: *Provided*, That the foregoing provision shall not be construed so as to prevent officers or enlisted men of the National Guard from wearing, in pursuance of law and regulations, the uniform lawfully prescribed to be worn by such officers or enlisted men of the National Guard; nor to prevent members of the organization known as the Boy Scouts of America, or the

Naval Militia, or such other organizations as the Secretary of War may designate, from wearing their prescribed uniforms; nor to prevent persons who in time of war have served honorably as officers of the United States Army, Navy, or Marine Corps, Regular or Volunteer, and whose most recent service was terminated by an honorable discharge, muster out, or resignation, from wearing, upon occasions of ceremony, the uniform of the highest grade they have held by brevet or other commission in such Regular or Volunteer service; nor to prevent any person who has been honorably discharged from the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing his uniform from the place of his discharge to his home, within three months after the date of such discharge; nor to prevent the members of military societies composed entirely of honorably discharged officers or enlisted men, or both, of the United States Army, Navy, or Marine Corps, Regular or Volunteer, from wearing, upon occasions of ceremony, the uniform duly prescribed by such societies to be worn by the members thereof; nor to prevent the instructors and members of the duly organized cadet corps of a State university, State college, or public high school offering a regular course in military instruction from wearing the uniform duly prescribed by the authorities of such university, college, or public high school for wear by the instructors and members of such cadet corps; nor to prevent the instructors and members of the duly organized cadet corps of any other institution of learning offering a regular course in military instruction, and at which an officer or enlisted man of the United States Army, Navy, or Marine Corps is lawfully detailed for duty as instructor in military science and tactics, from wearing the uniform duly prescribed by the authorities of such institution of learning for wear by the instructors and members of such cadet corps; nor to prevent civilians attendant upon a course of military or naval instruction authorized and conducted by the military or naval authorities of the United States from wearing, while in attendance upon such course of instruction, the uniform authorized and prescribed by such military or naval authorities for wear during such course of instruction; nor to prevent any person from wearing the uniform of the United States Army, Navy, or Marine Corps in any playhouse or theater or in moving-picture films while actually engaged in representing therein a military or naval character not tending to bring discredit or reproach upon the United States Army, Navy, or Marine Corps: *Provided further*, That the uniforms worn by officers or enlisted men of the National Guard, or by the members of the military societies or the instructors and members of the cadet corps referred to in the preceding proviso shall include some distinctive mark or insignia to be prescribed by the Secretary of War to distinguish such uniforms from the uniforms of the United States Army, Navy, or Marine Corps: *And provided further*, That the members of the military societies and the instructors and members of the cadet corps hereinbefore mentioned shall not wear the insignia of rank prescribed to be worn by officers of the United States Army, Navy, or Marine Corps, or any insignia of rank similar thereto.

"Any person who offends against the provisions of this section shall, on conviction, be punished by a fine not exceeding $300, or by imprisonment not exceeding six months, or by both such fine and imprisonment.

"SEC. 126. On and after July 1, 1916, an enlisted man when discharged from the service, except by way of punishment for an offense, shall receive 3½ cents per mile from the place of his discharge to the place of his acceptance for enlistment, enrollment, or original muster into the service, at his option: *Provided*, That for sea travel on discharge transportation and subsistence only shall be furnished to enlisted men.

"SEC. 127. Nothing in this act shall be held or construed so as to discharge any officer from the Regular Army or to deprive him of the commission which he now holds therein.

"SEC. 128. All laws and parts of laws in so far as they are inconsistent with this act are hereby repealed."

And the Senate agree to the same.

PROCEEDINGS OF EXECUTIVE SESSIONS.

Mr. KENYON. Mr. President, I desire to make a parliamentary inquiry. A few days ago, during the period when the Senate was taking recesses from day to day, I submitted a resolution somewhat similar to the resolution submitted this morning by the Senator from Wisconsin [Mr. LA FOLLETTE]. That resolution was ordered to lie on the table. My impression is that at this time that resolution will come before the Senate. That is the inquiry I desire to make.

The VICE PRESIDENT. When a resolution is submitted and goes over under the rule the present occupant of the chair has decided that it is the duty of any Senator who wants to call it up to do so before the conclusion of morning business.

Mr. KENYON. I ask, then, that there be taken up at this time the resolution submitted by me with reference to open executive sessions of the Senate.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a preceding day, which the Secretary will state.

The Secretary read the resolution (S. Res. 191) submitted by Mr. KENYON on May 9 (calendar day, May 12), 1916, as follows:

*Resolved*, That it is the judgment of the Senate that all executive sessions shall hereafter be open to the public, except when treaties are considered, or when the Senate by unanimous consent orders otherwise.

And the Committee on Rules is directed to prepare such amendments to the present rules, or to prepare new rules, or both, as may be necessary to carry out the terms of this resolution, and present the same to the Senate for action thereon.

Mr. WALSH. Mr. President, I have an impression that the Senator from Missouri [Mr. STONE] desired to be heard upon the motion to consider the resolution. However, I see the Senator is now present.

Mr. SMITH of Georgia. Mr. President, under the rules that resolution must go over until to-morrow.

The VICE PRESIDENT. It did go over on a previous day.

Mr. KENYON. I will say to the Senator it went over some days ago.

Mr. SMITH of Georgia. Under what circumstances is it now being called up?

The VICE PRESIDENT. It is called up under the right of a Senator to call up a resolution which he has submitted when it has gone over under the rule.

Mr. SMITH of Georgia. I thought it had already gone over.

Mr. KENYON. It was submitted and went over some days ago.

The VICE PRESIDENT. The resolution was not submitted to-day; it was submitted on a former day.

Mr. LA FOLLETTE. I will say to the Senator that it is not the resolution submitted by me, but the one submitted by the Senator from Iowa.

Mr. KENYON. Yes. It is the resolution submitted by me.

Mr. SMITH of Georgia. I beg pardon. I heard read a similar resolution submitted by the Senator from Wisconsin [Mr. LA FOLLETTE] a few moments ago, and I thought that was the resolution now being called up.

Mr. KENYON. Mr. President, I submitted a resolution similar to this two years ago, at which time there was a motion to table it, and I assume that that motion will probably follow to-day. I am simply anxious to get a record vote. It seems to me that, after the experience of the past, we may as well have executive sessions, except as to treaties, in the open. Nominations are coming along for the consideration of the Senate, which ought to be considered in the open, and I do not know why we should longer continue to consider nominations in secret sessions of the Senate.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Montana?

Mr. KENYON. I yield the floor.

Mr. WALSH. I rose to inquire when the resolution to which the Senator from Iowa has addressed his remarks was introduced.

Mr. KENYON. I submitted a resolution during the period when we were recessing from day to day—on the legislative day of May 9, calendar day of May 12—and asked that it lie over.

Mr. STONE. Mr. President, I was called out of the Chamber for a moment by a visitor, and I desire now to inquire how this resolution, which was submitted on the legislative day of May 9, with a request that it lie on the table, gets before the Senate, if the Chair please?

The VICE PRESIDENT. It gets before the Senate because the Senator from Iowa has called it up. Prior to the time when the present occupant of the chair assumed the duties of presiding officer it had been held—perhaps not held, but it had grown into a custom—that when a resolution was introduced on one day it should lie over until the succeeding day, and then it was

automatically laid before the Senate. Upon an examination of the rules at the last session of the Congress, the present occupant of the chair decided that there was not any rule which required the Chair automatically to lay before the Senate resolutions which were introduced and which went over under the rule, but that it was the duty of the Senator submitting the resolution, when he wanted to call it up, to call it up of his own motion. That has been the ruling of the Chair since that time.

Mr. GALLINGER. Mr. President, a word on that point. By reference to page 9 of the Manual there is a note:

On motion by Mr. Hoar, *Ordered*, That until otherwise ordered, the Chair shall proceed with the call for resolutions to be newly offered before laying before the Senate resolutions which came over from a former day.

It has been because of that order, to which the Senate agreed, that the custom has been heretofore that resolutions would be laid before the Senate after new resolutions had been acted upon.

The VICE PRESIDENT. The Senator from New Hampshire states it accurately; but the Chair has a very distinct recollection of a period in the Senate when there were some six or seven resolutions laid down every morning with the request that they go over without prejudice, and finally the Chair announced that they would not be laid down unless they were called up.

Mr. GALLINGER. It seems to me that that is quite a fair proposition, because any Senator can make the request, and the resolution will be laid before the Senate.

The VICE PRESIDENT. Yes. The Chair thinks there is no doubt about the right of a Senator to call up such a resolution.

Mr. STONE. Mr. President, this resolution is before the Senate on the motion or call of the Senator from Iowa. Am I correct in that?

The VICE PRESIDENT. The Senator from Iowa called this resolution before the Senate, and it is now subject to parliamentary procedure. It is subject to a motion to send it to a committee or to be laid on the table, or otherwise.

Mr. STONE. I inquire of the Senator from Iowa just what his purpose is in calling it up now? Is it to debate the resolution?

Mr. KENYON. I should like to have it passed. I do not myself care to spend any time debating it. A similar resolution was before the Senate a year ago.

Mr. STONE. In view of that statement, I move that the resolution be referred to the Committee on Rules.

Mr. BORAH. Mr. President, is that motion debatable?

Mr. STONE. I presume it is.

The VICE PRESIDENT. Let us see——

Mr. SMITH of Georgia. Mr. President, will the Senator from Idaho permit me a moment?

Mr. KENYON. Mr. President, I make the point of order that a resolution directing the Committee on Rules to do certain things can not be referred to the Committee on Rules in the very nature of the situation.

The VICE PRESIDENT. The Chair will be compelled to overrule that point of order. This body can do anything it wants to do.

Mr. SMITH of Georgia. I desire to make an inquiry, with the consent of the Senator from Idaho. Is the ruling of the Chair that the Senator introducing a resolution may call it up the morning thereafter or on any morning thereafter?

The VICE PRESIDENT. Any morning thereafter.

Mr. SMITH of Georgia. Any morning he sees fit to do so?

The VICE PRESIDENT. During the morning hour just before the conclusion of morning business, provided morning business has not closed.

Mr. BORAH. Mr. President, I am not going to discuss this matter at length, but I wish we might have a vote upon the resolution direct, instead of sending it to a committee. Without challenging the good faith of the Senator from Missouri, nevertheless the sending of the resolution to a committee means that it is to be indefinitely postponed, and we are not to meet the issue squarely, as we can do if we have a direct vote here at this time.

Mr. President, I have long been an advocate of open sessions with reference to all nominations and with reference to all treaties, save a very limited class of treaties. Commercial treaties and such treaties as we have lately consummated with Nicaragua and that class of treaties ought to be considered in the open. In the first place, practically all our work with reference to executive matters is done in the open. The hearings are had in the open; the newspapers discuss the matter; and it is a mere form when we come here and ourselves proceed to hold executive sessions. The subject matter is thoroughly discussed and thoroughly before the public, and the public has the entire matter, except the debates, which might take place here in the Senate.

Mr. CLAPP. Mr. President, will the Senator pardon an interruption?

Mr. BORAH. Yes.

Mr. CLAPP. Judging from what I noticed in the morning press, there is some question as to the Senator's last statement, because the reasons that were given in executive session yesterday are alleged to be given in the press this morning. So even the discussion does, in a measure at least, become public.

Mr. BORAH. I think any Senator here would agree with me that the reports that go to the newspapers upon these matters in executive session are very inaccurate and insufficient to represent any Senator in his views.

Mr. CLAPP. Will the Senator pardon another interruption?

Mr. BORAH. Yes.

Mr. CLAPP. Is not that just one of the vital reasons why we should have open sessions—in order that the public, instead of having an account of debate which may not be full or do justice to Senators, may have an exact account of what has taken place?

Mr. BORAH. I quite agree with the Senator, and that was to be my contention.

Mr. CLAPP. Then I am sorry I interrupted the Senator.

Mr. BORAH. No; I am very glad to be interrupted. But we have had the matter before us at one time and another for the last two or three years, and there is no reason why we should send it to a committee. Every Senator here, perhaps, has made up his mind on the matter. We are just as well advised as to what we want to do individually as we will be after it has gone to a committee and the Senator from Wisconsin presents his resolution in a few days. We might just as well, so far as the information and the conclusion of the Senate is concerned, vote now as a month later. I therefore hope that we will have a vote directly, and that we will open these regular sessions upon all subject matters save a very limited class of treaties.

Take the discussion which took place here yesterday. There were votes cast which were presumed to have been cast for certain reasons, but which were not, in fact, cast for those reasons at all, but for other reasons. The vote is there, and represents the final action of the Senator; but his reason for casting that vote is not there. The public is entitled to have it. The Senator is entitled to have it before the public; and there is nothing to be gained, either in the public welfare or in the interest of the man seeking the nomination, by a closed session.

I have never understood why a man seeking an appointment to an important office should not be subjected to a public debate and consideration of his qualifications, just the same as a man who is running for office; and it is fair to the man seeking the office as well as fair to the public. If I were a candidate before this body for a position, I certainly should desire to know some of the reasons or all of the reasons which were assigned for and against me, and especially those against me. It is not unfair to the candidate, as is sometimes supposed, but peculiarly fair, that he be considered in the open and that his qualifications there be discussed, and any man qualified to hold public office and fit to hold public office should be glad to have his qualifications presented in public rather than in private.

I sincerely hope the matter will be voted upon.

Mr. VARDAMAN. Mr. President, I have always felt that the secret or executive session of the Senate was not in keeping with the genius and spirit of our Government. It is based upon the theory that certain things must be kept from the people—that it is not well that the people should have information touching certain affairs pertaining to their own Government, which to my mind is an untenable position to assume.

It comes down to us from an age when the ability of the people to rule themselves was doubted by the rulers by Divine right. A theory of government so at variance with our system that any custom that even smacks or savors of it is out of joint with the spirit of the times.

Now, I have never done anything in the performance of my official duties in all my life—and I dare say the same is true of a majority of my colleagues, the Members of this body—that I desired to keep concealed from my constituents. I have infinite faith in the sense of justice and the capacity for discrimination of the people whom I have the honor to represent in this Chamber. They are just as capable of self-government as I am capable of governing them.

There is nothing in the world so purifying in politics as the sunlight of publicity. It is no reflection upon the patriotism or integrity of any man to say that he is more circumspect and careful about what he may say or do when he knows the eyes

of the world are fixed upon him than he would be when walking in the shadows. It is human nature to be that way.

As has been so well stated by the able Senator from Idaho [Mr. BORAH] the men whose characters and reputation are subjected to the acid test of criticism to which they are subjected in the consideration of nominations in executive sessions are entitled to know what is said about them. And the Senator who analyzes and criticizes the character of the nominee ought to desire that his reasons for his opposition or his excuse for criticism should be given the public.

The information which influences the action of the Senator in casting his vote is a matter of public concern and therefore the people have a right to know it. I can scarcely conceive of a measure which is likely to be considered by this body wherein public interest demands that the discussion shall be withheld from the people. The people ought to know what we are doing here, how we do it, and the reasons that we have for doing it.

If I had my way about it I would take the doors from the hinges of this Chamber, and I would let the public look in on us and hear our discussions and share with us, from the galleries, our deliberations.

Long before I came to the United States Senate I held to these views, and time and experience have only served to deepen my conviction on the subject and to vindicate the correctness of first impressions. I could not understand then why my Senator should desire to withhold from me his reasons or excuse for anything he might do in the performance of the functions of the place which I, by my vote, had commissioned him to perform.

And I agree with the able Senator from Idaho, further, that this matter ought to be settled now. There is no reason or excuse for delay. Senators have made up their minds. I should say they are ready to vote, and I am in favor of bringing the question to an issue at once rather than sending it to its death in the Committee on Rules. I think the proposed plan is a very moderate and proper treatment of the subject. All necessary safeguards will be thrown around it by the Committee on Rules to prevent the possibility of anything imprudent or radical being done, and I sincerely hope we may get a vote on it this morning.

The antiquity of the rule or custom which is to be repealed or abrogated is entitled to no special consideration because of its age. Time does not impute to it sanctity or eliminate from it in any way the inherent errors of the system.

Mr. SMITH of Georgia. Mr. President, the resolution is in bad form. You can not amend the rules in that way. The rules specifically prescribe the way in which they must be amended. You can not pass a resolution here instructing the Committee on Rules to get up a rule. You could pass a resolution expressing the sentiment of the Senate, but you can not instruct the committee to prepare a particular rule except by recommitting a pending measure——

Mr. KENYON rose.

Mr. SMITH of Georgia. Let me proceed a little further. You can not amend the rules in the way proposed. The rules specifically provide that amendments must be made first by written notice of a Senator that he intends to offer an amendment to a particular rule, designating the rule, and designating the nature of the amendment. Then, one day later, he can offer the amendment itself.

Mr. KENYON. Mr. President——

Mr. SMITH of Georgia. I yield for a question.

Mr. KENYON. I only want to say that that exact question was raised when this matter was up before, on a point of order, and decided by the Chair.

Mr. SMITH of Georgia. Mr. President, I do not yield for a statement. I decline to yield under any circumstances for a statement from anybody, because, under the ruling of the Chair, that takes the speaker off the floor.

Mr. KENYON. I ask, then, if it is not true that the resolution merely recites and expresses the judgment of the Senate, and instructs a committee of the Senate?

Mr SMITH of Georgia. Mr. President, I do not concede the right of the Senate to act in any such way. Suppose you send that to the committee, and the committee did not want to get up a notice in response to it, and did not want to introduce a rule for you—you are absolutely helpless. Why, we have a rule that there shall be no publicity as to what takes place in executive sessions, and a Senator gives it out. If a Senator can disregard a solemn rule of that sort, how can you, by resolution, instruct the Committee on Rules to prepare for you a notice, and to prepare for you an amendment to the rules?

I will go one step farther. I am not sure that I will not support a rule of this kind. I am a good deal inclined to desire that practically all of our discussions, except where necessarily private on account of foreign relations involved should be in public. I would vastly have preferred to have had my reasons for voting against the nominee yesterday published and printed in the RECORD. I should have been gratified to see them in the RECORD this morning. If I vote against the confirmation of anybody else in the Senate, I should be glad to see the CONGRESSIONAL RECORD publish my reasons for it, because, if I vote against a man, I have reasons that are satisfactory to me, and I am willing to be judged by my reasons. We have another nomination coming up soon which has attracted much attention. I should be glad to see that nomination debated in public. I so state now.

If the Senator will prepare his notice in proper form, and introduce his resolution proposing to amend the rules, it will not be buried in the Committee on Rules. The committee may report adversely on it, but we will bring you out a report and give you a chance to take it up in an orderly way on the floor of the Senate, under the rules. The Senator is simply wasting his time on this resolution. He will make no progress. I am always in the Committee on Rules when they meet. I say to the Senator that if he introduces such a rule I will call it up at the first meeting, and we will bring in a report on it, just as we brought in a report to-day on Senate procedure looking to a limited cloture.

I do not think the Senator will make any progress by this resolution. I shall vote against it, because I do not think the Senate has any authority to direct us to prepare legislation for it, or to prepare a rule for it. I do not think that that is the proper way to undertake to treat a committee—to direct them to get up a rule for you. You are proposing to do this by resolution when the rules forbid the presentation of an amendment in such a way. But if you present an amendment to the rules as the rules require I have no doubt it will be speedily acted upon by the Committee on Rules. I am sure the Committee on Rules would be glad to report it, and I am very much disposed to vote for it.

Mr. OWEN obtained the floor.

Mr. STONE. Mr. President, I am obliged to leave. Will the Senator allow me to make a request?

Mr. OWEN. Certainly.

Mr. STONE. I have an engagement at 1 o'clock that I can not neglect. I should like an opportunity to say something on this resolution, and I request this much: The debate can go on, but I request that the matter be left open and not voted upon until later.

Mr. OWEN. Until to-morrow?

Mr. STONE. Until to-morrow or any subsequent time.

Mr. OWEN. I ask unanimous consent that it may be voted on to-morrow.

Mr. KENYON. What was the request of the Senator?

Mr. SMITH of Georgia. Mr. President, I think we might very well dispose of this matter now, unless the Senator from Missouri wants to speak on it, by a motion to lay it on the table.

Mr. STONE. Mr. President, I can not vote on anything, as I am obliged to leave now to fill an engagement at 1 o'clock, and I merely ask that the motion be not voted upon.

Mr. KENYON. Until to-morrow?

Mr. OWEN. Mr. President, in yielding the floor to the Senator from Missouri I did not yield to make a motion to lay on the table.

Mr. STONE. No; and I do not want to make a motion to lay on the table.

Mr. OWEN. I know the Senator did not wish to do that.

Mr. STONE. No; I wish the matter debated, and I wish to debate it myself; but I can not stay here now. My request to the Senate is, after you have debated it here as long as you please, that it may go over until to-morrow or any later day; I do not care.

Mr. SMOOT. I will say to the Senator that if it is debated until 2 o'clock, of course it will go to the calendar.

Mr. STONE. Well, I am not particular. I simply do not want the matter closed up to-day. I would be very glad to close it to-day as well as at any other time, except that I am compelled to go.

Mr. OVERMAN. Mr. President, if the Senator from Oklahoma will yield to me for a minute, I want to suggest that there is another resolution——

Mr. OWEN. I do not wish to yield the floor or to take any step that would result in my yielding the floor.

Mr. OVERMAN. No; I simply want to make a suggestion to the Senator himself.

Mr. OWEN. I yield for that purpose, if it does not deprive me of the floor.

Mr. OVERMAN. There is a resolution here submitted by the Senator from Wisconsin [Mr. LA FOLLETTE] of a similar charac-

ter, and I think both of them ought to be considered together. The resolution of the Senator from Wisconsin does not come up until to-morrow.

Mr. LA FOLLETTE. It does not come up to-morrow, unless I call it up, under the rule.

Mr. OVERMAN. Yes; that is what I mean.

Mr. LA FOLLETTE. And the Senator's suggestion brings it up to-morrow, whether I am ready to call it up or not.

Mr. OVERMAN. I thought the Senator would want to call it up and have it considered at the same time.

Mr. LA FOLLETTE. I want to call it up when I am ready to call it up.

Mr. OVERMAN. If the Senator wants to call it up at a different time, very well.

Mr. OWEN. Mr. President——

Mr. KENYON. Mr. President, will the Senator from Oklahoma yield to me for a moment?

The VICE PRESIDENT. Does the Senator from Oklahoma yield to the Senator from Iowa?

Mr. OWEN. For a question or a suggestion that does not affect my parliamentary status.

The VICE PRESIDENT. The Senator from Oklahoma had some unfortunate trouble the other day which the Chair is sorry for. We are not now enforcing what the Chair thought was the rule.

Mr. OWEN. I yield to the Senator from Iowa.

Mr. KENYON. I was going to say, in the line of a question, that I should be glad to do anything that would accommodate the Senator from Missouri; and I wondered if we could have a unanimous-consent agreement to vote on the passage of the resolution itself to-morrow at 1.30? He desires to have it go over until to-morrow, and I would like to accommodate him. I ask unanimous consent that to-morrow at 1.30 we vote on the original resolution which I introduced.

Mr. BRANDEGEE. Mr. President, I have no objection to fixing a time to vote, but if the request is agreed to in that form it may be that the Senate will be driven to a vote without any opportunity for any debate whatever, simply because the hour of 1 o'clock arrives; that is all. I do not intend to debate the question, but some other Senator——

Mr. KENYON. Would the Senator prefer 1.45?

Mr. BRANDEGEE. If the Senator will ask unanimous consent that at 12.30 to-morrow or 12 o'clock to-morrow the Senate shall proceed to consider this resolution and that at not later than 1 it shall vote upon it, that would give opportunity for some five-minute speeches; but the Senator's request is——

Mr. LODGE. Mr. President, I suggest to the Senator that, in view of what the Senator from Missouri [Mr. STONE] has said, it is hardly right to press a request for unanimous consent in his absence.

Mr. KENYON. I am trying to accommodate the Senator from Missouri.

Mr. LODGE. I know it.

Mr. KENYON. Therefore I suggest that the resolution go over until to-morrow and that it be voted on then.

Mr. LODGE. I think it would be better to accommodate him in another way.

Mr. KENYON. If the Senator knows his way——

Mr. LODGE. I can not speak for him. I have no desire to debate this matter at any length myself. I am perfectly willing to join in a unanimous-consent agreement to vote; but the Senator from Missouri said he wished to debate the resolution, and he has just left the Chamber. I think the Senator had better reserve the request for unanimous consent until to-morrow, when the Senator from Missouri can be present.

Mr. LANE. Mr. President——

Mr. OWEN. I decline to yield the floor further.

The VICE PRESIDENT. The Senator from Oklahoma has the floor.

Mr. LANE. I should just like to ask a question.

The VICE PRESIDENT. The Senator from Oklahoma has declined to yield the floor, and he has it.

Mr. KENYON. I will withdraw my request, on the suggestion of the Senator from Massachusetts. I was only making it to accommodate the Senator from Missouri.

Mr. OWEN. I shall take only a minute or two. I do not think the debate will change many votes in the Senate. I am in favor of instructing the Committee on Rules in accordance with this resolution, because I should like to see the debates of the Senate wide open. There are some treaties in which foreign affairs are concerned which I think should be considered in executive session under the old rule, where the dealings with foreign nations might be affected by our debate. Outside of that I should like to have the American people look down into the heart of the Senate and see everything which transpires here. I believe that is in the interest of public order and public welfare.

I do not feel quite willing to let the statement made by the Senator from Georgia go as acquiesced in that the Senate has no right to instruct the Committee on Rules. The Senate has a right in my opinion to instruct the Committee on Rules. That committee might exercise the right to refuse the instruction, and the Senate might exercise its authority to abolish that committee, and be entirely within its rights; and I think it would be justified in abolishing the committee when the committee refused to exercise the duty imposed upon it by the Senate. I say that, of course, merely as my opinion of parliamentary procedure, not with any view whatever to rebuke any committee or suggest anything of the kind.

I do not think that debate would change many votes on this question, but I should like to have it acted upon to ascertain what is the view of the Senate as to whether we shall have open session or shall not; and I ask unanimous consent that on to-day a week at 1 o'clock this resolution may be voted on.

The VICE PRESIDENT. Is there objection?

Mr. JONES and Mr. WILLIAMS. I object.

The VICE PRESIDENT. There is objection.

Mr. KENYON. I wish to ask unanimous consent that at 12 o'clock and 15 minutes to-morrow we take up this matter and proceed with it and vote, if possible. That will accommodate the Senator from Missouri.

Mr. SMOOT. I suggest to the Senator from Iowa that he has a perfect right to call it up immediately at the close of the morning business.

Mr. SIMMONS. I could not hear what the Senator from Utah said.

Mr. SMOOT. I suggested to the Senator from Iowa that it is a privileged question; that he can call it up immediately after the introduction of resolutions and before morning business is closed; and I do not see any necessity of making that request. He has it in his own hands.

Mr. LODGE. Mr. President, I think the Senator is mistaken about this being a privileged question. It goes to the calendar, and then the Senator has a right to move to take it up.

Mr. SMOOT. It goes to the calendar at 2 o'clock.

Mr. LODGE. Yes.

Mr. SMOOT. If debated until 2 o'clock to-day; but it will not go to the calendar if laid aside now by unanimous consent.

Mr. LODGE. Certainly not.

Mr. KENYON. That is why I asked for unanimous consent.

Mr. LANE. Before the matter closes I wish to say that I spoke to the Senator from Missouri before he left the Chamber. He has asked for time to debate, and I think he or any other Senator ought to have ample time. I would not like to set a definite hour for a vote without giving the Senator from Missouri an opportunity to be heard. All I ask is that the Senator from Missouri and others may have an opportunity to discuss this question.

Mr. SIMMONS. Mr. President——

Mr. KENYON. The request does not pertain to time.

Mr. LANE. It limits the time to half past 1.

Mr. KENYON. It is to commence at 12.15, to take the matter up at that time.

Mr. LANE. And come to a vote.

Mr. LODGE. I suggest to the Senator from Iowa that if he will ask that the resolution may go over without prejudice he can call it up himself at any time.

Mr. KENYON. That is satisfactory to me.

Mr. LODGE. That would leave it in his own power to call it up at any time.

Mr. WILLIAMS. What is the request?

The VICE PRESIDENT. The request of the Senator from Iowa, as the Chair understands it, is that the resolution go over without prejudice, that he may call it up to-morrow or any succeeding day, if he chooses to do so, at the conclusion of the morning business.

Mr. WILLIAMS. Mr. President, a parliamentary inquiry. Would that interfere with a motion to send the resolution to the Committee on Rules?

The VICE PRESIDENT. That will be the pending motion when it comes up.

Mr. SIMMONS. When I rose I misunderstood the request of the Senator from Iowa. I understand the Chair now to say that it is nothing more than a request that this matter shall be laid before the Senate to-morrow at half-past 12 o'clock.

The VICE PRESIDENT. No; the request is that it shall go over without prejudice. If the Senator from Iowa chooses

to call it up to-morrow he will have a right to call it up at the conclusion of the morning business.

Mr. SIMMONS. It does not give it any special privilege?

The VICE PRESIDENT. No special privilege beyond that.

Mr. GALLINGER. Mr. President, without committing myself either for or against this resolution, I submit a proposed amendment which I will ask the Secretary to read.

The VICE PRESIDENT. The proposed amendment will be read.

The SECRETARY. On line 4 strike out the words "unanimous consent orders otherwise" and insert "two-thirds vote shall otherwise order," so that if amended it will read:

*Resolved*, That it is the judgment of the Senate that all executive sessions shall hereafter be open to the public, except when treaties are considered, or when the Senate by two-thirds vote shall otherwise order.

Mr. UNDERWOOD. Mr. President, this resolution may be considered in the future or it may not. I do not know what disposition the Senate is going to make of it. Therefore I wish to occupy the time of the Senate for a few moments in stating my own views in reference to the matter.

In recent years there has been a great deal said about business transacted behind closed doors. There is some justice in what has been said and there has been a great deal of farce play for the benefit of the public on this question.

I remember a year or two ago when I had some part in making up the committees of the House it was determined that the Progressive Party in the House should have a right to name so many men on each committee of their own selection, of course, to consult with the party in power as to the individual selections. The representative of that party called on my office and presented a list of the committeemen that he was in favor of and that his party had agreed on to see if it met with the approval of my party. They were promptly agreed to. Then the day afterwards an open caucus of the party was called and the men who had already been agreed to were agreed to in open session. Some time afterwards when I heard that gentleman abusing sincerely the Democratic Party for holding its sessions behind closed doors I could not but feel that a great deal he said was for the benefit of the public and not in the interest of pure government.

But I think the question that is presented by the Senator from Iowa comes to a point where it deserves the sincere consideration of the Senate. I can understand the reasons why the men who wrote the rules of the Senate provided that nominations sent by the President of the United States shall be considered in executive or secret session. I can understand why they thought it wise to provide, as the Senate rule provides, that we might consider these questions in executive session. They may have feared that the power of the Executive was such that the Senate could not exercise an unbiased judgment in accepting or rejecting a nomination if it was considered in public. They may have felt that the consideration of treaties in secret session was necessary in order that we might protect the great interests of the United States.

If that were so, if that condition existed and possibly might continue to exist, I might be inclined to vote against a resolution of this kind and to vote in favor of continuing the secret sessions or the so-called secret sessions of the Senate for the benefit that might be derived by the American people from those sessions growing out of the independence of action of Members of the Senate.

So far as I am able to judge a secret session of the United States Senate is simply a farce. As far as I know there has never been in recent years a secret session of the United States Senate upon any matter that anybody on the outside wanted to find out about 15 minutes after. The only distinction that I see between the so-called secret session of the Senate and the open sessions of the Senate is that what is said in the executive sessions of the Senate is not taken down by the reporter at the desk and printed in the RECORD. Aside from that, there is no secrecy.

Of course, there are a great many nominations that go through here in secret session when no one is advised as to how the votes are cast, because nobody cares to inquire. It is not of such vital importance that it is of interest to anybody to know what occurred. But where there is a matter of interest it is either given out by the unanimous consent of the Senate, as it was yesterday, and properly, or it is given out without the unanimous consent of the Senate. To those men who desire to observe the rules of the Senate, to live up to the obligation of a Senator in keeping its rules, I think a secret session of the Senate is very unfair, because their mouths are closed in honor; they do not divulge what happened. The man who rejects the idea of a secret session, who believes that it is wrong, who desires in his heart to repudiate it and intends to repudiate it by immediately disclosing what has happened so that it can not be a secret session, has all the advantages of the situation, because he discloses what happened from his partisan standpoint, and the man who obeys the rule of the Senate is foreclosed from discussing the question.

Therefore, I say in common fairness to the Members of the Senate, in order that each one of us may have the same opportunity before the public, that our motives may be judged from what we do and say ourselves and not from what some other partisan who is opposed to us says we do and say, I shall vote for this resolution to no longer have a secret session for the confirmation of nominations, to no longer give anybody an opportunity to hide behind a claim that something happened in a secret session that honorable men are foreclosed from denying.

Mr. NORRIS. Mr. President, I shall favor the amendment that has been offered by the Senator from New Hampshire [Mr. GALLINGER], but I want also to offer another amendment to the resolution of the Senator from Iowa.

The VICE PRESIDENT. The Chair would like to have an understanding about the request of the Senator from Iowa as to whether there is any objection to the resolution going over without prejudice.

Mr. NORRIS. I do not want it to go over just at this minute, taking me off the floor. I have no objection to its going over, however.

Mr. KENYON. I ask the Senator if he has any objection to the resolution going over?

Mr. NORRIS. I have not any objection to its going over, but I thought as I had the floor it was hardly proper to take me off the floor.

The VICE PRESIDENT. The Chair is not trying to take the Senator from Nebraska off the floor. The Chair has been trying to meet the request of the Senator from Iowa, if it could be met within the time; that is all.

Mr. KENYON. I will state to the Senator from Nebraska that if the debate continues until 2 o'clock, the resolution will go to the calendar.

Mr. NORRIS. I will yield the floor if there is any question about it.

The VICE PRESIDENT. Is there objection to the request of the Senator from Iowa? The Chair hears none, and the resolution goes over without prejudice.

## WOMAN SUFFRAGE.

Mr. BORAH. Mr. President, out of order I ask leave to have printed in the RECORD, in view of the precedent established by the Senator from Utah [Mr. SUTHERLAND], some resolutions which were passed at a mass meeting in my home city, Boise, Idaho, on the 9th day of May, 1916; and, as these resolutions call upon me particularly to do something that I am unable to do, I ask to have printed in the RECORD in connection with it as a reply my letter in answer to it.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. LODGE. I ask that the resolutions and the communications be read before going over.

The VICE PRESIDENT. Without objection, the Secretary will read.

The Secretary read as follows:

Resolutions unanimously passed at a mass meeting of citizens of Boise, Idaho, at the Pinney Theater, May 9, 1916.

Whereas we, citizens of Boise, Idaho, May 9, 1916, realizing that never in history has it been possible to build a contented nation half free and half disfranchised; and

Whereas the present interstate discrimination against the political rights of women can be ended only by the passage through Congress of a Federal suffrage amendment; and

Whereas our representatives in the lower House of Congress have been denied the opportunity of voting upon this amendment: Be it

*Resolved*, That we protest against the action of the House Judiciary Committee in unfairly blocking the passage of the Susan B. Anthony Federal suffrage amendment and demand of it an immediate favorable report that it may be voted upon during this session of Congress: Be it further

*Resolved*, That we call upon Senator Borah to work and vote for the passage of the amendment in the Senate: Be it finally

*Resolved*, That a copy of these resolutions be sent to the leaders of the administration, the members of the Judiciary Committee, and to the Members of the Idaho congressional delegation, with the request that it be read into the CONGRESSIONAL RECORD in the Senate by Senator BORAH and in the House by Congressman MCCRACKEN.

ALICE PITTENGER, *Chairman*.

—

MAY 15, 1916.

Mrs. ALICE PITTENGER,
*Boise, Idaho.*

MY DEAR MRS. PITTENGER: I have just received a copy of a set of resolutions passed at the Pinney Theater May 9, 1916, touching the subject of the proposed amendment to the Constitution providing for woman suffrage.

I shall be pleased to present this and other resolutions of similar import at the proper time (as the petition of the people responsible for the passage) to the Senate.

In the resolutions it is said "*Be it further resolved*, That we call upon Senator BORAH to work and vote for the passage of the amendment in the Senate," etc. Upon this subject my views are perfectly well known to those passing the resolution. I arrived at those views after as thorough consideration as I could give to the subject. I explained those views at length in the Senate and again to the women of my State when at home last summer. I need not burden you with repeating them. Suffice it to say that time and further consideration leave me in no doubt as to the correctness of my position. I beg to state, therefore, with the utmost consideration for those who hold a different view that in this matter my judgment is not subject to change. There are questions of Government so vital and controlling in this matter and upon which I have held such settled views that I could not give you such assurance as you desire and as I personally would like to do of either working or voting for this amendment. I do not think it is in the interest of the suffrage cause itself and I am sure that it is not in the interest of good government that we should rob the States of the power, vital and indispensable to their integrity, of determining who, within their respective borders, shall exercise the right of franchise. Holding the views I do you would not respect me and you would certainly come to have a certain contempt for a Senator who should slavishly surrender his convictions on so vital a matter. I feel, therefore, I at least choose as a matter of personal pride and self-respect to assume, that you do not expect me to change my views after having so often and so fully stated my convictions against this amendment. I would like the people of Idaho to feel that I want to serve their interests, but I want them to feel also that I entertain convictions of my own as to how best to serve those interests, and that I can not out of mere personal consideration exchange those convictions for other views until I am convinced that I am wrong. I am not convinced in this instance.

Following in the wake of those who lately visited our State in the interest of this amendment a great number of resolutions are coming into my office, all clothed in exactly the same language. As it is impossible for me to find the time, as I should like to do, to write them all I take the privilege of making this letter public that they may understand that my failure to answer is not by reason of any want of decision in the matter.

Very respectfully, W. E. BORAH.

RIVER AND HARBOR APPROPRIATIONS.

The VICE PRESIDENT. Morning business is closed.

Mr. JOHNSON of Maine. Mr. President, I move that the Senate proceed to the consideration of the bill (H. R. 54) to pension widows and minor children of officers and enlisted men who served in the War with Spain, Philippine insurrection, or in China.

Mr. CLARKE of Arkansas. Mr. President, in connection with that motion I call attention to the unanimous-consent order that was taken last Saturday, which made the river and harbor bill the regular order to-day after the morning business had been disposed of or dispensed with. I see no reason why that order should not be executed. That bill has now been before the Senate for more than a week, and unless it is to be treated seriously, as it ought to be, it will be here for several more weeks. I insist upon the regular order.

The VICE PRESIDENT. The Chair was not in the Chamber when that order was made, but there was an order of that kind, and, in pursuance of that order, the Chair lays before the Senate the bill referred to by the Senator from Arkansas.

Mr. JOHNSON of Maine. In view of the statement of the Chair, I withdraw my motion. I will say to the Senator from Arkansas that I was not aware that any such unanimous-consent agreement had been entered into.

Mr. CLARKE of Arkansas. The Senator from Maine will find that the unanimous-consent agreement was ordered on page 7902 of the RECORD of Saturday last.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. CLARKE of Arkansas. I understand that it is the purpose of the Senator from Ohio [Mr. HARDING] to address the Senate on this particular bill, although the regular order would be the reading of the committee amendments.

Mr. JONES. Mr. President——

Mr. CLARKE of Arkansas. Is it the desire of the Senator from Washington to address the Senate?

Mr. JONES. It is.

Mr. CLARKE of Arkansas. That will be satisfactory to me.

MERCHANT MARINE.

Mr. JONES. Mr. President, I do not desire to delay the river and harbor bill at all, but I wish this morning to submit a few remarks with reference to a subject which I think is opportune at the present time. I am therefore going to occupy the time of the Senate for a little while and give Senators an opportunity to get their lunch—an opportunity of which I know they are anxious to avail themselves—and serve a good purpose in that way, if in no other.

Mr. President, I send to the desk a copy of the bill I introduced some little time ago, and which I ask may be read.

The VICE PRESIDENT. In the absence of objection, the bill referred to by the Senator from Washington will be read.

The Secretary read as follows:

A bill (S. 5067) to regulate commerce between the United States and foreign countries, to restore and maintain American ships in the foreign trade, to aid in the national defense, and promote the general welfare.

*Be it enacted, etc.*, That to regulate commerce between the United States and foreign countries, to restore and maintain American ships in the foreign trade, to aid in the national defense, and promote the general welfare, from and after 30 days from the signing of a treaty of peace closing the war now existing in Europe, all goods, wares, and merchandise imported in vessels not admitted to registration under the laws of the United States shall be subject to a duty of 10 per cent ad valorem in excess of the duties imposed by the act of October 3, 1913, and all goods, wares, and merchandise, excepting tea and coffee, so imported which are admitted free under said act shall pay a duty of 5 per cent ad valorem: *Provided*, That the foregoing provisions shall not go into effect as to goods, wares, and merchandise imported in the vessels of those nations with which we have treaties which said provisions contravene until said treaties have been duly abrogated; and the President is hereby directed to abrogate any treaties which would interfere with the taking effect of said provisions in the manner provided by said treaties and without delay.

Mr. JONES. Mr. President, a few days ago the senior Senator from Missouri [Mr. STONE] urged very earnestly the needs of this country for a merchant marine and expressed the hope that early action might be had upon the bill proposed for that purpose. The able and patriotic senior Senator from New Hampshire concurred in the suggestion as to the importance of a merchant marine and called attention to the fact that the Democrats of Congress have uniformly opposed legislation urged for that purpose by the Republicans. It was retorted that the failure to enact this legislation during a period of 16 years should be charged to the Republican Party, because we were in control of the legislative and executive branches of the Government. It is true that we were in control, as the Democrats are in control now.

The building up of our merchant marine is not a party question. It is no more a party question now than it was then, and the mere fact that one party is in control is no excuse for our not acting and does not relieve any of us as individual Senators from the responsibility of doing our duty toward the country and its interests.

There is no difference of opinion as to the importance of building up a merchant marine for this great country. Everybody recognizes that. It is no longer a subject of contention, and every effort should be turned to methods. It is very humiliating that a country of such great wealth, resources, power, and commerce as the United States should be almost wholly dependent upon foreign shipping for the transportation of its world commerce. It is a sorry reflection upon our statesmanship and political sagacity that we have not taken our proper position upon the seas in the transportation not only of our own commerce, but of the world's commerce.

There is no fundamental party difference as to any principle involved. There is no specific platform declaration of either party creating an issue over fundamentals. Our differences are over methods only. Platform declarations have been of the most general character, except the Republican platform of 1896, when we declared for a specific policy for the building up of our merchant marine.

The majority of the Republicans have urged the adoption of legislation similar to that of other countries and known as the subsidy system. The Democrats have opposed that policy, though favoring subsidies in one form or another in almost every other line of governmental activity. Some Republicans have also opposed the subsidy plan, and as a result no legislation which has been of any substantial benefit has been enacted. The Senator from New Hampshire stated, as I remember, that the Democrats, while the Republicans were in the majority, had proposed no legislation. That may be true of the Senate, but it is not correct as to the House. They have suggested and even urged the passage of legislation in accord with the Republican platform of 1896, and, in my judgment, if to-day we would lay aside the thought that this party or that party controls Congress and set aside any influence or interference from the Executive Department of the Government and its departmental heads and seriously begin the consideration of this question as statesmen rather than as partisans we would come into substantial agreement upon legislation that would result in the building up of a great American merchant marine without violating any of the established party tenets of any political organization.

In 1908 the Democratic Party declared:

We believe in the upbuilding of the American merchant marine without new or additional burdens upon the people and without bounties from the Public Treasury.

And in 1912 they declared:

We believe in furthering by continued regulation of commerce the building of a merchant marine for the development and strengthening of the commercial ties which bind us to our sister Republics of the

south, but without additional burdens upon the people and without bounties and subsidies from the Public Treasury.

While the Democrats were in the minority in Congress they urged a policy in accord with the above declarations for the upbuilding of the merchant marine in opposition to that submitted by the Republican majority. What do we hear regarding this policy now? Nothing. It seems to be forgotten. Why? Is it because their habit of violating or disregarding platform promises has become so fixed that when they find a promise they instinctively try to do something different? It would seem so.

When these promises were made they no doubt had in mind the proposition that had been submitted by their Representatives in the House. They now control Congress and the Executive, but they do not propose to follow the policies declared by them when in the minority. They now propose new methods and additional burdens and appropriations of money from the Public Treasury as a method of building up the merchant marine.

It is interesting now to see what the Democratic Party proposed and supported when in the minority, and I want to call this to their attention. In the Fifty-eighth Congress, at the second session, H. R. 7056 was reported by the Republican majority. The Democratic minority submitted a report opposing this bill and advocated their plan of relief. This is what they said:

The merchant marine of this Nation, in its early history, was built up as if by magic by the policy of discriminating duties and tonnage taxes.

There is no suggestion there of a Government-owned line or a Government-operated line or the necessity of the organization of a national corporation for the purpose of handling, purchasing, leasing, operating, and building merchant ships.

It is the only system which has proved successful. All others now proposed are at best mere experiments—guesswork.

I hope, Mr. President, that the suggestions made in this report will be very carefully considered in connection with the proposition which the Democratic majority now submits. Continuing:

We see no insuperable obstacles in the way of its present successful adoption.

The navigation interests of the United States languished before the Constitution was adopted, and one of the principal, if not the most potent factor in bringing about its adoption was the urgent demand for uniform regulations of commerce in favor of our home marine.

In 1789 we were carrying 17 per cent of our imports and 30 per cent of our exports. One of the first acts of the First Congress was to establish a tonnage tax of 6 cents on home vessels and 50 cents on foreign vessels entering our ports and a rebate of 10 per cent of tariff duties on goods imported in American vessels.

Without going into further details of measures passed, the result of this system was that our marine advanced by leaps and bounds, so that in 1794 we carried 91 per cent of our imports and 86 per cent of our exports in American bottoms. This flattering condition continued in unabated vigor, except temporarily during the War of 1812, until high-water mark was reached in 1825, when we carried over 95 per cent of our imports and 89 per cent of our exports.

On the statute books of the United States the discriminating duty system still stands in apparent force, but its vitality has been wiped out by a system of trade conventions with foreign nations by which their vessels are placed on a level with ours in the ports of the United States.

Not to burden this report with details, it may be fairly said these treaties began to take full effect about 1828, and from that time until now our carrying trade has steadily declined. We lost about 1 per cent a year for 30 years, until the Civil War. It revived steadily after the war, but again drooped and dwindled, and under this system we now carry about 9 per cent of our traffic.

Many volumes have been written about these things, torrents of debates have poured forth, and many are the theories presented for our consideration, but the "short and simple annals" of our foreign carrying trade are contained in the foregoing. Theory may be piled on theory, but the simple fact is, experience proves that a moderate discrimination duty will accomplish what we want—and no nation can justly take offense.

The policy of discrimination duties was inaugurated by the fathers of the Democratic Party, and it has recently had the sanction officially of the Republican Party, and it may therefore be justly termed nonpartisan and broadly American. Jefferson and Madison were the authors of our earliest laws along these lines. Adam Smith, the greatest apostle of free trade, declared that protective navigation laws were the one justifiable exception to his proposed system.

The Republican national platform of 1896 said:

"We favor restoring the early American policy of discriminating duties for the upbuilding of our merchant marine and the protection of our shipping in the foreign carrying trade, * * * so that American ships may regain the carrying of our foreign commerce."

Mr. McKinley, in his letter of acceptance, said:

"The policy of discriminating duties which prevailed in the early years of our history may be again promptly adopted by Congress and vigorously supported until our prestige and supremacy on the seas are fully attained."

In 1894 Senator Frye proposed in the Senate to abrogate the trade conventions and again inaugurate the discriminating-duty plan of building up our marine, and was supported by Senators LODGE and Higgins and other Republican Senators. In 1897 Senator Elkins delivered an able speech in the Senate advocating this policy.

No one questions the certainty and effectiveness of this discriminating-duty plan, if it should be adopted. While the Democratic Party is opposed to taxing the general industries of the country in order to give the proceeds to a private enterprise, it is not opposed to encouraging the American marine by a reduction of taxation.

The principal argument offered by its opponents is that we must first abrogate over 20 trade conventions with foreign nations, and that these nations would retaliate against our shipping in their ports, and against our exports, especially foodstuffs.

These conventions all contain provisos that they may be annulled on one year's notice (some of them six months' notice) by either party, and 14 have been so annulled at different times. There is no practical difficulty whatever in the way of annulling them if we so decide. Senator Frye's proposed bill and Senator Elkins's for discriminating duties simply fixed the 10 per cent discriminating duty in favor of American vessels, and then provided that the same should take effect in 15 months, and in the meantime notice of the act should be given to foreign nations.

With reference to retaliation, it may be said we have no foreign shipping now to speak of, hence they can not hurt us in that direction, while we would soon get back at least 50 per cent of our foreign carrying.

But the advocates of the subsidy say foreign nations will retaliate by increased duties against our products. We can not believe that their expressed fears are genuine. To bring about retaliation from a sensible people you must do some harmful, unjust act—you must grab for more than your share—but to adopt a moderate policy of encouragement of our merchant marine in order to get our just share of trade will not provoke a sane man. If we were seeking what rightfully belonged to them, we might expect revengeful measures; but to ask a part of what is ours by all moral standards may call forth their selfish efforts to prevent us from adopting the measures, but no retaliation for purposes of revenge.

The men who see danger in retaliation in discriminating duties are the men who want subsidies. If foreigners were going to retaliate against our foodstuffs, every provocation has been furnished by the Dingley bill. The nation that would stand our almost prohibitive tariffs without retaliation is not going to take offense or umbrage if we adopt conservative measures simply to get a part of our own without the remotest thought of taking anything that belongs to them.

The world needs our products, especially cotton and foodstuffs, and for the welfare of their own people the nations which import our goods can not afford to do anything to embarrass the quick and cheap importation of our products.

One plan of discriminating duties much advocated by the conservative people, and which involves no danger whatever of retaliation, allows all foreign vessels to carry freely between their own countries and the United States, but levies an extra duty when they carry between the United States and other countries. Speaking of this plan, Senator Elkins said, having reference to the South and Central American trade:

"Here is the carrying of nearly $300,000,000, 90 per cent of which is now done in foreign ships, which if this bill becomes a law, without retaliation or opposition of any kind, will come to our ships, and they can not get it in any other way."

In pursuance of the foregoing views we shall at the proper time move to recommit the bill H. R. 7056 to the committee, with instructions to bring in a bill providing for discriminating duties in favor of American shipping and for the abrogation of any trade conventions which stand in the way of this course.

THO. SPIGHT.
ROBT. W. DAVIS.
ALLAN L. MCDERMOTT.
J. A. GOULDEN.
JOHN H. SMALL.
ALFRED LUCKING.

Some of those men are still Members of the House of Representatives. It seems to me that the arguments presented in this report are absolutely unanswerable; they are just as applicable to-day as they were when they were written, and the people of this country will certainly wonder why it is that when the Democratic Party has come into power it disregards entirely the recommendations which its representatives made when they were in the minority.

In the Fifty-ninth Congress, second session, Senate bill 529 was favorably reported to the House by the Republican majority. The Democratic minority submitted a minority report and said, after referring to what they considered defects in the existing laws:

If we would accomplish real and permanent good, let us repeal some and modify existing laws, and if need be return to the policy of discriminating duties which was so eminently successful in the early life of the Republic. Above all things, let us get away from the idea of subsidies and quit encouraging men to believe that they can not do anything without Government aid and teach them lessons of self-reliance.

They now prefer to say to the individual: "You can not do this at all. The Government must do it."

This report was signed by Thomas Spight, J. A. Goulden, H. L. Maynard, SWAGAR SHERLEY, and G. B. Patterson.

During the second session of the sixty-first Congress House bill 16362, amending the American merchant-shipping act, was favorably reported by the Republican majority. A minority report was submitted in which a substitute was proposed, the first and second sections of which read as follows:

That a reduction of duty of 5 per cent of all the customs duties now and hereafter imposed by law shall be allowed on all goods, wares, and merchandise imported into the United States in vessels of the United States, owned and controlled by citizens of the United States, or corporations organized and chartered under the laws of the United States, or of any State thereof and whose stockholders are all citizens of the United States; but said reduction of duty herein provided for shall not apply to cases where goods, wares, and merchandise are transshipped or transferred from a foreign vessel or port or place to a vessel of the United States for the purpose of evading the provisions of the customs laws of the United States. And any and all clauses

in existing treaties with foreign countries in contravention hereof are hereby abrogated, and all acts of Congress in conflict herewith are hereby repealed: *Provided*, That said reduction of duties shall take effect and be in force from and after the time specified in section 2 of this act. The Secretary of the Treasury shall prescribe such rules and regulations as may be necessary for carrying out the provisions of this section.

SEC. 2. That the President shall have the power, and it shall be his duty, to give notice, within 10 days after the passage of this act, to all foreign countries with which commercial agreements have been entered into making any provision or provisions which are in conflict with section 1 of this act, of the intention of the United States to terminate such agreement at a time specified in said notice, which time shall in no case be longer than the period of time specified in such agreements, respectively, for notice of their termination: *Provided*, That until the expiration of the period when the notice of intention to terminate hereinbefore provided for shall have become effective, or until such date thereto as the high contracting parties may, by mutual consent, select, the terms of said commercial agreement shall remain in force.

The minority said:

It will be observed that by the first section of this proposed substitute we offer discriminating duties.

We will not enter into any extended discussion of the wisdom of this policy, but will say that the obvious effects of it would be to induce the foreign merchant or manufacturer who desires to ship any dutiable goods to an American importer to send them in a vessel of the United States on account of the 5 per cent rebate. The same inducement is offered to our merchants buying in foreign markets. The great advantage to the shipowner would be that it would help to assure him of a return cargo. At the same time it is a help pro tanto to the shipbuilder, because it encourages the investment of capital in American-built ships, which may engage in either foreign or coastwise trade.

UNSOUND OBJECTIONS.

Two objections have been urged to this policy, neither of which, in our judgment, is well founded. One that it would necessitate the abrogation or amendment of a number of treaties with foreign countries. That, it is provided in the treaties themselves, may be done by giving the specified notice. We have a precedent for this in the tariff law of 1909. Are we not strong enough and shall we not have courage enough to declare a policy of our own?

RETALIATION BY FOREIGN COUNTRIES.

The other objection is the danger of retaliation.

All the commercial nations of the world need what we have to sell. They can not afford to impose unnecessary burdens upon their own people in their efforts to punish us for the exercise of the very right which they claim for themselves. In one respect at least we have the advantage of any other country. We produce the cotton which keeps their factories running, gives employment to their labor, and clothes their millions. They can not get it elsewhere, and there is no substitute. It is inconceivable that England, or Germany, or any other country which manufactures cotton cloth, would put a burden upon our raw material, without which their machinery would stop and their people would suffer.

The second salient feature of this proposed substitute is the "freeship" provision. It is admitted by all that we have an insufficient merchant marine under the American flag in the foreign trade. We need more ships, and it is claimed that it costs so much more to build them in American than in foreign yards that the difference is prohibitive. While it is true that there is some difference, we are convinced that this difference is exaggerated. We call attention to the recent successful competition of American shipyards with those of the world in securing contracts for the construction of two large battleships for the Argentine Republic. Whether or not there is any ground for this contention as to the difference in the cost of construction, the fact remains that we have not the ships, and if our capitalists want to engage in the laudable business of carrying our commerce under the American flag they must be allowed to buy in the cheapest markets. This we propose to do without any tonnage limitations or as to whether the motive power is steam or sail. As a concession to our shipyards, we deny these foreign-built vessels the privilege of coastwise trade.

This was signed by Thomas Spight, J. A. Goulden, Harry L. Maynard, FRANK CLARK, J. W. ALEXANDER, RUFUS HARDY, and R. P. Hobson.

Again in the Sixty-first Congress, third session, H. R. 32127 was favorably reported, the report being submitted by Mr. Hobson. Sections 7 and 8 of this bill read as follows:

SEC. 7. That a reduction of duty of 5 per cent of all the customs duties now or hereafter imposed by law shall be allowed on all goods, wares, and merchandise imported into the United States in vessels of the United States, owned and controlled by citizens of the United States, or of any State thereof, and whose stockholders are all citizens of the United States, but said reduction of duty herein provided for shall not apply to cases when goods, wares, merchandise are transshipped or transferred from a foreign vessel or port or place to a vessel of the United States for the purpose of evading the provisions of the customs laws of the United States.

SEC. 8. That a duty of 2 per cent ad valorem is hereby imposed on all goods, wares, and merchandise now on the free list or that may hereafter be placed on the free list when imported into the United States in ships or vessels not of the United States.

The majority report referred to these and other sections of the bill, as follows:

The second six sections of the bill will produce that large tonnage of cargo carriers that will make us commercially independent. The foundation of the policy is discriminating duties in favor of American bottoms, reductions of rates on goods now dutiable, and the placing of duties on goods now on the free list. This amount of discrimination is so small in both cases—5 per cent of existing rates and its equivalent 2 per cent ad valorem for nondutiable goods—that it can not disturb business conditions. The amount of nondutiable goods affected will decrease in proportion as American bottoms supplant foreign bottoms. The effect upon our revenues will be small, the loss of revenue on dutiable goods, if any, being offset by the gain of revenues from goods now on the free list. In general effect the reduction will coax European trade and in addition will drive Pan American and Asiatic trade into American bottoms.

Mr. HUMPHREY of Washington, a Republican, submitted a report, in which he said:

The most important feature of the bill is section 8, the discriminating-duty provision. This provision would undoubtedly give us a great merchant marine of cargo carriers. Especially would this be true between this country and South America and between this country and the Orient, the places where we most need ships. This provision is entirely different from the discriminating-duty bills recently introduced in Congress, providing only for a reduction of duties in goods carried in American bottoms. Bills if this latter class are absurdities because of the large amount of our imports now upon the free list. A discriminating duty between here and South America downward of 5 per cent on all goods carried in American bottoms would not be sufficient to run a line of Indian canoes between here and that country. If all our imports from Brazil in the year of 1908, amounting to $75,577,864, had been carried in American ships, and they had received for that service 5 per cent of the duties paid upon these imports, it would have amounted to the magnificent sum of $2,877.55. During the first 16 days of November, 1909, seven ships came into the harbor of New York from South American ports. These ships carried a cargo valued at $2,991,826. These seven ships, for bringing in this amount of imports, if they had received 5 per cent of the duty paid, would have reaped the magnificent reward of $42.30 each. The period selected for this illustration was selected at random, and is a fair one of the general trade between here and South America. The same coaditions exist as to the Pacific Ocean. Take the *Minnesota*, the largest vessel on the Pacific and one that has the distinction of being the only ship beneath the American flag that is running exclusively in the foreign trade without Government assistance. If this great vessel had received 5 per cent of the duty paid upon the goods it carried in the year of 1909, it would have had the great assistance of $5,262.90. If it had received the same pay in proportion to tonnage and speed as the Japanese vessels that are running in competition with it, it would have received for that period the sum of $350,000.

But the other provision of section 8 that gives the preference to American ships of 2 per cent ad valorem on the value of goods now on the free list would be an advantage that would give us an American merchant marine To illustrate: On the 4th day of March, 1910, the *Clement*, of 2,166 tons, brought a cargo into the port of New York from South America valued at $6,000,000. On November 14, 1909, the *Afghan Prince*, of 4,794 tons, brought a cargo from South America valued at $1,195,572. All the goods carried by each vessel were on the free list. Two per cent of these cargoes would have been a great reward, sufficient to secure American ships beyond question. In these two illustrations, however, the cargoes are more valuable than the average. This shows in a most striking manner the difference between a discriminating duty of 5 per cent reduction and the discriminating duty of 2 per cent increase. The 2 per cent increase would place the American flag on the seas and would fill the ocean with our ships between here and South America and here and the Orient.

This statement made by him is very significant:

Certainly the country is to be congratulated that only two members of the committee were opposed to section 8.

Two members of the minority, Mr. J. W. ALEXANDER and Mr RUFUS HARDY, submitted a minority report, in which they said:

Our objections lie particularly in sections 1, 2, 3, 4, 5, and 6 of the bill.

They say:

Section 7 of the bill is substantially the same as section 1, H. R. 21828, Sixty-first Congress, second session, known as the Spight bill. The Spight bill was proposed by the minority members of this committee as a substitute for H. R. 16362, known as the Humphrey bill, and now on the calendar. And we incorporate the views of the minority, in which all the Democratic members of the committee concurred, as filed with that bill as Appendix A hereto, as applicable to the bill under consideration as well as to H. R. 16362 and Senate bill 6708, hereinbefore referred to, which are both now on the calendar, and we submit the Spight bill as a substitute for the bill reported by the majority.

It will be seen from that, Mr. President, that this committee was practically unanimous in its report upon this bill, so far as its provisions relating to the policy of discriminating duties were concerned.

I call the attenton of the junior Senator from Alabama to the bill which I have introduced for the upbuilding of the merchant marine, and ask his powerful aid in its behalf. I know that he is in favor of the principle of it. In another body he urged its adoption in a powerful and comprehensive speech, and after that speech the Democratic Party declared in its platform as follows:

We believe in fostering, by constitutional regulation of commerce, the growth of a merchant marine which shall develop and strengthen the commercial ties which bind us to our sister Republics of the South, but without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury.

There can be no doubt but that that declaration referred to this policy. Through the efforts of the Senator from Alabama, the principle of this bill was asserted in the Underwood-Simmons Tariff Act; but under a Democratic administration the officers of the United States who are supposed to sustain the acts of Congress, and who have sworn to support the law of the land, have exerted every possible effort against the enforcement of this law, and have done all in their power to nullify it; and a case will be heard in the Supreme Court soon attacking the validity of this law, with the officers of the Government striving to destroy it.

The last public declaration of the Republican Party for the upbuilding of the American merchant marine by a specific policy was as follows:

We favor restoring the American policy of discriminating duties for the upbuilding of our merchant marine and the protection of our shipping in the foreign carrying trade, so that American ships, the product of American labor employed in American shipyards, sailing under the Stars and Stripes, and manned, officered, and owned by Americans, may regain the carrying of our foreign commerce.

In my judgment both parties are committed to this policy, which was so evidently successful in the early days of the Republic. If Congress would take up this question in a nonpartisan way and free from the dictation of the executive departments, a law could be passed under which we would secure a merchant marine, and which, in my judgment, would be based upon the principle of this bill.

The main objection heretofore urged against it has been that it will involve the abrogation of many treaties and invite retaliation. We have begun the abrogation of treaties in the interest of laws which we deem necessary and beneficial. We did not hesitate to provide for their abrogation in the La Follette seamen law, and the President has already given the necessary notice.

Right there I desire to insert in the RECORD a letter from the Secretary of State, under date of February 25, with reference to this matter, together with a list of treaties, notice of the abrogation of which has been given.

The PRESIDING OFFICER (Mr. HOLLIS in the chair). Without objection, it will be so ordered.

The matter referred to is as follows:

DEPARTMENT OF STATE,
*Washington, February 25, 1916.*

Hon. WESLEY L. JONES,
*United States Senate.*

SIR: I have the honor to acknowledge the receipt of your letter of the 14th instant, in which you request to be advised "as to the nations that have been notified of the abrogation of treaties under the seamen's law, when the treaties were entered into, and the form of notification."

Complying with your request, I have the honor to inclose herewith a list showing the Governments to which notification was sent, the date of the treaties, and the articles thereof affected, and to inform you that the instructions on the subject to the diplomatic representatives of the United States directed them to say to the ministers for foreign affairs that "pursuant to the provisions of the act of March 4, 1915, the Government of the United States hereby gives notice of its intention to abrogate Articles [number of the articles] of the treaty of [date of treaty] with [name of country] in accordance with the stipulations in the treaty requiring 12 months' notice," such abrogation to take effect July 1, 1916.

While denunciation of a portion of a treaty as required by the act may not, according to international practice, be made, the President nevertheless, using the discretion which he deems was granted to him to interpret the act in the sense contemplated by Congress, instructed the diplomatic officers to propose to the ministers for foreign affairs an arrangement between the United States and their respective Governments which would effect the purpose of the act by the abrogation or mere omission of the articles referred to without affecting the remaining articles of the treaties. I have the honor to be, sir,

Your obedient servant,

ROBERT LANSING.

(Inclosure: List of treaty articles which the United States has given notice of its intention to terminate under the seamen's act.)

[1] Whole treaty.

Mr. JONES. We can abrogate the treaties that shackle us in dealing with foreign trade without giving offense, because the treaties themselves provide for such abrogation.

This is the time to do it. When the European war is over we will find ourselves engaged in the fiercest commercial struggle that any nation has ever faced. These treaties will handicap us and aid our rivals. Other nations will not hesitate then to use every possible commercial device or subterfuge to keep us off the seas or from securing the world markets. It is patriotic wisdom to prepare for the contest by terminating treaties that shackle our people and work only to the advantage of their competitors. If other nations desire to enter into a contest of retaliation, we can face it with equanimity. We will then be able to strike blow for blow instead of taking supinely whatever discriminations they aim at us without any effort at self-defense, as now. This, Mr. President, is the time to act. This is the time to prepare. This is the real preparation that should now excite our people, and that we should make. Instead of inviting trouble by controversies over charges of broken treaties, let us abrogate these treaties and start into the commercial contest that must surely come at least upon a fair and equal basis.

The Democrats should welcome this legislation. They claim to want to build up the merchant marine. They say they need more revenue. The primary purpose of this bill is to build up the merchant marine. Incidentally, it will provide revenue to meet the deficit now confronting us. We ought to have a merchant marine. We must have revenue or go into bankruptcy. Until a merchant marine is built up under this bill it will produce revenue. We can not build a merchant marine immediately. We must have revenue at once. Until an American merchant marine is built up this bill will produce revenue, and as a merchant marine is developed the revenue will decrease. By the passage of this bill we will get the revenue to meet the present emergency. We will fit ourselves to enter upon equal terms the great commercial contests that are sure to come, and we will once more place the American flag upon American built and manned ships upon the seas.

Instead of making the Government particeps criminis in the hellish traffic of manufacturing shot, shells, ammunition, and guns for the slaughter of humanity by sharing in the proceeds from their manufacture, let us use this peaceful and inexpensive means of building up a much-needed merchant marine and secure the revenues necessary for a depleted Treasury.

Mr. President, the great political parties of the country will soon meet. They will issue their platforms. They will declare the principles and policies upon which they will seek the people's approval. The time for equivocation is past. Glittering generalities on this great question should cease. Each party should say something, propose some plan to do what everybody wants done, and what everybody knows needs to be done. If our plan is to be subsidies and subventions, let us say so. If something else, let us say so. The plan proposed in 1896 was rejected because of the treaties involved. Now is the time to get rid of them. A clear-cut and definite plan should be submitted by each party upon which the judgment of the people can be secured after full discussion and consideration. As the situation now is, the Democratic Party should declare for a Government owned and operated merchant marine and the Republican Party should declare for a discriminating duty plan, and I have no doubt of the verdict.

A proposition of that sort is going to be passed by another body. It may be attempted, then, to pass it through this body. It proposes a plan that never has been submitted to the people, that never has been passed upon by the people, that never has had the consideration of the people. It seems to me that the wise course and the proper course to take would be to submit that proposition to the people as a square-cut issue, to be met by a declaration in the Republican platform, and then the voters of this country will declare squarely upon it when election day comes around. The succeeding Congress will then know that the people have taken into consideration the issue raised, have considered it, deliberated upon it, and have passed upon it, and then the Congress can act in accordance with their expressed wishes.

I have some statements here bearing upon this subject. Without reading, I ask that they may be put in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[From the Marine News of January, 1916.]

TO SECRETARY M'ADOO.

Mr. McAdoo, you assert that the only alternative offered to your proposed Government-ownership bill is that of subsidies, that otherwise criticism is destructive and not constructive. Why do you ignore the suggestion of a return to the old policy of discriminating import duties and tonnage dues? It was in more or less force for 61 years, as a result

of which American ships carried an average—mark you, an average—of 80 per cent of our imports and exports for 72 years. It has been recommended to Congress again and again in Democratic minority reports during the 8 or 10 years preceding Democratic control of Congress. It was their invariable alternative to subsidies that Republicans proposed. Men of your party who studied "the shipping question" in committees of Congress advocated a constructive policy, one that had back of it a record of achievement most remarkable and enduring, one that took not a cent from the National Treasury, one that would be sure to add millions of dollars to the National Treasury. Shall we catalogue the Democratic minority congressional reports of recent years in favor of discriminating duties? Did you ever read the speech in favor of that policy delivered on the floor of the House of Representatives by Mr. UNDERWOOD on February 26, 1910, when he was a member of the minority? It is well worthy of your most careful attention. It is sound Democratic doctrine. It has its foundation in the Constitution. It advocated the constitutional method of building up our shipping in foreign trade that the 1912 Democratic national platform advocates. Surely you know that the first bill introduced in the House of Representatives in the Sixty-third Congress by Chairman ALEXANDER, of the House Committee on the Merchant Marine and Fisheries, was a bill providing a discount of the duty on dutiable imports in American vessels, and an ad valorem duty on nondutiable imports in foreign vessels, and instructing the President to serve notice on all nations with which we had terminable trade treaties of our intention to terminate them so as to give effect, full and vigorous and virile effect, to the other provisions of his bill? Would you say that Chairman ALEXANDER introduced a bill of such importance and of such a character without believing that it would receive the support of his party associates—the majority of his committee and the majority of Congress—especially in view of the minority reports in favor of the policy he advocated which Democrats had so often in the preceding years presented to Congress, and which your party platform in 1912 advocated, if what it advocated in respect to the method by which to build up our shipping in foreign trade meant anything? Surely you know that Representative Hobson introduced a discriminating-duty bill in the Sixty-first Congress when Republicans were in control, and that the Hobson bill looked so good to the Republican (the majority) members of that committee that every one of them voted for it, as did all but two of the Democratic members of that committee, and that the Hobson bill of the Sixty-first Congress, in respect to its discriminating-duty features, was almost precisely like the discriminating-duty bill introduced in the Sixty-third Congress, on the first day of its first session, by Chairman ALEXANDER, of the House Committee on the Merchant Marine and Fisheries. Whether you know it or not, you should know it, and that is why we are recalling it to your and to public recollection now. These things are a part of your party's history; they indicate a constructive disposition toward the restoration of American ships to foreign trade, an earnest, prolonged, reiterated, persistent belief in and advocacy of a thoroughly constructive policy by Democrats informed regarding and familiar with the condition and needs of American shipping in foreign trade.

You know that Mr. UNDERWOOD, in accord with his Ways and Means Committee of the House of Representatives, provided for a 5 per cent discount of the duty on imports in American vessels in his 1913 tariff, because even before the bill had passed the House of Representatives you were trying to destroy that constructive policy of your party associates, as disclosed in your correspondence with the State Department, afterwards published as a Senate document. What caused you to do that? Was the foreign opposition so strong that it had to be heeded, and was the American advocacy so weak that it could safely be ignored? If that was not the reason, there are many who think it was. Did Mr. UNDERWOOD cringe in the face of the storm of protest raised by the representatives of foreign Governments in Washington to the 5 per cent discount section of the tariff bill? You know that he did not, however weak-kneed others proved to be. He stood up manfully, courageously, and he refused, and his associates in the House of Representatives joined him in refusing, to strike out that innocent little subsection of the tariff. You know, doubtless you thoroughly know, why the 5 per cent discount subsection went out of the tariff bill so quickly when it reached the Senate. But Mr. UNDERWOOD was able to get it reinserted in the bill when the bill went to conference, and in that form it passed and was signed by the President.

The press of the country asserted that the ink of the President's signature had scarcely dried on the bill before he summoned Mr. UNDERWOOD back from Atlantic City to repeal the 5 per cent discount of the duty subsection of the tariff act. Perhaps you know why Mr. UNDERWOOD went back to Washington so hurriedly, and what passed between him and the President. The press said at the time that President Wilson pleaded with Mr. UNDERWOOD to repeal the subsection, so that thus the representatives in Washington of foreign Governments who violently opposed the bill might be appeased. Whether that is true or not you doubtless know far better than we do. And doubtless you know whether or not, as the newspapers alleged, Mr. UNDERWOOD suggested to the President that he explain in a message to Congress why he (the President) desired to appease the representatives in Washington of foreign Governments and thus overcome their opposition to a measure framed and designed in part to restore American ships to foreign trade, in part to furnish, what you now so loudly and vehemently demand, a naval auxiliary merchant marine.

Whether Mr. UNDERWOOD was or was not asked by the President to have the 5 per cent discount of the duty subsection of the tariff on imports in American vessels repealed, we all know that it was not repealed. We know that you asked the Attorney General for an opinion as to the meaning of a subsection of the tariff that was thoroughly clear to the representatives in Washington of the great maritime nations, but that the President had misgivings about, not because of any obscurity in the subsection as the meaning of its provisions had been presented to him from the State Department, and to that department by the aroused, incensed, and truculent representatives in Washington of the great maritime nations.

We have the authority of the Washington correspondent of that most respectable and esteemed of American free-trade newspapers, the Journal of Commerce and Commercial Bulletin of the city of New York, speaking from his experiences and observations in Washington to the effect that it is the custom of Attorneys General to furnish to department heads the kind of opinions that department heads want. Whether that be true or not generally, or true in this particular case, we know that you received an opinion to which you have not as yet been known to object in any way, an opinion that declared subsection 7 of paragraph J of section 4 of the tariff was unenforceable, and, although the enforcement of it is by law lodged in your hands, we know that you have never enforced it, although twice the Federal courts created to deal with tariff cases have declared that imports in American vessels are entitled, under this 5 per cent discount section of the tariff, to a discount of 5 per cent on the dutiable imports they bring into the United States.

We know that your zeal for a naval auxiliary merchant marine never moved you to accept the judgment of the Federal courts, nor did it move you to enforce a little bit of a subsection of the tariff that Congress has enacted along with the tariff, with the constructive purpose in the minds of the majority—the Democratic majority thereof—of building up an American merchant marine in foreign trade. Why have you been so cold toward a policy favored by your party associates in Congress for the building up of American shipping in foreign trade, of providing a naval auxiliary merchant marine in the same old way that such a naval auxiliary merchant marine was built up and sustained during all of the 72 years preceding the Civil War, during the many, many years of "good old Democratic control of Congress"? Why so cold to a thoroughly tried and unquestionably successful policy that your Democratic colleagues in Congress feebly, but in part, tried to restore, but that you destroyed, and at the same time so warm for an untried policy of Government ownership and operation of merchant ships, almost unanimously condemned by your countrymen?

Surely the country has a right to know why an administration so keen as the present one seems to be for a naval auxiliary merchant marine in foreign trade, provision for which was in part made in the tariff, and relentlessly opposed by the administration, which has refused to enforce it and which has fought it with signal bitterness through all the courts, has never tried to secure such a merchant marine according to the method provided by a Democratic Congress. If you care to tell the country, the Marine News gladly offers you all the space you may desire in doing so.

---

WHAT HOLDS THE UNITED STATES BACK?

Common-sense consideration of our merchant shipping problem should make plain the impossibility of its solution by methods that would accentuate rather than relieve the intensity of foreign competition. Our people have gradually drawn out of foreign carrying during a period of over half a century, a period during which our foreign rivals have increased their ocean-going tonnage enormously, largely to accommodate our foreign commerce. This gives them the vantage ground of knowledge of and experience in the intricacies of international trade which present-day Americans are unfamiliar with. Our foreign rivals also have the advantage of cheaper construction and operation of ships than our own people in the beginning could hope for. Add to this the various aids, financial and otherwise, that foreign Governments that realize the value of a merchant marine of their own are disposed to extend in every way possible to those of their nationals who are engaged in maritime pursuits, and it becomes more and more apparent that, lacking governmental encouragement, those of our people who might be disposed to invest in American-built ships for foreign trade will not make the venture.

Cheapness is not, nor should it be, the sole objective of a nation in establishing and maintaining a merchant marine of its own. That policy has never been applied to our Navy, the personnel of which is three times more expensive than that of our nearest rival. Efficiency is of far more moment to the Nation than cheapness. Depending, for example, on foreign shipbuilders for our ships, in the very moment of our greatest need may they not fail us? Depending likewise upon aliens for the officering and manning of our merchant ships, of what avail will they be to the Nation in the event of war? Manifestly our national necessities in respect to a merchant marine of our own include home-built ships navigated by dependable citizens of our own. As private capital will not supply such a marine without ungrudging governmental support and encouragement, not at all for the benefit of either shipbuilders, shipowners, or seafarers, but for the welfare and safety of the Nation, literally encouraging laws must precede the establishment of an American merchant marine in foreign trade.

When in 1883 the United States entered upon the construction of its new Navy American shipyards were unprepared for and their men were unfamiliar with such construction. The construction was entered upon from a condition that may be described as "in the raw." The demand for warships was constant, and the supply was confined to the United States. What followed? Existing shipyards supplied themselves with the men and the facilities that supplied the national demand; new shipyards were established, and the work progressed rapidly and successfully. Most of the warships were built at or below cost, the competition between builders was so keen. Thirteen years later, in his last annual message to Congress, speaking of our warships, President Cleveland said:

"It is gratifying to state that our ships and their outfits are believed to be equal to the best that can be manufactured elsewhere, and that such notable reductions have been made in their cost as to justify the statement that quite a number of vessels are now being constructed at rates as low as those that prevail in European shipyards."

Having succeeded in so brief a period in constructing warships—the most intricate, difficult, and expensive of ships—as well and as cheaply as they could be built abroad, if, by law, a demand is created for merchant ships equal to the needs of our foreign carrying, why should not our people build them as well and as cheaply as they are built abroad if the supply of merchant ships were confined to American shipyards?

Had the building of our new Navy in 1883 been thrown open to foreign competition, is there reason to believe that American shipyards in 13 years would have built warships as well and as cheaply as they were built abroad? If the building of our merchant ships is thrown open to foreign competition, what reason is there to believe that American shipbuilders will attempt to meet the competition? We believe, however, that the policy pursued in building our new Navy, that it shall be wholly home built, in 10 or 15 years would bring our cost of merchant ships down to the level of foreign cost, or below it, merely by increasing the skill and efficiency but without reducing the pay of American workmen, which constancy of employment would no doubt accomplish.

The United States will decide to build a Navy equal to the strongest possessed by any other nation. At the same time it must decide to build a merchant marine equal to all of the needs of American foreign commerce. In a score of years our Navy and our merchant marine would be unmatched in all the world, and, by reestablishing our maritime independence, we would achieve and thereafter retain our destined position upon the seas.

COST OF AMERICAN AGAINST FOREIGN SHIPS.

[By Alexander R. Smith.]

The question often is asked, "Why can't we build ships in the United States as cheaply as they are built in other countries?" If but one-half the ships required to do our foreign carrying were built here, in a few years they would be built as cheaply, if not more cheaply, than in other countries. What is required is a demand for American-built ships, reasonably constant, and soon the supply would meet all requirements.

At present the greater part of the world's ocean-going shipping is built in Great Britain; that has been true for more than half a century. Naturally, Britons have been able to specialize, and, as far as possible, standardize. It is no uncommon thing to find three generations of one family working side by side in a British shipyard. As men develop special aptitude for a certain kind of work they are employed on that in which they have developed the greatest efficiency. The maximum of economy thus is achieved at the minimum of cost.

Is it to be supposed that in American shipyards, where labor is paid about twice that in British shipyards, where it is less steadily employed, and, because of the intermittent character of the employment, it is less efficient, by any possible economic legerdemain, in the beginning ships can be built as cheaply here as in Britain? Certainly not.

Without experienced shipbuilders, lacking thoroughly equipped modern American shipyards, in 1883 the United States began the building of our "new Navy." A demand was created for American warships, the supply of which was confined to the United States. What happened? Thirteen years later, in his last annual message to Congress, President Cleveland said, speaking of our warships:

"It is gratifying to state that our ships and their outfits are believed to be equal to the best than can be manufactured elsewhere, and that such notable reductions have been made in their cost as to justify the statement that quite a number of vessels are now being constructed at rates as low as those that prevail in European shipyards."

If a similar demand were created for American merchant ships, and the supply confined to the United States, why, in 13 years, or sooner, should we not be able to build them as well and as cheaply as they are built abroad? No doubt we could.

By imposing a higher duty on imports in foreign vessels than is imposed on imports in American vessels, and by collecting a higher tonnage tax on foreign than on American ships, the demand for ships would be created, and the supply of American ships would be increased rapidly. In an amazingly short time ships would be built at least as cheaply in this country as in other countries. It would take nothing from the National Treasury; on the contrary, it would add largely to our national revenues. Importers would see to it that American shipyards supplied the needed American-built ships.

—

OUR SIMPLE MERCHANT-MARINE QUESTION.

[By Alexander R. Smith.]

American shipping in foreign trade is one of the most discussed and the least understood questions of immediate national concern. It is a simple question, with endless ramifications, and collaterally it is full of the most subtle complications.

The people must first understand that American shipowners per se are no more concerned about American shipping in foreign trade than the Kansas farmer, the Colorado miner, the Georgia lumberman, the Illinois manufacturer, or the Wall Street banker.

The individual American invests in ships as a business, for a profit. He wants the cheapest ships he can get, and he wants to run them in the cheapest possible way. As foreign-built ships ars cheaper than American, and as ships are more cheaply operated under foreign flags than under the American flag, the American investor in ships buys foreign ships and runs them under foreign flags.

The United States—not its shipowners—needs an American merchant marine in foreign trade. It needs American-built ships, so that at all times we shall have shipyards in readiness to build and to repair ships. It needs American-manned ships so that when needed for auxiliary naval and military purposes the men and the ships will be available for the national defense. That is the prime reason why the United States needs an American merchant marine.

The great economic reason why this country needs such a marine is in order that the carriage of its imports and exports shall be stabilized, under our own control, and so that the Nation shall have a dependable merchant marine of its own instead of being dependent upon an unstable foreign merchant marine. To secure such a merchant marine the Government, in some effective and permanent way, should make up to Americans willing to invest in ships the difference between American cost of the ships and American cost of operating them in competition with foreign ships, not at all for the owners' benefit but for the Nation's benefit, for its defense.

The way to get such an American merchant marine is to exact a higher duty on all imports in foreign ships than is collected from imports in American ships, and to place a higher tonnage tax on foreign than on American ships. This takes nothing from the National Treasury, but adds to it instead. It is the policy that was in full or partial effect for 61 years, during which time American ships carried an average of 80 per cent of our imports and exports.

—

[From the New York Evening Mail of Jan. 26, 1916.]

HOME-BUILT DOMESTIC CARRIERS.

Foreign ships were not barred from our domestic carrying by law until 1817, but up to that time it had been made so expensive for foreign ships to operate in our domestic carrying that they abandoned all thought of it. We may properly say, therefore, that from the foundation of our Government until to-day, a period of 127 years, the domestic carrying of the United States has been confined to American-built vessels, owned, commanded, and officered by American citizens.

The last census of "transportation by water" in the United States, taken in 1906, showed that we had 37,321 documented and undocumented vessels of 12,893,429 gross tons, valued at $507,973,121, with a gross income of $294,854,532, employing 140,929 persons, who were paid $71,636,521. The previous census of transportation by water was taken in 1889. If our shipping has grown as rapidly during the past 10 years as it grew during the preceding 17 years, we now have 41,341 vessels of 15,560,659 gross tons, valued at $683,844,161, with a gross income of $373,007,742, employing 156,839 persons, who would be paid $89,373,991.

All but 829,833 of that total of 12,893,429 gross tons of shipping in 1906 was in domestic carrying—more than twelve-thirteenths. Up to the Civil War our tonnage in domestic trade grew no faster than that in foreign trade—it was about ton for ton. The disparity has grown only since the Civil War, our prohibitively protected domestic shipping steadily increasing, successful and profitable, our ships in foreign trade, in free competition with foreign ships, steadily diminishing and unprofitable.

The remarkable part of this is that although this vast tonnage engaged in domestic carrying was by law built in the United States, its extra cost has been no burden. The bulk of our people were unconscious that our laws required that vessels in our domestic carrying should be home-built, owned, commanded, and officered by our own citizens. The Nation that can so readily bear whatever burden is imposed by requiring that its shipping in domestic carrying be all home built, a shipping by this time twelve times larger than our shipping in foreign trade, a shipping in domestic trade of approximately 14,000,000 gross tons, could as easily bear the extra cost of having the ships engaged in its foreign carrying all built in the United States, say, an additional 6,000,000 gross tons.

We have been persuaded, oh, so astutely, and have accustomed ourselves to measure the value of our shipping in foreign trade by its cost, and our shipping in domestic carrying by its efficiency. For nearly three-fourths of a century our shipping in foreign trade was measured by its efficiency, not by its cost, and in those days it was all home built, owned, commanded, officered, and manned by our own citizens. When most numerous and most profitable our ships in foreign trade were by law all home built, owned, commanded, officered, and manned by our own citizens. Then our shipyards were equal to all of our tonnage requirements for domestic and foreign trade, our builders skilled and experienced, the Nation truly independent. How wise we would be if, in respect to the ships engaged in our foreign trade, again we would require that they should be home built, owned, commanded, officered, and manned by American citizens. It is a matter that Congress can arrange in the easiest and simplest way imaginable whenever it possesses the courage and the statesmanship.

—

[From the New York Evening Mail of Dec. 10, 1915.]

A NAVAL AUXILIARY MERCHANT MARINE.

[By Alexander R. Smith.]

Secretary of the Treasury McAdoo says the United States must have a naval auxiliary merchant marine. Conceded, unconditionally. We have but to think of Great Britain's plight had she lacked the several millions of tons of British merchant ships now engaged in auxiliary naval and military operations which are directly aiding in the national defense. This country may need some day, as badly as Great Britain has needed, a naval auxiliary merchant marine. Picture our plight lacking an adequate and effective naval auxiliary merchant marine of our own!

Note Britain's dependence upon British ships to bring to her the foods, raw materials, and munitions she needs so urgently, and note our own dependence upon British ships for our foreign carrying. Suppose British ships no longer were available for our foreign carrying; how, then, would we market abroad our over-increasing surplus products? We must have a naval auxiliary merchant marine measurably equal to the carriage of our exports and imports.

Shall we have a naval auxiliary merchant marine that shall be used as a political machine? Shall it be extravagantly managed? Shall it be operated at large financial loss; that is to say, shall it be owned and operated by the Government? Operating commercially, such ships would constantly be in acute danger of affronts which, at a moment's notice, might involve us in war with a foreign country.

We must have a naval auxiliary merchant marine of ships built in the United States, owned, commanded, officered, and manned by citizens of the United States, as ready to fight its battles in war, as alert to secure, hold, and develop the foreign markets which we must have in peace for our surplus products, the ships and the men constituting a highly efficient national naval reserve.

The easy, simple way to secure such a merchant marine is to collect higher duties from imports in foreign ships than is collected from imports in American ships, and to tax foreign ships more on their tonnage than we tax our own ships. This would force importers to secure American ships to avoid the extra duties.

Terminable trade treaties in the way? Our Government already has served notice on foreign governments with which we have such terminable trade treaties of our intention to terminate or modify them so as to give full effect to the seamen's act.

Retaliation? Retaliation gave foreign ships an average of just 20 per cent of our foreign carrying during the 61 years this policy was in operation preceding the Civil War.

Mr. KENYON. I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Iowa suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Fletcher | Lippitt | Sheppard |

Mr. CLAPP. On behalf of the junior Senator from Michigan [Mr. TOWNSEND] I desire to say that he has been called home by serious illness in his family. He has a general pair with the junior Senator from Florida [Mr. BRYAN]. I ask that this statement may stand for the day.

The PRESIDING OFFICER. Sixty Senators have answered to their names. There is a quorum present.

NATIONAL DEFENSE.

Mr. CHAMBERLAIN. Mr. President, the conference report on the Army reorganization bill was submitted by me awhile ago, and I had hoped that the Senate might be able to take it up and dispose of it this afternoon. After conference, however, with some of my colleagues and with the Senator from Arkansas, who has in charge the river and harbor bill, he thinks it might be best not to attempt to take it up this afternoon, but that it be taken up to-morrow morning at 11 o'clock. I hope I may be able to have the Senate consent to have the conference report taken up and disposed of at that time. I do not think it will take very long to dispose of it.

Mr. CLARKE of Arkansas. Mr. President, may I ask the Senator if he will not limit the time for its consideration to a couple of hours after the report has been taken up? If it opens up general debate, it may have the effect of displacing the river and harbor bill.

Mr. CHAMBERLAIN. I do not desire to do that, Mr. President.

Mr. HARDWICK. Mr. President, it will be impossible for me to consent to any agreement about the matter now. There are several Senators here who are not pleased with everything in the conference report nor with everything that has been omitted from it.

Mr. CLARKE of Arkansas. We will wait until to-morrow comes, then, in the light of events. I think it is the purpose of the Senator from Ohio [Mr. HARDING] to address the Senate at this time.

Mr. CHAMBERLAIN. I will not take any further steps about the matter at this time; but I ask that the conference report may be printed as a document for the information of the Senate.

The VICE PRESIDENT. That action will be taken.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. HARDING. Mr. President, the few remarks I may have to offer on the pending measure are not designed in any way to delay the action of the Senate. I rather suspect that I will not influence any votes cast on the measure. My position is the outgrowth of an incident in the proceedings of the Committee on Commerce. During the proceedings of the committee, at one of the meetings, a specific question came to a vote, when I ventured to say I was illy prepared to express my attitude on that particular question, whereupon the distinguished chairman of the committee, with that bluntness which characterizes him, and which does not in any way diminish my regard and affection for him, said, "Well, a Senator is supposed to know how to vote." That made me think, and after a very careful perusal of the bill and the reading of hundreds of pages of information and misinformation on the subject I feel very much in the attitude I expressed to the chairman that day as to the whole bill, I hardly know how to vote.

I did not sign the majority or minority report, because I wanted to have a free hand in the discussion of this measure. There is very much in this appropriation bill that I should like to vote for. I suspect that some Members of this body will think that I am prejudiced particularly in favor of the Ohio River project because it is located so as to seem to be a selfish proposition. I hope no one will accuse me of being quite that narrow.

Mr. President, I want to approach this proposition from a viewpoint a little bit broader than sectional. I should like to reach a position that is not in any way prejudiced by my partisan ideas. To be sure, the Ohio River traverses the southern border of my State, but I recall that that great waterway courses from Pittsburgh along the eastern and southern borders of my State, the northern borders or western borders of West Virginia, the northern borders of Kentucky, and the southern borders of Indiana and Illinois until it reaches the great Father of Waters. The Ohio River alone constitutes an artery of commerce extending more than 1,000 miles, which has been given the attention of the Federal Government since early in the Nation's history, perhaps as early as 1820. The Ohio River and its connection with the Mississippi makes a waterway almost equal to the entire free river transportation lengths of Germany. The Mississippi and the Ohio make a waterway, not counting the section north of St. Louis, of more than 2,000 miles, and probably has the largest river commerce of any river waterway in the world.

It is a very natural thing that the Ohio should be a useful artery of commerce. It has located, as I suggested, at the headwaters not only the wonderful city of Pittsburgh, and is bordered by the important cities of Cincinnati and Louisville and Wheeling, but throughout what we call the southeastern Ohio Valley, adjacent to the coal fields of Pennsylvania and West Virginia and Ohio, there is a perfect avenue of almost matchless industry running from Marietta all the way to the great steel city of Pittsburgh.

Naturally with these hives of industry and the coal fields the Ohio becomes a natural avenue of commerce. I believe it will be possible for the river to rival the Rhine. It does now; it excels the Rhine in heavy freight; but of course the Ohio situation, as indeed all American situations, are very much different than those of the Old World. Eventually I must address myself for a few moments to that feature of this question.

My objections to the bill in its present form are general in nature. I would not for a minute desire to take up and discuss any individual appropriation. I feel myself utterly unfit to do so. I surely would not want to take the bill up and discuss it from any geographical or sectional viewpoint. I should like to undertake to vote a large appropriation for internal improvements of this character. It would have to be a very indefensible project that I would not like cordially to support.

I do not entirely agree with the statement made by my distinguished friend the Senator from Illinois [Mr. SHERMAN] the other day. I love to dream of the possibilities of commerce. I think I know something about commerce's contribution to our present-day advancement. I am sure we all know something of the part that internal improvement has contributed to American development. But, on the other hand, there must grow upon every observing American the deterioration of inland waterway commerce. I have been reading with more or less interest the report of the United States National Waterways Commission, but before I had read that very interesting report I had come to some conclusions of my own that are rather personal in character.

My first observation relating to inland-waterway commerce came from my experience in the General Assembly of the State of Ohio. Ohio caught the spirit of canalization, or rather of canal building, in the early days of the State. We expended millions upon interior water routes from the Lakes to the river, and for a number of years these canals contributed very largely to the development of the great Commonwealth of Ohio. But after the period of railway development came the canal traffic began to deteriorate. It proved more and more expensive to keep them up, and we had in Ohio, and have now, the problem of the abandonment of our canals. Every man who recommended the abandonment of the canals was suspected of having some selfish motive. It was suspected that he wanted to make a grab of a right of way. So we had a commission appointed to investigate the question, and one thing was done after another, but no fixed policy by the general assembly was ever formulated. Finally at one session of the general assembly, while I was serving on the finance committee, a delegation representing the canals of the State—representing, I should say, the canal spirit of the State—came before our body and said the trouble with the development of canal transportation is that nobody knows how long these waterways are going to be maintained, and nobody will venture to build a canal boat nowadays for that reason. Being of rather a practical turn of mind I said, "I can fix that without the expenditure of a dollar on the part of the State." So I had caused to be written into the bill a guaranty wherein it was stated that in case of a change of policy on the part of the State and the abandonment of any part or all of these canals the citizen who had invested in the building of a canal boat after the passage of this act and prior to 25 years therefrom should be reimbursed for his investment. In other words, we provided in the appropriation that in the case of the man who built a canal boat and we did not maintain a canal for him to operate it upon, we should buy his boat and return his money, so that he stood no possible chance to lose. Thereby we spiked for all time the argument that canal transportation was kept from developing because there was no fixed policy, and under that provision, which was enacted 16 years ago, there has not been a canal boat built in the State of Ohio. I am willing to drop my observation concerning canals with that one statement.

My next observation relating to the deterioration of river transportation——

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Nebraska?

Mr. HARDING. Certainly.

Mr. NORRIS. Before the Senator leaves that subject, which is very interesting, I wish to state that I know just a little about it, because I lived in Ohio for a great many years. Ohio had quite a system of canals. I believe there was a canal extending all the way from Lake Erie to the Ohio River.

Mr. HARDING. The Miami & Erie.

Mr. NORRIS. Yes. That has been abandoned, has it not?

Mr. HARDING. Not in toto. The Miami & Erie Canal, except that the southern section running into Cincinnati is maintained as a waterway, mainly for supplying water to the industrial institutions located on its banks. As a transportation line it is abandoned, practically.

Mr. NORRIS. As a facility of commerce it is no longer there. As I understand it, a large portion of the canal bed itself is dry and used for other purposes.

Mr. HARDING. That is true of the Ohio Canal, running around from Columbus to the Ohio River.

Mr. NORRIS. How much money has been expended upon those canals? Can the Senator tell us approximately?

Mr. HARDING. I could not tell the Senator from Nebraska the total amount of expenditures. My recollection is that the Ohio canals are estimated to be worth about $8,000,000.

Mr. NORRIS. They were free, were they not?

Mr. HARDING. Oh, yes.

Mr. NORRIS. Anyone who complied with the regulations could build a boat and operate it?

Mr. HARDING. Yes; and it is so to-day.

Mr. NORRIS. The locks were kept up by public taxation.

Mr. HARDING. Yes; by payments out of the general revenue fund of the State.

Mr. NORRIS. So, as a matter of fact, they were practically no expense to the man who wanted to operate a canal boat except his own boat.

Mr. HARDING. None whatever.

Mr. NORRIS. And such help as he might give.

Mr. HARDING. None whatever.

Mr. NORRIS. A large part has been abandoned.

Mr. HARDING. It is all gone, so far as actual transportation is concerned.

Mr. NORRIS. That has been on account of the developments of the railroads?

Mr. HARDING. Entirely.

Mr. NORRIS. Has there been any other cause that has contributed to the abandonment?

Mr. HARDING. I think not. As a matter of fact, we have maintained canals in Ohio at no little expenditure of money, with no income except the water rentals collected from the industrial plants that have located along the line of the canal, because it afforded them a very desirable water supply largely for steam purposes.

Mr. NORRIS. That brings me to another point which I would be glad to have the Senator enlighten me upon. Those plants that were located were originally built because the canal was there, and almost invariably found themselves utilizing the railroads instead of the canals later on.

Mr. HARDING. Almost wholly so.

Mr. NORRIS. So these manufacturing plants abandoned the use of the canal because of the superior advantages of the railroads?

Mr. HARDING. Almost entirely so. Mr. President, I can best answer the Senator from Nebraska by saying that to-day the United States of America is on wheels. We have passed the old canal age.

Mr. NORRIS. Can the Senator give us from his recollection something about the cost of the maintenance of the canal system of Ohio when they were in full operation?

Mr. HARDING. That antedates my time of actual experience in the Senate of Ohio; but we were expending for canals that were not in use approximately half a million a year some 15 years ago, when there was no possible use for the canals and no actual use except for the water they furnished to the industrial plants.

Mr. NORRIS. What did the State do with the canal right of way when the canal was abandoned?

Mr. HARDING. We very recently leased the right of way of one of the abandoned canals under a satisfactory arrangement for a railway route.

Mr. NORRIS. That is what I wanted to bring out.

Mr. HARDING. That has been one of the reasons why the abandonment has not been accomplished heretofore. There was always a fixed suspicion that somebody was seeking to grab these possessions and weaken us, though they were utterly worthless to the public at large. We clung to them and expended money on them rather than to lay ourselves open to the suspicion that we favored somebody.

Mr. NORRIS. Are there abandoned canals in Ohio with railroads built in the canal bed?

Mr. HARDING. Not at this time. That is in process of development.

Mr. SHERMAN. Mr. President——

Mr. HARDING. I yield to the Senator from Illinois.

Mr. SHERMAN. In response to the inquiry of the Senator from Nebraska I will state to him that in Illinois the Illinois & Michigan Canal is paralleled by steam roads that have been developed since the canal was opened for the entire length of the canal and more. There is an actual instance of a canal being abandoned practically and the building of a steam road that has reached from Chicago to St. Louis. I refer to the Chicago & Alton.

Mr. HARDING. Mr. President, I am very glad to have these interruptions. I wanted to recite to the Senate my next observation relating to the deterioration of inland-water commerce. It was my fortune to go to Florida 25 years ago, in the days before railway development had wrought such transformation as it has in that wonderful State. My fortune took me to a section on the Indian River, about 200 miles south of Jacksonville, what is known as the Merritt Island section of Florida. At that time there was no railway south of Titusville on the east coast, and indeed none that far south along the east coast. The railroad running to Titusville came across the State. There was an East Coast Railway running as far south as Daytona or Smyrna. It was in the vicinity of the Indian River, on which I was located, to some of you better known as the section of Rockledge and Merritt Island. All transportation on the river in those days was by boat, either sailing craft or steamboats. It was a wonderfully attractive section. It was romantic in accordance with our notion of things in the earlier days. I can recall very distinctly that at evening time, when darkness dropped its curtain suddenly, it was a very common thing to step out on the banks of the river and watch the steamboats passing at night. We knew every evening at a certain time that there would be seven big river steamboats in sight. It so happened we were located where they passed one another and we saw the best presentation of the river traffic on that river in that way. These boats made all the points on the river down as far as Jupiter Inlet. There was a necessary transfer across the little peninsula south of Jupiter Inlet, and those who wanted to go farther south took another steamboat on Lake Worth. I remember at one time the distinguished President of the United States, who was then Grover Cleveland, made a trip down the river. These boats not only carried passengers but carried all the freight that had to do with the development of the country, and brought back all the fruit of which that section boasted.

Three or four years later, perhaps in 1894, Henry M. Flagler began the marvelous development of the east coast of Florida with his railway building. He was able to command the means. He had an objective point. He saw the possibilities of the southern portion of the east coast of Florida. He mapped out a great and comprehensive scheme, and then he built a railroad with that thought in mind, and those of us who have visited that section of Florida for 25 years have witnessed the complete process of supersedure whereby this railroad has put the steamboats out of business. There is no flood and little tide on the Indian River; nothing to interfere with continuous traffic; but there is not a single craft for commerce, except a little tub of a steamer that crosses from one bank to the other and gathers up the citrus fruit of that section for transportation to a central shipping point, like Titusville or some other point on the railroad. The whole business has disappeared. Romance and commerce have both become things of the past.

I was making some investigation into the reports of the engineers on the subject, and I only cite these instances of Florida, because I have seen them myself—not that I have any grievance against the State of Florida in any way. I delight to see it develop. I hope that there may be some continued maintenance of water craft for the pleasure of those who visit that State in the winter, but the commerce on the Indian River is practically nothing; and I may say that under modern conditions there is but the one little craft which dodges back and forth connecting with fruit docks on the island side with the transportation lines on the mainland. They could get along quite as well without the one craft that is in existence there. It is a beautiful body of water, and the interesting thing about it to consider in this connection is that the Indian River is a tidewater river. In fact, it is not a river; it is a lagoon; it is a long arm of the Atlantic Ocean. It does not depend on mountain streams or freshets or springs for any of its water. The waters of the Indian River are the backwaters of the ocean, and it is always supplied at all seasons of the year and little affected by tides.

Mr. OWEN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Oklahoma?

Mr. HARDING. Certainly.

Mr. OWEN. I wish to ask the Senator whether there was any arrangement made between the Indian River boats and the railways, so that the traffic upon the river could be conveniently placed on the railways for further transportation across Florida?

Mr. HARDING. You mean whether there was cooperation between them?

Mr. OWEN. Yes; that would utilize the water transportation connecting the railways.

Mr. HARDING. I am not able to answer the Senator from Oklahoma definitely. There was this condition when the railway development began on the Indian River. On the Indian River there was a line of steamboats operating in connection with what is known as the Jacksonville, Tampa & Key West Railroad, and the line of boats operated in connection with that railway from Titusville on down to the Lake Worth section of Florida. Henry M. Flagler, who later built the railroad on the east coast, was not to have anything to do with that railway, and he necessarily established his own line of boats in the beginning of his construction, because he wanted to transport certain things down the river where his railway would lead. Then there was a competing line of boats. It is my recollection that there was very little done by Mr. Flagler himself on his railway to encourage facilities that would make the railroad and steamboat lines coordinate, as the Senator from Nevada [Mr. NEWLANDS] says.

Mr. OWEN. I have had an impression that the failure of water transportation was largely due to the detached character and to the fact that there was no method provided of control for waterways and railways to operate and permit convenient intershipment from one to the other.

Mr. HARDING. I am glad to have the Senator from Oklahoma raise that question, because it is pertinent to this discussion. I have noticed some passages in the report of the Waterways Commission that have something to say about that. The Waterways Commission, in reporting on this subject—I trust every Senator has read this document that has been in existence for the last six years—says:

> A fourth advantage of the railways, in this class, is the far greater attention given to provision for warehouses, terminals, and the equipment for handling freight. On many of the waterways very little if any progress has been made during the last 50 years in furnishing modern facilities for the storage or handling of traffic. In each of a considerable number of cities located upon rivers and canals in Germany the members of the commission during their recent inspection trip saw a larger investment for terminals and for the storage of freight and handling of boats than exists on the whole of the Mississippi River above New Orleans.

Following that proposition the commission speaks of the enormous investment in handling freight in connection with the Great Lakes. Of course the commission will also discuss and does in this report the question raised by the Senator from Oklahoma.

In Europe where there has been some maintenance of the volume of inland water traffic, if I may use that term, there has been the cooperation on the part of the Government which owns its railways to maintain a rate on the railroad that will encourage the development of waterway competition.

But, Mr. President, that will not apply. We overlook the point that Europe developed its waterways in the days of necessity under conditions of a dense population. We began to develop our waterways and have made some progress in the last 50 years, but under an entirely different condition, because meanwhile there came the railroads, and this wonderful land of ours is developed by railroads beyond any other nation on the face of the earth. I think the statement is correct that in relation to population our development is five times that of Europe. Will some one correct me if I have the wrong figures? It is given in this report. My recollection is that we have in this country five times the mileage in proportion to population that Europe has with its many Government-owned railways.

Under these conditions American enterprise, American determination, American individual development have strung the steel highway between all the marts of importance, have connected up its centers; and then we Americans, with this modern spirit of development, have gone boldly along at our incomparable pace until we demand the speed of the railway delivery. Nobody would tolerate nowadays a freight shipment by a canal boat, and that is one of the reasons why there is no ordinary commerce on the great Ohio River, relatively. Of course, there is packet freight on the Ohio River, but most of our river freight, as has been pointed out by the Senator from Iowa [Mr. KENYON], consists very largely of, shall I say, gross products—natural products—logs on the smaller streams running from the timber section to the sawmill, coal as we have it on the Ohio or in other sections. We are willing to tolerate our tardy shipment of products of that kind; but when you get to the great interior and serve all citizens, the American spirit no longer will tolerate any freight delivered by river transportation.

You can take the question a little bit further. Have Senators stopped to think what a tribute you have paid to this spirit of speedy delivery in this country? I called your attention to it for a moment in discussing the good-roads bill. You give us a good-roads bill from the majority of this body under the guise of contributing to the post roads of the country. You did not mean anything of that sort. You are encouraging the building of good roads by the Federal Government just as we did in the State of Ohio by the State government to promote the means of speedier transportation—not only the transportation of the passenger or the individual, but of his products. If you choose to call them market roads, very good.

As I said a moment ago, we have reached an age where the American people, at least, are on wheels; and you can not supplant the automobile and the railway car with anything like the antiquated canal boat or anything else that you can develop on our rivers.

I do not want by this statement, Mr. President, to commit myself unalterably and entirely against interior water navigation. I believe in it very cordially; but the trouble is that Congress has allowed to grow up a system of appropriation which is absolutely intolerable and indefensible. I want to know for what I am voting. I may get over this feeling in time, but it is a little difficult for a new Senator to come here and to think in millions all the time. I have a very strong conviction that a man who enters the public service ought to perform public duties very much as he would his own. The trouble with us is that we are all the time drifting away from our own individual convictions; we are drifting away from doing things as we would do them if they were our very own, and we are yielding to the exigencies of politics.

A Senator on the other side—I use no names, because I do not wish to violate the proprieties—said to me the other day, "This system ought to be abandoned; I know it," he said. I respect his opinion very highly; but he added, "We can not do it now." Well, Mr. President, if we can not do it now we never can do it. They way to do it now is to proceed to do it; and there never was a better time in the history of the United States than to begin now. For example, in my own affairs, if I find myself without ready funds—I ought not to put it in that way, but for illustrating purposes it will do; I am always that way—but when contemplating a condition lacking ready funds, I do not invest, and if I do business in the same way for the United States Government, when I contemplate a distressed condition of the United States Treasury, I ought to refuse to appropriate money for needless expenditures.

I do not mean to talk about any one party, Mr. President; we are just as bad on one side, I think, as on the other, excepting just now you on the majority side have the responsibility. It is rather a singular characteristic of our American political life that everybody talks economy in the campaign season, and that nearly everybody proceeds to grab at the Treasury immediately the campaign is over.

The Federal Treasury is a mysterious, mythical sort of thing that is never exhausted apparently, and nobody ever stops to inquire how the money gets into the Treasury. You know, I think we Republicans are responsible for that state of mind in the country. I do not mean to drift into a partisan discussion; but we Republicans had fallen into such a fortunate management of the country that we always had means to do the things that we wanted to do and still have an abundance of money on hand. I remember we had so much money that in 1884 you, on the then minority side, grew so worried about it that you passed resolutions on the subject in your national convention. I do not know but that the Senator from Kansas [Mr. CURTIS] may have made allusion to that in his address the other day; but the chief burden of worry on the part of my friends on the other side of the Chamber in 1884 was as to how to get rid of a menacing surplus in the United States Treasury.

So, I say, we are responsible for this creation of a feeling that the Treasury is inexhaustible; but I want to tell you, Senators on the other side, at a time when you are contemplating direct and offensive taxes to meet the needs of the Government, is a good time to resolve to correct abuses in the expenditures of the Government. I do not know that I can offer a remedy. A distinguished Senator from the South, discussing this bill the other day with the zeal for which he is known, said he would be very glad to have somebody who criticized the existing plan to be constructive enough to offer a remedy. Well, that is a fair

statement; and I wish I might do it; but because I can not offer a remedy immediately to-day is no reason why I should go on with the old system.

I was saying a moment ago that a man ought to follow the same rules in public service that he would in his own private conduct of affairs, and I have learned in my own business that if I go on a wrong track, no matter if I had made large expenditures on that track, it is better to back up and get off the track and quit, even if you do not know definitely what your next track is going to be. So I should like to favor the suggestion of the minority. I do not want anybody in the Senate and I do not want anyone who reads of these discussions to get the impression that I am opposed to a liberal expenditure for the improvement of harbors and of rivers which may be of some use in the service of the public, in the modification of railway rates, and in the facilities of transportation. I have been looking it up, and I have discovered that in the last 15 or 20 years we have increased these appropriations from approximately $15,000,000 to $20,000,000 to something like $42,000,000, as this bill provides. Well, the Senator who offered the criticism and asked for a constructive substitute the other day said, "We now have the examination of the engineers and their recommendations by which to make appropriations," and he added, "I do not believe there is any more dependable system than that." Well, Mr. President, one who reads the report of the engineers will find that there are a good many reports to Congress that do not mean anything, and I have discovered already that there are a good many recommendations of the engineers which are not heeded by Congress. There are numerous instances in the existing bill where committees of the House and of the Senate have exceeded the recommendations of the engineers. There are instances of appropriations made where the engineers have suggested that the project be abandoned. Under these circumstances I am unwilling to cast my vote to spend some fifteen or twenty million dollars of this proposed sum in order to secure, if you please, the sums that I should like to favor in the completion of the project for the Ohio or the Mississippi Rivers, or the two together.

Mr. President, there are in this bill not less than 100 projects on which there have already been expended millions of dollars which will never amount to a continental snap of your finger if we expend a hundred million dollars more to bring them to completion as originally designed. There is not a member of the committee who will not admit in private that we are following programs of river development that can never be made useful under any modern or known system of water transportation. If this be so, why limit ourselves, as we did in the consideration of this bill, by a rule to take up no new project, and then under that cloak go along with these enormous appropriations, largely because there is the old system of dividing up the spoils according to the political needs of the situation.

Mr. President, I do not want any fellow Senator to misconstrue my remarks. I like the fraternity of this body; I like to know that when the waters are muddy I will be considered; I like to participate in the "booster" proposition. I could vote for hundreds of projects with a good deal of conscience, and I very much desire to have the privilege of doing so in the pending bill. I know how a Senator feels when he has his heart set on securing Government assistance for some great undertaking in his section; but can we not bring that to a consideration on its merits and not have this trading combination which requires a man to stultify himself to secure the consideration of projects for which he really has a heart?

I do not know that it is customary to relate the experiences of committees, and I shall quote no one in the conversation which I am about to relate, but it is a very discreditable proposition that one man shall say "he ought to have this; this is all he has asked for; and he ought to have that, for that is all he has asked for; and we must give him this, for that is all his State wants." That is no way to transact business involving millions of dollars.

I want to say something that will lead the Senate of the United States to adopt a businesslike system of appropriating millions of money, as such a bill as this does, and give us all an opportunity to vote our conscience into an operation that involves some great public improvement.

Mr. President, the Waterways Commission, from which I started to quote—I do not want to take the time of the Senate—confirms all that I have attempted to say in this matter. Let me quote you one or two expressions:

> The commission has had under consideration the manifest decrease in water-borne traffic on a majority of the rivers and inland waterways of the country. On many there has been an absolute decrease, while on others the falling off has been merely relative. In these latter cases, although the aggregate traffic by rail and water has been greatly multiplied, the proportional share carried by water has very noticeably diminished.

Then this commission followed with a statement that is very interesting to note. I have already said—so I can have no prejudice in making this quotation—I should like to take the great Mississippi River and the Ohio River and some other tributaries and see if we could not really develop a great and effective and abiding system of water transportation. The commission reports from figures taken up to 1906 that the upper Mississippi River system decreased in water transportation 72 per cent; the Ohio system, to which I am committed, decreased 3 per cent; and the lower Mississippi River decreased 59 per cent, so there is an average decrease on the Ohio and the Mississippi of more than 30 per cent.

Those decreases are in no way disputed. There has been the backward tendency, and in only a very few cases has there been an increase of river traffic, notably on the Monongahela up about the city of Pittsburgh.

This raises the question in another form, as suggested by the inquiry of the Senator from Oklahoma. The commission says there are inherent or fundamental advantages in railway transportation, and then continues:

> The first and most important of these is the wider area of distribution available to railways. A railroad line can be constructed in any direction to any part of the country, except the portions which are admittedly inaccessible, while the line of a river is fixed by nature in a single direction. Railroads are more readily adaptable to the newly arising and ever-shifting demands of producing areas and of markets.

And, by the way, Mr. President, that raises another question. Some of the improvements which have been under consideration, and for which appropriations are made in this bill, are supported by local interests. The commission reports that on nearly all the waterway developments of Europe the expenditure is divided. I will not assume to give the percentages, but one part is assumed by the Imperial Government, one part by the State or the Province, and another part by the municipality; and sometimes the division goes further than that.

The construction of railways, which has entered into competition with and destroyed water transportation is due to the spirit of development. Up in Alaska, until Congress ventured to appropriate money for a federally built railway, private capital was engaged in building railway lines to the rich mineral deposits of the Territory. Congress saw fit to stop individual development and build a federally owned railroad in that section. What is the result There will be pending, if there is not pending now, a first request for an additional $30,000,000 of Federal money to build a branch from the Government railway to a deposit of ore or coal, which remains undeveloped because we halted the individual development. In my State it is customary if a man locates a deposit of coal or knows of a deposit of stone which he wants to quarry into he has the individual initiative and the courage and capacity to build a line of transportation, and he does not ask any Government help.

I can cite a very interesting illustration on the other side that applies to water. I should never have known of it if it had not been for some little touch of kinship that brought me in contact with it. Congress is appropriating in this bill several hundred thousand dollars for the development of a harbor and waterway at Texas City, Tex. The men who built the original channel into Texas City did not ask a penny of anybody; and, if they did, they did not get it; but they went ahead applying private capital to the making of a channel. Why? Because they had acquired the real estate on the site of Texas City and deliberately set about to build a harbor and a city and to profit thereby—a perfectly legitimate undertaking—but, unfortunately, because of the abundance of Government funds the practice has been established of men starting to build a city and then asking the United States Government to furnish the money to build it. I know how it is. I suppose if the chamber of commerce of my home city should start out and ask the Government to spend a half million dollars on the Scioto River, and they should ask my cooperation as a private citizen, I would join them, and I would come here, and I would make the best possible case in presenting the matter to Congress; but the Government would have no more right to spend half a million dollars on the Scioto River than it would have to go out and spend it on a mountain in Virginia to make some sort of a playground.

The practice extends in many directions. There is a provision in this bill for revetment work on the upper Missouri—and I regret that the Senator from North Dakota is not present. The United States Government is under some obligation to maintain its waterways so long as it holds them under Government control, and we ought to spend and we must spend millions for embankments and revetment work and levees in order to protect the citizenship of this country and maintain our waterways as we ought;

but here, on the other hand, there are thousands of people who have acquired almost valueless areas among the lowlands along the rivers of the country. They have acquired such land for a song because of the danger of flooding and overflow and the disasters that attend such conditions; but after they acquire the title to the land it is a very common thing for the people interested to want the public to expend the money that shall give increased value to their possessions. I do not blame them for doing that, but I am opposed to the Government undertaking such work.

That situation does not apply entirely to the Federal Government. We have the same condition in Ohio along the river banks in State control. Men acquire river-bank possessions at a song, because the property is endangered by flood all the time; but, as soon as enough of them become interested in one another and they can start an organized movement they will tax the nearest city on the banks of the river to dredge that river or establish a new channel so that they will be protected from floods; and land which cost $40 an acre will be increased to the value of $250 an acre by the expenditure of public money in revetment and channel work.

I want to see Congress liberally appropriate the public money for the maintenance of channels and for the improvement of harbors. I want to see Congress liberally contribute to the development of every possible waterway that is interstate in character at least, but, Mr. President, we forget that Congress has accomplished the great feat of railway-rate legislation, and when it passed that legislation it took away forever one of the chief inspirtions for the development of inland waterways. In the States we have our State railway commissions, so that interstate commerce and intrastate commerce are officially regulated, and there is not the slightest need in the world for entering upon an expenditure of millions upon millions of dollars for waterways that will never be used in order to attempt to influence the railway rates of the country.

This takes me back, Mr. President, to an illustration which I meant to use in the opening of my remarks. I do not know at this time the amount of money that was expended on the Muskingum River in the State of Ohio. The Muskingum River flows from the central eastern section of the State to the Ohio River at Marietta. It is a beautiful stream, and some Member of Congress, a number of years ago, had the eloquence and the influence to bring about an appropriation on the part of the Federal Government for the construction of dams in the Muskingum River. I am sorry I have not the information at hand to state the expenditure made, but there were perhaps a dozen dams erected in the Muskingum, although there has not been a boat on the Muskingum River, except one little passenger and package steamer in the last 10 years, and I was told only this week that this one steamer had not made a trip over the river in the last two years. I can have no prejudice concerning that, Mr. President. The Muskingum is in my State. There has not been enough commerce to pay the interest on one-tenth of the expenditure which the Government has made on the Muskingum River; the dams are to-day falling into a state of deterioration; it will not be long until all that the Government has spent on that waterway will have been utterly wasted and there will not be even a remnant to show for the improvement which was made.

The trouble with us, Mr. President and Senators, is that we too readily drift into a tendency to tickle a constituency rather than commit ourselves to a policy that is to promote the Federal Government. It is a very easy thing for a man to represent merely his district or his State, but it is my notion that we ought to grow a little bit larger than that; that a man ought to be a Senator for the great American Union, and when he casts his vote for expenditures on matters relating to river and harbor improvements, he ought to get the viewpoint of the Nation.

This is a big proposition. I became amazed when I undertook, as one must do very briefly, to study the question before meeting with the Committee on Commerce. We are a wonderful people. Somebody has said that the trouble with the party in power is that it is not able to comprehend the extent of this country. I am not repeating that statement on this occasion as a sentiment of my own. Our tremendous breadth and extent and resources and possibilities are beyond the average man's comprehension; but when you take up the question of commerce, you must remember that this wonderful American commerce of ours, amounting to something like $50,000,000,000 a year, has been developed on railway lines in good part, while the foreign commerce, of which we boast and delight and want to see grow, is that of the waterway. I should be very glad, Mr. President to take $25,000,000 of the amount proposed to be appropriated in this bill, and spend that sum under the direction of a knowing hand, for the improvement of every harbor that needs improvement on the coast of the United States.

Mr. SMITH of Michigan. And on the Lakes.

Mr. HARDING. Yes; I will include the Lakes, as the Senator from Michigan suggests. I have not touched, Mr. President, on the commerce of the great system of northern lakes, because that seems to be a matter so well established that there is no longer any question about it; but I would just as readily vote, if need be, for $50,000,000 to maintain perfect harbors on the east and west and southern coasts of these United States, so that every possible artery of commerce abroad shall be opened and ready for the craft which shall take American products to all the marts of the earth; but I should like to do that, Mr. President, under some guiding hand that knows what should be undertaken. It may be possible for some of you to know in detail about these enormous expenditures; it may be that after five or six years in the Senate I can acquire the judgment that I must exercise, as the chairman of the Commerce Committee insists that a Senator ought to do. I hope I will; but I do not believe it practicable, Mr. President, for the 96 Members of the Senate to vote intelligently on the numerous items included in this bill.

Mr. KENYON. Mr. President——

The PRESIDING OFFICER (Mr. POMERENE in the chair). Does the Senator from Ohio yield to the Senator from Iowa?

Mr. HARDING. Certainly.

Mr. KENYON. The Senator referred to the Muskingum River, and said he did not know the amounts appropriated for it. The figures are set forth in volume 2 of the Engineers' Report for 1915, and show that the allotments under the various river and harbor acts for that river have been $2,368,321.84, and that the expenditures for operating and care of locks and dams for the fiscal year ending June 30, 1915, were $184,323.68, an enormous sum of money.

Mr. HARDING. Well, Mr. President, then the Muskingum has cost the United States Government something like two and a half million dollars, and I might make my remark very brief and say that it is not worth the dams on the river; it is not worth one of them. It is the most profligate and ineffectual expenditure of money that I can imagine.

You know, Mr. President, we have been growing up in this country, and I assume that out of the practices of Congress there have developed a number of systems that need changing, to effect that efficiency which every one of us must commend in the conduct of Government affairs. I have been serving, as every new Senator must, I suspect, on the "hazing" committee, known as the Committee on Claims. It is not an uninteresting experience. There is many a romance developed in the discussion of the claims which are before that committee. I believe it to be a very important committee, and I am not sorry for the experience that I have had there, brief as it is. But, Mr. President, the Senate of the United States ought not to dispose of the six or seven hundred bills that come to the Claims Committee as they do dispose of them in that committee. You know the practice. I have had on my desk no less than a dozen claims bills which I, as a subcommittee of one, must report to the general committee. Usually the recommendation that the subcommitteeman makes is adopted by the committee, and the report adopted by the committee comes to this body, and blindly you vote what the committee recommends. What is the result? One man has hurriedly listened to the testimony concerning a claim presented to this body, and one man's necessarily hasty judgment is your judgment finally, and through that process of handling claims we are passing upon the expenditure of millions of dollars. It is not efficient, and it is not businesslike, and there is not one of you who would stand for it a minute in your own business.

What is the result? Why, we must do with claims just like I suggested, without going into a detailed plan, doing with this enormous expenditure for rivers and harbors. Let us conceive some kind of an organization that can make these expenditures of twenty-five to fifty million dollars, and make them justly and efficiently, so that the public knows that fifty millions of expenditures have been rightly made, and that there is something to show for the Government expenditure in the contribution to public good which will follow.

We ought to do the same thing, and I believe it is under consideration now in the case of claims—not to add to the Court of Claims, which will pass, as it does, on the testimony submitted, but to have some sort of a creation that can take a claim properly filed against the United States Government and dispose of it and see that there is a just allowance.

Why, Mr. President, there have been in my hands great volumes of testimony relating to measures calling for $50,000 upon which I had no more right to pass individually than one of the page boys could pass on a constitutional question pending

before this body because I had not the information at hand and could not have in the time that a Senator can give to the consideration of those things. So, out of the passage upon claims and the passage of great appropriations we have allowed these practices to grow up and I for one want to start my career in the Senate with a protest against going on with this method of doing business—a protest uttered in the kindliest sense imaginable. I have not any "knock" in the world for any man's pet improvement presented to this body. I have not the slightest desire to impede internal improvements. I should very readily vote for a liberal appropriation to carry on our public works, and hope I may do so; but I do not want to be asked at the same time to vote for a lot of propositions which must impress any man who investigates for a single moment that the improvements are not worthy the serious consideration of the Senate and do not deserve the expenditure of the money of the American people.

It seems to me, Mr. President, that if there ever was a time when the Senate ought to call a halt and go into a more careful consideration through some proper agency and make a limitation on these things, it is now. It is very difficult for me to understand why the head of the administration—which shows a strong inclination now and then to intimate to this body what ought to be done contemplating the situation that now confronts you relating to the acquirement of a sufficient amount of revenue to run this country—does not step in and add his influence, and let us Republicans and Democrats and Senate and administration join in bringing about a new era in this matter, which has so much interested the country, and against which so much honest protest has been made without the inspiration of a single selfish thought on the part of anybody who has made it.

I for one want to go on, Mr. President; I want to vote liberally, but I want to vote intelligently; and I can not do it when I answer to my name on the roll call on the pending measure. It may be that I am derelict in duty; it may be that I am deficient; but I will tell you that there is not a Senator on the floor who can possibly know in three years of continuous application and study the merits of the projects that are included in that measure.

It is for that reason that I have spoken as I have, in the hope that some time I may join some of you in a more efficient, a more thoughtful, a more prudent, a more effective, and a more helpful process or plan for carrying on our American internal improvements without hindrance, so that we may go on confident of the development which is befiting a country so rich and so hopeful and so full of opportunity as is ours.

Mr. REED. Mr. President, the Senator from Ohio complains that the President ought to give us information regarding this bill. I know of no way in which the President of the United States could convey the desired information to the Senator unless the President should sit down and study this bill, and give it the three years of time that the Senator says is necessary to an understanding of its provisions, and then carry the information over to the Senator from Ohio. Even if the President were to do so I apprehend that the Senator from Ohio would refuse to follow the President's lead in that as he does in all other things.

I know of no way in which any man can obtain knowledge with reference to the river and harbor bill except by sitting down and studying it. I know of no duty that devolves upon the devoted head of Woodrow Wilson to do the studying for Members of the Senate. It occurs to me that if men can not vote intelligently upon this bill, the thing for them to do is to cultivate their intelligence, and endeavor to get into their heads the ideas that now appear to be so lamentably and confessedly absent.

I do not intend to take the time to discuss the details of the bill. I want to make one or two general observations, and with that I am content.

No fair view can be given of this or any other bill by discussions that single out one particular item or half a dozen particular items, and then, in a discussion of those items, present only one side of the case. You can not judge a bill containing many items by any single item, or by any half dozen or dozen items; and certainly you can not when you have merely a one-sided and an unfair statement of those items.

It ought to be enough to say that this bill, like all of its predecessors, has been given very careful consideration in a committee composed in part of Republicans and in part of Democrats, and made up of men who come from widely separated parts of the country, so that the committee membership is in no way a sectional membership, and that this committee and its predecessors have for many years pursued substantially the same course of conduct. It ought to be also considered that there is scarcely a single item in the present bill which is not an item relating to an approved plan, and that that approved plan was approved, recognized, accepted, and adopted by the last Republican administration or by some of its predecessors. There is scarcely an item in this bill that has not been approved by the Republican Party when it was in control; and if this bill is subject to any great or sweeping criticism, it ought to be because the bill has confined its benefits to the limits set by previous Congresses.

I do not intend at all to discuss minutiæ or details. It is easy enough for any man to stand on the floor of Congress and cry out "pork." It is easy enough to denounce everything in the way of progress or forward movement. The veriest amateur can always find some venture out of the multitude of things that have been attempted that has perhaps been an unfortunate or even a wasteful venture. That is true of private business. It is true of everything that partakes necessarily of the nature of experimentation. It is true of great enterprises and of small enterprises that a certain per cent has been improvidently made. Mistakes are bound to occur.

There was an item discussed here the other day of a dock that was built by the Government for governmental uses—built, I think, 36 or 38 years ago—and the reports attached to this bill state that that dock never was used. This bill carried a small appropriation to repair it and proposed to turn that particular dock over to general and public use, the Government having failed to use it. It was the subject of criticism by a Senator whose views I always respect. But what is there of merit in the criticism when we analyze the facts? First, the mistake, if there was a mistake, was made 36 or 38 years ago. The mistake that was made by men most of whom are dead and gone ought not to be charged to the sponsors of this bill. Because there was a mistake made in the building of this one dock 36 or 38 years ago that does not argue that the provisions of this bill which relate to other enterprises are mistakes, a bit more than the fact that one member of a church 36 or 38 years ago was false to his religion argues against all the churches of the land. But this bill, proposing to turn over this dock to a public use and to expend a very small bit of money to give utility to that which has hitherto had no utility, has heaped upon it the odium of the mistake made by somebody 36 or 38 years ago. There has been much of the same character of criticism heard in the discussions we have listened to.

When the various items of the bill were taken up in the committee they were thrashed out by honest men, who were acting under a rule peculiarly conservative, and to my mind too conservative. That rule was to the effect that for the most part no new enterprises would be appropriated for in the bill. It was proposed to simply carry on those enterprises which had already been inaugurated and duly approved. I said to the committee then, and I take this moment's opportunity to say to the Senate, that I believe a narrow, pinch-penny policy with reference to the internal improvements of this country is the greatest mistake we can possibly make.

There are two kinds of ways to spend the public money, speaking broadly. When you fasten a fixed expense of some kind upon the country; when you create a great number of offices, particularly if they are useless; when you multiply divisions of the Government in an unnecessary way; when you build monumental structures at enormous cost; when you embark in any system which fastens a fixed expenditure annually upon the Government, unless you proceed with great care, you will burden the taxpayers of the Republic without any just return.

But there is another kind of expenditure of money which is in its nature an investment, and not an expenditure at all. If a man issues his bonds or his notes and buys an adjoining farm, and pays only what it is reasonably worth, although he has expended money, and although he has gone in debt, he is not the poorer but the richer because of the transaction, for the thing he has bought returns not only the interest upon his investment but a profit in addition.

When this Government creates great armies and great navies and fastens an expense upon the Republic, it is an expenditure that brings back not a dollar in return. It may be necessary; it may be justifiable; it may be highly desirable; it may be absolutely imperative; but it is made desirable and made imperative because of unfortunate world conditions. It is an economic loss, save as you estimate the greater loss which might come from a lack of ability to defend the country. But when this country invests its money in improving the highways of the country, is it a loss? No, sir; it is a distinct gain financially, economically, if it be properly done, because every good highway that is built lessens the labor necessary and the expense incident to the carrying of goods from the producer to the con-

sumer, benefits both the producer and the consumer, and adds to the aggregate wealth of the country. Every mudhole that is left, every obstacle to travel that remains, is an economic loss to the people of the country. The money that is employed to remove such obstacle is an investment that brings back a return many times.

When the Government of the United States expends money to remove obstacles to commerce upon the great inland seas of this Nation, and thereby in fact shortens the distance between the western and eastern extremities of the Lakes and between their northern and southern boundaries, it cheapens the cost of transportation across those inland seas and it makes money on every dollar that is properly invested. Any other claim is a foolish claim. When a great city lying along the borders of this country finds itself shut off from deep-sea going vessels because of a bar or a reef of rocks, and hundreds of thousands of dollars must be wasted annually in transporting the goods by lighters or by unloading and reloading, and that waste is going on, it is paid for by the people of the United States in the increased cost of everything thus transported. When the Government takes some dynamite and some laborers and removes the obstacles, and makes it so that great ocean vessels can swing up to the dock and unload without that loss we have not expended money; we have invested money. We have not used up the people's substance; we have increased the people's wealth.

When this Government spends money to make it possible to restore river transportation in places where river transportation can be reasonably restored; when it makes it so that a cargo of wheat can be carried from Kansas City, Mo., to St. Louis, Mo., for one-half of the price charged by the railroads, it has not wasted money; it has saved money to every farmer who ships grain and to every man who uses bread.

If this country should carry out a plan that was conceived by one of the greatest engineers of our generation, and should make a 14-foot waterway from St. Louis to the Gulf, and make it possible, as it would be possible, for boats to travel from Buffalo to New Orleans without breaking freight, it would not be "pork"; it would not be wasteful; it would be investment that would return a hundredfold.

Moreover, I embrace this opportunity to offer another suggestion. This Government has, with the full acclaim of both branches of Congress and with the full accord of the country, spent many hundreds of thousands of dollars, at least by way of a loan of the credit of the Nation, to put water on the arid lands of the West. It was a splendid conception. It has resulted in incalculable benefits, not only to that section but to the entire country. And yet, while an expenditure by the Government to put water on dry land is applauded, we find opposition to the proposal that the Government shall expend some money to keep water off of the wonderful valleys of the Mississippi, the Missouri, and the Ohio Rivers, and the equally fertile valleys of many other great rivers.

I have not the figures with me to-day, but I can produce them. On some other occasion I intend to show that there is enough rich bottom land to-day subject to overflow to almost sustain the population of the United States. The increased value of that land alone would pay for the harnessing of these streams.

The nation that sees annually areas as large as some of the great kingdoms of Europe devastated by floods, cities almost swept away, farm lands destroyed, cattle drowned by the thousands, human beings carried to their death by scores and by hundreds, is guilty of gross waste. It is more than extravagant; it is almost as senseless as the man who guiltily looks on while his home is consumed by the flames.

Mr. President, there are some things individuals can not do. I am an individualist. I would like to see every right, every liberty, every responsibility that can possibly be reposed in the citizen so reposed. I am in favor of the maintenance by the separate States of all the powers, of all the prerogatives that can properly be exercised by the individual States. But there are certain tasks that individuals can not perform and there are certain tasks States can not perform. As the individual resident of a city can not supply himself, by his individual effort, with gas, electricity, or water, those necessities must either be furnished by a public corporation or by the municipality itself. As the city can not build or construct a railroad to ramify the State, that task must be performed by private corporations or by some arm of the State government. Likewise, there are certain great tasks that can not be performed by the State which, therefore, justly fall upon the Federal Government.

Among these must be included the improvement of harbors. A harbor is in no sense merely local. The benefit to a harbor is a benefit to commerce, and a benefit to commerce is a benefit to every citizen of the land. An improvement to the Ohio River, running through several States, can not be undertaken by a single State, because the burden would fall unjustly upon one State and the control would not be in the hands of that State, neither would the benefit be confined to that State.

The Mississippi, the Missouri, and the Ohio Rivers with their tributaries cover the central part of our land. They are as vital to the well-being of the great Central States as is the arterial system to the human body. They must be improved by the Federal Government for the benefit of the entire Nation, for, I repeat, you can not advantage commerce without conferring blessings upon all the people.

Instead of caviling about the small and sometimes stingy expenditures of this bill we ought to be devising a plan here for the greatest system of internal improvements ever carried on by any Government since governments existed. These great streams should be harnessed; these vast alluvial bottom lands should be protected; they ought to be raising every year vast crops of corn and cotton and wheat and hemp and tobacco. These rivers should be harnessed, no matter what the expense, so that life and property may be safe, and these rivers should be made navigable.

I challenge attention to the fact that a situation confronts us that this Congress must deal with at an early date. We built the Panama Canal. We built it at the expense of the taxpayers of the entire United States. Under recent rulings of the Interstate Commerce Commission railroads have been granted the privilege of altering their rates at eastern and western points because of the competition or alleged competition with the canal. So it is now possible to ship goods by the canal from the eastern to the western coast, then load those goods upon railroads and ship them back almost to the center of the United States cheaper than they can be shipped over a railroad directly from the East to the center of the United States.

If the injustice were confined to water transportation, I should not so much complain, but because of the water competition railroads are now being permitted to make rates so that goods may be shipped from New York City through Kansas City and 2,000 miles farther to the western coast, reshipped over the same railroad, and hauled nearly back to Kansas City for the freight that Kansas City has to pay direct for every shipment from New York to Kansas City.

I have used Kansas City in the illustration. What I have said of Kansas City will apply to Omaha, Nebr., it will apply to Sioux City, Iowa, it will probably ultimately apply to the Twin Cities. It will apply to every one of the great cities of the South that lies within that vast belt known as the Mississippi Valley.

I call the attention of Senators to this great problem and say to them to-day that something must be done to remedy the evil. We must either restore commerce to our rivers so that there may be a water competition which will result in revised rates to the Mississippi Valley, or there must be regulation by law. Unless one or the other is accomplished the great Mississippi Valley, with all that belt of wonderful States that flank the river on its eastern and western shore, the great Missouri Valley extending clear to the mountains, the upper Mississippi which stretches away through Minnesota, all that vast territory will be drained of its wealth, and will be, if not destroyed, at least greatly injured by reason of conditions growing out of the construction of the canal.

With that situation confronting us, we find Senators who live in the territory affected standing here in the Senate and caviling about a little money that has been spent upon these rivers. Instead of spending money by hundreds of thousands for internal improvements, I say without qualification we ought to be expending it by tens of millions. The expenditure ought to be made in accordance with a well thought-out plan; it ought to be made in accordance with the advice of the best engineers of the world; but this country ought to march forward. It must not stand still.

There is great enthusiasm just now about national preparedness, and I have voted for the military measures and shall continue to do so. I say to you that the best preparedness this country will ever have is when her mighty resources have been developed, when her gigantic energies and power are so harnessed and conserved that we shall constitute the great dominant and controlling industrial factor of the world. That can be accomplished, and that must be the task of the immediate future.

So the time, I think, has come to quit crying "Pork, pork," and to cry "Progress"; the time has come to teach that kind of economy which expends money to develop the resources a bountiful God has bestowed upon the land, so that they may be garnered for the service of man.

Mr. CLARKE of Arkansas. The order is the consideration of the amendments of the committee.

The PRESIDING OFFICER (Mr. CHILTON in the chair). The Secretary will state the first amendment of the committee.

The first amendment of the Committee on Commerce was, at the top of page 3, to insert:

Improving harbor at New London, Conn., in accordance with the report submitted in House Document No. 613, Sixty-third Congress, second session, and subject to the conditions set forth in said document, $170.000.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. KENYON. I wish we could have an explanation of that item. I am not opposing it, but I should like to have an explanation of it from the Senator from Connecticut [Mr. BRANDEGEE].

Mr. BRANDEGEE. Mr. President, I am very glad to explain the amendment. The State of Connecticut, I think in 1911, appropriated $1,000,000 for the construction of a great wharf adjoining the long wharf owned by the Central Vermont Railway Co. in the harbor of New London. The wharf was to be a thousand feet long, and it was to be built of the most modern construction—steel and concrete. A board on rivers and harbors was appointed by the general assembly of the State to take care of the construction, and the State acquired the adjoining land. The project embraces the construction of grain elevators and warehouses and also a railway terminal.

I do not need, I think, to dilate upon the advantages of the harbor of New London as one of the great harbors of the country. It is situated midway between the metropolitan cities of New York and Boston. It is a great railroad center. The entire New York & New Haven Railroad system is there, running east and west on what we call the Shore Line from New York to Boston, and intersects the Central Vermont system, which runs from tidewater at New London north to Canada, where it connects with the Grand Trunk, which runs westerly to Puget Sound.

The project in contemplation is to make this State wharf, together with its warehouses and railway terminals, a great distributing center. As is well known, there has been, and I suppose there now is, a considerable congestion in the port of New York, especially for dock room for large steamers, and it is hoped that the overflow of commerce from that city may be accommodated to such an extent as it is possible at this State wharf in New London.

I do not wish to bore the Senate nor detain it unduly in this matter, and I am speaking on it only at the suggestion of the Senator from Iowa.

The State river and harbor commission had negotiations with the War Department here. The new wharf has been constructed. The State has issued its million dollars' worth of bonds and is now paying interest on them. The wharf is entirely completed except the covering or top of it which is to be completed this autumn. Under cooperation with the engineers of the War Department this State commission dredged around the wharf to the depth of 35 feet, which is considered sufficient for large ocean-going vessels loaded with cargo.

The Government part of this proposition, as agreed to by the War Department, was that if the State of Connecticut proceeded and made this what might be called a joint railway and ocean project, the Government would dredge from the mouth of the harbor up to and connecting with the 35-foot deep dredging project that has already been completed by the State of Connecticut and paid for. As I said, our part of the cooperative plan is finished.

The engineers' report shows what it will cost for the Government to complete the project, which it agreed to so far as any department can agree to anything in the absence of a distinct congressional pledge. Our project was completed and the Government part of it was that they would dredge to 33 feet. The Government's depth is 2 feet less than ours from the mouth of the harbor up to this wharf.

It is estimated by the engineer of the War Department that to construct this channel either 600 or 1,000 feet wide—I have not the document before me at this minute—and I should say perhaps 2 miles long, would cost $330,000 and it would take two years to complete that dredging project. The Government engineers recommend that $170,000 be appropriated the first year, which item the bill carries, and the $160,000, if that is the difference, the following year.

If this is passed now, it will be seen that having our project completed and paying interest on the bonds which the State issued to pay for it we have to wait now two years if the Government starts the project at this time.

Mr. CURTIS. May I ask the Senator if the million dollars upon the project is already expended?

Mr. BRANDEGEE. To be perfectly accurate about it, as is shown by the telegram which appears in the RECORD in the proceedings of the House of Representatives, there has actually been spent $800,000 now out of the million dollars, leaving $200,000, which they are going to put on the floor of the dock and build some elevators or warehouses or something of that kind.

Mr. CURTIS. In other words, the State has carried out its part of the contract?

Mr. BRANDEGEE. Yes; and let me tell the Senator from Kansas this appropriation of $170,000 was included in the bill a year or two ago as it passed the House of Representatives, and it failed in the Senate, because we cut the rivers and harbors appropriations all to pieces and appropriated a lump sum of $20,000,000 to be expended only upon what are called existing projects.

Mr. KENYON. Was any of the amount in the act of 1914 or the act of 1915 apportioned to this appropriation?

Mr. BRANDEGEE. Not one penny on this contract, so far as it could be called a contract. I do not claim that it was legally binding or could have been enforced against the Government, because Congress in both branches had not simultaneously appropriated the same amount and the act had not been signed by the President, but this item was included in the river and harbor bill as it was passed by the House two years ago and it was included in the bill as reported by the Senate Committee on Commerce also. It is agreed on all sides that there is no objection to the project whatever on its merits. The only reason why it was not incorporated in the bill in the House and in the bill as it went to the Senate committee was that, as Senators are familiar, the committees had adopted what they called a rule by which they thought that the money appropriated should be confined to projects already heretofore authorized and on which work was being done.

I do not pretend to speak for the committee of the Senate, but I assume that in the attempt to work out the bill under that rule it was seen that injustice would result among the States. I think it would, at least so far as my State is concerned, because here was a bill carrying forty-odd million dollars and the entire water front of my State, the whole southern boundary of which abuts on Long Island Sound, which is, as Senators know, one of the chief waterways of the country, with its bays and harbors and rivers, was getting only $41,000 out of the $43,000,000. I think when the committee looked at that situation and some others they felt that a bill like this ought not to pass if it did discriminate against States and did not do substantial justice. So I was very glad to see that the committee had put it on.

As I said, this matter was up on the floor two years ago. I do not care to read the proceedings of the Senate on it, but at that time, when the proposition was to reduce the amount carried for this item by the House from $170,000 to something that they thought would begin the work and partially carry it through, I inquired of the Senators who had the bill in charge on the floor here, if I agreed that it should be reduced, if I could count upon the aid of the committee at future Congresses to put it in, and I was assured that there was no question about the merits of the project whatever, that it was one of the most commendable they had seen, because we did not ask the Government to do this whole thing; the State of Connecticut went to work and did the greater portion of it herself, and I was assured by Senators on the floor who had the bill in charge that the next bill which came up would contain this item.

I do not care to continue this subject unless there is some criticism upon the proposition. I am very glad to see the item included in the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 3, after line 16, to insert:

Narrows of Lake Champlain: Improving the Narrows of Lake Champlain, N. Y. and Vt., in accordance with House Document No. 1387, Sixty-second Congress, third session, $300,000; and the Secretary of War is hereby authorized to enter into a contract for such materials and work as may be necessary to complete the said project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $437,000, exclusive of the amount herein appropriated.

Mr. KENYON. Mr. President, I do not mean to oppose this project but I should like to know something about it. I think there was absolutely no consideration of it before the committee.

Mr. RANSDELL. Mr. President, I will be glad to explain the item on behalf of the committee. I have the report before me.

I will say that the State of New York, as is known to us all, is expending very large sums of money on its canal system. I understand it is expending in the neighborhood of $150,000,000 to construct a system of canals between Lake Erie and the Hudson River and between Lake Champlain and the upper Hudson. At the lower end of Lake Champlain there is a place where the lake is very narrow and the water is very shallow. Several years ago an elaborate survey was made of that lake. The engineers recommended that in view of the canal being constructed by the State with a depth of 12 feet and, I believe, a width of 200 feet, if I am correctly informed, there being a very considerable commerce between Lake Champlain and these State canals, it would be exceedingly difficult for that commerce to pass on the enlarged boats unless these narrows were both wider and deeper. So a report was made in December, 1913. It shows what the former project was and then states that the present project is to provide for a channel 12 feet deep and 200 feet wide, except at one point through rock where the width is reduced to 150 feet. The estimated cost of this plan, including the placing of new fender booms, is $737,000, and $5,000 annually for maintenance.

The project was in the usual course submitted to the local engineer, approved by him, and then submitted to the Board of Engineers for Rivers and Harbors. It was approved by them and then was approved by Gen. William H. Bixby, Chief of Engineers, who submitted a favorable report, as I have stated, February 10, 1913. The board of rivers and harbors mentions this, and as it is very brief I will quote from page 3 of the report, and that report, by the way, is House Document No. 1387, Sixty-second Congress, third session. I quote:

> The commerce of the Narrows for the calendar year 1911 is stated to have been 825,975 tons, of which 681,894 tons passed through the Champlain Canal. It seems but reasonable to anticipate a very material increase in commerce as soon as the enlargement of the canal has been completed, and vessels of adequate size, such as are expected to use the canal in the future, have been put in service.

I remember the bill that was before the Commerce Committee two years ago and one year ago, and it was stated to us at that time that in all probability the New York State Canal could be completed by the time that this project for the narrows of Lake Champlain could be completed, if adopted at that time.

It would certainly seem a calamity, Mr. President, if the Government does not improve its own waterway, Lake Champlain, so that it can connect in a reasonable and proper manner with the great canals constructed at such enormous expense by the State of New York for the benefit of the entire country.

Mr. KENYON. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Iowa?

Mr. RANSDELL. I shall be very glad to yield.

Mr. KENYON. Does the Senator know why this item was not inserted in the bill in the other House?

Mr. RANSDELL. I have understood that the House did not adopt any new projects whatsoever except the one for the East River. I know that this project was included in the last two river and harbor bills which met with defeat on the floor of this body.

Mr. KENYON. Does the Senator feel that the public interest would be injured if the matter were put over for another Congress?

Mr. RANSDELL. I think if there is any project in the land which is worthy of consideration it is this. I believe that consideration should be shown to the State of New York, which has exhibited such magnificent spirit and has spent such enormous sums of money for developing waterways which are going to be of very material benefit to the entire Nation, as the Erie Canal has proved throughout all of its history, for it has been a national waterway since it was completed in 1826. It is now being enlarged to a depth of 12 feet at an enormous cost. The State of New York is not asking the Government for a dollar. The whole Nation is going to get the benefit of that waterway. When that is being done it seems to me the least the Government can do is to connect Lake Champlain, which is one of the Nation's waterways, with that canal. This will complete the project and put it in splendid order. It will cost a very small sum, something over $5,000 a year, to maintain it.

I think, too, that it would be a very unbusinesslike performance for us not to finish this waterway so as to have it ready when the canal systems themselves are completed. I have no doubt the junior Senator from New York can answer any other questions in reference to the matter.

Mr. WADSWORTH. Mr. President, the Senator from Louisiana has described the situation with entire accuracy. I might say, in further explanation, however, that the system of barge canals now being built by the State of New York, and which are fast approaching completion, touches what might be called Federal waters, or waters under Federal jurisdiction at three points, one at the Niagara River at the western terminus of the main canal, which follows, roughly speaking, the old route of the Erie Canal across the State; one at the Hudson River, where the eastern terminus of the main canal joins the Hudson River. Of course, it is understood that the Hudson River will be used as a continuation of the canal system, south 150 miles, to the harbor of New York. The third point at which the canal now being built will touch Federal waters is at this point at Lake Champlain. At each one of the three points it is absolutely essential that the Government make certain improvements in waters under its own jurisdiction, otherwise the entire canal will be useless.

About a mile and a half of dredging must be done at the Niagara River to connect with the western terminus of the Barge Canal; a little piece of dredging must be done at Lake Champlain to form the connecting link between that branch of the canal and the St. Lawrence River, which it will eventually reach by using Lake Champlain and the rivers to the north of it; the point on the Hudson River—which must be deepened to a depth of 12 feet, approximately, the distance between the city of Hudson to and beyond the city of Albany, or approaching the city to Troy—those three projects must eventually be completed by the Federal Government in order that the New York Barge Canal can be of any service whatsoever for through traffic. The Champlain branch of the Barge Canal is approaching completion a little faster than the other branches.

As I understand it, this item is now being urged by the engineers to be taken up immediately, so that this branch of the canal will be placed in full operation when the canal is finished. Without this item there will be at least two years' delay in the operation of boats on the canal; eventually the work must be done.

Mr. SMOOT. Mr. President, I desire to ask the Senator from Louisiana [Mr. RANSDELL] if the expenditure of this money will in any way benefit the traffic on the Erie Canal?

Mr. RANSDELL. I understand that it will, because it connects Lake Champlain with the Erie Canal, and, as the junior Senator from New York [Mr. WADSWORTH] has just stated, the upper end of Lake Champlain connects with the St. Lawrence River. If they do not do this work, then it will be impossible for the large-sized canal boats which intend to use the improved Erie Canal to ply between that link of the canal which goes from the city of Troy up to the lower end of Lake Champlain. Only small boats will be able to use it. I believe the depth is now about 9 feet; and the plan is to have a 12-foot canal.

Mr. SMOOT. I certainly hope that it will increase the traffic, because I notice that transportation on the Erie Canal is dropping in such proportions that if the decrease continues there will not be very much of it left. I notice that there were shipped on the Erie Canal in 1880, 4,108,581 tons of freight; in 1906 it had decreased to 2,383,481 tons; in 1912 it had decreased to 1,790,069 tons; or, in other words, in 1880 that canal carried 18 per cent of the total rail and water freight; in 1906 it carried but 3 per cent of the total freight; and in 1912 it carried but 2 per cent of the total freight. If the adoption of this amendment is going to increase the water transportation upon that canal, I have no objection to the appropriation whatever; but if it is simply the mere spending of more money in connection with the amount that has already been expended upon that canal, with the freight decreasing at a rate that if it continues many more years there will be very little freight upon it, I think it would be a waste of money.

Mr. RANSDELL. Mr. President, very briefly, I would say to the Senator from Utah that the old Erie Canal has been in existence a great many years. It was completed in 1825 or 1826. It was a canal upon which the boats were propelled by horses and mules. I went to school on the banks of that canal in the city of Schenectady, and graduated in the class of 1882. At that time it was said there were 3,000 boats on that canal; and, as I have stated, they were all propelled by horses or mules. I am not aware that there has been any improvement in the physical character of the canal since that time until the present great project was adopted several years ago. It was submitted to the people of the State; a bond issue was voted; the canal was to cost considerably over a hundred million dollars; the minimum depth was to be 12 feet; it was to be much wider than previously; and it was to be susceptible of use by boats propelled by steam, gasoline, or other motive power. Barges were to be built for it to carry at least 3,000 tons. I do not think that the old barges used there when I

was a young man—and they are the same as those that have been used up to the present—could have carried over 150 to 200 tons.

The Senator from Iowa will bear in mind that in the meantime the railroads have been improving in every imaginable way, by every conceivable device. Larger rails, larger cars, larger engines, every device has been adopted to improve transportation by rail; and I am delighted that that is so. The facilities on this canal, however, have not improved at all. Finally the people of the State of New York—and they are wise people—saw that, unless they did something, they would have to abandon their canal altogether. They determined to make a modern waterway out of it; and that is what has been done. That modern waterway will be completed, I am told, within two years. That modern waterway, or at least one branch of it, runs up to the lower end of Lake Champlain. The proposed improvement here, which is to cost $737,000, is to connect Lake Champlain in a place called The Narrows, with this magnificent modern canal of the State of New York. I am sure when it is completed, the canal will be used.

Mr. SMOOT. I hope so.

The PRESIDING OFFICER. The question is on agreeing to the amendment. Without objection, the amendment is agreed to.

Mr. KENYON. Mr. President, we would like to have the opportunity to cast our votes on the adoption of the amendment. For my part, I want to vote against it.

The PRESIDING OFFICER. Does the Senator from Iowa refer to the amendment which has just been adopted? Does the Senator want a vote on that?

Mr. KENYON. The Chair simply said, "Without objection, the amendment is agreed to."

The PRESIDING OFFICER. That has been the practice. The Senator from Iowa could have objected had he so desired. However, the Chair will put the question. Those in favor of the amendment will say "aye." [A pause.] Those opposed will say "no." The "ayes" have it, and the amendment is agreed to. The Chair supposed that if the Senator had any objection he would have stated it before the announcement was first made.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, at the top of page 5 to insert:

Improving Black Rock Harbor, N. Y.: The unexpended balances of appropriations heretofore made and authorized for the improvement of Black Rock Harbor and Channel, N. Y., and Tonawanda Harbor and Niagara River, N. Y., are hereby consolidated and made available for completing improvement of Black Rock Harbor and Channel and Tonawanda Harbor in accordance with the report submitted in House Document No. 658, Sixty-third Congress, second session, and subject to the conditions set forth in said document.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CLARKE of Arkansas. I ask that the next amendment, on page 6, to strike out the item known as the East River item, may be postponed until to-morrow morning. That amendment is likely to consume more time than we shall be able to devote to it this afternoon.

The PRESIDING OFFICER. Without objection, the amendment will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 9, line 7, after the word "level," to strike out ", and" and insert ": *Provided*, That"; in line 8, after the word "have," to strike out "acquired"; and in line 11, after the word "commerce," to insert:

*Provided*, That the said Alba B. Johnson and Samuel M. Vauclain and the Baldwin Locomotive Works shall construct and maintain at their expense a bridge, satisfactory to the Secretary of Commerce, over the new course of Crum Creek, available for the passage of persons and vehicles for purposes of the United States, said bridge to take the direction of the present right of way of the United States at the place where the same is to be cut by the proposed new course of Crum Creek, and to be maintained so long as title to the property now owned by the United States at the mouth of Crum Creek remains in said United States.

So as to make the clause read:

That Alba B. Johnson and Samuel M. Vauclain and the Baldwin Locomotive Works, abutting property owners upon Crum River where the same empties into the Delaware River, be, and they are hereby, authorized to change and divert the present course and channel of Crum River and to straighten same, under the direction and supervision of the Secretary of War, from the right of way of the Philadelphia & Reading Railway Co. to the low-water line in the Delaware River, and that the said river shall be of the width of not less than 100 feet at mean low water; and that hereafter the said Crum River, as so straightened, shall be a public navigable stream, and the present course and channel of the said river from the right of way of the Philadelphia & Reading Railway Co. to the low-water line in the Delaware River shall be abandoned and vacated when the above-mentioned new channel shall have been completed to a depth of 4 feet at mean low water, with a bottom width of 62 feet and width of 100 feet at mean low-water level: *Provided*, That the Government shall have acquired such right, title, and interest in and to the bed of said new channel as will assure the public the right to the perpetual use of said channel for all the purposes of navigation and commerce: *Provided*, That the said Alba B. Johnson and Samuel M. Vauclain and the Baldwin Locomotive Works shall construct and maintain at their expense a bridge, satisfactory to the Secretary of Commerce, over the new course of Crum Creek, available for the passage of persons and vehicles for purposes of the United States, said bridge to take the direction of the present right of way of the United States at the place where the same is to be cut by the proposed new course of Crum Creek, and to be maintained so long as title to the property now owned by the United States at the mouth of Crum Creek remains in said United States.

The amendment was agreed to.

The next amendment was, on page 11, after line 3, to insert:

Maintenance and repair of the Government iron pier, harbor of Lewes, Del., hereafter, under regulations prescribed by the Secretary of War, to be opened to public use, $10,000.

Mr. SMOOT. Mr. President, I ask that that amendment go over. I did not expect it to come up this afternoon.

Mr. CLARKE of Arkansas. For how long does the Senator desire it to go over?

Mr. SMOOT. Until to-morrow.

Mr. SAULSBURY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Delaware?

Mr. SMOOT. Certainly.

Mr. SAULSBURY. I desire to ask the Senator if it will be agreeable to him to have the item taken up the first thing in the morning? I may have to be away later in the day.

Mr. SMOOT. I will not ask that it be taken up, if the Senator is absent.

Mr. CLARKE of Arkansas. Mr. President, we must not have an indefinite continuation of these postponements.

Mr. SMOOT. I am perfectly willing to take it up in the morning.

Mr. CLARKE of Arkansas. Very well; but I should not want to mislead the Senator from Delaware. The first item which we are to take up to-morrow morning is the East River item, which involves a policy that will probably provoke some discussion, and upon its settlement may depend many items in this bill.

Mr. SAULSBURY. May I ask the Senator from Utah if he will state why he asks that the amendment go over? I ask that for my personal convenience, because I can not be here all day to-morrow.

Mr. SMOOT. I will state to the Senator that the reason I make the request is that I have not the papers at hand which I desire to consult in connection with this item, as I did not expect that it would come up to-day. I thought that the East River item would take the remainder of the afternoon, and therefore I did not expect this item to be reached to-day. That is the only reason, I will say to the Senator, why I make the request.

Mr. SAULSBURY. May I ask the Senator, so far as he can, to make such objection as he desires now, so as to give me the opportunity to try to answer whatever he may say this afternoon, as it may be impossible for me to be here late to-morrow afternoon?

Mr. SMOOT. I would prefer to say what I have to say in this connection at one time rather than to say it piecemeal.

Mr. CLARKE of Arkansas. Mr. President, I think I can say that it will not be very late in the afternoon to-morrow before the item is reached in regular order, for I feel sure that the East River item will not require more than an hour.

Mr. SAULSBURY. If that is the case, very well.

The PRESIDING OFFICER. Without objection, the amendment is passed over.

The reading of the bill was resumed. The next amendment of the Committee on Commerce was, on page 18, after line 11, to insert:

Key West Harbor, Fla.: For improvement by removal of Middle Ground, $50,000.

Mr. CLARKE of Arkansas. Mr. President, that item was inserted at the instance of the junior Senator from Florida [Mr. BRYAN]. The information upon which it would be based, according to the demands that usually are made in such cases, is not at hand. It was put in the bill with the determination to make further investigation of it after the matter had gone to conference. It is founded upon the proposition that there is in Key West Harbor a deposit known as the Middle Ground, which has recently become an obstruction to navigation. The report which has reached us is that a brig foundered there some days since, and that the channel is shoal. Whether or not it can be removed without an additional appropriation is a matter that the engineers will report on later. I ask that the item be included in the bill, and we will look into it when the matter comes to be considered in conference.

Mr. KENYON. I should like to ask the chairman of the committee if there is any report of the engineer on this subject?

Mr. CLARKE of Arkansas. Not specifically. We are having an investigation made now; and, as to whether the item shall go into this bill at all permanently will depend upon what is hereafter shown to be the condition of the channel.

Mr. KENYON. When is that to be determined?

Mr. CLARKE of Arkansas. That will be determined before the matter is finally disposed of. I take it for granted that we will be compelled to justify these items when we go into conference. The preliminary showing that has been made justifies the action that has been taken, treating the matter as one of emergency. Key West is one of the well-known harbors of the country, and it is quite important that it shall be kept in a navigable condition.

Mr. KENYON. There is no doubt of that; but I understand there was nothing before the committee concerning the item except a telegram from the junior Senator from Florida [Mr. BRYAN].

Mr. CLARKE of Arkansas. That is true. There was a telegram from the Senator from Florida calling attention to the facts and asking that steps be taken to determine the necessity for the item.

The PRESIDING OFFICER. What is the suggestion of the Senator from Arkansas?

Mr. CLARKE of Arkansas. That the amendment be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 19, line 5, after the words "Dog River," to strike out "$35,000" and insert "$80,000," so as to make the clause read:

Pascagoula Harbor, Miss.: For maintenance of channels through Horn Island Pass, Mississippi Sound, Pascagoula River, and Dog River, $80,000.

Mr. KENYON. Mr. President, I should like to have some explanation of the increase of that appropriation.

Mr. CLARKE of Arkansas. The Senator from Mississippi [Mr. VARDAMAN] will look after that.

Mr. VARDAMAN. Mr. President, heretofore there was a project adopted in 1913 carrying an appropriation of $383,000, I think, for deepening this harbor. It was conditioned upon the payment by the citizens of Pascagoula and Moss Point of $100,000 in five years. The citizens of Pascagoula and Moss Point were unable to raise that amount of money, and so they came to Congress and asked that the sum of $283,000 might be used, so far as it would go, to deepening the channel. The original plan contemplated the deepening of the channel from 17 to 22 feet. The engineers recommended the modification of the original plans and suggested that $283,000 be appropriated to be used for deepening the channel so far as it would go. That, however, was upon the further condition that the city of Pascagoula should give certain property to the Government in the form of a wharf. In investigating the title to this property it was discovered that there was a defect in the chain which caused delay. That, I understand, has been perfected now. For the last two years no money has been spent by the Government for deepening the channel.

In addition to the $283,000 which was to go for deepening the channel there was to be a maintenance fund of something like $50,000 per annum. They have not done anything to the channel, and while the engineers in their report state that they do not need quite as much money as is carried in this amendment, still they say if this money is appropriated they may be able to do some work on the channel, and if this money is not used it will remain in the Treasury.

The people of Pascagoula and Moss Point are very desirous that this appropriation be made; I want it made; the committee has adopted it; and I hope the Senate will agree to it. It is needed; we are entitled to more than the amount appropriated, but this will give us enough to continue the work until the next appropriation bill, when we hope to get the original appropriation with which to deepen the channel ultimately to a 22-foot depth.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 20, after line 2, to strike out:

Southwest Pass, Mississippi River: Continuing improvements and for maintenance, $600,000.

And insert:

Passes at the mouth of the Mississippi River: Continuing improvement and for maintenance, $1,000,000.

Mr. KENYON. Mr. President, the Senator from Louisiana, I think, explained that amendment before the committee.

Mr. CLARKE of Arkansas. The Senator from Louisiana had a communication from the Chief of Engineers which justified that change, and I take it for granted that, if the item is contested, the Senator will present that communication.

Mr. RANSDELL. Mr. President, if there is any necessity for so doing, I will read from the report of the engineers in explanation of this item.

Mr. KENYON. I wish the Senator would do so.

Mr. RANSDELL. A special report was made by the Chief of Engineers to the chairman of the Committee on Commerce, and I quote this extract from it:

Owing to the long high river of 1915 and the unprecedented stage in the lower Mississippi below New Orleans this year, shoals have occurred in both passes, especially at the mouths. Some regulating works are needed at the Head of Passes to force more water into Southwest Pass and to restrain the waters going into South Pass. A conservative estimate of the work required at the Head of Passes alone is $400,000. A board has been appointed by Special Orders No. 4, Office of the Chief of Engineers, March 1, 1916, to report upon Southwest Pass; and any modifications which this board will recommend will probably include some work at Head of Passes, and any such work can not be commenced promptly unless sufficient funds are on hand.

Mr. SMOOT. May I ask the Senator from what page he is reading?

Mr. RANSDELL. I am reading from the report of the committee, on page 226, where this special report has been incorporated.

Southwest Pass: In addition, the question of jetty extension at Southwest Pass, as well as the contraction of the jetty channel, will be matters to be brought before the board. The present depth over the bar at Southwest Pass is 27 feet, and during the last month the depth over the bar at South Pass shoaled suddenly from 34 to 26 feet. Two dredges are now at South Pass and one at Southwest Pass. The battleship *Kentucky*, drawing about 26 feet 4 inches, lay off South Pass from March 1 to 4, unable to enter either pass. She finally succeeded in entering Southwest Pass. The enormous sediment of over 3,000,000 cubic yards daily going down the Mississippi at the present time is causing heavy shoals, and several ships have grounded recently. In addition to the three dredges at present in use, an additional dredge may be required. It is, therefore, impossible to state definitely what funds are needed or what the character of the work recommended will be, as the channel conditions at best are subject to sudden and severe changes. It is, however, urgently recommended that not less than the original amount of $850,000 be appropriated.

That is for the Southwest Pass. Now, as to the South Pass of the Mississippi River:

South Pass, Mississippi River: The usual $100,000 from the appropriation, "Maintenance of South Pass Channel, Mississippi River," will be available for maintenance and repair of spur dikes, shore plant, etc. This maintenance will be especially heavy the coming year. In addition, at least $100,000 will be needed to assist in regulating work at Head of Passes and $50,000 for dredging. The present flood has caused a portion of the banks at South Pass to cut away and has undermined a portion of the West Dike (headland between South and Southwest Passes) and a portion of the Upper Dam (headland between South Pass and Pass a Loutre), so that some very extensive improvement by revetment and mattress sills will be needed. It is believed at least $150,000 should be added to the pending bill for South Pass improvement, for work at Head of Passes, and for dredging at Head of Passes, especially at mouth of South Pass. The reasons for the urgency of this work are similar to those for Southwest Pass.

If the item be included as thus worded (Senate amendment), it would permit of the use of the money for either the Southwest or the South Pass in such proportion as might be required, and if so worded it will be understood by this department that the intent of the item is to simply provide that the money may be so used, but that it shall be used in accordance with the projects heretofore or hereafter specifically adopted by Congress.

If there are any further questions, I will attempt to answer them.

Mr. KENYON. I should like to ask the Senator if the amount of $1,000,000 is recommended?

Mr. RANSDELL. Yes; it has been specifically recommended, and the change in the wording of the item has also been recommended.

Mr. SMOOT. That has been recommended in a special report.

Mr. RANSDELL. In a special report by the board that was sent down there. There is a large commerce, as the Senator knows, at the mouth of that river—something over 6,000,000 tons.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Commerce was, on page 22, line 22, after the word "maintenance," to strike out "$25,000" and insert "$50,000," so as to make the clause read:

Channel to Port Bolivar, Tex.: For maintenance, $50,000.

Mr. SMOOT. I desire to ask whether that has been estimated for?

Mr. CLARKE of Arkansas. The Senator from Texas [Mr. SHEPPARD] will look after that.

Mr. SHEPPARD. Mr. President, it was shown to the committee by a letter from the examining engineer that shoaling had occurred since the bill passed the House, necessitating the increase in the item for maintenance.

Mr. SMOOT. Has the Senator the report with him?

Mr. SHEPPARD. The letter is with the Committee on Commerce. I laid it before that committee, but I will put it in the RECORD, I will say to the Senator. I do not, however, have it on my desk.

Mr. SMOOT. I will ask the chairman of the committee if the letter is printed in the report?

Mr. CLARKE of Arkansas. I think not.

Mr. President, we have now reached a time when we will probably not be able to consider any item that is contested, and I will say to the Senator that we will pass that amendment over until to-morrow, when the letter will be brought to the attention of the Senate.

The PRESIDING OFFICER. Without objection, the amendment will be passed over.

Mr. CLARKE of Arkansas. I now move that the Senate proceed to the consideration of executive business.

WOMAN SUFFRAGE.

Mr. CURTIS. Mr. President, I will ask the Senator to withhold the motion for a moment.

Mr. CLARKE of Arkansas. I withhold the motion for a moment.

Mr. CURTIS. I should like to state that at the conclusion of the executive session, or a few minutes before 5 o'clock, I shall ask the Senate to take a recess until 11 o'clock to-morrow morning in order that the Senate may have an opportunity to take advantage of the invitation which I send to the Secretary's desk and ask to have read.

The PRESIDING OFFICER. The Secretary will read as requested.

The Secretary read as follows:

The Members of the Senate are cordially asked to be present in the Rotunda of the Capitol to-day at 5 o'clock to meet the envoys from the suffrage States elected at the woman voters' conference in Salt Lake City on May 12, who will present resolutions from the woman voters to Congress.

ELIZABETH T. KENT (California).

EXECUTIVE SESSION.

Mr. CLARKE of Arkansas. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After 30 minutes spent in executive session the doors were reopened.

RECESS.

Mr. CURTIS. I move that the Senate take a recess until 11 o'clock to-morrow morning.

The motion was agreed to; and (at 4 o'clock and 58 minutes p. m.) the Senate took a recess until to-morrow, Wednesday, May 17, 1916, at 11 o'clock a. m.

## CONFIRMATIONS.

*Executive nominations confirmed by the Senate May 16, 1916.*

POSTMASTERS.

MINNESOTA.

Thomas L. Fay, St. Charles.
Altie Hill, Dawson.
W. E. Lawson, Benson.
A. M. Loberg, Cokato.

NEW YORK.

Charles P. Monro, De Ruyter.
John C. McGreevy, Hornell.

PENNSYLVANIA.

F. G. Ackley, Wyalusing.

## HOUSE OF REPRESENTATIVES.

### TUESDAY, *May 16, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Out of the deeps of the soul we cry unto Thee, O God, heavenly Father, because of Thy boundless resources and our limitations. Thou knowest us altogether, and Thy tender mercies are ever with us. Guide us by Thy fatherly care that we may measure up in our limitations to the perfected manhood for which we all long, revealed in the incomparable life and character of Thy Son.

Alone, O Love ineffable!
Thy saving name is given;
To turn aside from Thee is hell,
To walk with Thee is heaven.

Thus may our longings, hopes, and aspirations be fulfilled. Amen.

The Journal of the proceedings of yesterday was read and approved.

EXTENSION OF REMARKS.

Mr. FOSTER. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech by the Hon. WILLIAM ELZA WILLIAMS at the Democratic State convention in Illinois on April 21.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend remarks in the RECORD by printing a speech of his colleague, WILLIAM ELZA WILLIAMS, at the Democratic State convention a few days ago. Is there objection?

There was no objection.

Mr. KEATING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by the discussion of the subject of industrial relations in Colorado.

The SPEAKER. The gentleman from Colorado asks unanimous consent to extend his remarks in the RECORD on the subject of industrial relations in Colorado. Is there objection?

Mr. MANN. Reserving the right to object, I would like to ask the gentleman if it is a speech that he wants to insert or an article.

Mr. KEATING. It is based partly on the report of the Commission on Industrial Relations, pointing out the efforts to adjust the matter.

Mr. MANN. Is it a speech?

Mr. KEATING. No; not altogether. It incorporates a speech by the chairman of the commission, with introductory remarks by myself and a short editorial with reference thereto.

The SPEAKER. Is there objection?

There was no objection.

Mr. DUPRÉ. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by incorporating an editorial in the New Orleans Times-Picayune of May 13, 1916, entitled "Congress and Flood Control."

The SPEAKER. The gentleman from Louisiana [Mr. DUPRÉ] asks unanimous consent to insert in the RECORD as a part of his remarks an article from the New Orleans Times-Picayune on flood control. Is there objection?

Mr. MANN. Reserving the right to object, I would like to ask the gentleman if we printed all the editorials written on the subject would the CONGRESSIONAL RECORD ever be finished?

Mr. DUPRÉ. I think not; but this has a bearing directly on the subject that comes up to-morrow and is very closely related to it.

The SPEAKER. Is there objection?

There was no objection.

Mr. DUPRÉ. A parliamentary inquiry, Mr. Speaker. Is it in order to submit a further request for unanimous consent to ask all Members of the House to read this editorial before the matter comes up to-morrow?

Mr. MANN. No; I should object to that. [Laughter.]

Mr. ADAMSON. It would not be mandatory.

Mr. BARKLEY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by having printed a short article from the Manufacturers' Record containing the location of the Government armor-plate plant at Paducah, Ky.

The SPEAKER. What does the gentleman say the subject is?

Mr. BARKLEY. The location of an armor-plate factory at Paducah, Ky., and the article is from the Manufacturers' Record.

The SPEAKER. The gentleman from Kentucky asks unanimous consent to print an article on the subject of an armor-plate plant at Paducah, Ky. Is there objection?

Mr. MANN. Reserving the right to object, does this advocate the location of the plant at any particular place?

Mr. BARKLEY. Not at any particular place, but at a particular location on the Ohio River. [Laughter.]

Mr. MANN. I think there have been about 50 bills introduced for the location of armor-plate plants.

Mr. BARKLEY. This is an article by a nonpartisan and unselfish man in the Manufacturers' Record.

Mr. MANN. Oh, they are all unselfish, but I object.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 5790. An act to confer additional authority upon the President of the United States in the construction and operation of the Alaskan railroad, and for other purposes; and

S. 5910. An act authorizing the sale of the lighthouse reservation at Scituate, Mass.

The message also announced that the Senate had passed without amendment bill of the following title:

H. R. 8068. An act for the relief of E. C. Hornor.

The message also announced that in accordance with the provisions of the concurrent resolution of the two Houses (H. Con. Res. 40) the Vice President has canceled his signature to the enrolled bill (H. R. 759) entitled "An act to provide for the removal of what is now known as the Aqueduct Bridge across the Potomac River, and for the building of a bridge in place thereof.

LEAVE OF ABSENCE.

Mr. CAREW, by unanimous consent, was granted leave of absence for one week, on account of the illness of his wife.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees as indicated below:

S. 5830. An act to repeal paragraph 4 of section 21 of the public-buildings act, approved March 4, 1913, providing for the construction of a national archives building; to the Committee on Public Buildings and Grounds.

S. 5910. An act authorizing the sale of the lighthouse reservation at Scituate, Mass.; to the Committee on Interstate and Foreign Commerce.

S. 5790. An act to confer additional authority upon the President of the United States in the construction and operation of the Alaskan railroad, and for other purposes; to the Committee on Territories.

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 759. An act to provide for the removal of what is now known as the Aqueduct Bridge, across the Potomac River, and for the building of a bridge in place thereof.

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bill:

H. R. 562. An act to amend the act approved June 25, 1910, authorizing the Postal Savings System, and for other purposes.

ROBERT OWEN.

Mr. JOHNSON of Washington. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a statement on the anniversary of the birthday of Robert Owen, the founder of the colony of Socialists at New Harmony, Ind.

The SPEAKER. The gentleman from Washington asks unanimous consent to extend his remarks in the RECORD by printing an article on Robert Owen, the founder of the colony at New Harmony, Ind. Is there objection?

There was no objection.

UNITED STATES SHIPPING BOARD.

Mr. HENRY. Mr. Speaker, I submit a privileged resolution from the Committee on Rules.

The Clerk read as follows:

House resolution 236 (H. Rept. 696).

*Resolved*, That immediately upon the adoption of this resolution the House shall resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 15455; that the first reading of the bill shall be dispensed with; that there shall be not exceeding five hours of general debate, the time to be controlled one-half by the gentleman from Missouri [Mr. ALEXANDER] and one-half by the gentleman from Massachusetts [Mr. GREENE]; that all debate shall be confined to the subject matter of the bill; that while the bill is under consideration the House shall meet at 11 o'clock a. m.; and that the bill shall be the order for all legislative days except calendar Wednesdays. At the expiration of general debate the bill shall be considered under the five-minute rule and the Committee of the Whole House on the state of the Union shall perfect and report the bill to the House: *Provided*, That if at 4 o'clock p. m. on Friday, May 19, the reading of the bill under the five-minute rule shall not have been completed, the Clerk shall then complete the reading of the bill without further interruption; that immediately upon the conclusion of such reading all pending amendments shall, without further debate, be voted on in order. Any Member may offer amendments to that portion of the bill which shall have been read after 4 o'clock p. m., as above provided, and send same to the Clerk's desk at any time before said reading is completed and the same shall be considered pending.

After all pending amendments shall have been disposed of the committee shall rise and report to the House said bill and all amendments that shall have been recommended by the committee, whereupon the previous question shall be considered as ordered upon the bill and amendments to its engrossment, third reading, and final passage, without intervening motions, except one motion to recommit.

Mr. HENRY. Mr. Speaker, I will ask the gentleman if he wishes to debate the rule?

Mr. CAMPBELL. Yes. I have a number of requests for time on the rule.

Mr. HENRY. How much time does the gentleman think will be required on his side?

Mr. CAMPBELL. About 30 minutes.

Mr. HENRY. Then, Mr. Speaker, I give notice that I shall move the previous question at the end of an hour and I yield the gentleman from Kansas 30 minutes of my time.

The SPEAKER. The gentleman from Texas yields the gentleman from Kansas 30 minutes.

Mr. HENRY. Mr. Speaker, I have only a few words to say about the rule at this time. The rule seems to be plain and specific. It gives an abundance of time for the consideration of this meritorious measure and affords ample opportunity for amendment. I think it allows the utmost freedom of discussion.

Mr. MANN. Mr. Speaker, will the gentleman yield for a question in reference to the rule?

Mr. HENRY. Yes.

Mr. MANN. The rule provides that after 4 o'clock on Friday the balance of the bill which has not been read up to that time shall be read without further interruption?

Mr. HENRY. Yes.

Mr. MANN. Then it provides that amendments to that portion of the bill may be offered by sending the same to the Clerk's desk at any time before said reading is completed. How could you send amendments up there without interruption? Does that mean to say that they are just to be handed to some employee of the House?

Mr. HENRY. I suppose that that means that the amendments shall be in the hands of the Clerk, that they shall be lodged in the hands of the Clerk and shall be considered as pending.

Mr. MANN. But the Clerk is reading the bill.

Mr. HENRY. They may be sent to the Clerk's desk.

Mr. MANN. I am not asking for the sake of confusion, but so that we will understand it.

Mr. HENRY. I understand. They shall be sent to the Clerk's desk.

Mr. MANN. While one reading clerk is reading the bill we shall shove the amendments into the hands of the other reading clerk?

Mr. HENRY. The idea is to allow a vote on every amendment which is offered.

Mr. MANN. I am trying to get at what the procedure shall be. The rule provides that there shall be no interruption of the reading after that time.

Mr. HENRY. I do not think it makes any difference which Clerk holds the amendments. They will be there and will be voted on without debate.

Mr. LENROOT. Under the gentleman's construction, when would those amendments be reported from the Clerk's desk?

Mr. HENRY. Immediately after he finishes the reading of the bill, then all amendments should be reported. I do not think there will be any difficulty about that.

Mr. MANN. There will be difficulty unless we understand in advance.

Mr. HENRY. I think that will be the proper construction.

Mr. MANN. While one reading clerk is reading the bill we shall send the amendments to the other reading clerk?

Mr. HENRY. And they will all be reported as soon as the bill is read by the Clerk.

Mr. STAFFORD. I assume they will be reported in the order in which they apply to the bill rather than in the order in which they are presented?

Mr. HENRY. Yes.

Mr. STAFFORD. So that there will be some intelligent consideration even under this confused policy?

Mr. HENRY. The idea is to have a vote on every amendment. Mr. Speaker, I do not care to discuss the merits of the ship-purchase bill, except to say that I am heartily in favor of it and hope to see its passage through this House and through the Senate. I believe it to be a most important measure, that will bring untold relief to the people of all classes throughout this country; and, being a meritorious measure, I think it should be considered by this House, and believe the rule gives ample opportunity for discussion and consideration. It will give the farmer ships and facilities to get his cotton, grain, live stock, and farm products to the markets of the world and vastly reduce ocean freight rates. It will do much to regulate the conduct of the Shipping Trust and high-seas transportation monopoly. It will aid the cotton farmer, the grain grower, and unburden the commerce of the ocean.

This act will redound to the benefit of the entire country, will further commend the Democratic Party to the country, and stand

as another lasting monument to their constructive wisdom. It has my sanction and cordial support.

Mr. CAMPBELL. Mr. Speaker, this rule provides for rushing a shipping bill through the House. The House will not be permitted to give that calm and deliberate consideration to this great measure that its importance entitles it to. The bill must pass the House on Friday, if this rule is agreed to. To give the House some idea of the uncertain sea upon which we are launching this bark, I call the attention of the House to the fact that the Committee on Merchant Marine and Fisheries has not been very certain itself as to what it wants in connection with this great subject. The Committee on Merchant Marine and Fisheries of the House has changed its mind five times since this matter has been under consideration as to the nature of the bill that should be presented and passed. How important, therefore, it is that the House should give sufficient consideration to the last conclusion reached by that committee.

The first bill is a short bill of 5 pages. The next bill is a longer bill of 6 pages, differing very much from the first one. The next bill embraces 20 pages. It will be seen that the subject is growing upon the committee. The next bill is a bill of 28 pages, and the last bill under consideration cuts off one page and gives us 27 pages. This is the bill before the House. The changes in the mind of the Committee on Merchant Marine and Fisheries upon this subject have led that committee to offer five different bills since it has taken up the consideration of this subject, and yet it proposes to rush through the House by Friday night, without proper consideration, the last conclusion at which it has arrived. I suggest to those in charge of this legislation and to the responsible majority in the House that on a subject of so great importance they should give the Committee on Merchant Marine and Fisheries another chance to change its mind and to correct erroneous conclusions at which it has already arrived.

Mr. HUMPHREY of Washington. Mr. Speaker, will the gentleman yield?

Mr. CAMPBELL. Yes.

Mr. HUMPHREY of Washington. Does the gentleman think that by limiting this debate and taking a vote on Friday evening there will be any too much time left in which to get the bill through the Senate before the Democratic convention meets?

Mr. CAMPBELL. I was just going to suggest that even the importance of getting a political measure of this character through the House before the meeting of the Democratic convention on the 14th of June next should not outweigh the importance of the nature of the law that shall be saddled on the American people, that shall burden the people of the country with so great an expense, with the prospect of little, if any, good. I have wondered sometimes if the shades of Thomas Jefferson and Andrew Jackson ever look down upon this majority. If so, those old patron saints of Democracy must wonder where the child of their youth is wandering. I walked through the Hall beneath the dome the other day with a copy of this bill in my hand, and I thought I could see the statue of Alexander Hamilton wink and point over toward that of Thomas Jefferson and say, "After all, it does seem that though Thomas was popular with the people during his lifetime, my policies have weathered the storms of the years and have won the followers of Jefferson over to the policies of Hamilton." [Applause on the Republican side.]

That is what has happened. I am inclined to think that you have gone just a little too far after your abandonment of Jefferson's principles. You have gone further than Alexander Hamilton ever intended anybody in this country to go. While he believed in a central government with virile powers, he never believed that we should have a central paternal government in the United States that should do all the business of all the people, depriving local communities and the States of every semblance of the right of self-government. This rule does not give opportunity for the consideration of this important measure. This is so important a step, so important a matter of legislation that it should have the deliberation of Congress with an opportunity to work out the question and see whether or not we are ready to embark upon the new proposition provided for in this bill.

Mr. Speaker, I reserve the remainder of my time.

Mr. HENRY. Mr. Speaker, I yield five minutes to the gentleman from Pennsylvania [Mr. MILLER].

Mr. MILLER of Pennsylvania. Mr. Speaker, I am not only in favor of the passage of this resolution, but I expect to vote for the adoption of the bill when it finally comes to a vote. [Applause.] This is not a political question. This is a great business proposition which every man who has any products to ship to foreign countries, every manufacturer who wishes to ship his products to foreign countries is interested in. We have practically no merchant marine, and when the people of the United States heretofore wanted to ship their products to South American they had to ship by way of London or Liverpool in English bottoms, because we had no American bottoms in which to ship them. I therefore will vote for this bill when it comes to final passage. Personally, I would prefer a subsidy; but that is impossible. This House will not vote for a subsidy. Past Republican Congresses have tried it time and again, but never could get enough Republican votes to pass a subsidy, and the result is that we have no merchant marine and all our products shipped by sea are carried by German, English, and French bottoms. I want to see the American flag float over our shipping as it did 50, 60, 70 years ago. It will never come by private enterprise, because there is not enough profit in it to encourage private enterprise. Another proposition. The gentleman from Kansas [Mr. CAMPBELL] complains that this is not giving the House time enough to consider this proposition. Time enough! What for? The country understands it; this House understands this bill. Why, sirs, it was discussed in this House in the Sixty-third Congress for hours and days, and finally passed, and the Senate discussed it for months and finally strangled it—talked the bill to death. The country understands the proposition; it wants Congress to limit debate, pass the necessary legislation, and adjourn. This rule will hasten the day of adjournment. This rule gives five hours for general debate. It gives at least nine hours for consideration under the five-minute rule. It makes provision so that 108 men on both sides of the House can talk on this bill. Is that not time enough to talk? [Laughter and applause.] Is any Member so stupid that he can not understand and comprehend the provisions of the bill in that time? How long do those opposing this rule want to talk; throughout eternity? I commend the Rules Committee, I commend the majority, and also the majority leader for bringing in this rule and compelling this House to do something besides talk. [Applause.]

Mr. HENRY. Mr. Speaker, I will ask the gentleman to use some of his time.

Mr. CAMPBELL. Mr. Speaker, I will yield eight minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Speaker, I have been a great deal interested in the remarks made by the gentleman from Pennsylvania [Mr. MILLER], a Member of this side of the House; and when he asked what need there is for discussion of this bill more than is provided by this rule, he has himself by his speech demonstrated the need for that discussion, for he clearly is ignorant of what the bill contains. [Applause on the Republican side.]

The gentleman says that this subject was discussed in the last Congress for hours and for days. If the gentleman had read the bill, which I greatly doubt, he would know that 15 pages out of the 27 are upon a subject that has never been discussed in either House of Congress, a subject that is entirely new, a subject that is so broad and comprehensive that it ought to have the fullest discussion. Does the gentleman realize that the last 15 pages of this bill puts into the hands of seven men the power to drive the American flag from every ship that is upon the seas to-day?

Mr. MILLER of Pennsylvania. No; the gentleman does not realize that.

Mr. LENROOT. Well, if the gentleman would not vote for a rule that will prevent discussion of that phase of the bill when we come to it, he perhaps would get some knowledge upon the subject.

Mr. MILLER of Pennsylvania. May I ask the gentleman a question?

Mr. LENROOT. No; I can not yield now. Now, Mr. Speaker, I am not saying that under the circumstances power of that kind ought not to be reposed in this board. I am saying that it is so important that it ought to have discussion upon this floor.

Mr. MILLER of Pennsylvania. May I ask the gentleman a question?

Mr. LENROOT. Yes; I will yield for a question.

Mr. MILLER of Pennsylvania. If any Member of this House can not get information in 15 hours when would he get it? [Laughter and applause.]

Mr. LENROOT. Again the gentleman displays his ignorance. The gentleman has been a Member of this House long enough to know that under the rule that is here presented discussion may and probably will be taken up with the first 12 pages of the bill, and at 4 o'clock next Friday, when we come to the regulatory provisions, there will not be opportunity for a single word of discussion.

Does the gentleman know that? And I want to say to that side of the House that there are defects in this bill, and if

there was opportunity for discussion when we reach it, I am satisfied that the chairman of the committee himself would accept amendments that will be proposed to the bill.

Now, Mr. Speaker, what execuse is there for a "gag rule" of this kind? There is only one reason, and that is that you upon the other side of the aisle are afraid of free and open discussion. You say you are pressed for time. Mr. Speaker, the Porto Rican bill is pending before this House and general debate has been exhausted upon it. It is the Democratic program to have it follow this bill. There is a bill to which there is no opposition upon either side of the House. It has a unanimous report from the committee. If you are pressed for time, why do you not shut off discussion on such a bill instead of one upon which there is a serious division of opinion? If you must cut out discussion, why do you not do it upon some appropriation bill where days and days are wasted in speeches, not for the enlightenment of Members of this House but for home consumption only? Why, Mr. Speaker, the Agricultural appropriation bill occupied the attention of this House for three weeks; two-thirds of the discussion upon it not being upon controverted items at all, but for home consumption. Why did you not bring in a rule on that bill? When this bill shall pass, we will take up the District appropriation bill. If you are pressed for time, why do you not bring in a rule upon that bill? And the same might be said concerning the sundry civil bill.

Mr. MEEKER. Will the gentleman yield?

Mr. LENROOT. Mr. Speaker, you can not defend what you are trying to do in this rule. You are trying to throttle the House of Representatives upon one of the most important bills that has come before this House, and it is a shallow excuse, an inexcusable thing for you to do, to say that you have got to put a gag rule upon a bill of this character and then waste days and weeks upon idle discussion of matters concerning which there is no contest.

Now I yield to the gentleman from Missouri [Mr. MEEKER].

Mr. MEEKER. Has not the gentleman discovered that whenever that side brings in a package of dynamite they send it out immediately?

Mr. LENROOT. Of course, I am not speaking of the merits of this bill, but I do say that the House is entitled and the country is entitled to full and free discussion of it.

Mr. Speaker, this Committee on Rules last Saturday reported a rule that the Republican minority Members agreed to upon this bill. That rule gave five hours' debate. It permitted full discussion under the five-minute rule. That bill was reported to this House last Saturday, but, Mr. Speaker, last night at 6 o'clock the Committee on Rules was called into the room of the Committee on Ways and Means, just off the corridor, for the purpose of putting through this rule to cut off the consideration of the bill at 4 o'clock next Friday. I am not going to reveal any of the secrets of the committee, but it is fair to say it was suggested that if there was any attempt to filibuster on this bill and waste the time of the House on it, it would be just as easy to call this Committee on Rules together next Friday in this same committee room and then bring in a rule instead of doing it now. But, if no time is being wasted upon the bill, who is there who will say that we ought not to discuss every section and every amendment that may be offered to it?

Mr. Speaker, we are all anxious to get home. Of course, we are. But at the same time, Mr. Speaker, we can stay here long enough to do business in a businesslike way and consider measures as they ought to be considered. [Applause.]

The SPEAKER. The time of the gentleman from Wisconsin has expired.

Mr. HENRY. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. FOSTER].

Mr. FOSTER. Mr. Speaker, the rule which has been reported and is now before the House is one that is very simple and very easily understood. It is a liberal one, which provides for sufficient debate, which provides for the consideration of every amendment which may be offered. Of course, this side of the House never would bring in a rule that would exactly suit the gentleman from Wisconsin [Mr. LENROOT]. He is always complaining, and, of course, he has a right to do it. It is his nature to complain. He finds fault with this side of the House, and we never seem to please him, and can not do so in this case.

Mr. LENROOT. Will the gentleman yield for a question?

Mr. FOSTER. Yes.

Mr. LENROOT. Does the gentleman remember that "the gentleman from Wisconsin" voted for the last rule on rural credits, and voted for the rule that was reported last Saturday on this other bill?

Mr. FOSTER. But the gentleman from Wisconsin was not suited with that rule, because in his speech, as he will see if he will look at the RECORD, he was bitterly complaining of this side of the House because we brought in the rule at that time.

Mr. LENROOT. He also said that he was willing for that side of the House to take responsibility for it.

Mr. FOSTER. It did not suit him, and even with a rule that is as liberal as that one, he came before the House complaining of something. That side of the House knows that practically all the rules which this side of the House has brought in have been for the consideration of some great measure which the people want. [Applause on the Democratic side.] And not only that, but in all these rules that have been brought in for the consideration of bills, practically every one of them, a large part of that side of the House has voted for the bills. Yesterday we had an example of what good legislation this side of the House proposes by rule, when there was mustered only 10 votes out of a membership of 435 that would vote against the bill that we brought in by special rule. That is an evidence, my friends, of the fact that the Democratic majority is legislating in such a way as meets with the approval of the American people. [Applause on the Republican side.]

Why, when the Republicans brought in rules they brought in "gag rules." We bring in liberal rules [laughter on the Republican side] that permit debate, that permit the offering of any amendments.

Why, you know and I know as well as any other man in this House that you used to bring in gag rule after gag rule, and jam legislation through the House, and provide rules of such a character that if you voted "no" it counted "yes," so there was no way you could vote against the proposition. Everyone knows that, and now you complain because we bring in a rule that provides for the consideration of legislation which the people want. The only trouble with you is that you are troubled with wind on the stomach. [Laughter.]

Mr. COX. They have a bad case of colic. [Laughter.]

Mr. FOSTER. Yes; I will say you have a bad case of colic. They see, my friends, that the Democratic Party is passing bills and keeping faith with the people, and that is what hurts them on that side. It is not the passing of these rules so much, but it is their eternal protest, wanting to get back to the old stand-pat way of doing things as they did them years ago. That is all.

Now, gentlemen on that side, be honest with yourselves and with your constituents, and come out and stand for the consideration of this needed legislation. We will not gag you. You need not be afraid of that. [Laughter.] Do not let Members on that side of the House be scared by the speeches of the gentleman from Wisconsin [Mr. LENROOT]. He is an able gentleman. I like him, and I am very fond of him; but these speeches that he makes here are all buncombe. [Laughter.] And he has made them, as is suggested to me by the gentleman from Indiana [Mr. COX], so often that he has gotten them by heart, and he pours them out here on all occasions, and probably he sends them back to Wisconsin, but he does not send the RECORD containing the proceedings when the bill is finally passed and the RECORD showing that he objected to the rule and that he finally voted for the bill. He votes in most instances right. He voted for the rural-credits bill and for a great many other measures that have been proposed by this side of the House by what he calls "gag rule."

This rule, my friends, is a reasonable rule. It is a rule that every man in this House can afford to vote for to expedite the consideration of a measure that is to help the business interests of the country. I have heard that side talk about what they wanted to do for them. Now is the time to do something for the business interests of this country. Will you do it? [Applause.]

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. CAMPBELL. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. BENNET].

The SPEAKER. The gentleman from New York [Mr. BENNET] is recognized for five minutes.

Mr. BENNET. Mr. Speaker, I shall have to decline to be interrupted.

The SPEAKER. The gentleman declines to be interrupted by anybody about anything. [Laughter.]

Mr. STAFFORD. That means hot stuff.

Mr. BENNET. Except by sudden death and taxes. [Laughter.]

Mr. Speaker, the country ought to know the way we have been legislating since the 28th of April. We have been continually under special rule, with the exception of one day, outside of Calendar Wednesday; that we can not dispense with. There is nothing like it in the history of past Congresses.

Now, it is sweet to see brethren dwelling together in unity, and, so far as I can, I want to agree with the gentleman form Pennsylvania [Mr. MILLER]. He says that the people know about this bill. I think he is right. I have 52,000 voters in the congressional district that I have the honor to represent, and I have heard of only one voter among them all that was in favor of this bill, and when I went around and told him what the bill was—he is a Democrat—he said I ought to vote against it unless they amended it. [Laughter.]

Now, I have read the bill, and I am one of the few men who have read the testimony taken before the Alexander committee in the Sixty-third Congress. I was paid to read it—1,800 pages. [Laughter.] And I say to you that this bill does not put one single American ship on the ocean. I have read the 1,800 pages of testimony on the Sixty-third Congress bill and the testimony on this Congress bill, and if the gentleman from Pennsylvania had done the same thing—he is such a good, loyal Republican that he would not have made that speech, and I do not think he would have made it anyway if he was a candidate for reelection. [Laughter.]

I want to take two minutes on one subject and two on another. First, I want to call the attention of gentlemen who live on the Atlantic and Pacific seaboards to the fact that this bill affects the people who elect us. Some of us sit here in our seats and criticize the men who represent the cotton States. I do not. Whenever they want anything in behalf of cotton some one of them reports something for cotton, and they get it for cotton. In the month of April we passed two bills, and only two, and one of them was in relation to cotton, and we took two entire Wednesdays on that comparatively unimportant thing. But when anything is proposed for shipping, does it come from the Atlantic or the Pacific coasts? No; it comes from Missouri, the home of the chairman of the Committee on the Merchant Marine and Fisheries [Mr. ALEXANDER], fifteen hundred miles from the coast. He has a constitutional right to propose such bills, but I want to ask my people from the coast, who know that our people are opposed to this shipping bill, why in the world you are voting for this rule, and why in the world you will vote for the bill? Why do we not represent our constituents for a time?

Then, I want to say a word or two to my colleagues from New York City—pretty plain talk. There are only two men in New York City for this bill. One is William Gibbs McAdoo and the other is Mr. McGibboney. I do not know why Mr. McAdoo is for it. He is the Secretary of the Treasury. Mr. McGibboney is very plain and candid as to why he is for it. He is a hired advocate. He has the right to be.

Everybody else in our city is against it. Why should we go out of the way to be friendly to this Congress? What has it done for us? The Postmaster General is trying to take away all of the pneumatic tubes south of Fifty-first Street. This House, after a terrific fight, put in $750,000 for Diamond Reef. I have no right to say what happened to it in another body, but we all can read the papers. Our great city of 5,000,000 people has not had one instance of consideration from this Congress of the United States in the Sixty-fourth Congress. Now, they want you to turn around and vote for a shipping bill that our own people do not want. [Applause.]

The SPEAKER. The time of the gentleman has expired.

Mr. HENRY. Mr. Speaker, I yield three minutes to the gentleman from Virginia [Mr. SAUNDERS].

Mr. SAUNDERS. Mr. Speaker, I do not think the gentleman from Kansas [Mr. CAMPBELL] contributed much in the way of an answer to the very pertinent inquiry which every Member of the House doubtless has in mind to propound, namely is this a fair, or an unfair, a reasonable, or an unreasonable rule. Nor did the gentleman from New York [Mr. BENNET], who had much to say of a purely political and irrelevant character, find time to discuss the merits of the pending proposition. It was entirely appropriate for the gentleman from New York to decline to be interrupted in the course of his remarks. He is one of the Members on the minority side of the House who voted for the rule under which we considered the Payne bill. Having in mind the drastic character of that rule the gentleman from New York would naturally prefer not to be confronted in the course of his criticism of the present rule with the record of his vote on the Payne rule. The difference between the Payne rule and this rule, is the difference between a sinner, and a saint.

When the gentleman from Illinois [Mr. FOSTER] stated that this was a liberal rule, I noticed that many of the new Members on the Republican side of the House—and there are many new faces there—smiled, as if in derision, but the old Members, like the gentleman from Kansas [Mr. CAMPBELL], and the gentleman from New York [Mr. BENNET], and others of the old guard who recollect the rule on the Payne bill, saw nothing extravagant, or amusing in the statement of the gentleman from Illinois. They knew that this is a liberal rule, because it allows the House to express itself to the fullest extent in the way of amendments to the pending bill, a privilege that was denied to the minority by the terms of the Payne rule. I wish to say with full knowledge of the rule on the Payne bill, and full knowledge of the pending rule, that there is no man who is disposed to be fair and reasonable in his attitude who will deny that this rule gives far more opportunity of amendment and real discussion, than the rule on the Payne bill. The minority may say that there was more time allowed for general discussion of the Payne bill than is afforded for the pending measure. Granted, but even the new Members of this body know how little the general discussion, under the practice of the House, serves to illuminate the Members with respect to the matter before the committee. This is done in the discussion under the five-minute rule, not in the general debate. Under the rule on the Payne bill there was no way whatever—for that rule like this rule fixed the time at which the vote should be taken—by which a Member of the House on either side could suggest, or offer amendments with respect to that portion of the bill which remained unread when the time arrived for the committee to rise. This rule makes provision for every Member on that side of the House to submit amendments to the bill while it is under consideration under the five-minute rule. The right is given not only to offer amendments but to have the same voted upon in order. Having in mind the contents of the rule on the Payne bill, and the liberal provisions of this rule, it is absurd to speak of the pending proposition as a gag rule. [Applause.]

Mr. HENRY. Mr. Speaker, I yield one minute to the gentleman from New York [Mr. CALDWELL].

Mr. CALDWELL. Mr. Speaker, I want to have it understood that there is at least one Member of this House from the State of New York who is in favor of some kind of a shipping bill. [Applause on the Democratic side.] I have not set my patriotism for my country up against the desire for some portion of the appropriations that are called pork barrel. There is no man here more vitally interested in river and harbor improvements in New York than I am. I made my campaign upon it, and the gentleman from New York [Mr. BENNET] got on the band wagon after Congressman ROWE and myself had started the thing rolling. [Applause on the Democratic side.]

We are here to say to the people of the United States that any kind of shipping legislation is better than no shipping legislation at all. [Applause.] When Germany found that to develop her full strength and extend her influence, it was first necessary to build up a merchant marine, and when she could not induce private capital to go into the business she put Crown money into shipping, and the result is that Germany developed one of the greatest merchant marines on the waters of the world. [Applause.] So that at the outbreak of the war her ships were familiar in every seaport of importance. In the United States crown money is the people's money, and I believe the people's money should be used for this purpose, that we may carry American commerce in American ships.

For what profit will it be to us if we sell more than we buy and own the securities of our own industries if the freight upon all we sell and upon all we buy is carried abroad to be spent where we have no opportunity to get it again except at a premium.

The bill is not as good as I would like to have it, but it is the best that has been presented, and I expect to vote for it upon the theory that half a loaf is better than no bread. [Applause.]

Mr. CAMPBELL. Mr. Speaker, I yield five minutes to the gentleman from Illinois [Mr. CHIPERFIELD].

Mr. CHIPERFIELD. Mr. Speaker and gentlemen of the House: Let me say in behalf of the new Republicans, and for the old Republicans on this side of the House, that we are all alike bitter in our condemnation of this most unfair rule that is sought to be adopted here to-day. There is no more tolerance for it on the part of one class on this side than there is on the part of the other. And while I have no desire to sermonize or in any way to advise, I simply want to say that this is the kind of tactics and this is the kind of practice upon your part that will put many new Republican faces upon this side of the House at the next session. [Applause on the Republican side.]

Mr. BYRNES of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. CHIPERFIELD. Yes.

Mr. BYRNES of South Carolina. Does the gentleman not know that when the Republican Party last brought into this House the bill to build up the merchant marine in the Sixtieth Congress, you moved to suspend the rules on a majority vote, provide four and a half hours of general debate, and did not allow a man to offer a single amendment to the bill? [Applause on the Democratic side.]

Mr. CHIPERFIELD. I know that you gentlemen have been most bitter in denunciation of a rule that would limit debate upon this subject, and within the past 48 hours I have read in the RECORD the denunciations previously delivered by your associates upon the proposed rule on that measure, as you say was then pending, and upon other measures where a much fairer rule was sought to be adopted.

The fact is, that you use the same words and same expressions for cursing and for praise. You are ready to accept with praise those things that benefit you and to condemn with censure most severely precisely the same things when they are not to your advantage. The people of this country understand your lack of political sincerity. They understand your hurried purpose in attempting to railroad this bill through in order that it may be one more addition to the paternalistic program with which you hope to adorn your platform when you meet on the 14th of June next. The people are not being deceived. They understand what is going on, and if you have the idea that they approve, then, gentlemen, a great awakening awaits you. The words you use, the policies you adopt, the measures which you seek to fasten upon this country in the name of paternalism will not be approved at the polls, because it is the same old program that has been repudiated over and over again.

Mr. HASTINGS. Mr. Speaker, will the gentleman yield?

Mr. CHIPERFIELD. Briefly.

Mr. HASTINGS. If this legislation is going to be so disastrous to the Democratic Party, why does the gentleman not assist in expediting it?

Mr. CHIPERFIELD. That would be hastening you just that much faster to your doom, and you are going fast enough without it. You remind me in your professions and protestations as a party, and in the ready understanding of them upon the part of the American people, of a story that appealed to me quite strongly.

An old farmer went into town and for the first time saw a telephone hanging on the wall. He said to the storekeeper, "What is that pesky thing?" The storekeeper replied, "That is a telephone." "What do you do with it?" "Why, you talk with it." "Where do you talk?" "Anywhere they have another one." "Well, my old woman is over at the furniture store. Could I talk with her?" "Yes;" and so they called up the furniture store, got the old lady on the wire, and gave him the earpiece and through it he said in a loud tone of voice, "Hello, Betsy," and just then a terrific bolt of lightning struck the wire and he was hurled clear across the floor. The storekeeper, not knowing what had happened, said, "Did you get her?" He picked himself up and replied, "Thunder, yes; and I recognized her the very first word she spoke." [Laughter.]

The SPEAKER. The time of the gentleman from Illinois has expired.

Mr. CHIPERFIELD. And so it is that the American people recognize with the first word you speak the pretenses that you are making to the American people—the same pretenses that have carried to defeat in the past and will bring it about again in November. [Applause on the Republican side.]

Mr. HENRY. Mr. Speaker, I yield three minutes to the gentleman from Missouri [Mr. ALEXANDER.] [Applause on the Democratic side.]

Mr. ALEXANDER. Mr. Speaker, if the Committee on the Merchant Marine and Fisheries had had their will in this matter, if the condition of the business of the House were in such shape that the Committee on Rules and Mr. KITCHIN, majority leader, could have done so, they would have given more time to the consideration of this bill. I am very sure that we would welcome more time, because we have given to the bill very great consideration. I introduced a bill known as the shipping bill (H. R. 10500) on the 29th day of January, and hearings were held on the bill from the 10th of February to the 9th of March. Again, in April for a term of 10 days we had additional hearings on the bill. Following the hearings the bill was considered by a subcommittee of 10 members, 6 Democrats and 4 Republicans. We met daily, oftentimes in the morning, afternoon, and at night until 12 o'clock. This bill is the product of the best thought of the committee, without reference to party affiliations. I have been chairman of the committee now for nearly three Congresses, and in all of our deliberations in times that have passed we have not considered legislation along narrow partisan lines. We were not divided along partisan lines on the ship-purchase bill reported by the committee in the last Congress. There is a difference of opinion upon two or three provisions of this bill as between the majority and the minority of the committee. The gentleman from Kansas [Mr. CAMPBELL] says that we, the majority of the committee, have changed our opinion five times. This reckless statement is a demonstration of the fact that he does not know a thing about it. There is not a principle in this bill that was not embodied in the bill when I introduced it in the House on the 29th day of January. We worked it over and made a better bill of it.

The bill H. R. 10500 as introduced by me originally contained in sections 9 and 10 provisions for the regulation of water-borne commerce and the license of vessels engaged in our ocean transportation. At the close of the hearings, and after thorough consideration of the objections urged thereto at the hearings, we regarded those provisions as possibly objectionable, as being too general and too indefinite, and as clothing the shipping board with too great power that might be abused. Hence we took up and considered House bill 450, which I reintroduced in this Congress, to carry out the recommendations of the Committee on the Merchant Marine and Fisheries following the investigation of the Shipping Trust, and I want to say right here with reference to the provisions to which the gentleman from Wisconsin [Mr. LENROOT] said we had given very little consideration and might mean the elimination of the American flag from the high seas, that the report of the committee and the recommendations of the committee had the united support of every man upon the committee in the Sixty-third Congress. We investigated the subject for two years, and I think we are quite as competent as the gentleman from Wisconsin to consider and determine any and all of those provisions of the bill regulating common carriers by water.

The SPEAKER. The time of the gentleman from Missouri has expired.

Mr. HENRY. Mr. Speaker, I will ask the gentleman from Kansas to consume the remainder of his time, as there is but one speech more to be made on this side.

Mr. CAMPBELL. Mr. Speaker, I yield five minutes to the gentleman from Illinois, Mr. MANN.

Mr. MANN. Mr. Speaker, the bill under consideration has 35 sections. The last 21 of those sections relate to control over vessels engaged in interstate and foreign shipping. While the bill says that it does not conflict with the powers granted to the Interstate Commerce Commission, as a matter of fact it does in many particulars. For years the Committee on Interstate and Foreign Commerce has worked over the question of the Interstate Commerce Commission and the regulation of railroad carriers, and in some cases water carriers under the control of that commission. The Committee on Interstate and Foreign Commerce has a pretty fair knowledge of the subject, acquired through years of study, and would not dare bring to the House a bill relating to interstate commerce and the control of railroad carriers and say, "You shall pass the bill without an opportunity to consider amendments." No such proposition was ever brought before the House; but under this rule there will be no chance to give consideration to amendments to any one of these 21 sections, for before that part of the bill will be reached under the five-minute rule it will be 4 o'clock on Friday afternoon. While amendments may be read at the desk and voted upon, the rule gives no opportunity for their consideration. That is not a fair method of considering legislation.

I am not complaining that the majority, having agreed upon a bill to provide that the Government shall engage in shipping, decides to put it through under a rule with or without debate or amendment, but in these matters which ought fairly to be considered by the House, where the consensus of the judgment of all is better than the judgment of a committee which never dealt with this subject in the past, I say that there ought to be procedure under the rule by which Members may offer amendments to the bill and discuss the amendments and have them considered. When the last interstate commerce bill passed this House I had charge of it. There was no attempt to gag the House, no attempt to prevent amendments, no attempt to prevent the consideration of amendments. Many amendments were offered, many amendments were agreed to by the House and have been written into the law, some of them wise amendments, which had not been reported by the committee in the first instance, and the same procedure ought to be followed in this case. You are applying a gag on legislation, part of which is essentially nonpartisan. You propose to shut out the right to consider the portions of the bill to which I referred by any fair method. You gentlemen gained the House and the country

upon the cry that the Republicans did not give a fair opportunity for the consideration of measures in the House, and yet we never during all our control of the House attempted to pass such legislation without consideration as you are attempting now. [Applause.]

The SPEAKER. The time of the gentleman has expired. The gentleman from Kansas.

Mr. CAMPBELL. I think the Speaker has been overgenerous with me in regard to time. I used 8 minutes, the gentleman from Wisconsin 8 minutes, the gentleman from New York and the two gentlemen from Illinois used 15 minutes, which consumed 1 minute more than I was really allowed.

Mr. HENRY. Mr. Speaker, I yield eight minutes to the gentleman from North Carolina [Mr. KITCHIN]. [Applause.]

Mr. KITCHIN. Mr. Speaker, evidently there is a great difference of opinion as to this rule. The gentleman from Kansas [Mr. CAMPBELL], the gentleman from Wisconsin [Mr. LENROOT], the gentleman from New York [Mr. BENNET], and the gentleman from Illinois [Mr. MANN] say that this is a very unfair rule, that it is the worst gag rule they have ever seen attempted to be passed in this House. On the other hand, the distinguished gentleman from Illinois [Mr. FOSTER], the gentleman from Virginia [Mr. SAUNDERS], and the gentleman from Texas [Mr. HENRY] say that this is a very liberal rule; that there is no gag in it. The gentleman from Illinois, the able minority leader, says that this is an unfair way to proceed; that this bill is so important that it ought to have serious consideration; that under this rule on the last 15 pages of the bill there will not be an opportunity to offer any amendments. Why, the gentleman from Illinois evidently has not read the rule.

Mr. MANN. If the gentleman will permit, if the gentleman from North Carolina had listened to what I said—evidently he was not paying attention—I made no such statement.

Mr. KITCHIN. The gentleman made the statement that it was unfair; that under the rule, if passed, that we would not reach, under the five-minute discussion, the regulatory portion of it, constituting the last 15 pages, and there would not be opportunity of discussion or amendments.

Mr. MANN. No; I said discussion or consideration of amendments.

Mr. KITCHIN. Well, discussion and consideration.

Mr. MANN. That is true.

Mr. KITCHIN. The gentleman has not read the rule.

Mr. MANN. I have.

Mr. KITCHIN. The rule is fair and reasonable. It gives full opportunity of discussion of the bill and every amendment that may be offered in good faith to improve or perfect the bill. We have five hours of general debate. We will finish that debate to-day, if the gentleman says so. We will stay until 6 or 7 o'clock and finish that. Then on Thursday we will have all day, beginning at 11 o'clock, and we will stay here until 6 or 7 or 8 o'clock, or later if the gentleman desires, and then we will have all day Friday, until 4 o'clock, for discussion, sufficient time to offer and discuss amendments to every single section in the bill. There are 35 sections. Under the rules of the House, under the five-minute debate, if rigidly enforced, we are only entitled to 10 minutes on an amendment, 5 for and 5 against. By the adoption of this so-called "gag" rule there will be time enough to have 20 minutes to offer and discuss each amendment, even if you offer an amendment to every section of the bill. [Applause on the Democratic side.] The gentleman from Illinois says that this is one of the most unfair rules that has ever been attempted to be passed in this House, and yet the gentleman himself, with the almost solid Republican Party on that side of the Chamber, voted for a rule to pass the Payne-Aldrich Act, containing hundreds of paragraphs and sections and thousands of items, with a provision in that rule allowing this side of the House to only offer four amendments, and those four amendments were selected by them and not by this side.

The gentleman remembers the Vreeland-Aldrich Currency Act, a most important act, an act as important and perhaps more so at that time than this act. For its passage the Republicans brought into this House and passed a rule, and the gentleman from Illinois voted for the rule, which allowed no amendment and no discussion or consideration under the five-minute rule, except one amendment by the way of a substitute, but set out in that rule. They did not permit any man in this House, Democrat or Republican, to vote for or discuss or offer any amendment. They did not have any discussion under the five-minute rule, but just as soon as general debate was over the rule provided that the bill should be read and voted on at once. And yet the minority leader tells the House and tells the country that this is one of the most unfair methods of procedure that has ever been attempted in the House.

Mr. LENROOT. Will the gentleman yield?

Mr. KITCHIN. I will.

Mr. LENROOT. I wanted to ask the gentleman if that very fact was not the best issue you had in your campaign?

Mr. KITCHIN. Yes, sir; one of the best. And if we had put such a provision in this rule and had prevented you and any other man in this House from offering and discussing any amendment which you proposed in good faith, we would deserve to be condemned just like the people condemned your party for adopting such rules. [Applause on the Democratic side.]

The gentleman from New York [Mr. BENNET] says that his folks are not for this bill. Gentlemen, our folks are for this bill. He says that we ought not to pass this rule; that his people do not want us to pass it. Our people want us to pass this rule, and if these Democrats here will vote together we can pass this rule, and we can pass this bill in a reasonable time by stopping the filibustering and windjamming over on that side of the House. [Applause on the Democratic side.] As the gentleman from Pennsylvania [Mr. MILLER] says, the time has come for this House to stop talking and go to legislating. [Applause on the Democratic side.] This rule, while it gives everyone an opportunity to offer any amendment he desires to every section, and full time to discuss any amendment, prevents all the needless, delaying, demagogic, get-into-the-RECORD talk, to which we are too often compelled to listen, and enables us to legislate on the bill.

We are willing to come to a "show-down" with you on this bill. I want to say to my fellow Democrats here that we are responsible for the legislation in this House. The vote on this rule will show whether or not we have the patriotism and courage to assume that responsibility. We have a majority. We Democrats can run this House and manage its procedure, provided we want to do it; and if we want to do it, then all of you Democrats must come here and stay here and furnish a quorum at all hours in this House. [Applause on the Democratic side.] The people furnished us in the last election a majority of the House, and it is our duty to be present here on this floor at every hour of each day's session with that Democratic majority. If so, we can and will do business. We will legislate. We will carry out the entire legislative program of the House and the administration before adjournment. And if you will come here and furnish a quorum and majority, we will adjourn and get out of this Capitol by July 20. We can do it. [Applause on the Democratic side.]

Mr. HENRY. Mr. Speaker, I move the prevous question.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. CAMPBELL. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 192, nays 145, answered "present" 5, not voting 91, as follows:

YEAS—192.

So the previous question was ordered.

The Clerk announced the following pairs:

On the vote:

Mr. McKELLAR (for) with Mr. COPLEY (against).

Mr. CANDLER of Mississippi (for) with Mr. TEMPLE (against).

Mr. ESTOPINAL (for) with Mr. SNELL (against).

Mr. SPARKMAN (for) with Mr. BARCHFELD (against).

Mr. SEARS (for) with Mr. JOHNSON of South Dakota (against).

Mr. GODWIN of North Carolina (for) with Mr. GARDNER (against).

Mr. STEELE of Pennsylvania (for) with Mr. McCULLOCH (against).

Mr. LESHER (for) with Mr. McKINLEY (against).

Mr. DOREMUS (for) with Mr. SMITH of Michigan (against).

Mr. PATTEN (for) with Mr. FAIRCHILD (against).

Mr. HARRISON (for) with Mr. CHIPERFIELD (against).

Mr. FLYNN (for) with Mr. SANFORD (against).

Mr. WATKINS (for) with Mr. PARKER of New Jersey (against).

Mr. TILLMAN (for) with Mr. HAYES (against).

For the session:

Mr. LIEBEL with Mr. ROWLAND.

Mr. DEWALT with Mr. McFADDEN.

Until further notice:

Mr. TAGGART with Mr. NORTH.

Mr. CLARK of Florida with Mr. FULLER.

Mr. FITZGERALD with Mr. HOLLINGSWORTH.

Mr. DRISCOLL with Mr. KIESS of Pennsylvania.

Mr. CASEY with Mr. PORTER.

Mr. LOFT with Mr. GRAY of New Jersey.

Mr. BRUMBAUGH with Mr. WATSON of Pennsylvania.

Mr. EAGAN with Mr. SCOTT of Pennsylvania.

Mr. CONRY with Mr. FARR.

Mr. STEAGALL with Mr. MORIN.

Mr. RAUCH with Mr. HOPWOOD.

Mr. BUCHANAN of Texas with Mr. HEATON.

Mr. AIKEN with Mr. GRIEST.

Mr. CAREW with Mr. LAFEAN.

Mr. OLNEY with Mr. LEHLBACK.

Mr. POU with Mr. MOORES of Indiana.

Mr. RAGSDALE with Mr. McLAUGHLIN.

Mr. MAHER with Mr. COLEMAN.

Mr. HART with Mr. COOPER of Ohio.

Mr. SCULLY with Mr. TINKHAM.

Mr. DALE of New York with Mr. HASKELL.

Mr. LANGLEY with Mr. CANTRILL.

Ending Wednesday night:

Mr. TALBOTT with Mr. BUTLER.

Mr. BAILEY with Mr. GARLAND.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the adoption of the rule.

The question was taken, and the Speaker announced that the "ayes" seemed to have it.

Mr. CAMPBELL. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. The Clerk will call the roll. Those in favor of adopting the resolution embodying the rule will, when their names are called, answer "yea"; those opposed will answer "nay."

The question was taken; and there were—yeas 194, nays 142, answered "present" 4, not voting 93, as follows:

YEAS—194.

So the resolution was agreed to.

The Clerk announced the following additional pairs:

Until further notice:

Mr. HART with Mr. CHARLES.

Mr. DOOLING with Mr. MUDD.

Mr. LITTLEPAGE with Mr. CAPSTICK.

Mr. SLEMP with Mr. MONTAGUE.

On this vote:

Mr. SPARKMAN (for rule on shipping bill) with Mr. BARCHFELD (against).

Mr. TILLMAN (for rule) with Mr. HAYES (against).

Mr. ESTOPINAL (for rule) with Mr. CHANDLER of New York (against).

Mr. CANDLER of Mississippi (for rule) with Mr. TEMPLE (against).

Mr. MCKELLAR (for rule) with Mr. COPLEY (against).

Mr. SEARS (for rule) with Mr. JOHNSON of South Dakota (against).

Mr. STEELE of Pennsylvania (for rule) with Mr. MCCULLOCH (against).

Mr. DOREMUS (for rule) with Mr. SMITH of Michigan (against).

Mr. GODWIN of North Carolina (for rule) with Mr. GARDNER (against).

Mr. PATTEN (for rule) with Mr. FAIRCHILD (against).

Mr. WATKINS (for rule) with Mr. PARKER of New Jersey (against).

Mr. FLYNN (for rule) with Mr. SANFORD (against).

Mr. HARRISON (for rule) with Mr. CHIPERFIELD (against).

Mr. TILLMAN with Mr. MILLER of Pennsylvania (ending 22d).

The result of the vote was then announced as above recorded.

Mr. MARTIN. Mr. Speaker, on the roll call on the ordering of the previous question I find that I am not recorded. I voted "no," and I would like to have the correction made.

The SPEAKER. Without objection, the correction will be made.

There was no objection.

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that all Members who speak on the bill may have five legislative days after the consideration of this bill is closed to extend their remarks in the RECORD.

The SPEAKER. The gentleman from Missouri asks unanimous consent that all who speak on this bill shall have five legislative days after the consideration of the bill in which to print remarks in the RECORD. Is there objection?

Mr. MANN. For the present, I object.

The SPEAKER. The House automatically, under the rule, resolves itself into Committee of the Whole House on the state of the Union for the consideration of the shipping bill, with the gentleman from Tennessee [Mr. GARRETT] in the chair.

In the temporary absence of Mr. GARRETT Mr. SAUNDERS took the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the shipping bill, of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 15455) to establish a United States shipping board for the purpose of encouraging developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes.

Mr. ALEXANDER. Mr. Chairman and gentlemen of the House, in the limited time for debate it is impossible for me to discuss this bill as I would like to. I may say here that this bill is a very different bill from what is known as the ship-purchase bill which was considered in the House in the last Congress.

I introduced the original bill (H. R. 10500) for which the bill now under consideration is a substitute on the 29th of January last. Hearings were held on H. R. 10500 from the 10th of February to the 9th of March, and again from the 13th to the 22d of April. We gave the bill as thorough and painstaking consideration as it is possible to give a piece of legislation of its importance under all the circumstances. We fully realized its importance as it might affect our ocean-borne commerce.

In the Sixty-second Congress the Committee on the Merchant Marine and Fisheries was charged by the House with the investigation of what was known as the Shipping Trust. I called to our assistance as an expert Dr. S. S. Huebner, of the University of Pennsylvania, and our investigations continued over a term of nearly two years. We made a report to the House in February, 1914, and made certain recommendations to the House with reference to legislation as we were instructed to do by the resolution under which the investigation was held. We investigated every trade area in the world. We developed all the conditions under which the regular lines of vessels in over-sea trade, as well as our coastwise trade, were operating. No fact found in that report has ever been challenged by anyone. If you will look at the maps in the corridor, you will find how close and intimate were the relations between all the regular lines in the coastwise trade and on the Great Lakes and in the over-seas trade as disclosed by our investigation. As a result of our investigation we were confronted with the question whether or not we should recognize the agreements existing between carriers by water or recommend that the Sherman antitrust law should be enforced against them and these combinations be broken up, and if that law was not ample or broad enough in its provisions to do so that the law should be amended.

After giving thorough consideration to this grave question and after taking into consideration the arguments made before our committee by the ablest representatives of the foreign lines as well as of the domestic lines, we concluded that many of the provisions of the agreements under which combinations were operating were not objectionable; and hence we recommended reasonable regulation rather than that the combinations might be broken up. That decision was influenced by the consideration that if we would break up these combinations and restore destructive competition it would ultimately lead to consolidation and monopoly. Hence, after giving the question thorough consideration, we recommended that our water-borne commerce, domestic and foreign, should either be brought under supervision of the Interstate Commerce Commission or under some other body having jurisdiction.

I introduced a bill (H. R. 17328) in the last Congress, embodying the views of the committee and carrying out our recommendations. We did not have time to consider it in that Congress, and it went over. I reintroduced the bill in this Congress. It is known as H. R. 450.

The shipping bill, H. R. 10500, in addition to the provisions for the creation of a shipping board, contained section 9, which gave the shipping board large regulatory powers, and section 10, which provided that the lines engaged in domestic and foreigns commerce should be required to operate under a license from the shipping board. As the result of our hearings we concluded that the provisions of H. R. 450 better met the views of our committee than did the provisions of sections 9 and 10 of the bill H. R. 10500 I introduced in the House. The subcommittee, of which there were 10 members—myself; Mr. HARDY, of Texas; Mr. BURKE, of Wisconsin; Mr. SAUNDERS, of Virginia; Mr. BRUCKNER, of New York; Mr. BYRNES, of South Carolina; Mr. GREENE, of Massachusetts; Mr. EDMONDS, of Pennsylvania; Mr. HADLEY, of Washington; and Mr. ROWE, of New York—addressed ourselves to the task of sifting out from H. R. 450 and transferring to this bill those provisions which

we thought would be desirable to incorporate in the bill and give to the board the reasonable power to regulate our water-borne commerce.

I want to say right here that if we ever expect to build up an American merchant marine under the American flag in the overseas trade we must exercise some control over shipping lines engaged in trade from our ports, and provisions in this bill referring to common carriers in foreign commerce have that end in view—nothing harsh, nothing drastic, but reasonable regulations, the purpose of which is to insure American commerce fair treatment.

Mr. MADDEN. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. Yes.

Mr. MADDEN. I was interested in reading the hearings before the committee in a statement made by a man named Franklin and one or two other men to the effect that two-thirds of the commerce coming into and going out of American ports is carried by what is known as tramp steamers, and that those tramp steamers make their contracts with individuals for the cargo, and, consequently, would not come under the provisions of the regulations which the bill seeks to enact. Is there any truth in that?

Mr. ALEXANDER. That is true, and we do not want to regulate the tramps if they are bailees for hire and not common carriers and are free from the control of the regular lines; they are the very best regulators we have; but our investigation disclosed that many of these cargo steamers—the greater number of them—belong to and are under the control of these regular lines.

Mr. MADDEN. Well——

Mr. ALEXANDER. The gentleman will pardon me, but I have allotted to myself only 30 minutes, and I must get along. So much for the regulatory provisions of the bill. I want to say right here that the provision creating a Federal shipping board has the support of the commercial bodies in the United States. They do not favor the extension of the power to regulate our water-borne commerce to the Interstate Commerce Commission, because the commission is already overworked. The Chamber of Commerce of the United States had the provisions of House bill 450 under consideration for some time, and recommended legislation abolishing deferred rebate and providing for supervision of rates by the Federal shipping board, and by an overwhelming majority, on a referendum creating the shipping board and vesting the board with regulatory powers over common carriers by water, so voted. So that, so far as those provisions are concerned, I may confidently state that we have behind us the united sentiment of the commercial bodies in the United States, including the Chamber of Commerce of New York, which, I understand, is not affiliated with the Chamber of Commerce of the United States.

The first section of the bill defines the term "common carrier by water in foreign commerce," the term "common carrier by water in interstate commerce," the term "common carrier by water," the term "other person subject to this act," and the term "person," as used in the bill.

Section 2 provides that within the meaning of the bill no corporation, partnership, or association shall be deemed a citizen of the United States unless the controlling interest therein is owned by citizens of the United States, and the corporation itself organized under the laws of the United States or of a State, Territory, District, or possession thereof. The provisions of the bill also apply to receivers and trustees of all persons to whom the bill applies.

Section 3 provides for the creation of the United States shipping board, composed of the Secretary of the Navy and the Secretary of Commerce, as members ex officio, and five commissioners, to be appointed by the President, by and with the advice and consent of the Senate. The first commissioners appointed shall continue in office for terms of two, three, four, five, and six years, respectively, from the date of their appointment; the term of each to be designated by the President, their successors to be appointed for terms of six years, persons chosen to fill vacancies to be appointed only for the term of the commissioner whose term he succeeds; commissioners to be appointed with due regard to their fitness for the efficient discharge of the duties imposed on them, and to a fair representation of the geographical divisions of the country. Not more than three commissioners shall be appointed from the same political party. No commissioner shall be employed by or hold any official relation to any common carrier by water or other persons subject to the act, nor actively engaged in any other business. Any commissioner can be removed by the President for inefficiency, neglect of duty, or malfeasance in office. A vacancy in the board shall not impair the right of the remaining members of the board to exercise all its powers. The board shall have an official seal, which shall be judicially noticed. The board may adopt rules and regulations in regard to its procedure and the conduct of its business.

Mr. MADDEN. Mr. Chairman, will the gentleman yield there for a question?

Mr. ALEXANDER. The gentleman will pardon me, but I can not yield. Under this bill the Secretary of the Navy has certain duties to perform. The naval auxiliaries and Army transports and other vessels belonging to the Navy and War Departments may be transferred to this board. The Secretary of the Navy may list these vessels as a part of the United States naval auxiliary reserve, and, in addition, the officers and members of the crews of the listed ships may be enrolled as a part of the naval reserve force, under regulations prescribed by the Secretary of the Navy. The Secretary of Commerce is made a member of this board for the reason that the Steamboat-Inspection Service and the Bureau of Navigation are under the jurisdiction of the Secretary of Commerce.

Section 4 provides that the members of the board, except the ex officio members, shall receive a salary of $10,000 per annum. They may appoint a secretary at a salary of $5,000 per annum, and employ and fix the compensation of such attorneys, officers, naval architects, experts, examiners, clerks, and other employees as they may find necessary for the proper performance of their duties and as may be appropriated for by Congress. The President, upon request of the board, may authorize the detail of officers of the military and naval services of the United States for such duties as the board may deem necessary in connection with its business.

With the exception of the secretary, a clerk to each commissioner, attorneys, naval architects, experts, and examiners, all other employees of the board shall be a part of the classified civil service.

The expenses of the board, including necessary expenses for transportation incurred by members of the board or its employees under its orders in making any investigation or upon official business in any other place than in the city of Washington, shall be allowed and paid on the presentation of itemized vouchers approved by the chairman of the board. The board may rent suitable offices for its use.

There has been serious question raised as to whether or not the compensation named in the bill will be sufficient to secure men of the caliber necessary to properly discharge the duties of this commission. We believe there are many men in this country of experience in transportation and shipping, experts along the lines necessary, and qualified to discharge the duties imposed on them by this bill, who are willing to give their time to the public service.

Mr. MANN. Mr. Chairman, will the gentleman yield for a question?

Mr. ALEXANDER. Yes.

Mr. MANN. This board is to exercise certain regulatory powers?

Mr. ALEXANDER. Yes.

Mr. MANN. Are the Secretary of the Navy and the Secretary of Commerce to be a part of the board for that purpose?

Mr. ALEXANDER. They are a part of the board for all purposes.

Mr. MANN. Does not the gentleman think it is a little dangerous to introduce political, partisan appointments into the subject of regulatory powers over interstate commerce?

Mr. ALEXANDER. Of course there is that danger; but the practical duties will devolve on this board of five members in the administration of this law, and I do not believe that any men, although they may be members of the Cabinet and partisans in the sense that they are representatives of a party, would lend themselves to any scheme that would not be fair to the great interests which will be committed to their charge under this bill.

Mr. MANN. It would not be possible, of course, for the Secretary of the Navy and the Secretary of Commerce to hear all of the arguments made before this commission, or many of them. Would it be wise to let them vote on a proposition where they did not hear the arguments and where their vote might be decisive?

Mr. ALEXANDER. I think I am of a judicial temperament, and I always like to see fair play, and if I thought that they would abuse their powers by reason of their membership on this board I would regret very much to make them members of the board.

Mr. MANN. But would they not be apt to abuse their powers?

Mr. ALEXANDER. If they would not give the cases before them full consideration, they might do so.

Mr. MANN. But here there are seven members, and it takes a majority to decide a question. Suppose five members stood three to two?

Mr. ALEXANDER. They would have to decide. I believe they would fully inform themselves—that they would not vote blindly.

Mr. MANN. But they would not hear the arguments.

Mr. OGLESBY. Will the gentleman permit an inquiry on this line?

Mr. ALEXANDER. Yes.

Mr. OGLESBY. Is it not a fact, in all judicial bodies, those who do not participate in hearing of arguments always refuse to take part in a decision?

Mr. ALEXANDER. That is the rule.

Mr. MANN. Does the gentleman know any case where a minority of the court is permitted to render the judgment of the court?

Mr. ALEXANDER. No; I do not think there would be any serious danger of it here; but, as I have said, they have been made members of this board for the reasons that I stated.

Section 5 provides that the board, with the approval of the President, is authorized to have constructed and equipped in American shipyards and navy yards and elsewhere, giving preference, other things being equal, to domestic yards, or to purchase, lease, or charter, vessels suitable, as far as the commercial requirements of the marine trade of the United States may permit, for use as naval auxiliaries or Army transports, or for other naval or militay puposes.

The policy of admitting foreign-built ships to American registry has already been recognized and established by the Congress of the United States. In the Sixty-second Congress I reported out of the Committee on Merchant Marine and Fisheries a bill providing that foreign-built ships not more than five years old might be admitted to American registry; and that all the material entering into the construction, repair, or equipment of ships built in American shipyards might be admitted free of duty. The provisions of that bill were incorporated into section 5 of the Panama Canal act in 1912. The distinguished gentleman from Georgia [Mr. ADAMSON] was then chairman of the Committee on Interstate and Foreign Commerce, and the Hon. Fred Stephens of Minnesota, the ranking minority member, and between us we wove the provisions of that bill into section 5 of that act. That bill became a law under Mr. Taft's administration. No ships were admitted under its provisions because at that time the cost of constructing ships in American shipyards was greater than in foreign countries and the cost of operation of vessels under the American flag was greater than it was under foreign flags—or at least that was the claim. The vessels belonging to the United States Steel Corporation and vessels of the Standard Oil Co. and vessels of the United Fruit Co., all of them belonging to American citizens, were then under a foreign flag. They have since been admitted to American registry.

In August, 1914, immediately following the outbreak of the war in Europe, we passed through this House, under suspension of the rules, a bill removing the limitation of five years and admitting foreign-built ships to American registry without regard to age. It became law on the 18th of August, 1914. Under its provisions more than 600,000 tons of shipping have come under the American flag, all shipping belonging to American citizens, and prior to that time under British and other foreign flags.

At this time there is no claim that vessels may not be built in American shipyards as cheaply as they can be built anywhere in the world. In fact, we are building ships now for foreign account. There is no claim that vessels may not be operated under the American flag now as cheaply as they can be operated under a foreign flag. The difference in cost of construction and operation that may have existed prior to the war——

The CHAIRMAN. The gentleman from Missouri has consumed 25 minutes.

Mr. ALEXANDER. Whatever differences that existed prior to the war have been wiped out. A minority member of my committee introduced a ship-subsidy bill early in this session at the instance of certain parties in New York. Later some of the parties appeared at the hearings on this bill and agreed that the present is not a proper time to press a ship-subsidy bill. I believe if this bill becomes a law that every ship constructed under its provisions will be constructed in American shipyards. That is my hope and that is my expectation. I believe, too, that the facilities for the construction of ships will be ample.

It is said if this bill becomes a law, where are you going to have the ships built; our yards are now crowded with construction work. Well, now, admitting they are full to their present capacity, what is to become of the scheme to enlarge our Navy by the expenditure of $500,000,000 in the next five years? We are going to build battleships, cruisers, and submarines. No one seems to doubt our facilities to do this. All our shipyards are expanding their facilities to meet the requirements of our naval program; why not our merchant-marine program as well? We have some 40 shipyards. Merchant vessels can be built on the Atlantic coast, on the Great Lakes, along the Gulf, or on the Pacific coast, and there is no question in my mind but that these vessels may be built if we only make provision for it.

Another question to which I wish to call attention is this: Rear Admiral Benson, of the Navy, at the hearings before our committee said that we need at this time between five and six hundred thousand tons of merchant ships provided for in this bill as auxiliaries for our Navy at its present strength. I think we can very well expend the $50,000,000 provided for in this bill to furnish auxiliaries for the Navy in the interest of national defense. Certainly no one would claim that we should build these ships solely as naval auxiliaries.

They must be utilized in the commerce of the United States in time of peace. In the last Congress we had what was known as the Weeks bill. The Senator from Massachusetts was the first to suggest the Government ownership and operation of the merchant marine. That bill passed the Senate. You know its subsequent history.

Now, gentlemen, the limitation for debate under this rule is such that I can not go into the consideration of the many questions involved in this bill at any length. One provision of the bill did not meet the approval of the minority members of the committee; that is, the power vested in the board to purchase foreign ships. Another provision that they did not approve was that with reference to the Government operation of ships. First, I just want to speak a moment on that. If you look at section 11 of the bill you will see that it provides that after five years the operation of ships under the corporation in which the Government may own a majority of the stock shall cease. That concession was made to those who are opposed to peramnent Government operation of ships. We further provide that these foreign-built ships and ships operated by a corporation in which the Government is the owner of stock may not be used in the coastwise trade, except in the trade with Hawaii and Porto Rico and Alaska, and then only in the event those trades are not adeqautely served by privately owned and operated lines of vessels. That proposition was put up to us by ex-Gov. Gillette, of California, representing the Pacific coast lines. As we wished to demonstrate that we have no intent to discourage private capital from investing in shipping, for fear of competition by Government-controlled lines, we wrote that provision in the bill.

Mr. COOPER of Wisconsin. I would like to ask one question.

Mr. ALEXANDER. Yes.

Mr. COOPER of Wisconsin. Who is to decide whether the service is adequate?

Mr. ALEXANDER. The board. The American-Hawaiian Steamship Co. and the Luckenbach Co. have diverted most of their ships from the coastwise to foreign trade, because the profits are greater in that trade. And there is a real demand now for shipping in our coastwise trade, and especially in the trade between the Atlantic and Pacific coasts.

Mr. BRITTEN. Is not that condition due to the war in Europe?

Mr. ALEXANDER. Of course it is due to the war in Europe.

Mr. BRITTEN. That is not always going to exist.

Mr. ALEXANDER. I hope not.

Mr. KAHN. The gentleman spoke of the Hawaiian and Luckenbach Lines. Both of those lines do business through the Panama Canal, do they not; and the continued route through that canal has a great deal to do with the running of their ships? Is not that the fact?

Mr. ALEXANDER. They operated their ships regularly before the canal was opened.

Mr. KAHN. They operated them in conjunction with the Tehuantepec Railroad, which is equivalent to a canal.

Mr. ALEXANDER. Yes; and I think they will scurry back now if this bill becomes a law.

Section 6 provides that the President may transfer to the board such vessels belonging to the War or Navy Department suitable for commercial uses and not required for military or naval use in times of peace, and also transfer to the board vessels owned by the Panama Railroad Co. not required in its business.

Section 7 provides that the board, upon terms and conditions prescribed by it and approved by the President, may charter, lease, or sell to any person, a citizen of the United States, any vessel so purchased, constructed, or transferred.

Section 8 provides that when any such vessels become unfit for the purposes of the act they may be sold under the terms prescribed by the board.

Section 9 of the bill provides that any vessel purchased, chartered, or leased from the board may be registered or enrolled and licensed as a vessel of the United States and entitled to the benefits and privileges appertaining thereto: *Provided*, That foreign-built vessels heretofore and hereafter admitted to American registry, and vessels owned, chartered, or leased by any corporation in which the United States is a stockholder—except the Panama Railroad Co.—may not engage in the coastwise trade of the United States, except that such vessels may engage in trade with Alaska, Hawaii, or Porto Rico, whether or not en route to or from a foreign port, if the board finds such trade is not being adequately served by a regular line or lines of vessels. Such vessels while employed solely as merchant vessels shall be subject to all laws, regulations, and liabilities governing merchant vessels, whether the United States be interested therein in whole or in part, or hold any mortgage, lien, or other interest therein. No such vessel, without the approval of the board, shall be transferred to a foreign registry or flag or sold, nor, except under regulations prescribed by the board, be chartered or leased.

The section further provides that when the United States is at war, or during any national emergency, the existence of which is declared by proclamation of the President, no vessel registered or enrolled or licensed under the laws of the United States shall, without the approval of the board, be sold, leased, or chartered to any person not a citizen of the United States or transferred to a foreign registry or flag.

This latter provision applies not only to vessels constructed or purchased under the provisions of this act but to all vessels under the American flag.

Section 10 provides that the President, upon reasonable notice, may take possession, absolutely or temporarily, for naval or military purposes, of any vessel purchased, leased, or chartered from the board; and if, in the judgment of the President, an emergency exists requiring such action, he may take possession of any such vessel without notice.

The section further provides for the payment to the person interested the fair actual value at the time of requisition of the interest of such person in the vessel taken absolutely, or, if taken for a limited period, the fair charter value for such period.

Section 11 of the bill provides that the board, if in its judgment such carrier is necessary to carry out the provisions of the act, may form, under the laws of the District of Columbia, one or more corporations for the purchase, construction, equipment, lease, charter, maintenance, and operation of merchant vessels in the commerce of the United States. The aggregate capital stock of the corporation or corporations thus formed shall not exceed $50,000,000. It further provides that the board may, on behalf of the United States, subscribe to, purchase, and vote not less than a majority of the capital stock of any such corporation or corporations and do all things necessary to protect the interests of the United States. The board, with the approval of the President, may sell all or any part of the stock in such corporation, but at no time shall it be a minority stockholder therein.

The section further provides that at the expiration of five years from the close of the present European war the operation of vessels on the part of any corporation organized by the board shall cease and the corporation be dissolved. The vessels and other property of such corporation shall revert to the board to be sold, leased, or chartered in the same manner and on the same terms as vessels constructed or purchased by the board, and the board shall dispose of property other than the vessels upon the best available terms and deposit the net proceeds in the Treasury to its credit.

Section 12 provides that vessels purchased, leased, or chartered from the board may be listed by the Secretary of the Navy as vessels of the naval auxiliary reserve; that officers and members of the crew of such listed vessels who volunteer for the purpose and are citizens of the United States or its insular possessions, may, under regulations prescribed by the Secretary of the Navy, be enrolled in various ranks and ratings corresponding to those of the United States Navy, not above the rank of lieutenant commander, as members of any naval reserve force established by law.

Section 13 provides that the board shall investigate the relative cost of building merchant vessels in the United States and in foreign maritime countries, and the relative cost, and so forth, of operating vessels under American and foreign registry, also recommend such amendments to our navigation laws and regulations as necessary or desirable for the development of our merchant marine, also investigate the legal status of mortgage loans on vessel property, with a view to improving the security of such loans and encouraging investment in American shipping. The board is required to report to Congress at the beginning of each session the results of its investigations, also submit a statement of all expenditures and receipts and operations of any corporation of the United States in which it is a stockholder and the names and compensation of all persons employed by the board.

Section 14 provides for the sale or use of Panama Canal bonds for the purpose of carrying out the provisions of sections 5 and 11 of the bill. The proceeds of such bonds and the net proceeds of all sales, charters, and leases of vessels and of stock made by the board, and all other moneys received by it from any source, shall be covered into the Treasury to the credit of the board, and permanently appropriated for the purpose of carrying out the provisions of sections 5 and 11 of the bill.

REGULATION OF CARRIERS BY WATER IN FOREIGN AND INTERSTATE COMMERCE OF THE UNITED STATES.

Sections 15 to 22 provide for the regulation of carriers by water.

Section 15 provides, first, that no common carrier by water shall pay or allow deferred rebates to shippers, and defines the term "deferred rebate"; second, forbids the use of fighting ships, and defines the term "fighting ship"; third, forbids retaliation against shippers who patronize other carriers, or complain of unfair treatment by refusing, or threatening to refuse, space accommodations when available, or by other unfair practices; fourth, make any unfair or unjustly discriminatory contract with any shipper based on the volume of freight, or unfairly treat or unjustly discriminate against any shipper in the matter of cargo space accommodations or other facilities, due regard being had for the proper loading of the vessel and the available tonnage, and loading and landing of freight in proper condition, or the adjustment and settlement of claims.

Section 16 requires common carriers by water, or other persons subject to the act, to file with the board a true copy, or, if oral, a true and complete memorandum, of agreements with other carriers or other persons subject to the act, or modification or cancellation thereof, to which they may be a party or conform in whole or in part, fixing or regulating transportation rates or fares, giving or receiving special rates, accommodations, or other special privileges or advantages; controlling, regulating, preventing, or destroying competition; pooling or apportioning earnings, losses, or traffic; allotting ports or restricting or otherwise regulating the number and character of sailings between ports; limiting or regulating in any way the volume or character of freight or passenger traffic to be carried; or in any manner providing for an exclusive, preferential, or cooperative working arrangement. The board is given the power to dissolve, disapprove, cancel, or modify any agreement or any modification or cancellation thereof, whether or not previously approved by it, that it finds to be unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters between the United States and foreign competitors, or to operate to the detriment of the commerce of the United States, and to approve all other agreements, modifications, or cancellations. Agreements existing at the time of the organization of the board shall be lawful until disapproved by the board. It is made unlawful to carry out any agreement or any portion thereof disapproved by the board. Agreements, modifications, or cancellations lawful under this organization of the board shall be lawful only when and as long as approved by the board. Before approval or disapproval it is made unlawful to carry out, in whole or in part, directly or indirectly, any such agreement, modification, or cancellation. Agreements, modifications, or cancellations lawful under this section are excepted from the provisions of the Sherman and other antitrust acts.

Section 17 makes it unlawful for any common carrier by water, or other person subject to the act, either alone or in conjunction with any other person, directly or indirectly, first, to make or give any undue or unreasonable preference or advantage to any particular person, locality, or description of traffic, or to subject any particular person, locality, or description of traffic to any undue or unreasonable prejudice or disadvantage; second, allow any person to obtain transportation for property at less than regular rates by means of false billing, false classification, false weighing, false report of weight or by any other unjust or unfair device or means; or third, to improperly influence any marine insurance company or underwriter, or agent thereof, not to give a competing carrier by water as favorable an insurance rate on vessel or cargo as granted to such carrier or other person subject to the act.

Section 18 applies to carriers by water in foreign commerce and provides that no such carrier shall demand, charge, or collect

any rate, fare, or charge which is unjustly discriminatory between shippers or ports, or unjustly prejudicial to exporters of the United States as compared with foreign competitors. It further provides that whenever the board finds any such rate, fare, or charge is demanded, charged, or collected, it may alter the same to the extent necessary to correct such unjust discrimination or prejudice and make an order that the carrier shall discontinue demanding, charging, or collecting any such unjustly discriminatory or prejudicial rate, fare, or charge. Whenever the board finds any such regulation or practice is unjust or unreasonable it may determine, prescribe, and order enforced a just and reasonable regulation or practice. Such carriers and other persons subject to the act shall establish, observe, and enforce just and reasonable regulations and practices relating to or connected with the receiving, handling, storing, or delivering of property.

Section 19 provides that every common carrier by water in interstate commerce shall establish, observe, and enforce just and reasonable rates, fares, charges, classifications, and tariffs, and just and reasonable regulations and practices relating thereto, and to the issuance, form, and substance of tickets, receipts, and bills of lading, the manner and method of presenting, marking, packing, and delivering property for transportation, the carrying of personal, sample, and excess baggage, the facilities for transportation, and all other matters relating to or connected with the receiving, handling, transporting, storing, or delivering of property. Every such carrier is required to file with the board and keep open to public inspection, in the form and manner and within the time prescribed by the board, the maximum rates, fares, and charges for or in connection with transportation between points on its own route, and if a through route has been established, the maximum rates, fares, and charges for or in connection with transportation between points on the route of any other carrier by water. It is made unlawful for any such carrier to demand, charge, or collect a greater compensation for such transportation than the rates, fares, and charges filed in compliance with the section, except by the approval of the board and under 10 days' public notice in the form and manner prescribed by the board. The board for good cause may waive such notice. Whenever the board finds that any rate, fare, charge, classification, tariff, regulation, or practice demanded, charged, collected, or observed by such carrier is unjust or unreasonable, it may determine, prescribe, and order enforced a just and reasonable maximum rate, fare, or charge or a just and reasonable classification, tariff, regulation, or practice.

Section 20 forbids common carriers by water in interstate commerce to reduce its rates on the carriage of any species of freight to or from competitive points below a fair and remunerative basis with the intent of driving out or otherwise injuring a competitive carrier by water, and in the event it does so, forbids such carrier to increase such rates unless, after hearing, the board finds such proposed increases rest upon changed conditions other than the elimination of such competition.

Section 21 makes it unlawful for a common carrier by water, or other person subject to this act, or any officer, receiver, trustee, lessee, agent, or employee of such carrier or person, or for any other person authorized by such carrier or person to receive information, to disclose to or permit to be acquired by any person other than the shipper or consignee, without the consent of such shipper or consignee, certain information which might be used to the detriment or prejudice of such shipper or consignee, or which may improperly disclose his business transactions, or might be used to the detriment or prejudice of a carrier, and so forth. This does not prohibit, however, the giving of such information in response to any legal process issued under the authority of a court of competent jurisdiction, or to any officer or agent of the Government, or of any State, and so forth, in the exercise of his powers, or any other person seeking such information for the prosecution of persons charged with or suspected of crime, or to any other carrier, or its duly authorized agent, for the purpose of adjusting mutual traffic accounts in the ordinary course of business of such carriers.

Section 22 provides that the board may require any common carrier by water, or other person subject to the act, or any officer, receiver, trustee, lessee, agent, or employee thereof, to file with it any periodical or special report of any account, record, rate, or charge, or any memorandum of any facts necessary for the information of the board in the administration of the act. It makes it a misdemeanor to willfully falsify, destroy, mutilate, or alter any such report, account, record, rate, charge, or memorandum, or willfully file a false report, account, record, rate, charge, or memorandum.

REMEDIAL PROVISIONS—SECTIONS 22 TO 34, INCLUSIVE.

While the part of the bill relating to the regulation of carriers by water differs necessarily and materially from the corresponding provisions of the interstate-commerce act, the difference is not so radical that the administration and enforcement provisions of the latter act and the nearly 30 years' experience of the Interstate Commerce Commission can not be adapted with slight modifications to the purposes of this bill.

Section 22, relating to the requiring of information, confers upon the board only a part of the power of the Interstate Commerce Commission under section 20 of the interstate-commerce act, by which the commission is empowered to prescribe a uniform system of accounts, as well as the form of all accounts, records, and memoranda to be kept by carriers subject to the act, and its examiners given access to such accounts for the purpose of inspection and examination. While it is well within the power of Congress to impose similar requirements upon carriers by water in interstate commerce, the committee deems it neither advisable or necessary, at least at this time, to make the provisions of this bill any more burdensome in this respect upon carriers by water in interstate commerce than those imposed upon similar carriers operating under foreign flags and engaged in the foreign commerce of the United States.

Sections 23 to 31 inclusive, modeled very closely after the interstate-commerce act, in brief and concise manner confer upon the board power to make orders necessary for the enforcement of the act, and provide the means for the enforcement of such orders.

Under section 23 any person may file with the board a sworn complaint setting forth any violation of the act. The board after due notice to the person complained of shall investigate the matter, and make such order as may be proper, including an award of reparation for any injury resulting from the violation. Similar powers are conferred upon the board to investigate and make orders upon its own initiative, except that awards of reparation may be made only upon complaint. Provision is also made in section 24 that orders relating to a violation may be made only after a full hearing. While this secures to a person alleged to have violated the act a full opportunity to be heard in his own defense, it at the same time leaves free from unnecessary restriction the action of the board in other matters.

The provisions of section 24 relating to the time during which orders of the board shall continue in effect are the same as those of the interstate-commerce act, but the provision of the latter act that orders shall not take effect for 30 days has been omitted, as the committee feels that this matter should properly be left to the discretion of the board.

The provisions of section 27 relating to the power of the board to compel the attendance of witnesses and the production of documentary and other evidence are also substantially similar to those of the interstate-commerce act, except that the board may exercise such power only "for the purpose of investigating alleged violations of this act" instead of "for the purposes of this act" as in the interstate-commerce act. Under this broad phrase in the latter act as construed by the Supreme Court (Harriman *v.* United States, 211 U. S., 407 [1908]), the power of the board is limited to investigations of violations. The provision that testimony may be taken under the direction of the board by any person authorized to administer oaths has been substituted for the lengthy but little-used provisions of the interstate-commerce act relating to depositions. Section 28 includes the essential provisions of the compulsory testimony act of February 11, 1903, and the immunity of witnesses act of June 30, 1906.

In sections 29 and 30, providing the means for the enforcement of orders of the board, the provisions as to jurisdiction of the district courts have been slightly changed because of the difference between rail and water traffic.

The somewhat lengthy provisions of the district court jurisdiction act of October 22, 1913, as to the venue and procedure in suits to enforce, suspend, or set aside orders of the Interstate Commerce Commission, are extended by section 31 to apply to orders of the board. In view of the ambiguous provision of that act as to venue, the section provides that such suits may also be maintained in any district court having jurisdiction of the parties.

Section 32 is a general penalty provision, corresponding to section 10 of the interstate-commerce act, and making any violation, except where a different penalty is specifically provided, a misdemeanor punishable by a fine of not more than $5,000.

Section 33 provides that this act shall not affect the jurisdiction of the Interstate Commerce Commission nor confer upon the board concurrent jurisdiction over any matter within the jurisdiction of the commission. Its purpose is to obviate a

conflict of jurisdiction if in some unforeseen manner any substantive provision of this bill inadvertently overlaps a corresponding provision of the interstate-commerce act. The last clause of this section—that the act shall not apply to intrastate commerce—corresponds to the similar provision of section 1 of the interstate-commerce act, both of which are rendered advisable in view of the decision of the Supreme Court in the first employers' liability cases, Two hundred and seventh United States, page 463 (1908).

Section 34 is merely a legislative declaration of the separableness of each provision of the act, so that in the very unlikely event of any provision being unconstitutional the remainder of the act would not be endangered thereby.

Mr. GREENE of Massachusetts. Mr. Chairman, this bill that we have under consideration is one of the most important bills ever presented for the consideration of the Sixty-fourth Congress. I have good authority for that statement, and I propose to quote you an extract from a speech made by a good Democrat, so that you can understand where my authority comes from. I am not supposed to be good authority on Democratic propositions, but I will give the authority of a good Democrat and that will tell the story.

On February 11, 1915, there appears in the CONGRESSIONAL RECORD a copy of an address delivered by the gentleman from Virginia [Mr. SAUNDERS] before the Chamber of Commerce of Boston, and after he delivered that address it was so satisfactory to some of the Democrats in this House that before I was able to obtain recognition from the Speaker to ask to have this address placed in the RECORD, one of the most prominent Democrats in this House asked to insert the address before referred to in the RECORD. This was not hasty action on the part of the gentleman from Virginia [Mr. SAUNDERS], but one that was very thoughtful, because he had long consideration before he decided to deliver that address at the Boston Chamber of Commerce, and he took the position in opposition to the shipping bill that was presented last year. And the gentleman who has just taken his seat [Mr. ALEXANDER], the chairman of the Committee on the Merchant Marine and Fisheries, defended the bill before the chamber of commerce. The gentleman from Virginia [Mr. SAUNDERS] also on the 22d day of February, 1915, put into the CONGRESSIONAL RECORD a speech 11½ pages long, in which he condemned the shipping bill (H. R. 18666), which was acted on in the House of Representatives last year, and I shall quote what he said, because I think when you quote good Democratic doctrine, where that doctrine condemns Democratic legislation, it is wise to let the people understand what a prominent Democratic Member of the House thought about the shipping bill last year and how he characterized it then and how he views a proposition which provides for a larger expenditure from the public Treasury under the bill reported out from the Committee on the Merchant Marine and Fisheries by the action of the Democratic members of the committee, and now being considered in the House of Representatives.

The gentleman from Virginia [Mr. SAUNDERS] used the following language in his speech placed in the CONGRESSIONAL RECORD December 22, 1915:

> Mr. Speaker, the pending Government shipping bill is the most momentous proposition that has confronted the Democratic members of this body collectively and individually, since the advent of the Democratic administration. During the past two years we have passed a number of important measures, notably the tariff and currency bills. But the Democrats were committed to these measures by the declarations of many platforms. Reforms in these directions were familiar articles of the Democratic faith, and were prominent among the issues upon which the successful campaign of 1912 was waged. But the pending bill, that is the compound Gore-Weeks bill, presents a new principle, one never contained in a Democratic platform, and in my judgment both politically and economically unsound and unwise. This bill proposes Government ownership and operation in a commercial enterprise that will bring the United States into immediate competition with its own citizens who may desire to enter the field of foreign trade on the high seas. This enterprise will require many initial millions to set it on its feet, and holds out no hope of profit from its conduct and operation.

I could not have stated the condemnation of the shipping bill more forcibly if I had tried. The following is the language of the gentleman from Virginia [Mr. SAUNDERS], who is the presiding officer of the Democratic caucus, in a further reference to said bill:

> No Democratic platform has declared in favor of Government ownership in this direction. Quite the contrary. Our last platform specifically indorses the "efficient supervision and rate regulation of railroad and express companies, and telegraph and telephone lines engaged *in interstate commerce*."
>
> Contrast this plank with the plank in the same platform relating to a merchant marine, a plank that later will be cited in full. This plank favors the development of a limited merchant marine between this country and South America, through the exercise of the Federal power of "constitutional regulation of commerce." Regulation is the word used in the two planks, and in the common acceptation, as well as legal intendment, its meaning is the same in both connections. If the exercise of our constitutional power of regulation means that the Government is to buy and operate, or lease and operate ships on the high seas, in a commercial venture, in a word, if regulation in this connection commits us to Government ownership to an unlimited extent in the field of foreign trade, then it will be an easy step in the argument to say that our platform relating to the regulation of railway and other companies, engaged in interstate traffic, commits us to the principle of Government ownership of railroads, express companies, telegraph and telephone lines, a contention that doubtless some one will make before the work of this Congress is concluded.
>
> This shipping bill has been hailed with delight by Debs, Berger, and other leading Socialists in the United States, and why not? It is a concession that their main contention is fundamentally sound. Enact this bill, and the Socialists, not the Democrats, will have occasion to rejoice. Its passage may be a victory for the forces behind this measure, but the fruits of that victory will attach to an opposing organization, since our indorsement of their main contention will give an impetus to the development of their propaganda that nothing else would afford to the same degree. The Socialist contention that Government ownership and Government operation should replace private ownership and private operation, has not found favor in the Democratic Party, at least not up to the present time. For one, I am opposed to it. I believe in individual initiative, individual enterprise, and individual property rights, that is individual ownership. Hence my opposition to the pending bill which provides for Government-owned and Government-operated ships in the field of foreign trade. The Democratic Party has always favored the development of a privately owned merchant marine. Our last platform calls for such a marine, and the legislation of August, 1914, was intended to lay the foundation on which privatae capital could build. The amount carried in this bill, great as it is, and capable of being applied to very great advantage in many directions of domestic utility, would buy a comparatively small fleet of merchant ships. Still they would be sufficient to chill the spirit of private initiative, and discourage and deter private capital from the effort to establish such a merchant marine as our platform contemplates.
>
> As a Democrat, I am further opposed to this measure, for the reason that it is in flat contravention of the following plank of the platform adopted at Baltimore:

And only think, gentlemen of the Democratic majority, you will soon be compelled to write a new Democratic platform. There have been so many planks knocked out that, gentlemen of the majority, you will be compelled to begin anew at the foundation and build up again. The platform upon which you gained your power to control the House and elected your President declares as follows:

> We believe in fostering, by constitutional regulation of commerce, the growth of a merchant marine which shall develop and strengthen the commercial ties that bind us to our sister Republics of the south, but without imposing additional burdens upon the people and without bounties or subsidies from the Public Treasury.

The gentleman from Virginia [Mr. SAUNDERS] in that speech said of this plank:

> This plank plainly restricts our legislative activities in this direction to the exercise of our constitutional power to regulate commerce. The limited marine to be developed in this fashion is to ply between this country and South America, and must be self-supporting, since we are neither to impose additional burdens upon the people nor to afford bounties or subsidies from the Public Treasury in furtherance of its development. There is no hint in the language used of a world-wide Government-owned and Government-operated marine. Subsidies and Government ownership are alike excluded from contemplation.

So that, gentlemen, you can see clearly you are traveling on very dangerous ground, according to Democratic authority.

Mr. SMITH of Michigan. Will the gentleman give the reference to that quotation?

Mr. GREENE of Massachusetts. Yes; I can. It is in the CONGRESSIONAL RECORD, volume 52, part 6, Appendix and Index, Sixty-third Congress, third session, page 469. And, furthermore——

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. GREENE of Massachusetts. Certainly.

Mr. MOORE of Pennsylvania. Has the gentleman time to incorporate the peroration of Mr. SAUNDERS in that speech, where he quotes President Wilson on the immigration bill and says he can not support the President in his policy of Government ownership?

Mr. GREENE of Massachusetts. Yes; I can.

Mr. MOORE of Pennsylvania. I will read it to you. Mr. SAUNDERS said:

> Mr. Speaker, I will never support this undemocratic policy of Government ownership until it is embodied in and made a part of our party platform. When President Wilson vetoed the immigration bill, which had passed both branches of Congress by immense majorities, he made the following explanation of his action in his veto message: Does this bill rest upon the conscious and universal assent and desire of the American people? I doubt it. It is because I doubt it that I make bold to dissent from it. I am willing to abide by the verdict, but not until it has been rendered. Let the platforms of parties speak out on this policy and the people pronounce their wish. The matter is too fundamental to be settled otherwise. I only want instructions from those whose fortunes, with ours and all men's, are involved. Mr. Speaker, I renew the query of the President in the present connection, and ask: Does this Government-ownership bill rest upon the universal assent and desire of the American people? I sincerely doubt it, but am ready to abide by their verdict. For the present the people have not spoken, and until their verdict is rendered I am constrained to stand on my party's platform

as it has been written. When I am instructed further and otherwise by the people of my district I will conform to those instructions and subordinate my personal opinion to the better judgment of the people, who constitute the fundamental authority in a free and popular government.

That statement of the President the gentleman from Virginia [Mr. SAUNDERS] cordially confirms.

Mr. GREENE of Massachusetts. Yes. Now, gentlemen, I want to call your attention to a situation which arose out of that investigation which took place some time before the advent of this Congress. I find by examining the prefatory note prefixed to the Report on Steamship Agreements and Affiliations in the American Foreign and Domestic Trade, prepared under the direction of the Committee on the Merchant Marine and Fisheries in the Sixty-third Congress, that it represents a summary of the data gathered by that committee in its investigation of steamship combinations under House resolution 425, introduced by Mr. HARDY, of Texas, on February 24, 1912, and resolution 587, introduced by Mr. ALEXANDER on June 18, 1912. Then it proceeds to tell of this investigation, but states that a joint resolution was originally introduced by Mr. HUMPHREY of Washington, providing for a joint committee of the House and Senate to investigate foreign shipping rings. Mr. HARDY subsequently introduced a joint resolution extending the inquiry embraced in the resolution of Mr. HUMPHREY.

Now, gentlemen, that is the basis of some subsequent action taken in the committee. Last year, when we had the shipping bill under consideration, we started out with the bill numbered H. R. 18518. I want to show you how we have progressed on shipping bills. We started out, as I say, with the bill numbered H. R. 18518, which was a bill "to authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation to be organized under the laws of the United States, or of a State thereof, or of the District of Columbia, to purchase, equip, and maintain vessels to operate in the foreign trade of the United States, and for other purposes." That bill comprises less than five pages—four pages and less than a third. That was issued on the 24th day of August, 1914, as a starter.

On the 4th day of September, 1914, a bill was introduced, which was referred to the Committee on the Merchant Marine and Fisheries, "To authorize the United States, acting through a shipping board, to subscribe to the capital stock of a corporation, to be organized under the laws of the United States, or a State thereof or of the District of Columbia, to purchase, construct, equip, maintain, and operate merchant vessels in the foreign trade of the United States, and for other purposes." That bill contained six pages and about one-quarter. That would seem to be a very fair kind of proposition, simple in preparation and not too extensive in language.

On the 6th of December, 1915, a bill—H. R. 450—was introduced, entitled "A bill to regulate carriers by water engaged in the foreign and interstate commerce of the United States." When that bill was introduced I received many complaints from my constituents in regard to the different propositions contained in it. After inquiries made of the chairman, he said, "That bill will be withdrawn. I do not propose to have any hearing on that bill." That bill—H. R. 450—contained 28 pages.

We then were confronted with the bill introduced on January 21, 1916—H. R. 10500—"to establish a United States shipping board for the purpose of developing and creating a naval auxiliary and a naval reserve and to promote the commerce of the United States, and for other purposes." That bill contained 16 pages.

Now, when we came to consider that bill and go through it very carefully, there were some objections made to two sections of it; and so, in order to make the bill lighter and easier, so that it would not be quite so expensive a burden upon American shipping, it was pared down and another bill was presented, which was labeled H. R. 14337, "To regulate carriers by water engaged in the foreign and interstate commerce of the United States," and that bill contained every feature that was in the bill H. R. 450 that had rested in the committee a few months and then was withdrawn because it was announced to the general public that it would not be considered at that Congress.

So that we have the bill H. R. 14337, which seems to be a scheme to punish the shipping interests of this country for taking out sections 9 and 10 of the bill H. R. 10500, and the committee consolidated with it the bill H. R. 14337. And so to-day we have the bill H. R. 15455, "to establish a United States shipping board for the purpose of encouraging, developing, and creating a naval auxiliary and naval reserve and a merchant marine to meet the requirements of the commerce of the United States with its Territories and possessions and with foreign countries; to regulate carriers by water engaged in the foreign and interstate commerce of the United States, and for other purposes," as the bill which contains all that has been thought out in response to our invitation to draft a bill in the interest of American shipping.

Mr. ALEXANDER. Mr. Chairman, will the gentleman yield?

Mr. GREENE of Massachusetts. I will yield for a question; not for a speech.

Mr. ALEXANDER. I just want to ask the gentleman if it is not a fact that the bill I introduced to carry out the recommendation of the committee was the bill H. R. 3728 in the last Congress, which was printed in full in Referendum No. 9 by the Chamber of Commerce of the United States and was submitted to the members of their constituent bodies in that referendum and that in the main the provisions of House bill 450 are identical with the provisions of that bill?

Mr. GREENE of Massachusetts. Not having had my attention called to it, I can not tell you.

Mr. ALEXANDER. I say they are.

Mr. GREENE of Massachusetts. Then I take the gentleman's word for it. Let the gentleman conclude his speech, but I will yield no further.

There is no trouble with me. I fight fairly. I have been a member of this committee nearly 18 years, and I have been a member of the committee ever since the present chairman was made chairman of the committee, and there have been but very few bills on which I came before this House in opposition to him. One of these was the shipping bill last year, and the other is the shipping bill this year. I have my reasons for not being in favor of this bill.

I challenged members of the committee when I was charged with being concerned with a trust and defending a trust on this committee—I challenge any man to bring his proof here on this floor if he can find any evidence whether in the committee or outside of it that I have been in any way connected with any shipping trust, any manufacturing trust, or any kind of a trust in any form whatever. I challenge any member of the committee to show that I have not been entirely independent in everything I have done, without regard to any inducement by anybody, either in this House or outside of it.

Mr. GORDON. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. GORDON. Is the gentleman in favor of subsidies?

Mr. GREENE of Massachusetts. Yes, sir; I am, but I am not in favor of Government ownership and paying $50,000,000 into a proposition that will not do anything but entangle the American shipping and deny them freedom of action and which provides no benefit except to the foreign ships.

Mr. BRITTEN. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. BRITTEN. Does the gentleman think that $50,000,000 is sufficient?

Mr. GREENE of Massachusetts. Fifty million dollars will be a mere flyspeck if the intention really is to provide a merchant marine to cope with the merchant marine of the nations of the world, but it means a sum of fifty millions coming out of the Treasury of the United States and absolutely nothing will be returned, and it will be proved so by the application of this bill. No other Government has ever experimented in providing such a vast sum to be expended as is provided in this bill, but it is $50,000,000 out of the hard-earned money of the people, and is $50,000,000 too much.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. GREENE of Massachusetts. Certainly.

Mr. MOORE of Pennsylvania. The American shipyards are about as fully employed now as they can be?

Mr. GREENE of Massachusetts. Yes.

Mr. MOORE of Pennsylvania. And can not take any more orders, as I understand it?

Mr. GREENE of Massachusetts. No.

Mr. MOORE of Pennsylvania. And so we will have to spend the $50,000,000 in foreign countries?

Mr. GREENE of Massachusetts. Yes; there is a provision in the bill that gives them that opportunity, and the minority tried very hard to take this feature out of the bill. Every Democrat voted to retain this feature.

Mr. MOORE of Pennsylvania. If they were to enforce the law immediately where would they spend the money?

Mr. GREENE of Massachusetts. I do not know. There will be a payment to these gentlemen for their salaries and expenses and everything else that goes with the bill, but that will come out of the Treasury of the United States beyond the $50,000,000.

Mr. MOORE of Pennsylvania. Well, that gives them a start, then they can deliberate for two or three years as to whether they will buy abroad or at home.

Mr. GREENE of Massachusetts. Yes; they have the right to buy abroad. We tried to take that proposition out of the bill

but were unsuccessful. They have the opportunity to buy here or elsewhere. Section 5 says:

That the board with the approval of the President, is authorized to have constructed and equipped in American shipyards and navy yards or elsewhere, giving preference, other things being equal, to domestic yards, etc.

That is to say, if you can find that they can build the vessels cheaper abroad, then you will construct your vessels abroad and take the money out of the Treasury of the United States and spend it to support foreign shipbuilders to build up foreign shipyards—do everything you can to help the foreigner. You propose in this bill to tie the hands of the American shipper and shipbuilder. During the hearing I asked several gentlemen who were engaged in the construction of and in the running of vessels in the foreign trade if this bill did not put a cable around the hands and arms and bind up the feet of every American shipper and shipowner, and they invariably answered that if it was enacted into law that would be the result. Now, we can not control the foreigner, although the bill provides for control; but there never was a bigger piece of humbug in a bill than the attempt to promote the building of a merchant marine under the provisions, restrictions, and regulations of this bill.

Mr. KAHN. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. KAHN. The Secretary of the Navy is one of the members of the board ex officio. Does the gentleman know that the Secretary of the Navy has been buying canned goods put up abroad, put up in foreign countries, for use of the sailors of the United States?

Mr. GREENE of Massachusetts. Oh, yes.

Mr. KAHN. Is the gentleman familiar with the law of April 28, 1904, under the terms of which the American ship must be given the preference in carrying coal and other commodities for the use of the Army and Navy from the Atlantic to the Pacific seaboard whenever the charges of the American vessel were not unreasonable, and does the gentleman recall that President Roosevelt and President Taft decided that under that law where American shipowners, by reason of the greater expense the American ship is under, asked not more than 50 per cent over the foreign shipowner that the American ship must be given the preference to comply with the law?

Mr. GREENE of Massachusetts. Yes.

Mr. KAHN. And that the Secretary of the Navy has set that aside?

Mr. GREENE of Massachusetts. Oh, does not the gentleman from California realize that there is a great distinction between a Republican administration and a Democratic administration?

Mr. GORDON. Yes; 50 per cent. [Laughter.]

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. LA FOLLETTE. And does the gentleman remember that during this administration the Secretary of the Navy bought materials for Old Glory abroad?

Mr. GREENE of Massachusetts. Yes; anything that can be bought cheaply is very attractive to the present administration. You will soon have everything made in Japan. We will not do any American business.

Mr. DAVIS of Texas rose.

Mr. GREENE of Massachusetts. Oh, what is the matter with my friend from Texas? [Laughter.]

Mr. DAVIS of Texas. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes; for a question.

Mr. DAVIS of Texas. I want to ask if the gentleman remembers that Pierpont Morgan, whom you made general manager of the United States, bought a lot of bonds abroad last spring?

Mr. GREENE of Massachusetts. Why, yes; he spends his money where he pleases, the same as you do. [Laughter.] I do not think we have any right to control his expenditures and investments any more than we have to control yours. There is a vast difference between the gentleman from Texas and Mr. Morgan spending their own money and the expenditure of the money of the people. Now, gentlemen, I have a few other matters to which I wish to refer.

Mr. EMERSON. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. EMERSON. I would like to call the gentleman's attention to section 11, which provides for a partnership between the United States and citizens of this country. Has the gentleman discussed that at all?

Mr. GREENE of Massachusetts. I have not, because there will be no partnership between any individual and the United States. No individual will go into partnership with the Government of the United States on these terms. The gentleman need not fear that they will get in. Here is a high set of men, from the President down, who send orders to people who will take them. I thank God that I never took any orders from the White House, neither under a Republican administration or a Democratic, and I do not take the orders from any live man to-day either Democrat or Republican.

Mr. MOORE of Pennsylvania. Will the gentleman yield?

Mr. GREENE of Massachusetts. Yes.

Mr. MOORE of Pennsylvania. So long as we provide $20,000,000 for a nitrate plant and $50,000,000 for the lower Mississippi and $15,000,000 for rural credits, does not the gentleman think we had better hurry up and pass this bill while we have $50,000,000 in the Treasury?

Mr. GREENE of Massachusetts. I am going to suggest this, that this bill proposes to use Panama Canal bonds which, fortunately for the country, we did not use to build the Panama Canal because we had the money in the Treasury; and, furthermore, had we used these bonds to build the Panama Canal and had left money instead of those bonds in the Treasury there would not have been anything in the Treasury to-day, for the money would have looked so alluring to the party in power that they would have evolved some scheme to have disposed of it. They are using the canal bonds because they are available assets which are readily in sight.

Mr. MOORE of Pennsylvania. Does the gentleman not understand that the nitrate plant is to be built with Panama Canal bonds?

Mr. GREENE of Massachusetts. Oh, yes; there is nothing else now available.

Mr. MOORE of Pennsylvania. Had we not better hurry up and pass this bill on that account?

Mr. GREENE of Massachusetts. Oh, yes. I want to call attention to this fact, that in section 15 there is a penalty of $25,000 attached to a violation of a single provision of this bill. Just think of that. A penalty of $25,000, and then they put in a penalty of $5,000 for violation of another provision. They say that they are not going to hamper the American shipping at all; that they are perfectly free to go as they please; but if a man is in command of an American ship in a foreign port and he gets a chance to do any business with anybody over there, he has first to say to himself, "Well, I will have to look up this law first to see what I can do." Of course, they say that the law will be liberally administered—that is, some members of the committee say that—but they are not going to be the men on that board.

The board is going to be made up of Lord knows whom. Woodrow Wilson nominates the board and we can not tell whom he will nominate. Of course, he is going to see to it that the parties are properly divided! He made one division with a man whom he did not succeed in getting confirmed in the Senate yesterday. He was a man without a party, but the President recognized him as belonging to our party, and so we do not know what is going to happen to us; but we do know that this bill from beginning to end is an infernal bill that ties up American shipping and leaves the foreign shipping free, because you can not get at it. Of course, if they could, if this Democratic Congress could only do what they would like to do, they would endeavor to control the world. They are worse than the Kaiser, but their power is limited as well as his is. [Laughter.]

Mr. GORDON. Mr. Chairman, will the gentleman yield?

Mr. GREENE of Massachusetts. Oh, no; I have no time to spare, and I must decline to yield. I have used all of the time that I care to use at present. I have got any quantity of material, and if somebody else does not use the time, I will.

Mr. EMERSON. Mr. Chairman, will the gentleman yield to me for one more question?

Mr. GREENE of Massachusetts. Yes.

Mr. EMERSON. Has the gentleman overlooked on page 5 that paragraph which says that the expenses of the board, and so forth—for traveling expenses outside of the city of Washington, wherever they may go—is to be approved by the chairman of the board?

Mr. GREENE of Massachusetts. Oh, yes.

Mr. ALEXANDER. Will the gentleman yield?

Mr. GREENE of Massachusetts. No; I will not yield. I reserve the remainder of my time.

Mr. ALEXANDER. That provision applies to all boards.

Mr. GREENE of Massachusetts. I reserve the remainder of my time.

Mr. ALEXANDER. Mr. Chairman, I yield 15 minutes to the gentleman from South Carolina [Mr. BYRNES].

Mr. BYRNES of South Carolina. Mr. Chairman and gentlemen of the House, I sympathize greatly with my friend from Massachusetts [Mr. GREENE].

Mr. GREENE of Massachusetts. Do not sympathize with me; I do not need any. [Laughter.]

Mr. BYRNES of South Carolina. I think my friend does, and I understand his grouch. Nobody ever charged him with being controlled by the trusts or anything else. We know that no one could control him. He can not even control himself. But for all of his life he has had one hobby, a hobby that was indicated by the question of the gentleman from Ohio when he asked if he was in favor of a subsidy, and the gentleman from Massachusetts almost jumped over the chairs in replying, "Yes; I am." The trouble is that some Republican on this Merchant Marine Committee backed the gentleman from Massachusetts up in a corner or somewhere else and had him write a minority report upon this bill that covers 13 pages and he never says one word about a subsidy. With the best chance that he has ever had in his life to come here and advocate a subsidy, some power we do not know of forced him, the ranking member on the minority side of this commitee, to write a report over his own signature in which he fails to advocate the payment by the Government of the United States of a subsidy to the Shipping Trust of America! How did you do it?

Mr. MOORE of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. Yes.

Mr. MOORE of Pennsylvania. Is not this bill a subsidy under another name?

Mr. BYRNES of South Carolina. I can show that it is not, but I want now to direct my remarks to the members of the committee, and then I will try and talk to the gentleman from Pennsylvania. Think of the nerve, the absolute nerve, of the gentleman from Massachusetts [Mr. GREENE] getting up here and attempting to talk about the inconsistency of the gentleman from Virginia in advocating this bill. I will not attempt to explain the conduct of the gentleman from Virginia, because he is well able to do it for himself, but I want to talk about the inconsistency and hypocrisy of gentlemen on the Republican side. Here is my good friend from Michigan [Mr. LOUD], who signed this minority report, charging that the regulatory provisions of the bill are embarrassing both to the shipowner and to the ship operator, and are absolutely destructive to American shipping, and, lo and behold, the gentleman from Michigan, immediately after signing that report, introduces into this House on May 8, a bill, H. R. 15565, with 36 sections, and 33 out of the 36 sections are taken bodily from the Alexander bill. [Laughter and applause on the Democratic side.] There is not a change, the dotting of an "i" or the crossing of a "t," with the exception of three sections. Every restriction, every regulative section is word for word as provided in the Alexander bill. Did he mean it when he said what he did in the minority report? If so, why did he introduce this bill on May 8? Was he sincere when he said the Alexander bill was destructive of American shipping? Was he hypnotized into signing a report that condemned his own bill?

But he is not the only man. Take the gentleman from Pennsylvania [Mr. EDMONDS]. I know of no man in this House who is better informed on the subject of the American merchant marine, and therefore what he says is certainly of interest to all students of the question. He signed this report, and what does he say? He says that Government ownership, even under this modified plan for a limited period, is a most dangerous thing. Did he believe that?

My friends, during this same Congress another bill was introduced into this House by the gentleman from Pennsylvania [Mr. EDMONDS] on December 7, and what did he propose in that bill? He proposed that the President of the United States be directed to build or acquire 20 steamships of not less than 8,000 tons each. To do what with them? To put them into commerce; to have them engage in shipping, but instead of intrusting them to the control of the shipping board he provided that they should be operated through the Panama Steamship Co. The only difference was that he intrusted it to the Panama Steamship Co. instead of the shipping board.

Mr. EDMONDS. Will the gentleman yield?

Mr. BYRNES of South Carolina. Yes; I will be glad to do so.

Mr. EDMONDS. And did not the bill say where they are to be operated also?

Mr. BYRNES of South Carolina. He even provided certain definite trade routes in which they should be used to Central America—Central America and the West Indies if it be deemed advisable, preference to be given to home ports in the establishment of these lines. He went so far as to give preference to certain ports, and there is no question—the gentleman from Pennsylvania will not deny it—that his bill provides for nothing but Government ownership and Government operation of steamship lines. He went further and provided that these Government owned and operated vessels could invade the sacred preserves of coastwise shipping and stop at ports on the Atlantic and Pacific while en route to a foreign port. Then how can you explain the report in which you condemn the operation and ownership by the Government? [Applause on the Democratic side.]

The convention will meet in Chicago very soon, and my good friend from Massachusetts says the Republican Party is going to be returned to power. Does he believe it? No. He does not believe it, and I will prove it to you. They say here that even this limitation of five years upon the Government operation is not satisfactory, because at the expiration of five years the limitation may be removed. Well, they say they are not in favor of Government ownership, and if they are going to be in power five years from now they would not remove the limitation. But they say they fear the limitation will be removed, so we must presume that in their hearts they believe we will be in power. [Laughter and applause.] My good friend overlooks the fact that from his own State there is a distinguished Senator, and when the Chicago convention meets I have no doubt all of them will be found voting for that distinguished Senator from Massachusetts [Mr. WEEKS] for the Republican nomination. Is he in favor of Government ownership? Why, in August of last year much time was consumed in the Senate in the discussion and consideration of his bill that provided not only for Government ownership, but went further and provided that the Secretary of the Navy should fix the rates at which commerce should be transported by these boats under Government ownership.

If Government ownership and operation under existing circumstances is populistic and dangerous, how are you Massachusetts Republicans going to conscientiously vote to nominate WEEKS at Chicago?

And there is the distinguished Senator from New Hampshire, the Republican leader in the Senate, Senator GALLINGER, who had this to say of the Weeks bill:

> This proposition takes some of the few auxiliary ships we have and puts them into commercial work, and if they can be called back to the Navy when they are needed no substantial harm, as I see it, will be done.

That is what we propose to do, to put them in commerce, and we provide specifically that whenever war is threatened the President of the United States shall have the right to immediately draft these vessels, and thereafter a board of arbitration shall settle the price at which they shall be paid for.

The Senator from Mississippi [Mr. WILLIAMS] was opposing the policy of placing a limit upon the operation of Government ships and offered an amendment limiting the operation of ships by the Government to the period the war should continue. To this Senator WEEKS, candidate for the Republican nomination, said:

> The Senator will note from a reading of the bill that whether or not these lines are established and maintained is entirely in the hands of the Secretary of the Navy. If other means of transportation are furnished by private capital, these ships can be withdrawn at any time, but I think it would be inadvisable to enter upon this enterprise for the comparatively brief time which may ensue between now and the termination of the European war. I hope the Senator will not press the amendment which he has suggested, making the application of the bill temporary.

And again:

> But the purpose of the bill is not temporary. The purpose of the bill is to establish, until private capital undertakes to do so, a line of steamers to South America.

Now, the gentleman from Massachusetts opposes the provisions of this bill which would allow the shipping board to purchase or construct elsewhere, with the limitation that preference should be given to American shipyards. I want to commend to the gentleman another distinguished gentleman, a candidate for the Republican nomination for the Presidency; a man who certainly knows a good deal about this question. I refer to ex-Senator Burton of Ohio, and I want to read what he had to say in the Sixtieth Congress. Mr. Burton said:

> I would not disparage the importance of the shipbuilding industry. Let them have the exclusive right to build boats to ply upon the lakes. Let them have the exclusive right to build boats to ply between New York and Savannah or New York and Galveston. But if we desire to carry our goods or our mails abroad in boats which have the American flag at their mastheads we must fall in line with every other country and allow the purchase of ships anywhere where they can be obtained. * * * Right here I desire to state that while I favor restricting boats engaged in domestic or coastwise trade to those of American construction, I do not believe we can ever expect to attain to even a fraction of the prominence of former days without doing away with that regulation. This regulation dates from the very earliest history of the Republic.

He further said:

> No ship can carry the American flag and engage in either foreign or coastwise trade unless it is built in American shipyards, a law which has been abandoned by practically every other country in Europe or in the civilized world.

Mr. EMERSON. Did Senator Burton in speaking on this subject say he favored Government purchase and operation?

Mr. BYRNES of South Carolina. That is another question entirely. But the minority members of this committee, like the gentleman from Massachusetts [Mr. GREENE] a moment ago, opposed the provision in the bill which provides that ships can be built in American yards or elsewhere, preference being given to American shipyards, and the distinguished Senator from Ohio, Mr. Burton, said that the American flag would never fly from the masthead of American ships until we did what the Alexander bill seeks to do.

Mr. GREENE of Massachusetts. Did I not say that I asked to have stricken out the words "or elsewhere"?

Mr. BYRNES of South Carolina. And I tell you that when you did that you were directly in conflict with the opinion of the distinguished Senator from Ohio.

Mr. GREENE of Massachusetts. It does not make any difference whether I am in conflict with anybody else or not. You charge me with offering to take away the building of American ships from American shipyards and navy yards.

Mr. BYRNES of South Carolina. Nobody would ever charge you with that as long as you live. You will always be found trying to prevent that which Senator Burton said is the only way to have the flag at the masthead of American ships.

Mr. GREENE of Massachusetts. Senator Burton has as good a right to his opinion as I have to mine.

Mr. BYRNES of South Carolina. The real truth is that every last one of you is in favor of a subsidy and every last one of you was afraid to say so, because you know that at this time every steamship company is making such excessive profits that even if in the past years this Congress had enacted a subsidy law the ship owners to-day would be ashamed to take the money.

Mr. LOUD. Was not Senator Burton alone in that view on this side of the House?

Mr. BYRNES of South Carolina. When a man is right he is always alone on that side of the House. [Laughter.]

This bill provides a dual purpose. It serves preparedness in war and in peace. It serves preparedness in war, because, according to Admiral Benson, if we commandeered all American ships available as naval auxiliaries we would still lack 500,000 tonnage. To do what? To take care of the ships of the American Navy when at sea. A navy at sea without auxiliaries is as helpless as an army on a battlefield without guns and without ammunition. You clamor for preparedness, and yet you are willing to send a navy to sea without the necessary auxiliaries to supply the fleet.

Mr. COOPER of Ohio. Is it not a fact that in every country where they have been successful in building up a merchant marine it has been done by subsidy?

Mr. BYRNES of South Carolina. No; it is not a fact.

Mr. ALEXANDER. The greatest line in the world—the Hamburg-American Steamship Co.—was built up without subsidy in any form.

Mr. BYRNES of South Carolina. In the Committee on the Merchant Marine and Fisheries, in the consideration of this bill, that question, so far as I am concerned, was settled beyond dispute, and I care not whether the gentleman thinks so, or some of the other gentlemen who remain in their seats and say so, the facts show it is not true, and I defy any man to prove it.

Mr. KAHN. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of South Carolina. I yield.

Mr. KAHN. The gentleman from Missouri [Mr. ALEXANDER] just stated that the Hamburg-American line was not built up by subsidy.

Mr. ALEXANDER. I did.

Mr. KAHN. Is it not a fact that Germany, owning its State railroads, gives a special rate to the goods manufactured in Germany, so that the steamship lines can get a preference in carrying the goods?

Mr. BYRNES of South Carolina. I will answer the gentleman.

Mr. KAHN. And it is equivalent to an enormous subsidy.

Mr. BYRNES of South Carolina. The gentleman has asked me a question, and I will say that that statement has been made in the committee several times, but never authoritatively, and even if it was, it is not such a subsidy as you gentlemen want but have not the nerve to ask for now.

Mr. KAHN. It is a subsidy, nevertheless.

Mr. BYRNES of South Carolina. The gentleman is one of the big-Army and big-Navy men. He contends that we should enact the largest naval bill in the history of the American Congress, and we are going to do it; but when we do it, are we going to send them to sea without sufficient auxiliaries. You want battleships, but when it comes to building auxiliaries to supply them you oppose it, because you fear the auxiliaries may be used in commerce and injure the Shipping Trust.

I wonder how the gentleman from Illinois [Mr. BRITTEN] is going to vote. Is he going to deny, by voting against this bill, the 500,000 tonnage that the Secretary of the Navy says is absolutely necessary to supply American ships?

Mr. BRITTEN. I wish to say to the gentleman that you will not get a big Navy without Republican votes.

Mr. BYRNES of South Carolina. We certainly will not get those votes if it conflicts with the Shipping Trust. [Applause on the Democratic side.]

This bill will furnish the tonnage which the experts of the Navy Department claim is essential to the effectiveness of the American Navy. The ships will be constructed with a view to their use as naval auxiliaries. Now, in time of peace what shall we do with them? Shall we allow them to remain tied up at wharves, when the farmers and manufacturers of America are clamoring for ships to transport their products to market? You gentlemen know that the absence of shipping has caused the railroads to place an embargo upon the shipment of freight to Atlantic ports for export. As early as December, 1915, the railroads reported that 45,000 cars were tied up in the vicinity of New York. The conditions to-day are even worse than those prevailing in the fall of 1915.

The minority report states that even if this bill be enacted into law we can not hope to finish the construction of any ships within two years. I believe this statement is made not with regret but with delight. Had the Republican Party not defeated the ship-purchase bill in the last Congress by filibustering in the Senate, in March, 1915, we would to-day have in operation ships purchased under the provisions of that bill. They would to-day be worth 100 per cent more than they were worth in March, 1915, and the saving to the shippers in freight rates during the past year would have been sufficient to pay for the ships. I want to know what these Republicans from the grain-growing States are going to do about this bill. Before the war you could ship a bushel of grain from New York to Liverpool for 5 cents per bushel. March 1, 1915, the rate had increased to 24 cents per bushel. On that day the Republicans of the Senate by their filibustering defeated the administration bill, and since that time the rates on grain have increased until, March 1, 1916, it cost the farmers of the West 50 cents per bushel to ship their grain from New York to Liverpool. Those who aided in the defeat of that bill may have been true to the shipping interests, but they were certainly disloyal to the agricultural interests of this country, and I believe the farmers are smart enough to realize it.

As long as the European war continues there is absolutely no chance for any improvement in shipping conditions. The shortage of vessels is due to the elimination of the merchant marine of Germany and Austria-Hungary, to the withdrawal of ships for military and naval purposes of the allies, to the loss through submarine activities, and to the fact that the shipyards of Europe are to-day engaged in constructing vessels for naval and military purposes, and, therefore, the world is not receiving the normal increase of shipping. Even after the war shall end it will be some time before the shipyards of Europe can place upon the seas the number of vessels they were turning out annually before the war. In view of this situation, when we know that the absence of shipping last year increased the freight rates to such an extent as to cost the manufacturers and farmers of America $300,000,000 a year, shall we sit idly by and declare our inability to protect the interests of America?

In addition to the increased ocean freight rates, many shippers were unable to secure ships to transport their products, and as a consequence their business has been almost ruined. Many manufacturers have reported to the Merchant and Marine Committee their inability to bid for business in South America because they were not able to lease, charter, or buy ships to transport the products of their factories to the prospective markets. Take lumber and the manufactures of wood. In 1914 our exports were, in round numbers, $99,000,000. In 1915 the exports were only $48,000,000—a decline of $51,000,000. And our coal exports declined $4,000,000 in 1915, in the face of the greatest demand in our history for coal for foreign consumption.

In 1915 we exported manufactured products, other than farm products, to the amount of $843,699,562. The rates have been increased on manufactured cotton goods as well as other manufactured products. Every sane workingman realizes that as our manufacturers are put in position to compete in the open markets of the world, labor will be more regularly employed and at higher wages.

How does the question of a merchant marine affect the farmer? I have already referred to the increase in the rate on

grain. Even a greater increase has been made in the rate on cotton. In July, 1914, the ocean freight rate on cotton from New York to Liverpool was $1 per bale; to Copenhagen, $2; to Rotterdam, $1.25; to Havre, $1.05. On March 11, 1916, the rate from New York to Liverpool was $13.35 per bale; Copenhagen, $15; Rotterdam, $15; and to Havre, France, $15. It is also true that the rate from New Orleans and other southern ports has been higher than the rate from New York. In March, 1915, when the Republicans were endeavoring to defeat the ship bill it was predicted by some persons that there would be some relief from the outrageous rates, but instead of decreasing they have continued to steadily increase until to-day they are higher than they have been since the commencement of the war. The cotton farmer can realize the effect this increased rate has upon the price he receives for his cotton. Men debate the question as to where the price of cotton is determined, here or Liverpool.

If in Liverpool, then admittedly the burden of the increased rate falls upon the producer. No sane farmer will ever believe that he is not caused to bear a part if not all of this freight-rate burden, and all men must agree that when the rate of $15 per bale is added to the price of the commodity, together with the premium for war-risk insurance and increased premiums for marine insurance, the price to the purchaser is so materially increased as to lessen the purchasing power of the consumer and thus lessen the demand for cotton, resulting in lessening the price received by the farmer. During the year ending June 30, 1915, there were exported 8,807,157 bales of cotton of 500 pounds each, valued at $376,217,972. As the increased freight rate averaged about $12 per bale, it is readily seen that the absence of a merchant marine cost the cotton farmers during a single year $100,000,000.

The importance of this question is realized by the farmers of the country. When the war started, and for a month or two, all shipping was paralyzed, our cotton was piling up in the fields and in the warehouses, and as there was no way of shipping it to our markets in Europe, the price rapidly declined to 5 or 6 cents a pound. The spindles in America can not consume much more than a third of the crop, and whenever we are unable to transport our surplus abroad the price will be so low that it will not cover the cost of picking. Often during the last 12 months there have been fluctuations due, according to the market reports, to reported increases in freight rates. But we are in the helpless position of depending upon the merchant marine of Great Britain to transport our cotton to her mills. In this connection I wish to call attention to the press report quoting Admiral Beresford as commenting upon the depletion in the tonnage of British ships for commercial purposes, and Earl Curzon stating in reply:

> The Government is now administering the whole British mercantile marine, amounting to half the gross tonnage of the world. Forty-three per cent of the British tonnage has been requisitioned for naval and military purposes, 14 per cent is occupied in carrying foodstuffs and raw material in behalf of the Government and its allies, and the remaining 43 per cent is being operated by British shipowners under State regulations.

This statement shows what has become of the vessels upon which we have in the past depended for the transportation of our products. The extent of this Government control can be ascertained from an article in the London Economist on November 1, 1915, in which it is stated:

> In future the Government may requisition for the carriage of grain and other merchandise any ship registered in the United Kingdom, and after December 1 no British ship of over 500 tons may carry cargo from one foreign port to another without first obtaining a license from a committee in London. All British shipping is liable to be requisitioned for commercial purposes. All trade in British bottoms between foreign ports is to be under direct Government control.

This means simply that if it be more imperative for the Government to have munitions of war, the ships can not be used for the transportation of grain or cotton. Are we content to have this condition continue? If two grocers are competing for trade in a town and one has a delivery service and the other has none, but depends upon the delivery service of his competitor to take his groceries to customers, how long will he be able to remain in business? If a farmer has no wagon to transport his products to market, but relies upon hiring wagons from his neighbors, does he not know that he can hire those wagons only when it is not to the best interest of the owners to use them for their own business? Do not the business men of America know that the merchant marine of Great Britain will give to British shippers every possible advantage over their American competitors? If a merchant of America and a merchant of Great Britain bid for a contract in South America requiring delivery on specified dates, is it not reasonable to expect the merchant marine of Great Britain to favor their own shippers in guaranteeing bottoms to insure delivery under the contract?

Our opponents claim that it will be impossible to secure any ships under this bill before the war ends. Well, I do not believe any man can predict when the war will end. But if their contention is true, it is still of vital importance that we now proceed to build a merchant marine so that a similar emergency in the future will not find us in a similarly helpless condition.

We had one sad experience during the War with Spain when we wished to send our fleet to sea and found we had no ships to supply the fleet. We went into the market, and as we had to have them immediately the result was that we purchased ships that have ever since been referred to as "junk." Outside of the amounts paid for Army transports, we spent $18,000,000 for naval auxiliaries. After the war seven of the vessels purchased for $1,736,922 were sold for $353,785.04—a loss to the people of $1,383,136.96. The loss on the rest of the vessels was almost as great and the whole transaction a serious reflection upon the business capacity of the American Government.

One advantage of our embarking upon the building of a merchant marine at this time is that we will be able to build modern ships with which the ships of other nations now in existence will be unable to compete. Modern vessels using the Diesel engines, burning oil instead of coal, have such increased cargo space and can be manned with such smaller crews that it has been demonstrated that the saving thus effected will more than offset the increased expense of operating under the American flag, paying higher wages and furnishing better food and better quarters to our seamen.

I do not believe it will ever be necessary for the Government to operate ships under this bill. Because of the low rate of interest the Government can secure for the capital invested, they will be able to sell or lease the ships they build at prices that will attract persons interested in the shipping business. In addition, vessels purchased or leased under this bill will be included in the naval auxiliary, and American seamen upon these boats be enlisted in the Naval Reserve. The plan agreed upon by our committee will be included in the naval appropriation bill authorizing the payment to American seamen of some small amount each month as long as they are in the Naval Reserve. This will induce the American boys to return to the sea and will insure us in case of possible foreign aggression that we will have a naval auxiliary manned by American citizens to assist our fleet in protecting our shores against any invasion.

The regulatory features of the bill are agreed to by all fair-minded men. They seek simply to enable an independent shipowner to carry on his business without having the shipping trust drive him out by discriminatory and unfair practices. Does any man object to that? The London Stock Exchange Book shows the outrageous profits of the shipowners of Great Britain during the years preceding the war, and since that time we can imagine the profits they have made. Is there any good reason why established steamship lines doing business in our ports should not be regulated?

I believe this the most vital question pending in this Congress at this time, and the Democratic members of the subcommittee that framed this bill believe that it offers an opportunity for all Democrats to get together and do what the Republicans failed to do during their sixteen years' control of the Government—provide an American merchant marine that in time of war will insure protection and in time of peace will insure prosperity.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. ROWE].

Mr. ROWE. Mr. Chairman, in order to obtain a clear view of our present situation it is necessary for us to consider briefly the history of shipping in this country. You all know of the wonderful success attained by the Colonies in this line and how, prior to 1775, they not only were able to hold their own but were competitors of the great mercantile nations of the world, and were building ships not only for themselves but for Great Britain and other maritime nations. The Revolution between Great Britain and the United States destroyed all this, and the period which followed the war, known by many as the "dark period" in American history, brought our shipping to its lowest ebb. In 1789 we carried but 23.6 per cent of the export and import trade of the Nation. The very first act of the Congress of the United States under the new Constitution, which passed July 4, 1789, allowed a discount of 10 per cent of the tariff duties on all goods imported in ships built and owned by American citizens. Under the impetus given by this act our commerce increased fourfold in seven years, and by 1796 we were carrying 92 per cent of the exports and imports of the United States, beside doing a considerable trade for other nations.

We held this position as a maritime Nation until the War of 1812; during the second year of that war we handled only 54.5 per cent of our commerce. After the war, at the suggestion of Great Britain, we entered into a reciprocity agreement,

by which our Nation agreed to drop preferential duties in direct trade with the United Kingdom on condition that England was to do the same thing. From the close of the War of 1812 until the year 1834 we held our own in the trade of the world, with slight variations. In the latter year England began the policy of subsidizing its shipping by the payment of $85,000 to one company and $150,000 to another. In 1838 she paid $425,000 to Samuel Cunard for establishment of a line between Liverpool and Boston, which was subsequently increased to $850,000, and in a few years England was paying between three and four million dollars annually for subsidies. Immediately thereafter our trade began to fall rapidly, so that in 1847 we carried but 70.9 per cent of our own commerce. The ship subsidies granted by Great Britain had enormously increased her foreign trade and had opened up for her many new lines of commerce.

In 1845, by a Democratic Congress under the impetus of a Democratic President, the first ocean mail subsidy law was enacted, and under this law an American steamship service was established between the United States and the West Indies. In 1847 a similar act established a trans-Atlantic steamship line on payment of $385,000 a year, and was thereafter increased to $856,000 per annum. The immediate effect of the establishment of this line was the reduction of cost from £7 10s. to £4 per ton between the United States and England, and our tonnage was increased more than 50 per cent in the next five years, and in the five years following increased more than 63 per cent, or from 904,476 tons in 1845 to 2,348,358 tons in 1855.

It has been erroneously stated that the United States lost its commerce because it could not build ocean steamships, and especially because we did not understand and could not construct steel vessels. As is well known, Fulton built the first practical steamboat and Ericsson built the first screw propeller seagoing vessel. In 1855 there were many yards building steamboats for *coastwise navigation*, and some of these were iron steamboats, built at plants in New York and Philadelphia. We had plenty of iron of the best quality, and our mechanics, then as now, were the equal of any in the world. The real causes of the decline of American shipping were three:

First. In 1856 the slavery question was constantly before our people and the relations between the North and the South were becoming more and more strained each day; the northern people were the owners of the great ship lines that covered the seas, and the act which had been passed by the Democratic Party in 1845 had brought wealth and power to the North. The same party which had passed this subsidy but 11 years before, now under control of its representatives from the South, reduced the mail subsidy paid the Collins Line from $858,000 to $385,000; but the British Cunard Line continued to receive $856,000 per annum, and while the Collins Line continued the struggle for a few years it was finally forced out.

Second. About the same time France and Germany subsidized lines running to this country.

Third. Civil war broke out between the States and our foreign commerce, which had been so promising in the spring of 1856, was driven from the seas and has not up to the present time been reestablished.

For a period of more than 50 years, beginning shortly after the establishment of the Federal Government and extending to 1842, we carried each year under the United States flag between 80 and 92 per cent of our commerce, while in 1914 we carried out 8.6 per cent.

There is not a man in this House, nor, indeed, a citizen within the borders of the United States, who would not like to see our merchant marine reestablished on the high seas. We are all aiming to accomplish the same thing, and we only differ in method. I had hoped, as a member of the Committee on Merchant Marine, that we might be able, forgetting partisanship, laying aside as far as possible previous prejudices, to unite and present to this Congress a measure that men of all parties might support, that would ultimately reestablish our merchant marine; but we have failed to agree, and the majority members of the committee have reported the bill now before the House.

Since the Civil War we have never recovered. We are now carrying less than ever before, or, rather, we were at the beginning of the present war in Europe. In 1914, for instance, just before the war, we carried but 8.6 per cent of foreign and domestic commerce. There is not, as I say, a man in this House to-day who would not like to live to see the day when the United States shall again be a great maritime Nation. I hope we shall all live to witness the day when again 90 or 92 per cent of the exports and imports of the United States shall be carried under the American flag. [Applause on the Republican side.]

Mr. DENISON. Mr. Chairman, will the gentleman yield?

Mr. ROWE. Certainly.

Mr. DENISON. The gentleman seems to have made a study of the policy of England upon this subject of a subsidy. Does it happen that the gentleman has studied the policy of the German Empire, so that he can tell us what their policy has been, whether they have subsidized the Hamburg-American Line in one form or another?

Mr. ROWE. Yes. The Hamburg-American Line and all other German lines carrying freight receive a preferential in the form of a much less rate on goods sent to the seaboard from any interior city of Germany, so that in shipping their goods through the German railroads, being owned by the German Government, they allow a very large discount on the freight.

Mr. SLOAN. Mr. Chairman, will the gentleman yield at that point?

Mr. ROWE. Certainly.

Mr. SLOAN. Can the gentleman give us approximately what that preference amounts to per year to this great line, the Hamburg-American Line, which the gentleman has just spoken of?

Mr. ROWE. I can not give you an estimate. It would make a large subsidy.

Mr. SLOAN. In fact, a larger subsidy than has ever been contemplated by America to give to any American line or proposed line?

Mr. ROWE. I am not sure about that, but I think it is as large.

Mr. SLOAN. I am not a member of the committee. Does this bill before us now contemplate a traffic between this country and southern countries, or between this country and European countries?

Mr. ROWE. The present method would permit the use of ships built under this bill in any foreign commerce.

Mr. SLOAN. I know; but is it contemplated largely for South American commerce, or for world commerce generally?

Mr. ROWE. Some members of the committee have said South American commerce. Now, some of these questions will come up in my further discussion, and I shall be glad to answer questions later.

Now, as to this particular bill I thought the chairman would outline the bill a little more fully than he did.

This bill provides for the creation of a shipping board, whose duties shall be, first, to investigate the cost of construction of ships in American and in foreign yards and also the cost of operation under United States registry and under registry of foreign nations. Second, to regulate shipping, not only that operating under the United States flag but that also under flags of other nations, in so far as it in any way affects American shipping. To put out of commission as far as possible "fighting ships" and to destroy the rebate system. Third, to spend $50,000,000 in the construction of merchant vessels suitable, as far as possible, for the use of the Navy and Army for auxiliaries and transports. Fourth, to sell, charter, or lease said ships. Fifth, to operate through a company or companies any ships under the control of the board which have not been sold, chartered, or leased, with the understanding that the company thus operating under the Government, and with the Government owning not less than 51 per cent of the stock, shall, within five years after the European war is over, discontinue its business and sell or lease the vessels.

I believe in a shipping board. I believe it should have power to investigate the cost of construction of ships here and abroad. I believe in regulation of shipping, in putting out of commission "fighting ships," and breaking up of the rebate system; but I feel that the very stringent regulation of shipping provided in this bill will drive many companies now operating under the United States flag to foreign registry. I believe an investment of $50,000,000, which would build only about 50 vessels of the type desired, is too small to aid in solving the present maritime difficulties, but is large enough to cause men and corporations now investing hundreds of millions of dollars in the shipping trade to withdraw their capital from that business, believing, as many people do, that the Government is making a beginning of what will become a policy in the future. The plan of investing this amount of money in vessels for sale or to lease is bad enough, but the proposition to operate these vessels or any portion of them by the Government or through a Government corporation is infinitely worse.

Mr. SAUNDERS. Will the gentleman yield?

Mr. ROWE. Yes.

Mr. SAUNDERS. Gentlemen who have spoken on that side have approved very highly of various portions of the bill, but for the purpose of directing debate to the defective portions I will ask the gentleman to indicate those regulations that he regards as oppressive and objectionable.

Mr. ROWE. I can not do that now, but under the five-minute rule, as we reach those portions of the bill, I probably will have something to say as to the objectionable features of the bill.

Mr. HUMPHREY of Washington. If the gentleman would read the speech of the gentleman from Virginia [Mr. SAUNDERS], which is printed in the RECORD, he will find a good many of the objectionable features of the bill.

Mr. SAUNDERS. Then the gentleman from Washington can take the bill and point out the objectionable features.

Mr. HUMPHREY of Washington. I can do it by reading the gentleman's speech.

Mr. SAUNDERS. Well, read the speech; I will stand by that speech.

Mr. ROWE. I can not allow the gentleman to do it in my time.

The United States Chamber of Commerce, which is a central organization and is composed of delegates from commercial bodies in all parts of the United States, in July, 1915, had a referendum vote taken by sending questions to the separate organizations over the country and requesting them to give their answers to the following:

1. Do you favor the Government undertaking the purchase, construction, or charter of vessels for mercantile purposes, together with the operation of such vessels?

Eighty-nine votes in favor; 690 votes opposed.

2. Do you favor ownership of merchant vessels by the Government, but with operation by private parties under lease?

Fifty-one votes in favor; 713 votes opposed.

After learning of this vote, I sent a personal letter to the enrolled voters in my congressional district, requesting them to give me their opinions in reference to a merchant marine. I did not give them my ideas or the ideas of anyone else. I received some 7,000 replies, of which more than 90 per cent were opposed to Government ownership or Government operation. A very large percentage expressed the desire for a merchant marine, and said they believed the time had come when the Government should provide a subsidy sufficient to enable individuals to operate under the United States flag.

Mr. GREENE of Massachusetts. Will the gentleman yield?

Mr. ROWE. Yes.

Mr. GREENE of Massachusetts. Did the gentleman get a vote of the New York Chamber of Commerce on that proposition?

Mr. ROWE. I have it here; the New York Chamber of Commerce, which is entirely different from the National Chamber of Commerce and not a member of it, voted 290 against the bill of last year and 4 in favor of it, and, as is well known, that organization in New York City is very largely composed of Democrats.

When this proposal came up last year there was some excuse and a strong argument might have been made for Government ships, on the ground that the people would not provide them and there was extreme need of more ships to carry the commerce of the United States; since that time conditions have changed, the price of tonnage has trebled, and there are no ships to be purchased; every shipbuilding yard has contracted for all the ships it can construct within the next two years. On July 1, 1915, there were building in American shipyards 76 vessels, and there were building April 1, 1916, just nine months later, 360 vessels, and the tonnage under construction had increased during that time from 310,089 tons to 1,067,856 tons.

Mr. SLOAN. Mr. Chairman, will the gentleman yield?

Mr. ROWE. Yes.

Mr. SLOAN. Has the gentleman any information as to whether or not these ships being built are for American use—that is, for the use of American shipping concerns largely or for foreign shipping concerns?

Mr. ROWE. They are being built, and that is all we know. In some cases they are for American companies, but there is nothing to hinder the sale of them at any time, and if this bill becomes a law many will never sail under our flag but will go under foreign registry.

Mr. TILSON. In the gentleman's opinion what will be the effect if this bill should pass—that more of them would be inclined to take foreign registry?

Mr. ROWE. Mr. Chairman, there is no other nation in the world that restricts its shipping in the manner proposed in this bill, and the restrictions will be sure to apply to our own shipping, and they will be almost certain not to apply to foreign ships. The man who builds a ship and floats it under the American flag with such an act as this will be more foolish than I believe the shipbuilders of this country are.

The United States Government can not purchase vessels at any price that we would be willing to pay for them. It can not construct vessels and have them completed in less than two and a half years. Before that time has arrived the European war will probably be over, and there will be released immediately on conclusion of peace the immense fleet of German vessels now interned in neutral harbors; a large number of vessels owned by England, France, and Italy, and now used as army transports and naval auxiliaries, and a large number of vessels now being constructed in the shipyards of neutral nations will be available, and the world will be supplied as never before with tonnage.

Another provision of this bill, which any man with red blood in his veins should protest against, is the authority given the shipping board to purchase or have built ships abroad. In other words, the money of the people may be spent not to develop our own shipyards and furnish employment to our own mechanics but for the benefit of our competitor and the labor of a foreign nation. [Applause on Republican side.]

Mr. SAUNDERS. Mr. Chairman, I yield 15 minutes to the gentleman from Wisconsin [Mr. BURKE].

Mr. BURKE. Mr. Chairman, the bill under consideration is generally known as the shipping bill. In the last session of the previous Congress the House had before it for consideration a measure known as the ship-purchase bill, which passed the House by 94 majority, but it was defeated in the Senate by reason of a Republican filibuster.

A large part of the public press as well as a large portion of men in public life assume that the ship-purchase bill which passed this House two years ago and the pending bill are similar. Anyone who has taken the pains to compare the two bills will easily discover that they are almost entirely different. The previous bill referred to was in a strict and proper sense a ship-purchase bill—that is, a bill the principal purpose of which was the purchase and operation of ships in the merchant-marine transportation by the Government. That object is entirely absent from the present bill, excepting as an incidental feature of it, which I will point out as I proceed with a discussion of this measure.

The present shipping bill now under discussion is a far broader and more important bill. In the shipping bill now under debate there are two primary objects. The first primary purpose is the formation of a naval auxiliary reserve, and the second principal object of the bill is to vest in a board created by the bill proper and plenary authority and power to control, regulate, and supervise the American merchant marine in its business relations with shippers and competing lines. This power of regulation, control, and supervision is to be also exercised over the foreign merchant marine when within American ports, the general purposes of these powers being intended for the protection of shippers and competing lines from the various unfair practices now and heretofore characteristic of both American and foreign water carriers, and to incidentally build up and develop American commerce and transportation with such ports and countries as present the most advantageous opportunities.

As is well known, the foreign merchant marine of the United States, since the Civil War, is and has been at all times almost a mere shadow. Reliable statistics show that during the last 12 or 15 years all of our water-carried exports have been carried in foreign vessels, with the exception of about 8 or 9 per cent. Such transportation of our exports to foreign countries has cost, in round numbers, $300,000,000 annually, which, with the exception of 8 or 9 per cent, has been paid to the owners of foreign water carriers. There is no question but what during all of these years every American who has given the subject any thought whatsoever, and especially shippers, have been and are eager and desirous to see the American merchant marine developed so as to be able to carry all of our exports. Various schemes for the upbuilding of the American merchant marine for the transportation of our exports to foreign countries have been considered, debated, and proposed both in and out of Congress.

A few years ago, in the Fifty-ninth Congress, a scheme for the development of our merchant marine by way of a subsidy was nearly enacted into law. In the consideration and vote upon that measure a great majority of the Democrats opposed its passage because of this subsidy feature, and the great majority of the Republicans in Congress favored its passage with a subsidy provision. The proposition of stimulating, promoting, and developing our merchant marine by means of a subsidy has been all of these years, and still is, obnoxious and offensive to the common sense and conscience of a very large majority of the American people. Various other schemes for the development of such a merchant marine have been proposed and considered from time to time, but upon all of the same our legislators have been unable to agree.

The question naturally arises, Why, if, as the fact is, the American people are nearly unanimously in favor of the development and upbuilding of an American merchant marine, ways and means have not been devised and enacted into law for that much-desired and patriotic purpose? The question also arises, Why is it that during all of these years, and even now, that all of our foreign exports carried by water are carried in foreign bottoms excepting 8 or 9 per cent? The explanation seems to be simple and indisputable. It is primarily because the owners of foreign vessels engaged in water transportation of our exports in foreign commerce are able to carry cargoes and passengers at cheaper rates than American-owned vessels operating under the American flag.

Students of this question ask us, "Why are the owners of foreign merchant vessels able to carry freight and passengers at cheaper rates than American-owned ships flying the American flag?" There are two principal answers to this question, each of which has been proven to be true by the experience of those engaged in such transportation. First, it is a fact that it costs more to build an American merchant-marine vessel than it does to build and construct a similar foreign vessel. There is no country in the world in which vessels for the carrying of passengers and freight are built but what can build the same cheaper than like vessels can be built in this country. That has been true ever since the Civil War, and although that difference in cost since the commencement of the present European war has gradually diminished until now it is said there is but a slight difference in the cost of constructing similar vessels in foreign countries and in this country. But the present near equality in the cost of constructing foreign and domestic vessels is admitted by all who are familiar with and who have studied the question to be due to the present extraordinary conditions in the merchant-marine service, created by the present European war.

In normal times it is estimated that the difference in cost of constructing merchant-marine vessels in America and in the country where the next highest price of construction is paid is between 20 and 30 per cent. There are, however, a few shipowners who contend that in normal times this difference in costs of construction amounts to only 10 or 12 per cent.

One naturally asks, "To what is this difference in cost of construction due? Why should the cost of shipbuilding in America be higher than in any other country when it is true that both the wood and steel material which enter into the construction of vessels are to be had, as a rule, cheaper in America than in any foreign country?" In fact, it is stated upon reliable authority that steel for the steel structural parts of a vessel can and is secured for the construction of vessels in America cheaper than in any country in the world.

According to general observation and experience the greater portion of this difference in cost is due to the higher wages paid to American workmen in American shipyards. Granting this to be true, the student of this question naturally asks, "Why do not American shipowners have their ships built and constructed in foreign countries where labor is cheaper?" This is a natural question to ask and it is easily answered. The answer is that we have, and have had ever since the Civil War, a law preventing foreign-built ships from being registered as American vessels, even when owned by American citizens. Such has been the law ever since the Civil War.

A slight exception of this law was made by a law passed by Congress on the 18th of August, 1914, whereby for a period of seven years from the passage of the law foreign-built vessels owned by American citizens and corporations may be registered as American ships to engage in the foreign trade only. This amendment to the law was made within three weeks after the present war commenced, and for the express purpose of increasing the number of vessels which might be employed by American shippers in the transportation of our exports, thereby increasing the amount of tonnage available for that purpose, and to also render such foreign-built vessels so owned and registered immune from attacks by belligerent war vessels.

But why, it may be asked, has there been and is there now a law upon our statutes which prohibits the registering of foreign-built vessels under the American flag when owned by American citizens? The existence of such a law is due to the Republican Party's application of the theory of protection for the workingman. It is estimated that about 64,000 laborers are engaged in domestic shipyards on the ocean and Gulf coasts of the United States. It is doubtful if a majority of that number of workingmen are American citizens. Here we have a forcible illustration of the absurdity to which the doctrine of protection may be and has been carried. For the sake of enabling shipbuilders to pay their workingmen 20 or 30 per cent more wages per day they are actually depriving and preventing those who are anxious to engage in the American merchant marine from saving annually for this country the $300,000,000 which it costs the shippers of this Nation for the water transportation of the exports of this Nation. This is a case of protection run not only mad but insane.

Another important element entering into the difference in cost of transportation of our exports in American bottoms and foreign bottoms is the cost of operation. The cost of operation is largely made up of the wages paid to the crew and officers. Those with actual experience tell us that the difference in wages paid on a vessel operated under the American flag and one operated under the flag of the nation paying the highest wages in Europe is from 40 to 50 per cent. This difference in wages is largely due, of course, to the difference in the living conditions of foreign and American sailors. It seems almost impossible to equalize and overcome this difference. The seamen's law passed by the last Congress contains a provision under which students of the merchant marine predict that there will be an equalizing of the cost of wage operation by virtue of its provisions between foreign and American vessels. The provision referred to is that which requires that at the first port that a vessel may stop after a five or more days' voyage that the sailor shall be entitled to have paid him one-half of his wages then earned. It is the contention of those who contend that this provision will equalize wages, that foreign sailors when their vessel arrives in America, knowing that the wages in American ports are 30 to 40 per cent higher than the wages paid in their home ports, will refuse to return to the ship on which they came, thereby forcing the master or owner to hire a crew, or members of a crew, in their place at American wages, and that this condition will be kept up until the owners of foreign vessels entering our ports will for the purpose of securing a reliable and dependable crew be forced to pay as high wages as those paid to American sailors. I am one of those who believe that there is some force and truth in this contention.

Another reason why foreign-owned vessels are able to carry American exports at cheaper rates than American vessels is due to the fact that foreign owners and investors are content with a less dividend upon their investment than is the American investor or ship owner. The opportunities for American investors to invest in our large industrial enterprises that have been undertaken, promoted, and achieved since the Civil War throughout our country on land has attracted and induced American money investors to place their money in such investments because of the high dividends received. This theory is also supported by the fact that millions upon millions of foreign capital have been invested in industrial securities of this country during all of these years. In order to secure larger dividends or returns foreign capital has been attracted to invest in American securities and enterprises. But much foreign capital, satisfied with lesser dividends, has been attracted to the building, construction, and employment of vessels in the transportation business of their own countries, and they have been content with lesser dividends than their brother investors who sought investments in high dividend-paying enterprises of America. It may be that we will never have a merchant marine until conditions in the United States reach such a condition that the average dividend paid upon industrial investments will be so low that American investors shall find investments in the merchant marine as well or better paying than those located on land.

According to students of the problem of developing the American merchant marine, there are but two ways left that offer any prospect of building up the American merchant marine. One of those methods is by way of a subsidy, and the other is as proposed in this shipping bill.

The proposition of the Government taking the people's money and paying to private parties engaged in American merchant marine in foreign commerce, the differences between the cost of operation, and in cost of American built and manned vessels, and foreign built, owned and operated vessels, is repugnant to the common sense and conscience of the American people. They will never stand for it, excepting as a last resort. Personally, if I were convinced that there were no other means for building up the American merchant marine, I, too, would feel constrained to favor the payment of a subsidy under proper supervision and methods, but I am unwilling to support a subsidy proposition until after the methods proposed in this shipping bill shall have been enacted into law and have in good faith been put into operation and found wanting.

But, say the opponents of this bill, "You are using the people's money to carry out the propositions contained in this bill." While that is true, yet it is an entirely different proposition from taking the people's money from the Government Treasury and handing it over to private parties for their ex-

clusive gain and benefit. Under the scheme proposed in this bill, we will be taking the people's money from the Government Treasury for the sole purpose of investing it in a sincere and determined effort to develop and build up a merchant marine which shall be for the benefit of the public at large. It is the difference between taking public money and paying it to a private party to carry on a private business, and the taking of the people's money and investing it in the American merchant marine owned by and operated for the benefit of all American people, and to fly Old Glory on all ocean waters, the world over.

I am aware that there is throughout this country in the minds of investors a disposition to hold in holy horror all attempts of the Government to enter upon enterprises designed for the welfare of the people because such enterprises may invade the province of private enterprise and investment. The history of our country teaches us that whenever there is any great work of a public nature which private enterprise is unable, unwilling, or apprehensive of entering upon, that investors with capital to invest are the first to denounce and condemn the Government for refusing to undertake, perform, and develop the great public enterprises in which capital is afraid to invest. Years ago, shortly after the war, when the great transcontinental railway lines were being extended to the Pacific coast, capital was fearful of investing, fearing that if it did that it would never receive any return, and it held back with great timidity and apprehension until the public demanded that Uncle Sam should aid those transcontinental railway lines by the donation of millions upon millions of acres of public land that should have been held in trust for posterity.

A great hue and cry has come up that by this bill capital may be deprived from some investments, but for four generations it was the cry that one of the greatest aids to navigation and the common welfare would be the construction of a canal across the Isthmus of Panama. For a century the world waited for private capital to invest in this gigantic enterprise, but it failed. Then came the cry of the common people that the Nation should build the Panama Canal, and the Nation has invested the people's money in the excavation of that canal, and it is now the property of the people. I have no doubt but what there are many thousands of rich investors in this country, and especially those who are desirous of investing in a merchant marine, that now are sorry that they did not combine and have private capital construct the Panama Canal. They now see that monopoly has lost a golden opportunity to fleece not only the American people, but the world at large.

Ever since the purchase of Alaska, in 1867, the people of Alaska and of the United States have been anxiously waiting for capital to build and construct railways in that territory which nature has endowed with the greatest mineral, timber, and commercial wealth of any territory in the world, and yet private capital has feared to venture in, and as soon as it became apparent that Congress intended to make the necessary appropriation for the construction and operation of a railway in Alaska, just so soon private capital, which had been quiet all of these years, commenced a combined howl and saw the spooks of Government ownership. As a general rule, private capital investors are patriotic only when they see the dividends coming into their fingers. They would sooner see the immense possibilities of developing our foreign commerce with South and Central American countries, with Africa and Australia lie undeveloped for generations to come, than to have the Government with the people's money take a hand in developing new lines of water transportation that will afford a market for the surplus of our farms, factories, mines, and hundreds of industrial products, and enable us to bring those needed articles of commerce not produced in this country to our shores at reasonable rates from foreign countries. Nearly always greedy and unpatriotic capital can be depended upon to play dog in the manger when the Government undertakes an enterprise designed for the benefit of the public at large.

GOVERNMENT OWNERSHIP BETTER THAN SERVITUDE.

Even if it could truthfully be charged that this shipping bill provides for Government ownership, it would still be justified in view of the present condition of the world's merchant marine, for those conditions are a justification for even Government ownership of the vessels engaged in our foreign commerce. No better description and illustration of those conditions can be presented than to quote from an editorial published in the Washington Post May 5, 1916, which is as follows:

Secretary McAdoo has returned from South America in good time to press the Government shipping bill. He brings back with him a fund of exact and full information which should be laid before the committees of Congress showing the necessity for immediate legislation for the development of the merchant marine.

While the conference committee is wrestling with Army legislation and the House Committee on Naval Affairs is perfecting the naval bill the Committee on Merchant Marine should push forward the shipping bill in order that Congress may discuss and pass it when the Army and Navy bills are out of the way.

The shipping bill should not be sidetracked for any other legislation. It is in itself a preparedness bill of the highest importance, both for commercial and naval purposes. In time of peace the proposed law would stimulate commerce, rescue it from the grasp of foreign shipping monopolies, and enable the United States to take advantage of the present situation to supplant Great Britain and Germany in South American markets. In time of war the law would enable the United States Navy to utilize fine modern ships for transport, scouting, hospital, supply, and other purposes, and the seamen of the new merchant marine would be available to some extent for warships also.

Last year the shipping bill was defeated, because Congress was not willing to venture so far upon the policy of Government ownership. Since that time the world's shipping has passed almost entirely into the hands of Governments, directly or indirectly. The largest merchant fleet, that of Great Britain, is wholly under control of the British Government. It is being used as a weapon of commercial and naval warfare, both against enemies and neutrals. Great Britain is using its merchant marine to develop trade right in the midst of war. It is using its ships against the commerce of the United States. It dictates ocean freight rates and discriminates in favor of British traders. The same condition prevails with respect to the merchant marine of other nations.

It ought to be clear, without argument, that Americans as individuals can not maintain a merchant marine in competition with foreign Governments. Only the United States Government can cope with the situation that has developed. It can work directly by building and operating vessels and indirectly by facilitating and protecting the operation of private lines. Government ownership is undesirable, but it is the lesser of two evils. It is better than servitude to foreign Governments. As matters stand, Americans are suffering from "Government ownership" of the world's shipping, but it is foreign Government ownership. Since the only means of relief is American Government ownership, the sooner the shipping bill is passed the better.

ELIMINATION OF ALL FEATURES OF GOVERNMENT OWNERSHIP.

Granting, for the sake of argument, that Government ownership of vessels engaged in our foreign commerce is objectionable, yet if there is in this bill any feature of Government ownership it contains in itself the means for the automatic elimination of all elements of Government ownership. With the successful operation of the law contemplated by the passage of this bill, there will be absolutely no danger or need or necessity for the shipping board to resort to the creation of a corporation, or corporations, in which the Government shall hold at least 51 per cent of the stock, for the reason that provision is made in the bill for the sale, charter, and leasing of such vessels to private parties upon terms which will probably be more favorable than those who desire to engage in the merchant marine can obtain from investors of private capital.

Notwithstanding the abnormal condition of foreign shipping which is due at the present time to the European war, yet this is the very time for the country to contribute in some measure to the relief of the present shipping exigencies and to provide for the future. Conditions in shipping are now such that there is every likelihood that any and all vessels which the shipping board may have constructed or may purchase, charter, or lease under the provisions of this bill will be readily disposed of by sale, lease, or charter to private parties, and under the provisions of the bill the proceeds derived from such charters, leases, or sales will be turned back into the shipping fund, to be reinvested in purchasing, leasing, constructing, and chartering other vessels.

For corroboration of this contention, I again assume to take the liberty of inserting another well-written editorial from the Washington Post of May 12, entitled "The need of ships":

Ask the railroads or any of the shippers if they are in favor of the immediate enactment of a bill to provide better shipping facilities, and the answer will be emphatically in the affirmative. Most of the opposition to the pending bill in Congress is political. It is based largely upon the sound theory that the Government should not enter into competition with private business. But the revised bill does not conflict with that theory. The basis on which the bill deals with future conditions is absolutely sound, but the framers of the measure realized that it would take years to build up an adequate merchant marine under any other plan than the one that has been suggested.

Those who oppose the measure on the ground of Government ownership should recognize that the question before Congress is whether there shall be ships for the immediate relief of the congestion at the ports of the United States or whether no action at all shall be taken. John H. Fahey, former president of the United States Chamber of Commerce, after a two months' tour of South America, says there is no reason why the United States should not get all the trade it wants in that quarter, "but," he adds, "we must become active pretty soon. The fundamental thing about the South American situation is, and for a long time in the future will be, ships. This situation is not temporary and does not have anything to do with the disruption of shipping as a consequence of the war, but goes back to shipping conditions before the war, and involves conditions after the war." This is perfectly true with regard to South American trade, but the need for the shipping bill is to be found also in the fact that all of the export trade of the United States is now pouring through a funnel not nearly large enough to accommodate it. There must be more ships if the congestion is to be relieved and if a real merchant marine is to be built upon the present exceptional opportunities.

The United States Chamber of Commerce, as the voice of the business men of the Nation, has gone on record in favor of a shipping board, and this feature is provided in the bill now pending. The measure furnishes immediate relief and is framed in such a way that the Government-owning provision will be eliminated altogether as soon as private investors are able to take over the created facilities.

NATIONS, NOT PRIVATE OWNERS, NOW CONTROL WORLD'S SHIPPING.

As a further answer to the imaginary objections of the opponents of Government ownership, I desire to incorporate in my remarks the following additional editorial from the Washington Post, under date of March 30, 1916, showing that the world's shipping is now under control of the belligerent nations and that plans have been formulated to continue such shipping under the control of those nations at the conclusion of the present war. If foreign Governments are to assume control of their shipping, and that in combination with each other, it is time that the Government of the United States resorted to the same means of protecting itself against a combination of foreign nations in the operation of their merchant marine. I commend this editorial as truthfully expressing the present marine situation with which our people and our Government are confronted, and I believe that its advice is worthy of being followed:

All the nations engaged in war against Germany and her allies have been in conference in Paris, considering not merely the plan of military operations, but economic conditions which are working great hardship upon all nations. Among these is the world-wide rise in freight rates, which is subjecting the fighting nations to enormous expense. Plans are on foot which have not yet been made public whereby the allied nations hope to hold down rates. Presumably the Governments concerned will follow the example of England in assuming control of all shipping under their respective flags and requisitioning such vessels wherever found, whether under charter or not.

This means that the bulk of the shipping of the world will be withdrawn from commerce except such as is related to the war. If certain vessels or lines are left in commercial traffic, they will be controlled by Governments, and their charges to neutrals will be even higher than at present. Neutral nations will be compelled to furnish the shipping facilities necessary to carry on peaceful commerce or abandon this commerce.

It is little wonder that President Wilson urges Congress to pay immediate attention to the shipping bill. No time is to be lost if the United States is to save its foreign trade. No matter how urgent South America or the Orient may be in demanding American goods, the market will be as good as closed if shipping facilities disappear. At the very moment when an opportunity is offered for American trade expansion in peaceful countries the door is about to be closed by the disappearance of shipping. Unless the United States itself provides transportation it need not expect to profit by the temporary abandonment of foreign fields by the nations engrossed in war.

Now that the world's shipping is in the hands of Governments and is being used with powerful effect as a war weapon, there need be no hesitation among Americans in dropping their old objections to "Government ownership and operation" of oceanic transportation facilities. If the United States would hold its own and gain what it is entitled to, private enterprise must be backed by the Government. Individuals can not be expected to compete with nations. They can not make laws to protect the operation of their vessels, as the Government can. Indeed, the laws already in existence prohibit combinations of private corporations of the scale and character that would be required to enable them to dominate foreign-trade fields.

The Government is not only justified in establishing a merchant marine for trade purposes, but is in duty bound to create it as an auxiliary to the Navy. There is a shortage of seamen in the Navy, which must be remedied if the present fleet is to be made effective. In case of war there would be instant need of thousands of additional men. If the entire existing merchant marine of the United States were drawn upon, it would be found that the number of men available for naval service would be very small. More than 60 per cent of the sailors on American vessels are exempt from draft.

Assistant Secretary Roosevelt estimates that 225,000 men would be needed for the Navy in case of war with a formidable enemy. It is not to be expected that Congress will provide for more than a tenth of this number, and it would do well if it should increase the force by 20,000. By providing a merchant marine the country would be building up a force available for war, without being subjected to the expense of maintaining an excessive naval force in time of peace.

In view of the unfriendly and hostile attitude of the Washington Post, at all time to the present administration, these liberal extracts from its editorials, do not warrant anyone in charging that the same are self-serving declarations. Every Member of Congress who has served during the present administration is well aware that the Post has at no time acted as spokesman or sponsor for the administration. In its general editorial policies it has almost uniformly advocated measures in conflict with the policies advocated by the administration. So that when we find it advocating the passage of this bill, we must conclude that it is doing so not out of any friendship for the administration, but out of an honest conviction that the shipping bill is worthy of a place upon our statute books, for the Post could have no other object, in view of its past history toward the administration, in advocating the passage of this bill.

Present conditions so clearly and forcibly demonstrate that a vast increase in American merchant ships is urgently needed that it is not expected that any fair-minded person will complain if the Government under the terms of this bill should place such ships as come under its control and the shipping board may be unable to dispose of by sale, charter, or lease, in operation on water routes between commercial points where there is a reasonable prospect of developing our foreign commerce. Such development of foreign commerce will directly tend to increase our export trade and to build up commerce between this country and countries connected by such routes. Besides, the Government operation of such ships will serve as a check upon the Shipping Trust and will have a marked tendency toward stabilizing freight and passenger rates, and under such circumstances there can be no possible injury resulting to any legitimate shipping enterprises.

USE OF NAVAL AUXILIARY RESERVES IN TIMES OF PEACE.

For the purpose of partially relieving the great scarcity of American commercial merchant marine tonnage and for the purpose of encouraging the development of the American merchant marine engaged in foreign commerce, it is planned by the provisions of this bill to devote such naval auxiliary reserves as the shipping board may procure under this bill by purchase, construction, lease, or charter to commercial purposes in times of peace. In those plans are included the further idea of constructing a type of vessel for the shipping board which will be an improvement both in construction and in equipment over existing types of vessels. In other words, it is proposed to construct a standardized type of vessel according to the most improved and up-to-date ideas of ship architecture, so as to cheapen not only the cost of construction, but the expense of operation.

AN OBJECT LESSON.

No better illustration of what can be accomplished by the passage of this bill can be presented than by quoting from Senate Document No. 391, first session Sixty-fourth Congress, entitled "The Farmer and the Shipping Bill," and prepared by Hon. Carl Vrooman, Assistant Secretary of Agriculture, which is as follows:

The Federal shipbuilding plan of the shipping bill will be in the nature of a demonstration of the financial feasibility of building and operating American merchant ships at a profit. This plan of making "demonstrations" for the benefit of the business world is not a new one to the Agricultural Department. We are daily demonstrating the principles of the new agriculture in every State of the Union, and in a number of counties in each State. In fact, the Agricultural Department is spending millions of dollars every year carrying on practical demonstrations of scientific methods which the farmers and business men of the country seem unwilling to adopt until they have had ocular demonstrations that the new methods are profitable.

When once the Federal Government has demonstrated to the shipping corporations that ships can be built in American shipyards, operated under American charters and the American flag, by American crews, at a profit, these shipping corporations will not be slow to expand our merchant marine to meet the demands of American industry and commerce. But a demonstration of this nature is absolutely necessary at present, as American shipping corporations have taken the position that such a thing can not be done. Nothing is clearer than that they will not attempt to create an American merchant marine until the Federal Government demonstrates to them that even without subsidies it can be done profitably.

A NEW ERA DAWNING.

The change from sail to steam and from wood to iron construction shifted the supremacy in merchantmen from America to England, because England had facilities for building iron steamships cheaply and fueling them with cheaper coal than ours. We are now on the verge of another change—that from the coal-burning steamer to the oil-burning vessel with the Diesel type of engine. If America seizes her opportunity, the shoe will be shifted to the other foot, for America produces over 60 per cent of the world's crude oil. The Diesel engine makes more effective use of fuel than does the steam engine, occupies much smaller space, and requires a much smaller crew. Furthermore, the fuel is carried in the double bottom of the ship, a space only used for water ballast in coal-burning ships, and does not take up any cargo room.

This engine has not been perfected yet for the largest vessels, but is thoroughly practical for the type of merchantman most needed by us now. It has been estimated that though our crews should be largely composed of American citizens and paid the American scale of wages, enough could be saved on the cost of fuel and the economy of space in this new type of vessel to much more than offset the extra cost of American labor and food up to the American standard.

To sum up the whole question, then, is it not clear that an auxiliary merchant marine would be of inestimable value to the farmers of the country, not only because of the wider market it would open to them and the higher prices it would enable them to get for the products, but also because it would help provide them, in common with all other citizens, with protection from possible foreign aggression?

As such a merchant marine can not conceivably be obtained by any ship-subsidy plan, unless a complete and wholly undesirable revolution takes place in the sentiment of the people of the United States, if this primary necessity of our national life is to be provided for in the near future, evidently it must be in accordance with the plan worked out in the administration's shipping bill. In a national crisis of this character partisan considerations should and must be laid aside, and the farmers and business men of the country should rise up as one man to give their unequivocal and energetic support to the President in his efforts to secure for the country this incomparable piece of constructive legislation.

COMMERCE IN WHICH SHIPS PROCURED BY BOARD ARE TO BE USED.

By section 9 it is provided that any vessel purchased, chartered, or leased from the board may be registered or enrolled and licensed as a vessel of the United States and entitled to the benefits and privileges appertaining thereto; provided, that foreign-built vessels heretofore or hereafter admitted to American registry and enrolled and licensed under the act of August 18, 1914, or under this act, and also vessels owned, chartered, or leased by any corporation in which the United States is a stockholder, excepting the Panama Railroad Co., may not en-

gage in the coastwise trade of the United States, except that such vessels may engage in trade with Alaska, Hawaii, or Porto Rico, whether or not en route to or from a foreign port, if the board finds that such trade is not adequately served by a regular line or lines of vessels. All other vessels procured by the board may engage in either coastwise or foreign trade. It will be remembered that by the provisions of the act of August 18, 1914, foreign-built ships owned by American citizens or corporations may be admitted to American registry and fly the American flag for a period of seven years only. Since that date statistics show that foreign-built vessels amounting in tonnage to over 800,000 tons have been admitted to American registry under this act and are now flying the American flag.

Under this bill, if it becomes a law, all such vessels now admitted, or that may be admitted during the life of said act, as well as such vessels as may be procured by the board under this act, except foreign-built vessels, will be entitled to the privilege of engaging in both the coatwise and foreign merchant marine trade of the United States. From this it will appear that if in the course of its administration of this act the board should, in its discretion, purchase, charter, or lease foreign-built vessels, then such foreign-built vessels must be devoted exclusively to the foreign merchant marine trade, except that they may engage in trade with Alaska, Hawaii, or Porto Rico, whether or not en route to or from a foreign port, if the trade of those possessions is not adequately served in the opinion of the board.

SUCH VESSELS MADE NONTRANSFERABLE.

It is further provided in said section 9 that the vessels so purchased, chartered, or leased from the board by private interests shall not, without permission from the board, be operated under any other registry, enrollment, or license than American. They shall also, while employed solely as merchant vessels, be subject to all the laws, penalties, and liabilities of the Government merchant vessels. No such vessel, without the approval of the board, shall be transferred to a foreign registry or fly a foreign flag, or sold, nor, except under regulations prescribed by the board, be chartered or leased.

PROVISIONS RELATING TO SALE, LEASE, OR CHARTER OF SUCH VESSELS BY THE BOARD.

Under the provisions of section 14 the net proceeds of all sales, charters, and leases of vessels and of all sales of stock made by the board and of all other receipts received by it from any source shall be covered into the Treasury to the credit of the board, and are permanently appropriated for the purpose of carrying out the provisions of sections 5 and 11 of the bill, which relate to the purchase, construction, chartering, or leasing of vessels by the board. Thus it will be seen that there is constituted by the provisions of this bill a permanent revolving fund for the continuation of the work of the shipping board in purchasing, constructing, chartering, leasing, and in selling, chartering, and leasing vessels for the merchant-marine trade and for the development of commerce along routes leading to such foreign ports as the board may in their judgment consider likely to furnish a profitable transportation business for its line or lines of vessels and extend and encourage the development of our foreign commerce.

WHEN BOARD MAY FORM CORPORATION FOR OPERATING VESSELS.

By the terms of the bill it is made the duty of the shipping board to use its utmost endeavors to sell, charter, or lease its vessels to private parties instead of forming a corporation or corporations as described in section 11 of the bill, designed for the operation of merchant vessels in the commerce of the United States. In other words, the board is not to form the corporation or corporations mentioned in section 11 for the purchase, construction, equipment, lease, charter, maintenance, or operation of merchant vessels in the commerce of the United States except as a last resort. If from experience and after using their best efforts in that direction the board is unable to sell, charter, or lease its vessels to private parties to engage in the commerce of the United States, then, and not until then, may it organize a corporation or corporations for the operation of such ships in the commerce of the United States. This is the provision so much objected to by our friends who never fail to see ghosts in any enterprise engaged in by the Government on behalf of the public.

By the provisions of section 11 it is provided that in the organization of such corporation, or corporations, that the total capital stock should not exceed $50,000,000, and that in each corporation the United States is to subscribe for not less than a majority of the capital stock, and that the United States shall at no time while a stockholder in such corporation be a minority stockholder. This is for the purpose of enabling the United States at all times to control the action of the corporation.

By a further provision in said section the privilege of so organizing and operating such corporation, or corporations, is to expire at the end of five years from the conclusion of the present European war, a date which shall be declared by the proclamation of the President. Upon the date of such proclamation the property of such corporations shall revert to the board, and the board may then charter, lease, or sell such vessels as hereinbefore described, and shall dispose of the property, other than vessels, on the best available terms, and after payment of all debts and obligations deposit the proceeds thereof into the Treasury to its credit.

In my humble judgment this five years' limitation within which and during which the shipping board may form and operate such corporations in the commerce of the United States is the only objectionable feature of the bill. It is not only objectionable, but obnoxious. In the committee I vigorously opposed the insertion of this provision. Its insertion is intended as a sop for those who fear the ghosts of Government ownership and operation.

The presence of this limitation may be a wise provision for the purpose of silencing the objections of those who see spooks every time the Government undertakes a public service on behalf of the people. Its presence in the law will be harmful in its effects. It will have a strong tendency to discourage shippers in Central America and South American countries, and in other distant countries from giving their patronage to the vessels operated by such corporation. Foreign competitors of the line or lines of vessels thus operated by such corporations will, for the purpose of advancing their own interests and limiting the amount of shipping that otherwise may be secured by such vessels, readily, from the beginning, make known to shippers in foreign countries who are desirous of developing and establishing a permanent line of business with this country the fact that it will be useless for them to attempt to build up and establish their foreign business by any such line of shipping for the reason that by the very law under which such American shipping corporations exist they must terminate in five years. Such foreign patrons as we might otherwise secure, if the impression was not made upon them that the line of transportation operated by such corporations is to continue for only five years and not permanently, will also be discouraged from patronizing the same, because they will say to themselves, it is unsafe and imprudent for us to attempt to build up a permanent strong line of trade by using such boats for transportation because we will be in danger of losing our trade established through them at the end of five years, when such vessels may go out of business. It was unnecessary to incorporate this five years' limitation in the bill. With it in, or with it out, Congress has the power at any session to repeal or to extend this limitation. Congress can be depended upon, if the purposes for which these corporations are organized can not be attained, to repeal that provision at the first opportunity, or to extend the same when once the success of the enterprise has been demonstrated.

WISDOM OF RETAINING THE WORDS "OR ELSEWHERE."

It will be noticed from the provisions of section 5 that the vessels which the shipping board is authorized to construct may be built in American ship and navy yards "or elsewhere." Strenuous objection was made by several witnesses representing the various chambers of commerce to the presence in this section of the words "or elsewhere." Upon final action by the Committee on Merchant Marine upon this bill, motion was made to strike the same out, which was defeated by a majority of the committee. Of course, the words "or elsewhere" mean that, in the discretion of the shipping board, the vessels which it is authorized to have constructed, or any part of them, may be constructed in foreign shipyards.

In common with all genuine Americans, I would regret to see the board obliged to cause any of such vessels to be constructed in foreign shipyards. I have faith, however, in the patriotism and Americanism of the gentlemen who may be appointed members of the shipping board to believe that no vessels will be ordered constructed in foreign shipyards by the board unless there may be imperative reasons for so doing.

If the bill becomes a law, of course the majority of the first board will be Democrats. I am sure that there is no Republican, no matter however partisan he may be, who honestly believes that any Democratic member who may be appointed to that board will be unpatriotic or un-American. There will always be sufficient patriotism and Americanism among the members of the shipping board to authorize the construction of all such ships in American ship and navy yards, unless there is the strongest reason for causing them to be constructed elsewhere.

The presence of the words "or elsewhere" in section 5 are of the greatest importance and wisdom. Their presence constitutes a protection of the board and the American people from the exorbitant and unjustified prices for construction of such vessels by any combination, syndicate, or conspiracy of American shipbuilders. With this authority vested in the board, American shipbuilders will be warned in advance that the board is able to protect itself against grafting and exorbitant prices. It will thus have a tendency to make the rates or prices at which the board can secure the construction of such vessels fair and moderate and assure their construction in American ship and navy yards. In the event that the bids offered by American ship constructors are unfair and exorbitant, it will justify and warrant the shipping board, in the eyes of the American public, in authorizing the construction of such vessels in foreign shipyards. The construction of a few of such vessels in foreign shipyards will impress that lesson upon American shipbuilders, and the result thereafter will be to assure the construction of such ships in American shipyards at fair and just prices. Without the words "or elsewhere" there would be a strong temptation for American shipbuilders to form combinations, agreements, and conspiracies to extort exorbitant prices for the construction of the vessels authorized by the board, thus hindering, delaying, and perhaps preventing the increasing of the American merchant marine through the efforts of the board. Without the words "or elsewhere," in my humble opinion, the efforts of the shipping board to develop the American merchant marine would be doomed in advance.

NAVAL AUXILIARY RESERVES.

One of the primary objects of the bill is to establish a naval auxiliary reserve. For that purpose the shipping board to be created by this bill is authorized and empowered, with the approval of the President, to have constructed in American ship and navy yards, or elsewhere, giving preference, other things being equal, to domestic yards, or to purchase, lease, or charter vessels suitable—as far as the commercial requirements of the marine trade of the United States may permit—for use as naval auxiliaries or Army transports, or for other naval or military purposes.

It is shown by the testimony of Secretaries McAdoo, Redfield, and other experienced officers of the Navy and Commerce Departments that our Navy is even now, at its present size, sadly lacking in Navy auxiliaries. Secretary McAdoo estimates that about 600,000 tons of naval auxiliaries will be required to properly supply our present Navy with auxiliaries. As is well known, the purpose of such naval auxiliaries is in times of war to keep the great battleships and other fighting ships of the Navy furnished with the necessary supplies of fuel, ammunition, food, and all temporary equipment for the efficient use of such battleships and war vessels. With those who are more or less familiar with the great size and movement of large naval vessels it is well known that in order to maintain such vessels in a proper fighting condition it is absolutely necessary that they must promptly and efficiently be supplied with the necessaries for their operation. A battleship at sea on the watch for the enemy fleet and in readiness for battle can not be expected to make the necessary trips to port to secure its supplies. Neither will it do to have such a ship overloaded and cramped with supplies necessary for the maintenance of its crew and the operation of its guns. A battleship fleet without sufficient and efficient naval auxiliaries is like an army without equipment, clothing, food, or ammunition. Without the assistance of such auxiliaries, the best battleships will in a short course of time be at the mercy of the enemy's battle-fleet ships.

A navy without scout ships, aeroplanes, and necessary auxiliaries would be a navy without eyes. A navy without colliers and other supply ships would be a navy without supplies. A navy without submarines and adequate means of defense against submarines would be a joke. In other words, if we are to have a real Navy to defend our coast and trade routes, we must have a Navy that is complete in every respect and that will add to its fighting abilities. Without auxiliaries a navy at sea would soon become a helpless aggregation of floating batteries.

Testimony is abundant and reliable that during the Spanish War the Nation squandered millions of dollars purchasing unfit and unsuitable vessels for auxiliaries in a hasty and hysterical effort to supply our deficiencies in that direction. Enormous prices, several times more than they were worth, were paid for many such vessels, and after the war the great number of them were sold at such a sacrifice that one might truthfully say that "they were sold for a song." Because our Navy was then deficient in auxiliary vessels we squandered immense sums of the people's money in our necessary haste to procure some kind of auxiliary ships to supply our battleships. It is fortunate that we were not contending in that war with a first-class naval power, instead of a nation whose navy was less powerful on the sea than our own. In that case the weakness of our auxiliaries might easily have resulted in disaster and defeat for us. With the lessons of the European war firmly implanted upon our minds, it would be criminal and suicidal for us to continue in the future as we have in the past, without a highly efficient auxiliary merchant marine for our Navy.

LISTING OF GOVERNMENT OWNED, LEASED, OR CHARTERED VESSELS.

Provision is made in section 12 of the bill for the listing by the Secretary of the Navy of any vessel purchased, leased, or chartered from the shipping board as a vessel for the United States naval auxiliary reserve. The officers and members of the crew of any such listed vessel who volunteer for the purpose, and are citizens of the United States or its insular possessions, may, under regulations prescribed by the Secretary of the Navy, be enrolled in various ranks and ratings corresponding to those in the United States Navy, not above the rank of lieutenant commander, as members of any naval reserve force established or to be established by law, and the naval appropriation bill for the ensuing fiscal year, and from year to year thereafter, is expected to contain the necessary appropriation, rules, and regulations for a monthly payment to such volunteers of the naval reserve in times of peace and for their incorporation as a part of the naval forces, with the pay of regular sailors of the Navy, in time of war.

It is estimated by Secretary McAdoo, Capt. Bertholf, Admiral Benson, Secretaries Redfield and Wilson, and other competent witnesses that the appropriation of $50,000,000, to be made as authorized by the provisions of this bill, will provide naval auxiliary vessels with a tonnage of between four and five hundred thousand tons. This will be a much needed and necessary increase in the naval auxiliaries neeessary for the proper support of our battle fleet. It will amount to a supply of about four-fifths of the needed naval auxiliary for our Navy at its present size. Undoubtedly from year to year Congress will make the necessary provisions for additional naval auxiliaries, so that after a period of a few years our Navy will at all times have a complete supply of naval auxiliaries and be ready at a moment's notice to be placed upon a war footing.

By other provisions of the bill it is intended that the board may sell, charter, or lease any and all vessels which it may purchase, construct, lease, or charter to private individuals or corporations. Provision is made, however, in section 9, that no such vessel without the approval of the board shall be transferred to a foreign registry or flag, nor, excepting under regulations prescribed by the board, be chartered or leased. Further provision is made that when the United States is at war or during national emergencies no vessel enrolled, registered, or licensed under the laws of the United States shall, without the approval of the board, be sold, leased, or chartered to any person not a citizen of the United States or transferred to any foreign registry or flag. This provision applies not only to such vessels as shall become the property of the board by reason of the provisions of the bill, but it includes all vessels which shall be under United States registry and carrying the American flag at the time this bill becomes a law.

METHODS OF TAKING POSSESSION OF SHIPS PROCURED BY THE BOARD AFTER BEING SOLD, LEASED, OR CHARTERED BY IT.

Section 10 of the bill provides that the President, upon giving the person interested such reasonable notice in writing as in his judgment permits may take absolutely or temporarily for any naval purposes possession of any vessel purchased, leased, or chartered from the board, and in emergencies possession may be taken of such vessels without notice. To determine the value of the vessels so taken it is further provided that the United States shall pay the person interested in such vessels the fair and actual value at the time of the taking of the interest of such person in every vessel taken, or if taken for a limited period the fair charter value of such vesssel.

In case of disagreement the value shall be determined by appraisers, one of such appraisers to be appointed by the Government, one by the person interested in the vessel, and the third by the two so appointed. The finding of the majority of such appraisers shall be final and binding upon the parties. It will thus be seen that fair, ample, and impartial provision for the determining of the fair value of such vessels taken by the United States, and also for ascertaining the real value of any vessel that may be used temporarily in the service of the Government, is made.

Provision is further made in section 6 of the bill for the transfer by the President to such board of all such vessels

as are suitable for marine or naval purposes and not required for naval purposes in time of peace, and also for the transfer to the board of vessels owned by the Panama Railway Co. and not required in its business.

CERTAIN UNFAIR PRACTICES BY CARRIERS BY WATER PROHIBITED BY THE BILL.

Section 15 of the bill contains express provisions directly forbidding and prohibiting certain unfair practices by common carriers by water. The more prominent of these practices so prohibited are first, the paying or allowing by any water common carrier of a deferred rebate to any shipper. The term deferred rebate is expressly defined in section 15 of the bill as meaning a return of any portion of the freight money by a carrier to any shipper as a consideration for the giving of all, or any portion of his shipments to the same or any other carrier, or for any other purpose, the payment of which is deferred beyond the period for which computed and is made only if, during both the period for which computed and the period of deferment, the shipper has complied with the terms of the rebate agreement or arrangement.

The use of a fighting ship, either separately or in conjunction with any other carrier or otherwise, by common carriers, is prohibited by the same section. The term "fighting ship" is defined as meaning a vessel used in a particular trade by a carrier, or group of carriers, for the purpose of excluding, preventing, or reducing competition by driving another carrier out of said trade.

Such common carriers by water are also prohibited by said section 15 from retaliating against any shipper by refusing, or threatening to refuse, space accommodations when such are available, or resort to other discriminating or unfair methods because such shipper has patronized any other carrier, or has filed a complaint charging unfair treatment, or for any other reason.

Another provision in said section provides against such common carriers making any unfair or unjustly discriminatory contracts with any shipper based on the volume of freight offered, or unfairly treat, or unjustly discriminate against any shipper in the matter of cargo-space accommodations, or other facilities, due regard being had for the proper loading of the vessel and the available tonnage, the loading and landing of freight in proper condition, and the adjustment and settlement of claims. All violations of these express provisions are made a misdemeanor and are punishable by a heavy fine for each offense.

SHIP-TRUST INVESTIGATION.

Your Committee on Merchant Marine during the Sixty-second Congress was authorized by Congress to conduct an investigation of the so-called Shipping Trust. This investigation covered all the shipping lines engaged directly in the foreign and interstate commerce of the United States. Hundreds of witnesses were examined by the committee. In this important work the committee had the able assistance of Prof. Huebner, professor of transportation of the University of Pennsylvania, under whose careful guidance and advice a most complete investigation was made by your committee into the practices and business methods of the various lines engaged in transportation of American commerce. During this investigation hundreds of witnesses consumed one entire session. The result is preserved in three large volumes of testimony.

This investigation disclosed the unfair practices resorted to by water carriers for the purpose of destroying competition, and of discriminating and retaliating against persons and places who would not tamely submit to their dictation. It was found that, almost without exception, all of the merchant marine engaged in our foreign commerce resorted to the unfair practices known as deferred rebates, fighting ships, retaliation, and the making of unjust and discriminatory contracts relative to space accommodations, and with respect to loading and handling of freight in proper condition, and also with respect to the adjustment and settlement of claims. These practices were bitterly complained of by shippers and business men for year , but there was no law to be found upon the statute books providing punishment for such offenses or relief from such practices. Numerous other unfair practices in the business of transportation by water common carriers were found.

Your committee at the conclusion of such hearings and after consideration and due deliberation made its report to Congress upon the subject with many valuable recommendations. Among the recommendations made in such report to Congress were that laws should be passed prohibiting the grossest and most vicious of such unfair practices, and also recommending that laws be passed extending the jurisdiction of the Interstate Commerce Commission to regulate and control the rates for transportation by water carrier along the same lines and for the same purposes that jurisdiction has for many years been conferred upon such commission in the regulation, control, and supervision of railway rates.

In the Sixty-third Congress Hon. JOSHUA ALEXANDER, chairman of your Committee on Merchant Marine, prepared and introduced a bill to carry into effect the recommendations previously made as a result of the investigation of the Shipping Trust. This bill having been introduced rather late in said session was not given any consideration by said committee. It was reintroduced by Judge ALEXANDER in the present session, as was also H. R. 10500, for the purpose of creating a shipping board. After careful consideration it was found to be the judgment of the Committee on Merchant Marine that the best public service would be accomplished by consolidating the two bills. After some revision and elimination of both bills, such bills were combined and consolidated and reintroduced. After further deliberation and perfection of the consolidated bill the same was reintroduced as H. R. 15455, and after extensive hearings and deliberate consideration was reported favorably for passage as it now appears before the House.

The said shipping investigation disclosed conclusively that it was absolutely necessary that there should be a body of laws enacted relating to the regulation and control of the merchant marine and that a board should be created and empowered with authority to enforce laws that might be passed relating to the same, and to also investigate, regulate, and control both the domestic and foreign merchant marine service.

It was found by your committee that many of the unfair practices had become so firmly established and contained in many instances elements of usefulness that, with the exception of some of the more prominent ill practices, it was considered that a system of regulation and control of water transportation would be for the best interest of both the public and those interested in water transportation. It was found quite impracticable to cover water transportation into the jurisdiction of the Interstate Commerce Commission. Consequently the conclusion was forced upon the committee that the advisable thing to do was to create a new board or commission, to be known as the shipping board.

It may be said in all truthfulness, as pointed out in said recommendations of the committee, that it was "the consensus of opinion, as expressed in the testimony of witnesses and in the numerous communications received by the committee from shippers, that they were overwhelmingly in favor of some form of Government regulation of steamship carriers engaged in this country's foreign trade. Nearly all the steamship line representatives who appeared before the committee expressed themselves as not opposed to Government supervision which is reasonable and which is limited to requirements of full publicity and approval of all agreements or arrangements which steamship lines may have entered into with other steamship lines, with shippers, or with other carriers and transportation agencies." On the other hand, the shippers who appeared as witnesses or otherwise submitted recommendations for proposed legislation were, in the great majority of instances, favorable to a comprehensive system of Government supervision sufficiently broad to embrace the regulation of rates without actually fixing them, the approval of contracts, agreements, and the general supervision of all conditions of water transportation which vitally affect the interests of shippers.

SHIPPING BOARD WITH POWER OF REGULATION AND CONTROL APPROVED BY ALL.

The testimony of 47 witnesses, prominent in their respective lines of occupation and representing all the diversed interests interested in merchant marine, appeared before your Committee on Merchant Marine, some being for and some against the entire bill. With scarcely an exception, both friends and foes of the measure, as an entirety, approved of the plan to create a shipping board and to invest it with power of regulation and control for the purpose of preventing unfair practices in competition with other lines, and discriminating against shippers. There was, however, on the part of those hostile to the bill, a disposition to clothe the shipping board with rather weak, feeble, and inefficient power of regulation and control, but otherwise, that feature providing for a shipping board and to invest it with power of regulation and control and to prevent discrimination was approved by nearly all of the witnesses appearing before the committee on this measure.

Many of the provisions contained in the bill are quite similar to those contained in the law under which the Interstate Commerce Commission operates so efficiently and satisfactorily in the disposition of railroad questions. It is given full power to make investigations upon complaint and to make orders for-

bidding any unfair practices that it may, after full hearing, determine to be such. In fact, it is invested with full and complete power and authority to prevent abuses and discriminations, and to enforce regulations made by it for the proper protection of the interest of shippers, boat owners, and all concerned. As in the case of railways, water carriers are required to establish, observe, and enforce just and reasonable rates, charges, classifications, tariffs, and regulations and practices relating thereto, and to the issuance, form, and substance of tickets, receipts, and bills of lading; the manner and method of presenting, marking, packing, and delivering property for transportation; the carrying of personal, sample, and excess baggage; the facilities for transportation; and all other matters relating to or connected with the receiving, handling, transporting, storing, or delivering of property.

They must keep with the board and keep open to public inspection, in the form and manner as the board may prescribe, the maximum rates, fares, and charges for transportation between points on its own route. They are forbidden to charge, demand, or collect greater compensation for such transportation than the rates, fares, and charges filed in compliance with the law, except with the approval of the board and after 10 days' public notice in the form and manner prescribed by the board.

The board may upon such notice if it finds that any rate, fare, charge, classification, tariff, regulation, or practice demanded, charged, collected, or observed by such carrier is unjust or unreasonable it may determine, prescribe, and order enforced a just and reasonable maximum rate, fare, or charge, or a just and reasonable classification, tariff, regulation, or practice. Unlike the law governing the Interstate Commerce Commission, the shipping board has no power or authority to prescribe the different rates, fares, or charges. It is limited in its power of fixing fares and charges to fixing a reasonable and just maximum.

PREVENT ABUSES.

In section 20 is a provision whereby whenever a common carrier by water in interstate commerce reduces its rates on the carriage of any species of freight to or from competitive points below a fair and remunerative basis with the intent of driving out or otherwise injuring a competitive carrier by water it shall not increase such rates unless after hearing the board finds that such proposed increase rests upon changed conditions other than the elimination of the suppressed competition.

The bill also contains ample provision for making necessary and required investigation and for the enforcement of the board's orders, such provisions being closely related to the legal provisions with which the Interstate Commerce Commission has been clothed with authority for many years.

Penalties for the violations of the provisions of the act and of the orders of the board are provided in many cases specifically and with a general penalty applying to violations of all orders for which a specific penalty is not provided.

NOT TO CONFLICT WITH INTERSTATE COMMERCE COMMISSION.

Section 33 provides that the provisions of the bill shall not be construed to affect the power or jurisdiction of the Interstate Commerce Commission nor to confer upon the board concurrent power or jurisdiction over any matter within the power or jurisdiction of such commission, and that the bill shall not be construed to apply to intrastate commerce.

INVESTIGATION OF CONDITIONS IN COST OF CONSTRUCTION AND OPERATION.

Provision is contained in section 13 directing the board to investigate the relative cost of building merchant vessels in the United States and in foreign maritime countries and the relative cost, advantages, and disadvantages of operating in the foreign trade vessels under United States registry and under foreign registry. It shall examine the navigation laws of the United States and the rules and regulations thereunder and make such recommendations to Congress as it deems proper for the amendment, improvement, and revision of such laws and for the development of the American merchant marine. It shall also, on or before the 1st of December in each year, make a report to Congress, which shall include its recommendations, the result of its investigations, and a summary of its transactions, and a statement of all expenditures and receipts and of the operation of any corporation in which the United States is a stockholder, and the names and compensation of all persons employed by the board.

INDORSEMENTS.

Representatives of the national grange, farmers' unions, and various important shippers' associations appeared before the committee and approved the legislation proposed by this bill. The Federation of Labor and Seamen's Union have, by resolution in national convention, approved the same, as have prominent representatives of various business associations throughout the country. Even many representatives of steamboat lines have given it their approval, with the exception of those features of the same which they imagine, or fear, may amount to Government ownership or operation. It also has the approval of Secretaries McAdoo, Redfield, and Wilson; Admiral Benson; Capt. Berthoif; Hon. E. T. Chamberlain, Commissioner of Navigation; Hon. J. N. Gillett, ex-governor of California; Capt. William A. Wescott, president of Master Mates and Pilots' Association of the Pacific; Capt. W. S. A. Smith, of the Department of Agriculture; Western Starr, a prominent farmer of Westover, Md.; and of various other gentlemen prominent in the industrial and commercial life of the Nation.

This bill should be speedily enacted into law, as it will create a shipping board charged with the duty of supervising and fostering our merchant marine. It will provide from 500,000 to 700,000 tons of merchant vessels to serve in the development of our foreign trade; in the event of war, a naval auxiliary manned by a naval auxiliary force. It provides for the reasonable regulation of common carriers by water in foreign and interstate commerce. It has been framed with the view of encouraging, not to discourage, private enterprise in construction and operation of vessels under the American flag. While shipyards are now busy in new construction, we have good reason to believe their facilities will be increased and a new record set in speed and skill in shipbuilding in American shipyards.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield 10 minutes to the gentleman from Washington [Mr. HADLEY].

Mr. HADLEY. Mr. Chairman, we are all alike solicitous for the development and expansion of our mercantile marine, but notwithstanding the purpose expressed in the title of the pending bill under existing conditions, if enacted into law, it can add nothing to the total of our tonnage.

Our domestic shipyards are already worked to the limit of their capacity. New yards are in course of equipment. Private capital is seeking investment in vessel properties beyond all precedent. If the Government seeks to buy ships, where will it find them for sale? The minority report contains the statement based upon the showing at the hearings that "Great Britain, France, Germany, Austria-Hungary, Sweden, Norway, Brazil, and other maritime nations have prohibited the transfer of any of their tonnage now afloat to a foreign flag." But if perchance any ships are for sale the diligence of the private investor, in the present state of marine activity, will seek and find them. If the Government should compete it would only be to further stimulate existing fabulous prices and to render them altogether prohibitive. The bill confers authority on the Government agency it would create to purchase vessels and then to sell or lease them. What advantage is to be gained by the Government acting as a mere intermediary or middleman? It is proposed to put it in the ship-brokerage business. It can not buy or lease on a more favorable basis than the private citizen. Why should the latter not deal in the market for himself? There can be but one consideration to induce such a transaction between a citizen and the board, and that must move toward the citizen. In other words, the board must bargain at a loss, if it bargains at all. Let the Government build vessels and the result will be the same. It is stated that it costs approximately $2,000,000 more to build a modern dreadnaught in a Government yard than in a private yard. It is manifest that in the event of construction by the Government the private investor will not take vessels over when he can buy others for less money, except on equal terms, and that would mean Government loss. The logical end of the contemplated transactions, whether they be by way of purchase, lease, or construction is necessarily a resort to the provisions of the eleventh section of the bill, the organization of holding companies and the operation of the vessels.

Irrespective of the merits of that course as a matter of governmental policy, it should be considered here in the light of probable results. The end sought is an increase of tonnage. The great weight of opinion expressed at the hearings by those best informed on the subject was unqualifiedly to the effect that the provision for Government ownership and operation of vessels would cause a greater loss of tonnage from private sources than the gain to be realized. If this was not true, the little that will be created in the event of Government construction can in no event be delivered in less than from two to two and a half years. Supplementing the 360 ships now building in American yards, the great activity of private capital, if it is not intimidated by the enactment of this bill in its present form, will meet the emergency in the meantime. If, on the contrary, the plans proposed in this bill are put into execution no one can say how much of the tonnage now under construction will fail to come under American registry and how much will seek registry

and trade beyond the jurisdiction of Government competition or Government restrictions. Government ownership and operation of an entire merchant marine is a very different thing from the ownership and operation of a small percentage only in competition with that privately owned. The latter is the case presented here.

No showing has been made to demonstrate wherein the investment contemplated will give better or earlier results than the investment of private capital will yield. We are not informed where lines will be established, what ports are to be directly favored, nor what existing lines, if any, are to be subjected to competition. If new fields of operation are to be opened, it does not appear upon what theory we are to anticipate profitable operation where the ingenuity of private enterprise has declined to venture. All we know is that we are asked to join blindly in staking $50,000,000 of public money upon an enterprise which no other great maritime nation has voluntarily undertaken, surrounded by the conditions, and facing the probabilities stated. In the domain of private enterprise such a course would meet with universal condemnation. It has no claim to support at our hands except such as business expediency may justify.

The bill contemplates the construction and equipment of the vessels in question in the cheapest market. By its express terms preference is to be given to domestic yards only in the event of "other things being equal." The advantage of spending the money at home, and the endless chain of circulation as a result, in the benefits of which our people would participate, is wholly disregarded. We would, indeed, present a remarkable spectacle before the world if we should provide for the Government to take $50,000,000 of the money of the American people and expend it in foreign lands for what they themselves produce, and at the expense of their own labor. I stand for the building of American ships in American yards of American materials and with American labor. [Applause.] I am opposed to expending public funds for that purpose beyond the jurisdiction of the United States.

The creation of a shipping board may well form the corner stone of a new constructive policy. Such a board may be an instrument of development or an instrument of obstruction. These alternatives turn mainly upon its functions and powers. These should be evolved largely from the practical observations of practical men comprising the board and be determined by Congress in the light of their experience and recommendations. The force of this principle is recognized in one section of the bill, but it is ignored in many others. Among the provisions of that section are the following:

SEC. 13. That the board shall investigate the relative cost of building merchant vessels in the United States and in foreign maritime countries, and the relative cost, advantages, and disadvantages of operating in the foreign trade vessels under United States registry and under foreign registry. It shall examine the navigation laws of the United States and the rules and regulations thereunder, and make such recommendations to the Congress as it deems proper for the amendment, improvement, and revision of such laws and for the development of the American merchant marine. It shall investigate the legal status of mortgage loans on vessel property, with a view to means of improving the security of such loans and of encouraging investment in American shipping.

An annual report to Congress is made mandatory upon the board, including its recommendations and the result of its investigations. Here would be a real provision on which to found the rehabilitation of the merchant marine, if the proponents of the bill had been content to abide the consummation of that policy, coupled with an investiture of general supervisory powers in the board, in the meantime, to prevent unfair or unjust practices on the part of common carriers by water. The virtue of these provisions has been minimized, if not rendered largely nugatory, by the minute regulatory powers of the board applied to both foreign and interstate commerce.

A single illustration will indicate the nature of one of many difficulties to arise in practice under the theory and terms of the bill. The Canadian Pacific Railway meets Oriental lines on the Pacific seaboard at Vancouver, British Columbia. Foreign cargoes by way of those lines en route for this country by way of Vancouver touch no American seaport; and such carriers, therefore, would be wholly without and beyond the jurisdiction of the proposed shipping board. Their cargoes make their initial appearance in American territory through ports of entry along the international boundary line. American lines touching at the ports of Puget Sound would be subject to the regulatory powers of the board, but such would not be true in the case of foreign lines out of Vancouver carrying the products of British Columbia to foreign ports. Lines out of North Pacific ports in adjacent American territory are to be so regulated that—quoting the language of the bill—

SEC. 18. That no common carrier by water in foreign commerce shall demand, charge, or collect any rate, fare, or charge which is unjustly discriminatory between shippers or ports or unjustly prejudicial to exporters of the United States as compared with their foreign competitors. Whenever the board finds that any such rate, fare, or charge is demanded, charged, or collected it may alter the same to the extent necessary to correct such unjust discrimination or prejudice and make an order that the carrier shall discontinue demanding, charging, or collecting any such unjustly discriminatory or prejudicial rate, fare, or charge.

We are looking for relief on the Pacific coast from other competitive conditions which have been involuntarily imposed as the result of prior legislation, but while we look and wait in vain this new menace rises in view.

It is stated that nine-tenths of the tramp tonnage of the world coming into our ports does not operate here as a common carrier. It is conceded that this would not be subject to the provisions of the bill. Tramp steamers carry two-thirds of the world's commerce.

I repeat this pertinent inquiry of a witness at the hearings: "Now, how are you going to regulate the rates on one-third of the tonnage of the world, which makes its rates at the dock, with the shipper who brings his goods there, when the rates for two-thirds of the tonnage of the world are made in foreign ports?" [Applause on the Republican side.]

After months of earnest consideration of the provisions of this bill I am thoroughly satisfied that if given effect they will tend to undermine our present growing merchant marine. I am greatly disappointed that a bill was not reported which would insure its permanent development. In its present form the one now pending would destroy what we would conserve, and therefore should meet prompt and signal defeat.

Mr. ALEXANDER. Mr. Chairman, I yield 25 minutes to the gentleman from Texas [Mr. HARDY].

[Mr. HARDY addressed the committee. See Appendix.]

The CHAIRMAN (Mr. GRAY of Alabama). The time of the gentleman from Texas has expired.

Mr. HARDY. I ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. BYRNES of South Carolina. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. GREENE of Massachusetts. Mr. Chairman, how does the time stand?

The CHAIRMAN. The gentleman from Massachusetts has 81 minutes.

Mr. GREENE of Massachusetts. How does the other side stand?

The CHAIRMAN. Sixty-three minutes remain on the other side.

Mr. GREENE of Massachusetts. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. EDMONDS] 15 minutes.

Mr. EDMONDS. Mr. Chairman, I feel it my duty before entering upon a discussion of this measure to comment upon the thorough investigation and careful consideration given to it by the committee, and also to express my appreciation of the courtesy of our chairman, the gentleman from Missouri [Mr. ALEXANDER].

We have, however, arrived at a point where differences of opinion as to the bill have arisen, and it has been found necessary for the minority to file a report calling the attention of the House to those differences, with the hope that by their decision the bill may be so amended that there will be passed a law that will aid in building up a merchant-marine service which will return our country to the proud position in the sea-carrying trade it held early in the nineteenth century.
